Since I shredded both copies of your request before receiving this e-mail can you please provide the parameters for the data request?

In 2010, we purchased a Cellebrite unit for \$4065 and Fernico camera software for \$2045. We pay an annual maintenance fee of \$999 for the Cellebrite equipment.

Dear Chief Roberts,

I apologize for my error in repeating my original request to you. Thank you for your prompt response in August. As for your question regarding our third request, we would like to know both aspects. Please let me know what your department has paid carriers for data and the cost of equipment your department uses to analyze cell phone data, such as Cellbrite.

Thank you,

Jann Carson

I received a mailing today indicating that you had/have not received the information requested and sent in August of 2012 concerning Pendleton Police Department policies. I am happy to comply with such requests, but I will not continue to send redundant copies of the information you seek.

Subject: Public Records Request

1. Taser policy – Attached
2. ALPR policy/accounting– Agency does not use/possess units
3. Cell Phone Data procedure – Attached
Accounting – I am unclear what exactly you are requesting. Do you want to know how much we have paid carriers for data, or how much we have spent on equipment used to analyze information contained in cell phones (i.e. Cellebrite)?
4. PPD has no policy concerning the public recording officers acting in an official capacity –
Comment added to attached

We do not have a policy specific to if/when cell phones will be searched. Such searches fall under the scope of our search & seizure policy. Nor, do we track the cost(s) associated with data retrieval. Typically, post preservation letter(s) and subpoena(s) the information we seek is obtained at no cost.

I've attached the original request. The last page, item #3. Basically, we'd like to know 1) if you have policies guiding how and when you will seek an individual's cell phone records from the carrier, and if so, copies of the policies and 2) the amount of money your department has paid carriers for cell phone information. We are finding that many police departments do not separately track what they pay carriers for cell phone data and therefore several hours of research would be necessary to determine those costs.
