Hi Charmane,

I am following up about FOIA request 23-F-0128 and our new initial FOIA request.

Request 23-F-0128

We did not receive the scheduled monthly productions on March 15 or April 15th. The last production was on March 7, in lieu of the February 15th production. We understand that there are responsive records in all request categories that have not been produced yet. We agreed to prioritization of a narrowed scope of records in my March 5 email to you. **Please provide an update about the status of the monthly productions and when we can expect to receive the next production.**

Additionally, we are waiting for the production of the shelter manual that was withheld in November 2024.

New Initial FOIA Request

We have not received the tracking number for the new initial FOIA request we submitted by mail in February. It is nearly identical to our initial request here, but with a different time frame. **Can you please provide the tracking number?**

My colleagues at the ACLU Reproductive Freedom Project (the other Requestors) are copied here.

We have had a productive relationship with your office while working on our request and we hope we can get back on track with the monthly productions. If there are any questions we can answer about the requests, we'd be happy to provide clarification.

Thank you.

Best,

Rachel
