Columbus, Ohio 43215-5380

Re: Public Records Request / Automated License Plate Readers

Mr. Gary Daniels,

Attached to this correspondence please find our response to your public records request concerning the Automated license plate readers.

In regards to question 7:

The Franklin County Sheriff's Office does not obtain any third party information.

Marty L. Buechner
Chief Deputy
Franklin County Sheriff's Office
410 S. High St.
Columbus, Ohio 43215

MSA REGION#4 ALPR REVISED MEMORANDUM OF UNDERSTANDING BETWEEN FRANKLIN COUNTY SHERIFF'S OFFICE AND AGENCY POLICE DEPARTMENT OUTSIDE REGION#4

1. **PURPOSE:** The purpose of this Memorandum of Understanding (MOU) between FRANKLIN COUNTY SHERIFF'S OFFICE (FCSO) and the AGENCY POLICE DEPARTMENT is to foster an understanding regarding equipment receipt and the transmission, receiving, and dissemination of certain information contained in the Law Enforcement Automated Data Systems (LEADS) and National Crime Information Center (NCIC) systems of records.

2. **EQUIPMENT:** Funding for the purchase of License Plate Reader systems was authorized by the Ohio Emergency Management Agency through the Law Enforcement State Homeland Security Grant Program. Further, it is in agreement that the LE entity granted the equipment will be responsible for the insurance, maintenance, repairs, licenses, etc. associated with the License Plate Reader system(s) received.

2. **DATA:** The data to be shared pursuant to this MOU will be the LEADS and NCIC Stolen Vehicle Files and the Stolen License Plate files. Utilizing license plate screening technology, the AGENCY POLICE DEPARTMENT will receive relatively current information from these files in order to compare scanned numbers against the stolen files.

3. **RESPONSIBILITIES: FCSO**

- a. FCSO shall provide technical to assist AGENCY POLICE department with secure connectivity to Region #4 servers.
- b. FCSO will receive and send the LEADS and NCIC extracts to AGENCY POLICE DEPARTMENT daily, provided that the participating AGENCY POLICE DEPARTMENT has a secure Virtual Private Network (VPN) connection back to FCSO. This connection shall adhere to CJIS/LEADS network security protocols.
- c. FCSO will simply act as a conduit and pass the information from LEADS/NCIC to AGENCY POLICE DEPARTMENT. FCSO is not responsible for modifications, deletions, or confirmations of any information being provided.

4. **RESPONSIBILITIES: AGENCY Police Department or Sheriff's Office**

- a. AGENCY POLICE DEPARTMENT will utilize the LEADS/NCIC extracts for law enforcement purposes only.
- b. AGENCY POLICE DEPARTMENT must be aware and adhere to LEADS and FBI/NCIC requirements including the need to update their local databases as FBI updates

MSA REGION#4 ALPR REVISED MEMORANDUM OF UNDERSTANDING BETWEEN FRANKLIN COUNTY SHERIFF'S OFFICE AND AGENCY POLICE DEPARTMENT OUTSIDE REGION#4

become available, ensuring that those numbers deleted from the NCIC system are also deleted from all local databases.

c. AGENCY POLICE DEPARTMENT must be aware of the LEADS and FBI/NCIC requirements to confirm that extracted hits are still active in the systems, at the earliest reasonable opportunity in accordance with current hit confirmation policy.

d. AGENCY POLICE DEPARTMENT shall adhere to all CJIS Security and LEADS Policies & Standards with respect to stolen vehicle and license plate data.

e. Under no circumstance, is the AGENCY POLICE DEPARTMENT allowed or authorized to archive, publish, distribute ALPR data to Non Law Enforcement entities. . To the extent permitted by law, AGENCY POLICE DEPARTMENT shall indemnify FCSO from any and all claims resulting from any improper redistribution of ALPR data from participating LE agencies connected to MSA Region #4 servers.

5. **RETENTION SCHEDULE:** The parties hereto understand and agree that the current records retention schedule for the data subject to this MOU for MSA Region #4 servers is 90 days.

6. Either party may terminate this MOU upon 30 days written notification to the other party.

Sheriff Zachary Scott
Franklin County Sheriff's Office

AGENCY Chief or Sheriff
AGENCY Police Department

Date

**MSA REGION#4 ALPR REVISED MEMORANDUM OF UNDERSTANDING BETWEEN FRANKLIN
COUNTY SHERIFF'S OFFICE AND AGENCY POLICE DEPARTMENT**

FOR EQUIPMENT PURCHASED and INSTALLED POST JULY 1, 2011

1. **PURPOSE:** The purpose of this Memorandum of Understanding (MOU) between FRANKLIN COUNTY SHERIFF'S OFFICE (FCSO) and the AGENCY POLICE DEPARTMENT is to foster an understanding regarding equipment receipt and the transmission, receiving, and dissemination of certain information contained in the Law Enforcement Automated Data Systems (LEADS) and National Crime Information Center (NCIC) systems of records.
2. **EQUIPMENT:** Funding for the purchase of License Plate Reader systems was authorized by the Ohio Emergency Management Agency through the Law Enforcement State Homeland Security Grant Program and will be administered by the Franklin County Sheriff's Office and the Franklin County Office of Homeland Security & Justice Programs. By accepting the equipment and signing this agreement, said entity agrees to respond regionally, when able to any incident or requesting jurisdiction in need of enhanced capability provided by License Plate Reader technology. Further, it is in agreement that the entity receiving the equipment will be responsible for the insurance, maintenance, repairs, licenses, etc. associated with the License Plate Reader system(s) received. Equipment will remain the property of the Franklin County Sheriff's Office. Failure to maintain the equipment as established below, implement the equipment as intended and/or submit monthly data through the on-line reporting site shall result in removal of the equipment by the Franklin County Sheriff's Office.
2. **DATA:** The data to be shared pursuant to this MOU will be the LEADS and NCIC Stolen Vehicle Files and the Stolen License Plate files. Utilizing license plate screening technology, the AGENCY POLICE DEPARTMENT will receive relatively current information from these files in order to compare scanned numbers against the stolen files.
3. **RESPONSIBILITIES: FCSO**
 - a. FCSO shall provide technical assistance and coordination of the installation of the License Plate Reader(s) into AGENCY POLICE DEPARTMENT vehicles.
 - b. FCSO will receive and send the LEADS and NCIC extracts to AGENCY POLICE DEPARTMENT daily, provided that the participating AGENCY POLICE DEPARTMENT has a secure Virtual Private Network (VPN) connection back to FCSO. This connection shall adhere to CJIS/LEADS network security protocols.

**MSA REGION#4 ALPR REVISED MEMORANDUM OF UNDERSTANDING BETWEEN FRANKLIN
COUNTY SHERIFF'S OFFICE AND AGENCY POLICE DEPARTMENT**

c. FCSO will simply act as a conduit and pass the information from LEADS/NCIC to AGENCY POLICE DEPARTMENT. FCSO is not responsible for modifications, deletions, or confirmations of any information being provided.

4. RESPONSIBILITIES: AGENCY Police Department or Sheriff's Office

a. AGENCY POLICE DEPARTMENT shall be responsible for any costs resulting from the removal of vehicle equipment to accommodate ALPR equipment.

b. AGENCY POLICE DEPARTMENT will utilize the LEADS/NCIC extracts for law enforcement purposes only.

c. AGENCY POLICE DEPARTMENT must be aware and adhere to LEADS and FBI/NCIC requirements including the need to update their local databases as FBI updates become available, ensuring that those numbers deleted from the NCIC system are also deleted from all local databases.

d. AGENCY POLICE DEPARTMENT must be aware of the LEADS and FBI/NCIC requirements to confirm that extracted hits are still active in the systems, at the earliest reasonable opportunity in accordance with current hit confirmation policy.

e. AGENCY POLICE DEPARTMENT shall adhere to all CJIS Security and LEADS Policies & Standards with respect to stolen vehicle and license plate data.

f. Under no circumstance, is the AGENCY POLICE DEPARTMENT allowed or authorized to archive, publish, distribute ALPR data to Non Law Enforcement entities. To the extent permitted by law, AGENCY POLICE DEPARTMENT shall indemnify FCSO from any and all claims resulting from any improper redistribution of ALPR data from participating LE agencies connected to MSA Region #4 servers.

g. AGENCY POLICE DEPARTMENT shall assume responsibility for all extended LPR equipment, maintenance costs beyond year one. AGENCY POLICE DEPARTMENT is required to maintain the LPR warranty for the period allowable by the manufacture.

h. AGENCY POLICE DEPARTMENT shall be responsible for the following reporting schedule:

**MSA REGION#4 ALPR REVISED MEMORANDUM OF UNDERSTANDING BETWEEN FRANKLIN
COUNTY SHERIFF'S OFFICE AND AGENCY POLICE DEPARTMENT**

- i. Monthly: log any and all apprehension(s) and arrest(s) that resulted from LPR system alert(s), as confirmed and verified by LEADS. These logs are maintained by FCSO via secured access to <http://www.lprstats.com>.
- ii. Weekly: calibrate LPR system by accessing <https://www.lprstats.com>

It is the responsibility of AGENCY POLICE DEPARTMENT to maintain AGENCY POLICE DEPARTMENT password(s) to access this database. It is the responsibility of AGENCY POLICE DEPARTMENT to contact FCSO IT Support in the event that this password is lost or forgotten, so that a new password can be issued.

i. AGENCY POLICE DEPARTMENT is responsible for immediately notifying the Franklin County Sheriff's Office of damage to the equipment. Further, if AGENCY POLICE DEPARTMENT chooses to render the equipment inactive, written notification must be submitted to the Franklin County Sheriff's Office and equipment returned within 15 business days of the written notification.

j. AGENCY POLICE DEPARTMENT shall submit an annual equipment inventory form to the attention of the Franklin County Sheriff's Office by January 31st of each succeeding year after receipt of equipment.

5. **RETENTION SCHEDULE**: The parties hereto understand and agree that the current records retention schedule for the data subject to this MOU for MSA Region #4 servers is 90 days.

6. Either party may terminate this MOU upon 30 days written notification to the other party.

ALPR Products and Solutions > Mobile Plate Hunter - 900

Mobile License Plate Reader

ELSAG NA's Automatic License Plate Reader (ALPR) system, the Mobile Plate Hunter-900 (MPH-900) can be mounted to patrol cars capturing license plate numbers during entire shifts. If a suspect license plate number is read, audible and visual alarms alert the officer within milliseconds of license plate capture.

Cameras, a processing unit and proprietary software, allow officers to capture images of license plates and instantaneously compare them with millions of Hot List records to identify vehicles of interest. This highly advanced Automatic License Plate Reader system reads plates day or night, from all 50 States and most foreign countries including Arabic characters. It can also read other alpha-numeric identification systems—even from 1500 feet in the air. The MPH-900 ALPR system minimizes the guesswork and safety risks that challenge officers every day.

The MPH-900 has unique capabilities, many of which are much more advanced than features of other mobile ALPR systems.

Digital Camera Technology.

The MPH-900 ALPR's digital cameras see more than analog cameras do. Compared to the analog cameras used by all other ALPR systems, images taken by the MPH-900's digital cameras capture nearly twice the physical area—the sweet spot—and that means more information for law enforcement. While images taken with analog cameras show little more than the license plate, MPH-900 ALPR cameras show the plate, a significant portion of the car and part of the car's surroundings—day or night and in any weather. This visual information can greatly aid investigations.

MPH-900 FACT SHEET

<http://www.elsag.com/mobile.htm>

■ ELSAG "Sweet Spot" View

■ Analog "Sweet Spot" View

The MPH-900 ALPR takes "progressive scan" images, which present a better quality image than competitive technology using the "interlace scan" method. Progressive scans are digital and license plate images are read and captured one line at a time, sequentially. A progressive scan produces a far clearer read, providing more detail and a larger image area than the analog "interlaced scans" used by competitive ALPR systems. With interlaced scans, the camera can only record every other line of the license plate over two separate scans. In a final step, the system weaves the two scans together to form one complete image.

Progressive: full frame at once

Interlaced: frame split up into two fields

Field 1. odd lines

Field 2. even lines

Interlacing takes place to form the composite image.

Safety

The Mobile Plate Hunter-900 operates behind the scenes on the in-car computer allowing officers to keep their hands on the wheel and eyes on the scene.

When the MPH-900 reads a license plate number that matches a 'Hot List' file, officers are alerted immediately. The alert communicates the nature of the crime or infraction associated with the plate so officers understand the risks associated with the situation before ever getting out of the car and can prepare for safe interdiction.

Real Time Technology of the Mobile Plate Hunter-900 ALPR System

MPH-900 FACT SHEET

<http://www.elsag.com/mobile.htm>

Real time technology of the MPH-900 greatly increases the odds of resolving issues and in severe situations, can be the difference between life and death. Our advanced License Plate Reader system:

- Captures up to 1,800 license plate reads per minute, day or night, accurately recognizing plates from all 50 states, Canada, Mexico and many Arabic characters
- Processes parked and moving vehicles across up to 4 lanes of traffic, day or night, in any weather
- Transit speed up to 150mph (241kph) can be easily managed by our License Plate Reader system. It exceeds the normal speed of vehicles through the pathway (due to pathway infrastructure limitations)
- Allows officers to update "Hot Lists" manually at any time and also query them for new tags that may match a recently captured vehicle
- Alerts officers within milliseconds if a vehicle is suspect
- The ALPR translates a digital image into data, checks the information against an onboard hot list, and returns an alarm back to the operator in milliseconds for appropriate interdiction
- Hot Lists can be updated manually or wirelessly
- Officers can search ALPR system for previous reads at any time in reaction to notification of a suspect vehicle

Criminal Intelligence Capabilities of the MPH-900 ALPR System

The MPH-900 captures thousands of license plates during a shift. Data recorded for each includes date and time stamp, photo of the vehicle and its immediate area, and GPS coordinates. After-action analysis of this data from relevant periods of time can lead to:

- Witness identification
- Watch List development
- Placing suspect at a scene
- Terrorist interdiction
- Pattern recognition

Other features of the MPH-900 License Plate Reader System:

- Processor unit is the size of a small box for easy storage in trunk of a vehicle.
- The MPH-900 License Plate Reader requires less than 60W of 12V DC to function.
- The MPH-900 communicates with an agency's operations center (Command Center) for alarm notification and throughout the day for database update.

For further information on ELSAG North America's License Plate Recognition solutions and other Public Safety technology, please contact us at info@elsag.com or call 1-877-77-ELSAG (35724).
