Subject: Support for eminent domain in Riverside county, CA

Good sirs,

If and when the county of Riverside, CA partners with you to bring eminent domain to my neighborhood, I want to be one of the first on the list provided we don't exchange one evil for another. We the people, who are apparently not too big to fail, urgently need relief.

We have been patiently waiting for a reasonable solution to be presented to those of us who were oversold grossly overstated assets. We've tirelessly struggled to make ends meet while satisfying our unreasonable obligations to the investors of our mortgage back securities only to watch the perpetrators be made whole time and time again for their losses.

It's our turn... and this is our bailout package. Besides, the previous ones were "a cost ultimately borne by taxpayers" as well.

Respectfully,

Al Niemuth
