Program Abstract

Applicant Name: **City of Brighton, Colorado Police Department**
Title: **2009 Federally Funded Technology Acquisition**
Dollar Amount Requested: **\$57,774**

Goals:

- Enhance Criminal Investigations through use of Computerized Voice Stress analysis.
- Detect and prevent crime through the use of an Electronic License Plate Reader.
- Increase mobility and citizen contact through the deployment of beat officers on bicycles.
- Improve surveillance of crime prone areas and improve management of tactical and community events where the police department is responsible for public safety.

Strategies:

- Upgrade current 8 year old CVSA system with state of the art system.
- Deploy the Electronic License Plate Reader on a rotating basis through the four patrol districts. Recover stolen cars, detect vehicles operated without liability insurance, Arrest and prosecute drivers of stolen cars. Arrest those wanted on warrants when associated with vehicles.
- Continue to deploy beat police officers on bicycles.
- Deploy video observation camera system in areas prone to crime, such as application of illegal graffiti and illegal drug activities, facilitate observation of large gatherings.

Coordination:

- The CVSA system and operator is available for use by other agencies that do not have this asset in-house.
- The Electronic License Plate reader will be made available to nearby agencies that do not have this asset in-house. This includes police departments and sheriff's departments.
- Bicycle officers coordinate with local business owners, neighborhood groups, local shopping centers and other police officers and all members of the public.
- The Video Observation System will be deployed on the City of Brighton Mobile Command Post, which is a regional, statewide asset funded by the Department of Homeland Security. Coordination can occur with any government agency in the State of Colorado.

Program Narrative

The Brighton Police Department's proposed law enforcement program activities for this grant consist of the following components:

- **Computerized Voice Stress Analysis System (CVSA) \$3,300.00**
 - The Police Department currently has a CVSA function based in the Police Investigations Section. The CVSA system is used for truth detection in suspect interviews and background investigation screening interviews for job applicants. Although this program has been in existence for many years, the computer system used to operate the CVSA component is obsolete and needs to be replaced. CVSA is a critical function of the Police Investigations Section. The CVSA computer, software and peripherals are obtained from a U.S. based corporation and will benefit this company in buying its products.
- **Electronic License Plate Reader (LPR) \$22,000.00**
 - An electronic License Plate Reader is a computerized device that can read motor vehicle license plates and search for stolen cars, arrest warrants and other criminal justice data. The end result of this technology is recovering stolen vehicles, and potentially apprehending and prosecuting criminals and preventing additional thefts. The Police Department does not currently possess this technology. The LPR

computer, software and peripherals are obtained from a U.S. based corporation and will benefit this national company in buying its products.

- **Police Bicycles \$5,474.00**

- The Police Department has an assortment of police bicycles, some of which are worn out and need to be replaced. This grant request would allow the purchase of five new bicycles, accessories, uniforms and training for the Police Bicycle Unit. The U.S. made bicycles will be obtained from a local distributor, benefiting both the distributor and manufacturer.

- **Rapid Deployment Video System \$27,000.00**

- The Rapid Deployment Video System uses wireless observation cameras that can be deployed in remote locations and send a real time video transmission to a command post or police vehicles via the internet. These devices will be especially useful during high risk, rapid deployment tactical situations and large community events where video observation is critical for deployment purposes. The video system, software and peripherals are obtained from a U.S. based corporation and will benefit this national company in buying its products.

Program Objectives

This grant request is for law enforcement program activities and improving the operational capability of the Brighton Police Department. The project objectives are:

Ed Byrne Memorial Justice Assistance Grant (JAG) Formula Program: Local Solicitation
