I need a breakdown of what is included on the 3+1 system. I will use that to pull the pricing off of the GSA contract.

Hector, we need to move forward with this project. Please let me know what you need to get the backend set up, i.e. database, server. Do we need to purchase anything on your end?

Anna, the quote I have is over 60 days but since it is on contract do we only need to identify exactly what it is we need to buy or should the vendor provide us with a breakdown of what is included with the 3+1 system?

Since I was not at the last meeting were there outstanding action items that need to be discussed?
