Project Summary:

This project is intended to provide the South Carolina Highway Patrol with three (3) automatic license plate recognition (ALPR) devices. Each of these devices will be used to more easily detect the license plates of drivers who may be in violation of the law according to available law enforcement data via NCIC, the South Carolina Department of Motor Vehicles, etc. The resulting traffic stops will lead to an increased number of misdemeanor citations and felony arrests, including arrests for serious drug offenses, etc.

PROGRAM NARRATIVE

1) PROBLEM STATEMENT: First, define the problem exactly as it exists in your particular community. Describe the nature and magnitude of the problem using valid, updated statistical data, and cite the source and date of your information. Prior data may be used to show changes in the magnitude or severity of the problem. Remember to document the problem and not the symptoms or solutions of the problem. Second, identify your existing efforts, current resources and programs being utilized to deal with the problem.

Overall, South Carolina's crime rates continue to rise. Many of the increases are reflected in South Carolina Criminal and Juvenile Justice Trends 2010, which is a publication of the S.C. Office of Justice Program's Statistical Analysis Center (<http://www.scdps.org/ojp/stats/cjtrends/2010%20Crime%20Book%20Web%20Versions.pdf>). The Palmetto State's violent crime rate has exceeded the National rate since 1975. For instance, from 2007 to 2009, South Carolina's violent crime rate was 78.2% (2007), 73.0% (2008) and 67.6% (2009), while the National violent crime rate was 46.7% (2007), 45.5% (2008) and 42.9% (2009) during the same three-year time period. Our State's murder rate has exceeded the National rate 33 of the past 34 years (1975 – 2009). From 2007 to 2009, the murder rate in South Carolina was 0.81, 0.70, and 0.69 respectively. At the same time, the National murder rate was only 0.56, 0.54, and 0.50. South Carolina's rape rate has exceeded the National rate every year since 1982 and has increased 37.6% from 1975 to 2009. The robbery rate in the Palmetto State has increased 15% from 1975 to 2009 (3,087 vs. 5,744 offenses). South Carolina's aggravated assault rate has increased 19.8% from 1975 to 2009.

Overall, our yearly aggravated assault rate has exceeded the national rate since 1975. Another crime of concern to the South Carolina Highway Patrol is motor vehicle theft. The motor vehicle theft rate has increased 19.8% since 1975.

Many crimes in the Palmetto State are a direct result of drugs, including those listed above. In fact, according to the State Law Enforcement Division's publication entitled, Crime in South Carolina 2009

(<http://www.sled.sc.gov/documents/CrimeReporting/SCCrimeBooks/2009/2009%20Crime%20in%20South%20Carolina.pdf>), South Carolina's drug law arrest rate increased 1.3% from 2008 to 2009 (76.99 to 77.96 rate per 10,000 inhabitants) and from 1976 to 2009 it has increased 201.6% (25.85 to 77.96 rate per 10,000 inhabitants). Drug offenses were the most frequent offense among South Carolina inmates in FY2009. For example, 4,729 (19%) out of 24,883 inmates committed drug-related offenses. (South Carolina Criminal and Juvenile Justice Trends 2010, S.C. Office of Justice Program's Statistical Analysis Center)

South Carolina's drug problem is reflected in *Altered States in the Palmetto State: Statistical Indicators of Illegal Drug Use*, which is a 2008 publication of the S.C. Office of Justice Program's Statistical Analysis Center (<http://www.scdps.org/ojp/stats/IllegalDrugs/Altered%20States%20in%20SC.pdf>). For example, South Carolina's drug arrest rate has increased 46.8% from 1996 through 2006. Of the last four years with definitive information on file (2003 – 2006), the arrest rate increased each year (from 32,454 to 32,932 to 36,609 to 38,211). The drug equipment arrest rate increased 245.8% from 1996 to 2006, including an increase each of the past five years on record (2002 – 2006). The drug equipment arrest rates are as follows: 1,628 (2002), 2,179 (2003), 2,850 (2004), 3,315 (2005), and 3,603 (2006). The personal use drug offense arrest rate increased 64.7% from 1996 to 2006, including each of the last four years with definitive information on file (2003 – 2006). The personal use drug offense arrest rates are as follows: 23,593 (2003), 24,149 (2004), 27,271 (2005), and 28,391 (2006).

One of the most serious elements of our drug problem is the fact that South Carolina is a transshipment corridor for illegal drugs and the money generated by drug transactions. As the largest law enforcement agency in the Palmetto State, the South Carolina Highway Patrol faces the daunting task of enforcing a vast array of laws, including narcotics violations, in all 46 counties and upon a highway system of more than 66,265 miles.

Furthermore, South Carolina has the fifth largest state-maintained highway system in the Nation (2013 Highway Safety Funding Guidelines, January 10, 2012, page four). In addition to enforcing regular traffic laws, Troopers routinely encounter drugs and other violent crimes. In fact, we have a Unit specifically designed to proactively enforce drug statutes, the Aggressive Criminal Enforcement (ACE) Team. Unfortunately, according to the U.S. Drug Enforcement Administration's 2009 South Carolina Fact Sheet (http://www.justice.gov/dea/pubs/state_factsheets/southcarolina.html), "South Carolina, once considered a 'consumer state' has transcended to being a 'source state' for illegal drugs. South Carolina is increasingly documented as a transshipment corridor for all manners of illicit drugs and drug proceeds. There is increasing evidence of organizational activity extending to major distribution hubs, such as New York City, Southern Florida, Southern Texas/Mexico and Southern California. It (the Palmetto State) is strategically located midway between Miami and New York City, where I-20, I-26, and I-77 intersect with I-95 and I-85. South Carolina's location is ideal for transshipping contraband throughout the Eastern Seaboard. From Mexico and the southwest border states, traffickers travel on I-20 and I-85 (in South Carolina) to supply northeastern states with cocaine, marijuana, methamphetamine, and heroin. Cocaine hydrochloride, crack cocaine, and methamphetamine are the major illegal drug threats in South Carolina. Investigations are becoming more complex and cross numerous statewide and nationwide jurisdictions. Cocaine and crack cocaine abuse have long endured as South Carolina's major drug threat; however, methamphetamine poses a slow but steadily increasing threat in the northern regions of the state (Greenville and Florence). Methamphetamine seizures in the last year have seen an increase. Over the last year, 100 clandestine meth labs were seized in the state; reflecting a 6 percent increase over the previous year. Most illicit drugs are transited to and through the state in small and mid size passenger vehicles."

As an illustration, according to former Anderson County Sheriff David Crenshaw, "Interstate 85 is a major thoroughfare for drug traffic. The dope goes north and the money goes south. Typically, the meth comes up from Mexico. Atlanta is a big drug hub and Charlotte is too. We're (South Carolina) right smack in the middle of all that (drug) traffic." Lt. Billy Looper, a narcotics officer with the Anderson County Sheriff's Office said, "Drug smugglers use all sorts of routes and all sort of methods to transport their goods. But they know that airports use their canines on everything. Drug smugglers know they check those packages. Just about everything we get (in terms of illegal drugs) is traveling on the roads." A 2007 report from the U.S. Drug Enforcement Administration found that "South Carolina is an end user, a staging area, and a transshipment state for all illegal drugs. The state's interstate system is ripe for transport, too. From Mexico and the Southwest border states, traffickers travel daily on Interstates 20 and 85 to supply Northeastern states with cocaine, marijuana, methamphetamine, ecstasy, and heroin. Five major interstates run through the State of South Carolina: 1-85, I-26, I-77, I-20, and I-95. Traffickers use an array of smuggling methods to include private vehicles, commercial tractor-trailers, and containerized cargo. But drug traffickers don't only use the state's interstates. One tactic to avoid detection is to take alternate routes. South Carolina highways 28 and 81 (in Anderson County) are also high spots for drug busts, according to statistics from the Sheriff's Office." (Anderson Independent-Mail news article, April 23, 2008)

Unfortunately, even with the increase in the above-mentioned crimes occurring in the Palmetto State, the arrest rate still decreased 1.3% from 2008 to 2009 (South Carolina Criminal and Juvenile Justice Trends 2010, S.C. Office of Justice Program's Statistical Analysis Center). Hence, finding these drugs on South Carolina's roadways is difficult without advanced technology. According to the same Anderson Independent-Mail news article

mentioned above (April 23, 2008), "to the untrained eye, all the cars traveling along Interstate 85 look the same (and this is true with respect to other roads within South Carolina)." Drug traffickers like their anonymity. According to Sid Gauden, spokesman for the S.C. Department of Public Safety, "these are people who do not want to be noticed, so they aren't going to be doing anything to get pulled over. They aren't going to be speeding or driving recklessly." (Anderson Independent-Mail news article, April 23, 2008) However, having a legally justifiable reason to pull over such vehicles is critically important to reducing the trafficking of narcotics in the Palmetto State.

To deal with this problem, the Highway Patrol has been examining other technological options that could mitigate this serious law enforcement obstacle. We have found a successful option that is being used by police agencies in all fifty states. It is called an automatic license plate recognition (ALPR) system. Each system includes two or more cameras mounted upon a law enforcement vehicle that automatically scan and process license plate numbers of parked or moving vehicles. A computer instantaneously cross-references the license plates against a database containing the license plate numbers of wanted vehicles or suspects linked to those vehicles. The database is updated routinely via the FBI's National Crime Information Center (NCIC), DMV records and / or by other law enforcement entities that provide the license plate numbers of stolen vehicles or the owners of vehicles who have outstanding warrants or are linked to missing person cases, etc. A positive match captured by the automatic license plate recognition (ALPR) system immediately sounds an alarm in the patrol car to alert a Trooper. The system can capture up to 3,600 license plates per minute, day or night, and can accurately recognize plates from all 50 states, including Canada and Mexico.

Regrettably, and in closing, our Agency's budget has been significantly reduced in recent years. For example, our current General Fund appropriations for FY 2011 – 2012 have been reduced more than 23% when compared to FY 2007 – 2008 (\$85,719,414 vs. \$65,774,585). Therefore, due to these budgetary constraints, the Patrol cannot afford to purchase automatic license plate recognition systems without grantor assistance.

PROGRAM NARRATIVE

PROJECT PURPOSE: First, describe the broad goals of your project. Then describe a specific plan for conducting the project and a rationale for the tasks and activities to be employed to address the problem outlined on Page 7.

BROAD GOALS:

The primary purpose of this project is to use automatic license plate recognition systems to more easily detect the license plates of drivers who may be in violation of the law according to available law enforcement data via NCIC, the South Carolina Department of Motor Vehicles, etc. The resulting traffic stops will lead to an increased number of misdemeanor citations and felony arrests, including arrests for serious drug offenses, etc.

SPECIFIC PLAN:

In consultation with the Project Director, Patrol Supply will purchase the automatic license plate recognition (ALPR) systems from existing state contracts. If existing state contracts are not available, the Patrol, in accordance with South Carolina law and any grantor requirements, will initiate bids for the ALPR systems.

The vehicle-based technology allows for the automated capture and reading of license plates from a moving or stationary vehicle at a maximum rate of 3,600 plates per minute, day or night, in any weather. Vehicle plates captured by each system are instantly checked in a database that can identify vehicles that have been reported as stolen, wanted, endangered, etc. License Plate Recognition technology has proven to be a valuable tool in combating crime, locating wanted vehicles and persons, and aiding law enforcement investigative efforts, including drug suppression activities.

The Project Director will confer with Patrol Command Staff and personnel assigned to the project and will be provided a list of those Troopers who are assigned an automatic license plate recognition system.

Assigned Troopers will be trained on the proper use of the automatic license plate recognition (ALPR) system by an ALPR instructor(s).

A centralized recording system will be established to monitor the usage of each ALPR system. Additionally, an ALPR activity summary will be maintained by the Project Director indicating the specific law enforcement activity resulting from the use of each automatic license plate recognition system, the dates, times and locations of usage,

the effectiveness of each ALPR system in detecting the license plates of drivers who may be in violation of the law, and a detailed report summarizing the specific cases / charges that result from the use of each ALPR system. The grantee strongly believes that many of the cases resulting from the ALRP systems will be drug related.

RATIONALE:

The rationale for these tasks and activities is to provide Troopers with an enhanced detection option that will enable an increase in the apprehension of suspects / vehicles that are involved in misdemeanor and/or felony activity, including drug offenses, etc.

Additional rationale includes the following:

Force Multiplier: The South Carolina Highway Patrol's current force stands at only 804 Troopers (per The State Newspaper, Columbia, SC, 12/21/2011, <http://www.thestate.com/2011/12/21/2088012/highway-patrol-names-new-leader.html>.) For comparison purposes, in 1994 South Carolina had one Trooper for every 2,652 registered vehicles. In 2010, we only had approximately one Trooper for every 4,914 registered vehicles. Furthermore, in 1994 the Palmetto State had one Trooper for every 2,441 licensed drivers. Currently, we have only one Trooper for every 4,183 licensed drivers. Additionally, each Trooper is currently responsible for more than 46 million highway miles traveled – far more than the 36 million vehicle miles each Trooper had to cover in 1994. (The above-mentioned statistics are supported by the S.C. Office of Highway Safety's 2013 and 2010 Highway Safety Funding Guidelines and The State Newspaper, December 16, 2006, Columbia, SC, Page A6.)

Hence, automatic license plate recognition (ALPR) systems will assist with the current Trooper shortage that we are experiencing in South Carolina. According to the Columbia Police Department's Sergeant Brian Richenberger, the ALRPs are "a force multiplier and that's really what it is." It does all the same things" that an officer does on patrol, "it just does it a lot faster." (Columbia Daily Tribune (MO), September 6, 2009)

Protecting the Innocent: In addition to locating criminals, each ALPR system will be useful in protecting the innocent, this includes persons who are AMBER alert subjects, missing persons resulting from dementia or other medical conditions, motorists who do not arrive at planned destinations, etc.

PROGRAM NARRATIVE

PROJECT OBJECTIVE(S): Objectives are specific, quantified statements of expected results of the project. The objectives must be described in terms of measurable events that can be realistically expected under time constraints and resources. Objectives must be related to the Problem Statement and Project Purpose outlined on Pages 7 and 8.

1. To enhance the license plate detection of those drivers who may be in violation of the law according to available law enforcement data via NCIC, the South Carolina Department of Motor Vehicles, etc.
2. To enhance the number of misdemeanor citations and felony arrests, including drug arrests, resulting from the use of ALPR systems.

PROGRAM NARRATIVE

PERFORMANCE INDICATOR(S): State exactly how each objective will be measured. **Performance indicators must be matched to each specific program objective on Page 9** (i.e., if there are **5** objectives, then there must be 5 corresponding performance indicators). Performance indicators are based on quantitative (numbers) and qualitative (opinions organized in meaningful ways) data gathering procedures which evaluate and document your project.

1. Documentation will be maintained regarding the number of times the equipment is used to successfully detect the license plates of drivers who are in violation of the law.
2. Documentation will be maintained on the misdemeanor citations and felony arrests that result from the use of the equipment, as well as other specific details relating to the usage of the equipment (date / time / location of usage, the specific charges resulting from the use of each ALPR system, etc.).

PROGRAM NARRATIVE

PROJECT EVALUATION: This requirement is to: (1) establish an evaluation plan or process to assess the impact of your project on the drug and violent crime problem in your jurisdiction, (2) conduct the evaluation during the grant funded period, and (3) submit a formal written evaluation report at the close of the grant period. The purpose of evaluating each project is to assess how well it has been implemented in your jurisdiction and to assess the extent to which the activities funded have achieved the project's goals. The plan or process must describe how the evaluation will be accomplished and must describe the range of activities that will serve as vehicles for obtaining general qualitative and specific quantitative information. **The plan or process must be completed and submitted on this page.**

The success of the program will be primarily measured through the use of a process evaluation. This evaluation will be based on the completion of the objectives as stated in the approved grant, utilizing performance indicator data. A Final Narrative Report will be prepared and submitted upon the conclusion of this grant. The report will outline the degree to which the objectives were fulfilled, any problems which may have occurred over the course of the grant, as well as how those problems were addressed. An evaluation of the program goals will also be addressed in the Final Narrative Report. The primary tool used to determine if the stated goals were met will be the impact indicator data gathered over the course of the grant.

The Project Director will evaluate the project based on the objectives and performance indicators and the impact it has made on the community. The project director will then submit this evaluation to the Office of Justice Programs at the end of the grant year, separately from the progress report.

The South Carolina Drug-Free Workplace Act **requires certification by all subgrantees receiving \$50,000 or more.** The Certification is a material representation of fact upon which reliance will be placed when the SFA determines to award the grant. False Certification or violation of the Certification shall be grounds for suspension of payments, suspension or termination of the grant; or government-wide suspension or debarment.

39. Disclosure of Federal Participation: In compliance with Section 623 of Public Law 102-141, the subgrantee agrees that no amount of this award shall be used to finance the acquisition of goods and services (including construction services) for the Project unless the subgrantee:

The Assistant Attorney General, Office of Justice Programs, coordinates the activities of the following program offices and bureaus: Bureau of Justice Assistance, Bureau of Justice Statistics, National Institute of Justice, Office of Juvenile Justice and Delinquency Prevention, and the Office for Victims of Crime. 45. Higher Education Institutions: Where cash match is required subgrantees must show the applicable percentage match for each line item entry on the respective budget pages. An exception is made for institutions of higher education operating in accordance with OMB Circular A-21. In those instances the subgrantee may show an aggregate, bottom line match rather than a line item match. However, eligible applications utilizing this option must document in their Request For Payments some amount of match on at least a quarterly basis. 47. This special condition facilitates compliance with the provisions of the National Environmental Policy Act (NEPA) relating to clandestine methamphetamine laboratory operations, including the identification, seizure, or closure of clandestine methamphetamine laboratories [hereinafter, "meth lab operations"]. No monies from this award may be obligated to support meth lab operations unless the grantee implements this special condition.

The Office of Justice Programs (OJP), in consultation with the Bureau of Justice Assistance, the Drug Enforcement Administration, and the Office for Community Oriented Policing Services, prepared a Program-level Environmental Assessment (Assessment) governing meth lab operations. The Assessment describes the adverse environmental, health, and safety impacts likely to be encountered by law enforcement agencies as they implement specific actions under their methamphetamine laboratory operations. Consistent with the Assessment, the following terms and conditions apply to the grantee for any OJP funded meth lab operations:

- A. The grantee shall ensure compliance by OJP funded sub-grantees with federal, state and local environmental, health, and safety laws and regulations applicable to meth lab operations, to include the disposal of the chemicals, equipment, and wastes resulting from those operations.
- B. The grantee shall have a Mitigation Plan in place that identifies and documents the processes and points of accountability within its state. This plan will be used to ensure that the adverse environmental, health, and safety impacts delineated in the Assessment are mitigated in a manner consistent with the requirements of this condition.
- C. The grantee shall monitor OJP funded meth lab operations to ensure that they comply with the following nine mitigation measures identified in the Assessment and whose implementation is addressed in the grantee's Mitigation Plan. These mitigation measures must be included as special condition in all subgrants: (See below)
 - 1. Provide medical screening of personnel assigned or to be assigned by the grantee to the seizure or closure of clandestine methamphetamine laboratories;
 - 2. Provide Occupational Safety and Health Administration (OSHA) required initial and refresher training for law enforcement officials and all other personnel assigned to either the seizure or closure of clandestine methamphetamine laboratories;
 - 3. As determined by their specified duties; equip the personnel with OSHA required protective wear and other required safety equipment;
 - 4. Assign properly trained personnel to prepare a comprehensive contamination report on each seized/closed laboratory;

5. Utilize qualified disposal personnel to remove all chemicals and associated glassware, equipment, and contaminated materials and wastes from site(s) of each seized laboratory;
6. Dispose of the chemicals, equipment, and contaminated materials and wastes at properly licensed disposal facilities or, when allowable, at properly licensed recycling facilities;
7. Monitor the transport, disposal, and recycling components of subparagraphs numbered 5. and 6. immediately above in order to ensure proper compliance;
8. Have in place and implement a written agreement with the responsible state environmental agency. This agreement must provide that the responsible state environmental agency agrees to (i) timely evaluate the environmental condition at and around the site of a closed clandestine laboratory and (ii) coordinate with the responsible party, property owner, or others to ensure that any residual contamination is remediated, if determined necessary by the state environmental agency and in accordance with existing state and federal requirements; and
9. Have in place and implement a written agreement with the responsible state or local service agencies to properly respond to any minor, as defined by state law, at the site. This agreement must ensure immediate response by qualified personnel who can (i) respond to the potential health needs of any minor at the site; (ii) take that minor into protective custody unless the minor is criminally involved in the meth lab activities or is subject to arrest for other criminal violations; (iii) ensure immediate medical testing for methamphetamine toxicity; and (iv) arrange for any follow-up medical tests, examinations, or health care made necessary as a result of methamphetamine toxicity.

48. Active DUNS number and Central Contractor Registration (CCR) registration required for federal reporting purposes

A DUNS number is required following an award: A DUNS number is a unique nine-digit sequence recognized as the universal standard for identifying and keeping track of entities receiving federal funds. The identifier is used for tracking purposes and to validate address and point of contact information. The DUNS number will be used throughout the grant life cycle. Obtaining a DUNS number is a free, simple, one-time activity. Obtain one by calling 1-866-705-5711 or by applying online at www.dunandbradstreet.com. Individuals are exempt from this requirement.

Central Contractor Registration (CCR) is required following an award: A CCR is the primary registrant database for the U.S. Federal Government. CCR collects, validates, stores, and disseminates data in support of agency acquisition missions, including Federal agency contract and assistance awards. Please note that the term "assistance awards" includes grants, cooperative agreements, and other forms of federal assistance. Whether applying for assistance awards, contracts, or other business opportunities, all entities are considered "registrants". For **Central Contractor Registration (CCR) handbook** [click here](#).

49. All recipients of awards of \$25,000 or more under this solicitation, consistent with the Federal Funding Accountability and Transparency Act of 2006 (FFATA), will be required to report award information on any awards totaling \$25,000 or more, and, in certain cases, to report information on the names and total compensation of the five most highly compensated executives of the recipients.
