Message Testing — ICE is out of control and has a pattern of endangering our communities. Federal agents have arrested U.S. citizens, dragged children from their beds in the middle of the night, smashed car windows, and driven away with a U.S. citizen's toddler. Wednesday's shooting in Minneapolis should be a clarion call to our members of Congress to immediately rein in ICE's abuses and demand that the agency cease operations in Minneapolis.

Now, you have been randomly assigned to read statements some public officials have said about the shooting of Renee Nicole Good in Minnesota. How convincing would you say each of the following statements is to support limiting the power of immigration enforcement agencies?

	Total	Age					Gender		Education		Race

Message Testing — ICE has taken increasingly aggressive tactics against people who are immigrants and those exercising their First Amendment rights. There have reportedly been at least 16 shootings by federal immigration agents in the last year, with at least four deaths. Congress must rein ICE in before what happened in Minneapolis this week happens somewhere else tomorrow.

Now, you have been randomly assigned to read statements some public officials have said about the shooting of Renee Nicole Good in Minnesota. How convincing would you say each of the following statements is to support limiting the power of immigration enforcement agencies?

	Total	Age			Gender			Education		Race

RV Omni 2026 January A - ACLU

Online sample of 1,007 voters fielded from January 09 to January 12, 2026.

Margin of error: +/-3.4%.

This survey is based on 1,007 interviews conducted by YouGov on the internet of registered voters. The sample was weighted according to gender, age, race/ethnicity, education, and U.S. Census region based on voter registration lists, the U.S. Census American Community Survey, and the U.S. Census Current Population Survey, as well as 2020 Presidential vote and approximate 2024 Presidential vote based on available results, and party identification estimates based on Pew Research Center's National Public Opinion Reference Survey. Respondents were selected from YouGov to be representative of registered voters. The weights range from 0.08 to 6.01 with a mean of 1 and a standard deviation of 0.49.

The margin of error (a 95% confidence interval) for a sample percentage p based upon the subsetted sample is approximately 3.4%. It is calculated using the formula:

$$\hat{p} \pm 100 \times \sqrt{\frac{1 + CV^2}{n}}$$

where CV is the coefficient of variation of the sample weights and n is the sample size used to compute the proportion. This is a measure of sampling error (the average of all estimates obtained using the same sample selection and weighting procedures repeatedly). The sample estimate should differ from its expected value by less than margin of error in 95 percent of all samples. It does not reflect non-sampling errors, including potential selection bias in panel participation or in response to a particular survey.
