Tips & Techniques

Field Use

ELSANorthAmerica

A Finmeccanica Company

1. **Data** – Targeted State Data is key; the system can handle up to 4M lines of data, multiple source data can be combined
NCIC Data– Stolen Vehicles and Stolen Plates, Warrants
*** Suspended/Revoked currently is included in Hot List
2. **Technical Training** - The purpose of this training is to show you how to correctly operate the LPR system, move the system from vehicle to vehicle (if transportable), preliminary troubleshooting, and driving (aiming the system while in operation.
3. **Consistent Use** – The equipment is extremely durable and is built to be in constant operation
4. **Drive up the #'s** - Read 1,000 tags, get a stolen, read 6,000 get an arrest. Our partner agencies have read several million tags and all agree that volume reading while on patrol wins the day.

ELSANorthAmerica
A Finmeccanica Company

- ◆ Easily mounted or transportable LPR systems allow officers to maintain a normal patrol stance while capturing up to 5-7,000 reads in an 8 hour shift.
- ◆ The System reads across 2 lanes of traffic and captures vehicles in excess of 140MPH closing speed and 75+MPH passing speeds.
- ◆ The MPH-900 requires no driver intervention and runs against up to 4.0M lines of hotlist files for vehicles of interest.
- ◆ Milliseconds after a Hot list vehicle is captured, the system sounds an audible & visual alarm to the operator for immediate interdiction.
- ◆ The MPH-900 reads plates from all 50 states and Canada including difficult to read flat and vanity tags – 24 hours DAY or NIGHT in all kinds of weather.

2 Camera Split System

Infrared cameras, work day or night to capture license plate alphanumeric string and convert into digital text sent to OCR processor.

System Processor

Images all cameras, with up to 100 frames per second, and sends a message to the laptop in less than one second.

In-Car Computer

is notify
ion is

ELSAGNorthAmerica

A Finmeccanica Company

Left Camera

Reads 1-2 left lanes oncoming and vehicles

Processes both moving and parked vehicles, while the police vehicle is moving or parked.

Right Camera

Reads Parked vehicles as well as cars that are passed on right.

Images are processed at a rate of 20 frames per second per camera, plates are recognized and cross-checked versus a database of up to 4 million lines for stolen vehicles/stolen plates, FBI NCIC list, Parolee list, Sex Offenders etc.

Vehicles found in the database will alarm in milliseconds

ELSANorthAmerica

A Finmeccanica Company

Left Cameras

Reads vehicles passing
on your left no matter
the state origin.

3rd Camera System

Provides the complete
lane coverage in multiple
lane configurations.

Capturing vehicles with
only rear plate attached.

Processes both moving and
parked vehicles, while the police
vehicle is moving or parked.

Right Camera

Reads Parked
vehicles as well as
cars that are passed
on right.

How To Insert A Plate Into Hotlist

1. Click the blue Operations button.
2. In the plate field type the license plate number. This must be a complete plate entry.
3. In the state field choose the correct state.
4. In the notes field, type up to 100 characters to describe the violation.
5. Click the Insert button.
6. Choose the corresponding alarm type.
7. Click OK to search previous reads for the entered plate.
