Review Narrative

A public notice appeared in the Cheyenne Tribune Eagle and a public meeting was held at the Laramie County Commissioner's Office to solicit public opinion.

The Cheyenne Police Department will post its portion of the grant application on the department's website, with information about whom to contact for public input.

The Laramie County Sheriff's Department will post the entire application on its departmental website, with information about whom to contact for public input.

The memorandum of understanding between Laramie County Board of Commissioners and the City of Cheyenne has been signed and is attached with our documentation.

PROGRAM NARRATIVE

The purpose of this grant application is to fund two law enforcement activities undertaken by the two disparate jurisdictions within Laramie County.

Cheyenne Police Department – City of Cheyenne

- Covert surveillance video cameras and wireless transmitters
- covert motion activated still cameras and wireless transmitters
- dedicated computer and software for data retrieval and storage

Laramie County Sheriff's Department –

- 2 Motorola APX700 Digital Portable Radios
- 1 Motorola Mobile DVR

The application includes a memorandum of understanding between the two disparate jurisdictions spelling out the funding and activities to be undertaken. The two activities are described below:

Activity 1 - City of Cheyenne Police Department

The Cheyenne Police Department currently has no covert surveillance equipment. There have been several occasions when it has been needed and if available, it was borrowed from other agencies. If it was unavailable, a manpower exhausting surveillance would be used. This equipment would allow us to place a remote camera at a known criminal location and monitor it wirelessly from a safe site.

The video cameras would have the ability to pan/tilt/zoom and have a high enough resolution to identify suspects and vehicles. When a video camera would not be needed, a motion activated still camera could be used and that could remain in place for a long term providing much needed picture evidence of criminal activity. The dedicated computer would allow for the data storage of both video and still pictures, and be used as the controller for the cameras.

The purchase of this equipment would enhance our abilities to solve and prevent crime in our City and assist in locating and identifying criminal suspects.

Activity 2 - Laramie County Sheriff's Department

The Video camera (DVR) would have a high enough resolution to identify suspects and vehicles and enable us to document contacts and criminal activity, and share intelligence and information with area law enforcement at the local, State and Federal levels.

The radios are part of our on-going effort to upgrade our equipment to interoperable communications. These radios would provide us with the capability to meet Federal narrow-banding requirements. The radios are intended for use by patrol officers and may

also serve for emergency situations where additional radios may be shared with other local emergency response agencies.

Without this funding, it would be difficult for us to give up other vital equipment to make these purchases. The assistance of this funding would provide assistance to Laramie County's efforts to expand and formalize its community-oriented policing strategies and operations.
