Yes, good. I talked to Boyds this morning hoping to narrow in on the plan. Removing the cages is delayed until he tests the fan and insulation to see if its enough to solve the heat issue. Thx

I sent another email to the group and CC'd you on it.. Mark Boyds is the POC on this heat issue... so removing the cages will be up to him... he is going to install the fans to see if they work... as for the white cars, they are the "last resort" in the event we need to meet our grant deadline...

Art
