Kansas City MO 64111

Re: Sunshine Law Request to North Kansas City School District dated
        March 28, 2011

Dear Mr. Bonney:

This letter is provided in response to your email requesting records under the Missouri Sunshine Law, dated and received on Monday, March 28, 2011.

     1.   Pursuant to your request for documents regarding the North Kansas City School District's ("District") use of filtering software to block websites that fall into the category of "LGBT," "Gay or Lesbian or Bisexual Interest." "education.lifestyles," or similar category, the District provides the following information:

- Content Filter Property Sets
- Documentation regarding how the various Lightspeed "Access Denied" options work together
- Lightspeed Configurations

     2.   Pursuant to your request for information regarding the district's use of filtering software to block the website for GSA Network (gsanetwork.com) and Day of Silence (dayofsilence.org), please see the documents responsive to Request #1.

     3.   Pursuant to your request for information regarding any requests to the District by students, teachers, staff, administrators or anyone else to block or unblock specific websites and the resolution of each such requests, please see the documents responsive to Request #1.

     4.   Pursuant to your request for information regarding which categories of websites were selected to be blocked pursuant to the default configuration of the filtering software (i.e. the configuration in place at the time the software was initially installed),the District provides the following information:

Achieve excellence. Embrace change. Forge new traditions.
2000 NE 46th St. Kansas City, MO 64116-2042 816.413.5008 *fax* 816.413.5005
www.nkcsd.k12.mo.us

- Default Content Filter Property Sets
- Default Security Agent Property Set

5.   Pursuant to your request for information regarding who made the decision to activate the "LGBT," "Gay or Lesbian or Bisexual Interest," education.lifestyles," or similar filter category, when the decision was made, and any communications concerning that decision, the District does not have records responsive to this request.

6.   Pursuant to your request for information regarding the filtering software provider's knowledge that the "LGBT," "Gay or Lesbian or Bisexual Interest," education.lifestyles," or similar filter category had been (or would be) enabled on the district's filtering software, the District does not have records responsive to this request.

7.   Pursuant to your request for information regarding communications between the filtering software provider(s) and any representative or agent of the school district concerning which categories of websites had been (or would be) blocked, the District does not have records responsive to this request.

8.   Pursuant to your request for information regarding contracts and agreements, including service and maintenance agreements, between the filtering software provider(s) and any representative or agent of the school district, the District provides the following information:

- Recommendation for purchase of District internet filter
- Quotation
- Price Quotation and Order Form
- Co-Termed Quotation for Support/Subscription

Sincerely,

Becky Shaul

Sa\

How the various Lightspeed "Access Denied" options work together

1. User hits a Web site.
2. If the Web site is NOT blocked, he gets the Site, of course.
3. If the Web site IS blocked, it is blocked because some Policy says that it should be (the "Default" policy will be applied if no other Policy exists for that User)

ACCESS DENIED

warez.com is categorized as security.warez

The requested page has been blocked by the content filter because it is in violation of the internet acceptable usage policy set by the administration.

_____

■ If you would like to authenticate you may login.
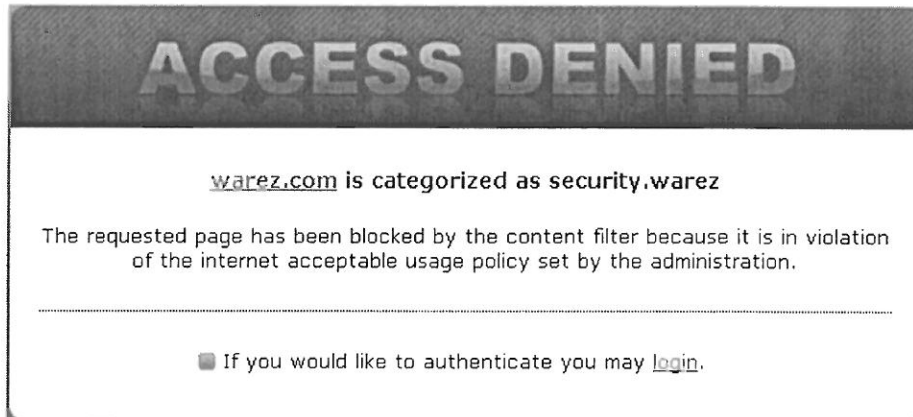

4. The **LOGIN** prompt appears because the "Default" Policy is being applied to the IP address of the machine and yet the ability to log in (using network credentials) has been turned on... This allows Lightspeed to switch from a "Default" policy (based solely on IP address) to a custom Policy (e.g., "Staff") based on that User's credentials
5. The custom Policy will then be applied...
6. The Policies define what is ALLOWED and what is BLOCKED; the Policies also allow the ability to **OVERRIDE** a Block based on "Full", "Category", or "Domain" (see Figure 1, at the end of this document, for an illustration of this hierarchy)...
   a. The Override options are set here, in the Policy:

   Override options:
   ☑ Enable workstation override   (maximum duration: 5 Minutes ▾)
      ☑ Allow domain override
      ☑ Allow category override
      ☐ Allow full bypass override

   b. These, however, do not take effect until the "ALLOW OVERRIDE?" option corresponding to the desired Category is selected:

   Adult

Name	Description	Block?	Allow Override?
adult.art	Adult art	☑	☑

c. When the "Override Options" are set, AND the "Allow Override?" box is checked, the User (usually just Staff, or Tech, or Leadership) will have additional options on the Blocked screen... First, THIS page (note the "Override Content Filter"):

ACCESS DENIED

stupidvideos.com is categorized as adult

The requested page has been blocked by the content filter because it is in violation of the internet acceptable usage policy set by the administration.

If you would like to authenticate you may login.

If you need to access this website you may override the content filter.
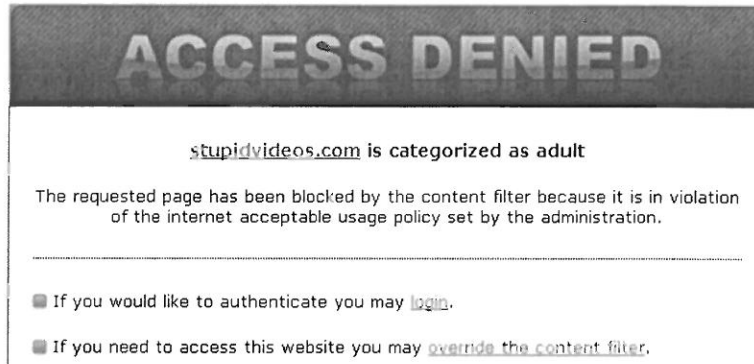

This screen appears next:

ACCESS DENIED

stupidvideos.com is categorized as adult

The requested page has been blocked by the content filter because it is in violation of the internet acceptable usage policy set by the administration.

If you would like to authenticate you may login.

If you need to access this website you may override the content filter.

Content Filter Override

An override allows you to view websites which are normally blocked. Please note that all web browsing activity is logged during an override.

What would you like to override?
○ I want to have full access to the stupidvideos.com domain.

Override the selection for [5 Minutes ▼]

[Override Filter] Cancel

If you feel this website should be allowed you may submit it for review.

*The above illustration shows that only a DOMAIN is allowed the Override, based on the fact that **only** "Allow Domain Overrides" was chosen in the Policy settings...*

ACCESS DENIED

stupidvideos.com is categorized as adult

The requested page has been blocked by the content filter because it is in violation of the internet acceptable usage policy set by the administration.

If you would like to authenticate you may login.

If you need to access this website you may override the content filter.

Content Filter Override

An override allows you to view websites which are normally blocked.
Please note that all web browsing activity is logged during an override.

What would you like to override?
- I want to have full access to the stupidvideos.com domain.
- I want to have full access to the adult category.

Override the selection for [5 Minutes ▾]

[Override Filter] | Cancel

THIS illustration shows that the User has the ability to choose access to that Domain OR to the entire Category, and for a specified period of time... Again, these stem from the "Allow Domain Overrides" AND (in this case) "Allow Category Overrides" in the Policy settings...

7. The other area in the Policy where sites can be ALLOWED or BLOCKED is in the boxes near the top of the Policy that bear those exact titles:

Allowed & Blocked Website URLs

Enter one URL per line, wildcards are accepted (example: *.games.com/*)

Allowed:	Blocked:
youtube.com	

The Sites that appear in these boxes will "trump" any other settings in the Policy... For example, http://www.youtube.com (and all its derivatives) will be allowed automatically for those to whom this Policy applies, because it is entered in the ALLOWED box; the converse is true for BLOCKED...

FIGURE 1
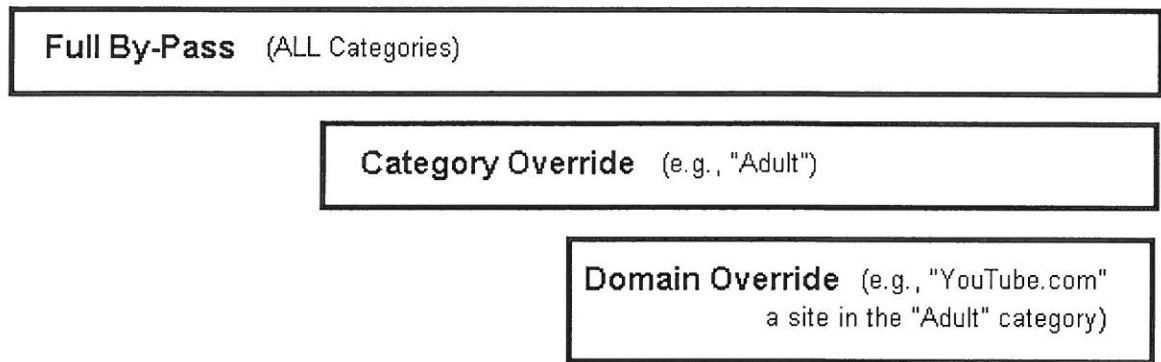

Full By-Pass   (ALL Categories)

Category Override   (e.g., "Adult")

Domain Override   (e.g., "YouTube.com" a site in the "Adult" category)

Re: Recommendation for the purchase of district internet filter

The district's current network filter was purchased by another company. As part of the acquisition the district will be required to switch products.   The district has evaluated filters from several companies. Listed below is a summary of the annual pricing received:

Company	1-Year Cost	3-Year Cost	Products Included
8e6	$94,077.72	$166,791.41	Web Filtering, Spyware
DPSciences	$90,998.63	$244,790.97	Web Filtering, Email Filtering
Lightspeed	$60,000.00	$144,000.00	Web Filtering, Email Filtering, Spyware, Antivirus, Email Archiving

Lightspeed also offered two-year pricing. The recommendation is to purchase a two-year subscription in the amount of $100,000 from Lightspeed for web filtering. Two years offers some economies of scale without locking into a long-term commitment for a technology that could change. Lightspeed is the lowest cost solution and offers many more features included within the subscription. Many local districts currently use the product. The technology department has successfully tested the product within our network environment. The subscription will be funded through technology funds.
