Subject: URGENT-PLATESCAN INSTALLATION SET FOR WEEK OF AUGUST 17th

Good Morning Everyone,

I am pleased to announce that we are ready to begin the PlateScan installation process for the ALPR vehicles. Collin County won't have the regional back-office server delivered until September, however Kelley and I decided that we didn't want to wait on the server, before we got the vehicles operational. The vehicles can hold their data for 30 days, so we shouldn't lose any data and it can be transferred to the server once it is installed.

The installation process will begin at the Collin County Shop, 700A Wilmet Road on Monday, August 17th. They will be doing the installation on all six agencies vehicles that week. The Collin County Shop has given PlateScan after-hours access, so that they can get all six vehicles done that week. Knowing the average install time, they will probably work over the weekend and hopefully have the vehicles completed the following Monday.

To complete this task on time, we need for each agency to deliver their designated ALPR vehicle to the Collin County Shop no later than Friday, August 14th by 4:30pm. Please make sure that it is the same vehicle that you spec'd in the pre-planner. Any surprises will only slow down the install process. The actual shop is closed on Fridays, but the ladies in the front shop office will be there and will take your keys from you until 4:30pm on that Friday.. Liz Gray at the Shop is coordinating this for us, so if you have a question about delivering your vehicle, she should be able to help you. Her number is 972-548-3734.

se take a look at the attached photos of the new cameras installed.  
hink you will all be pleased at the new low profile of the cameras and  
ee that it was worth the wait, rather than getting the previous  
model cameras.

Start thinking about training. I have blocked off most of the week of August 24th to train all the Collin County Agencies. For the vehicle training, I will need a classroom with a projector for my laptop. Each class will take 1.5 to 2 hours and you can send as many officers as the room will hold. I can do a couple of classes for each agency to meet their shift requirements. For the back-office training for dispatchers, investigators, crime analysts and anyone else that you want to have access, those classes only take about 30 minutes per class. The more classes I can do at one agency on one day, the more time it give me for the other five agencies. Don't worry though, we can do additional classes, as my schedule allows.

Please double-check this email to insure that I sent it to everyone at your agency that needs it.

As always, if you have any questions, feel free to call me at any time.

Dear Mr. Cavin,

Collin County won't be able to pay for the installation of the Platescan systems to any vehicle until the installation is actually completed. That said, we are in a position to pay for the equipment, if it has been received. The cost of installation will not increase since this product and installation is under a contract for completion.

Best regards,

Hello Carol,

Due to the patent-infringement lawsuit against PlateScan, in which we have also been named, Plano is currently prohibited from installation or use of the PlateScan equipment we recently acquired. It has, however, been received here and is being

stored for future use. I am not sure how we should handle the billing for installation at this point, since we will likely not be able to engage in this part of the process for quite some time; however, it should be okay to sign for the equipment itself. I am copying Ken Mackenzie for his input.

Thanks,

Hi Kelley,

As I said in my earlier message, Collin County will issue partial payment for the product if we have received it. We can't pay in advance for the product or the installation. Also, if the county is having Platescan systems installed in other entities' vehicles, a Collin County staff will still need to prepare a receiving report for that work.

Good Morning Everyone,

I am pleased to announce that we are ready to begin the PlateScan installation process for the ALPR vehicles. Collin County won't have the regional back-office server delivered until September, however Kelley and I decided that we didn't want to wait on the server, before we got the vehicles operational. The vehicles can hold their data for 30 days, so we shouldn't lose any data and it can be transferred to the server once it is installed.

The installation process will begin at the Collin County Shop, 700A Wilmet Road on Monday, August 17<sup>th</sup>. They will be doing the installation on all six agencies vehicles that week. The Collin County Shop has given PlateScan after-hours access, so that they can get all six vehicles done that week. Knowing the average install time, they will probably work over the weekend and hopefully have the vehicles completed the following Monday.

To complete this task on time, we need for each agency to deliver their designated ALPR vehicle to the Collin County Shop no later than Friday, August 14<sup>th</sup> by 4:30pm. Please make sure that it is the same vehicle that you spec'd in the pre-planner. Any surprises will only slow down the install process. The actual shop is closed on Fridays, but the ladies in the front shop office will be there and will take your keys from you until 4:30pm on that Friday.. Liz Gray at the Shop is coordinating this for us, so if you have a question about

delivering you vehicle, she should be able to help you. Her number is 972-548-3734.

Please take a look at the attached photos of the new cameras installed. I think you will all be pleased at the new low profile of the cameras and see that it was worth the wait, rather than getting the previous model cameras.

Start thinking about training. I have blocked off most of the week of August 24<sup>th</sup> to train all the Collin County Agencies. For the vehicle training, I will need a classroom with a projector for my laptop. Each class will take 1.5 to 2 hours and you can send as many officers as the room will hold. I can do a couple of classes for each agency to meet their shift requirements. For the back-office training for dispatchers, investigators, crime analysts and anyone else that you want to have access, those classes only take about 30 minutes per class. The more classes I can do at one agency on one day, the more time it give me for the other five agencies. Don't worry though, we can do additional classes, as my schedule allows.

Please double-check this email to insure that I sent it to everyone at your agency that needs it.

As always, if you have any questions, feel free to call me at any time.

No problem what-so-ever. Installation will be pre-paid and then you just need to let us know when to come out to do it. I will send Carol and invoice with that information on it

Hello Carol,

Due to the patent-infringement lawsuit against PlateScan, in which we have also been named, Plano is currently prohibited from installation or use of the PlateScan equipment we recently acquired. It has, however, been received here and is being stored for future

use. I am not sure how we should handle the billing for installation at this point, since we will likely not be able to engage in this part of the process for quite some time; however, it should be okay to sign for the equipment itself. I am copying Ken Mackenzie for his input.

Thanks,

Lieutenant Glenn Cavin  
Plano Police Department  
Office of the Chief

---

Good Morning Everyone,

I am pleased to announce that we are ready to begin the PlateScan installation process for the ALPR vehicles. Collin County won't have the regional back-office server delivered until September, however Kelley and I decided that we didn't want to wait on the server, before we got the vehicles operational. The vehicles can hold their data for 30 days, so we shouldn't lose any data and it can be transferred to the server once it is installed.

The installation process will begin at the Collin County Shop, 700A Wilmet Road on Monday, August 17<sup>th</sup>. They will be doing the installation on all six agencies vehicles that week. The Collin County Shop has given PlateScan after-hours access, so that they can get all six vehicles done that week. Knowing the average install time, they will probably work over the weekend and hopefully have the vehicles completed the following Monday.

- 10600 -

9/24/2009

To complete this task on time, we need for each agency to deliver their designated ALPR vehicle to the Collin County Shop no later than Friday, August 14<sup>th</sup> by 4:30pm. Please make sure that it is the same vehicle that you spec'd in the pre-planner. Any surprises will only slow down the install process. The actual shop is closed on Fridays, but the ladies in the front shop office will be there and will take your keys from you until 4:30pm on that Friday.. Liz Gray at the Shop is coordinating this for us, so if you have a question about delivering you vehicle, she should be able to help you. Her number is 972-548-3734.

Please take a look at the attached photos of the new cameras installed. I think you will all be pleased at the new low profile of the cameras and see that it was worth the wait, rather than getting the previous model cameras.

Start thinking about training. I have blocked off most of the week of August 24<sup>th</sup> to train all the Collin County Agencies. For the vehicle training, I will need a classroom with a projector for my laptop. Each class will take 1.5 to 2 hours and you can send as many officers as the room will hold. I can do a couple of classes for each agency to meet their shift requirements. For the back-office training for dispatchers, investigators, crime analysts and anyone else that you want to have access, those classes only take about 30 minutes per class. The more classes I can do at one agency on one day, the more time it give me for the other five agencies. Don't worry though, we can do additional classes, as my schedule allows.

Please double-check this email to insure that I sent it to everyone at your agency that needs it.

As always, if you have any questions, feel free to call me at any time.

10-4 sir. All the vehicle systems are up and running. They can at least download the hotlist by thumb-drive, if they didn't opt to get a work station. One of the biggest problems we had on that end was that when it became apparent that the Fusion Center Server wouldn't be delivered in time,

Casey was going to coordinate with the other agency IT people about making sure they had a temporary PC or laptop in place to act as a workstation to get the DPS downloads. Most of the agencies never got that word until our installers arrived and then they were scrambling to find a work station. I am in the process of finishing the training. Instead of just the one hour, I am trying to give them each as many training classes as they want to do. Have been doing 3-6 two hour classes at each Department.

Kelley,  
I don't foresee a problem paying for the cameras and installation once they are installed as long as they are signed for as fully received and functional. The only problem I can think of is if they won't be signed off on due to the software delay. If it has nothing to do with the camera installation then again, this should not be a problem. Let me know if you have any further questions.  
Thanks,

Ken, we can pay for the cameras and installation. I copied Janna and she will tell us what is appropriate. Janna is our auditor and does a great job overseeing these grants.

Carol, please check with Liz to determine if they have a secure area to store the equipment until installation.

Thank you Kelley
