The FBI:

- **Has always excelled at gathering intelligence**
- **Needed to improve our analysis and dissemination of that intelligence**
- **We had to transform from an agency that investigated crime and terrorism after the fact; to a threat-driven one able to predict and protect**

**Today we are using intelligence,
information sharing, and technology
to meet our new mission.**

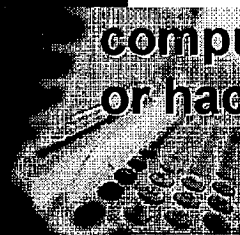

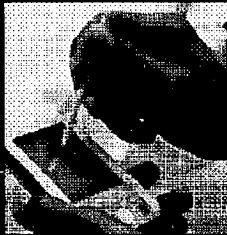

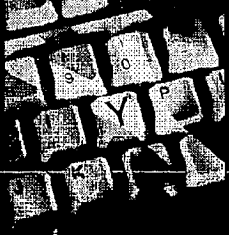

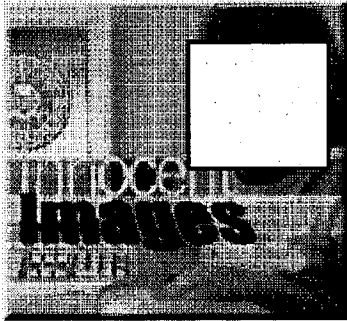

Cyber crime is a significant problem, and a growing one.

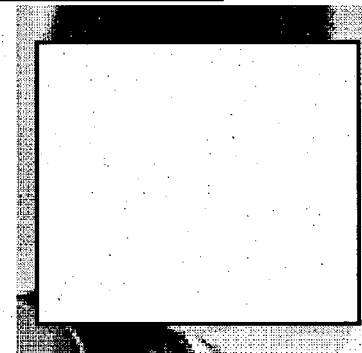

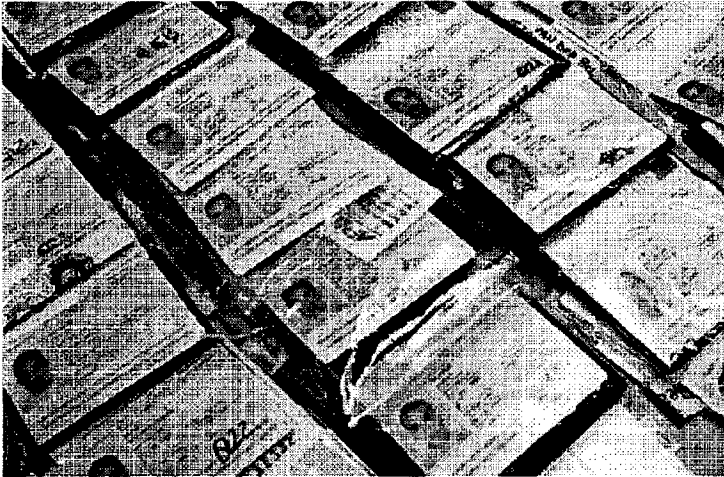

When you think of cyber crime, you probably think first of

computer intrusions, or hacking.
