Fixed Camera Costs P372

The P372 camera provides a 5 foot field of view. A site survey will have to be conducted to determine if this camera is adequate for the location.

All PIPS equipment hardware and software is covered by a one-year parts and labor maintenance and support agreement. Extended maintenance and support agreements are available for the system after the original one-year warranty expires. These agreements supply the end user with upgrades and improvements to our OCR engine for enhanced plate detection capabilities and software upgrades sold by PIPS Technology, Inc.
