Solutions

Phase #	Phase Description	Release Date	Status
---------	-------------------	--------------	--------

USCIS Verification Division Initiatives - Maestro Confluence

Phase 1	Build a capability within SAVE to allow states to relieve citizenship status for voter applicants in a bulk manner. Also, change the cost structure for voter verification within SAVE so that it is a free service for non-federal agencies (retroactive to April 1, 2025).	01 May 2025	COMPLETED
Phase 2	Integrate with the Social Security Administration (SSA) to allow for full Social Security Number (SSN) to be used as a non-DHS enumerator in order to ascertain U.S. citizenship for U.S.-born and derived citizens and to gather a DHS enumerator for those with an immigration journey so that it then can be run back through SAVE. This integration with SSA's Numerical Identification System (Numident) will also enable SAVE to determine if an applicant is found in SSA death records (and is therefore deemed deceased). Additionally, the bulk uploader feature will be made available to all SAVE users via web browser/graphical user interface (GUI) - not just for voter verification purposes - and all of SAVE will be a free service for non-federal agencies.	Soft Release (available to the public but not announced with Comms), (testing to continue): 16 May 2025	COMPLETED
		Full Release (with Comms): 22 May 2025	COMPLETED
Phase 2.1	Fast Follow after Full Release of Phase 2: 1. Add multi-benefit selection option on bulk upload page in place of current radio button. 2. Integrate Alien Registration Number (ARN) and SSN from SSA with SVS, also ensuring that ARNs with an SSN are visible in SVS for Status Verifiers (this would aid in removing duplicates). 3. Add SSN to reporting database (this will enable statistics to be run and reported on for SAVE responses with SSA integration). 4. Create new SAVE responses and narratives for when only SSN supplied at initial. 5. <div></div> 6. Add ability to the bulk upload feature to view history of files bulk-uploaded (aka as "File History Dashboard"). 7. Make Field Level Validation Errors enhancements. The upload confirmation screen will now offer downloadable errors for the user agency to be able to triage and correct errors before processing. 8. <div></div> 9. Add bulk-uploaded indicator to cases. 10. Add ability for users to bulk escalate cases that were bulk uploaded and received an IAV response. For specific steps on this, see the Bulk Escalation page. 11. Add ability to provide a File History Dashboard output file.	1. Multi-Benefit Selection Option Release: 06 Jun 2025 2. ARN and SSN to SVS Release: 06 Jun 2025 3. SSN to Reporting Database Release: 17 Jun 2025 4. New SAVE Responses Release: 06 Jun 2025 5. <div></div> <div>ON HOLD</div> 6. File History Dashboard Release: 11 Jul 2025 7. Error Download Release: 11 Jul 2025 8. <div></div> 9. Bulk-Uploaded Indicator Release: 17 Jun 2025 10. IAV Bulk Escalation: 11 Jul 2025 11. File History Dashboard Enhancements Release: 08 Jul 2025	COMPLETED
