Inv\_1108\_from\_Platescan\_Inc.pdf

Good afternoon

Please see the attached invoice for the 2 vehicle swap out for Lewisville PD. To my understanding the PC in the trunk will be returning to us with our Tech Justin, as we were unaware there was an issue. Upon its return we will update you, to the status and time for repair.

All the best to you all  
Mila Kelly

**April, 2009**

### **Limited Hardware Warranty**

PlateScan Inc. warrants to the original purchaser that the following hardware components comprising the PlateScan License Plate Recognition System, including but not restricted to: in-car computers, cameras, touch screen displays, keyboards, mounting hardware, cables and connectors, be free from defects in materials and workmanship. The products must have been used for their intended purpose and installed and operated in accordance with PlateScan's instructions for daily use and routine maintenance.

PlateScan is not responsible for damage to PlateScan components caused by incorrect installation in a manner not consistent with PlateScan guidelines. Excluded from warranty coverage are all acts of nature, such as electrical storms, floods, fire, etc., acts of war and terrorism, criminal acts, vandalism and customer negligence.

The warranty term for all components is one year beginning on the date of service.

PlateScan provides free online or telephone technical support during the warranty period. During the first 60 days of the warranty period, PlateScan will provide the purchaser with a Returns Merchandise Authorization (RMA) number for any component deemed faulty by PlateScan engineers and ship the purchaser a replacement component. The purchaser will return the faulty component to PlateScan in the packaging provided within seven days of receipt of the replacement component.

During the remainder of the warranty period, PlateScan will repair or replace any faulty components free of charge within 21 days of receipt by PlateScan of the component. PlateScan warrants that the spare parts used to repair the component, or a replacement unit, returned under Warranty will be free from defects in materials and workmanship for the remainder of the warranty period.

### **Limited Software Warranty**

PlateScan Inc. warrants to the original purchaser that the software components comprising the PlateScan License Plate Recognition System, and the PS Connect Back Office (both server and client) be free from bugs and perform in the manner for which it was purchased for a period of one year from initial service.

The software must have been used for its intended purpose and installed and operated in accordance with PlateScan's instructions.

Any software defect or bug encountered, either in the PlateScan software or PS Connect Back Office system, should be reported online, or by telephone, to PlateScan's technical/service engineering department during the hours of 8am to 6pm PST at 949-851-1600 ext 18. They will attempt to troubleshoot the issue through our remote access diagnostic system, and will determine the necessary procedure for rectification of the problem. All patches and bug fixes will be provided to the purchaser at no additional charge during the warranty period.

# Quotation

Please note that PlateScan does not warrant that the PlateScan License Plate Recognition software will recognize any modifications made by States to their license plates subsequent to the original installation. On request PlateScan, Inc. will assess the potential for creating "custom upgrades" to the software. Purchaser may request a custom upgrade at any time and this request will be analyzed for practicability by PlateScan engineers and a formal quotation will be submitted to purchaser. PlateScan does not guarantee that any custom request can, or will be, executed by PlateScan. Custom upgrades required by Purchaser must be accompanied by a separate written purchase order.

## **Limitation of Liability**

PlateScan Inc. does not accept liability beyond the remedies set forth in this warranty or liability for incidental or consequential damages, including without limitation any liability for products not being available for use or for lost data or software.

## **Optional Extended Warranty**

An optional one or two year extension to the original warranty, is available to cover the replacement or repair, free of additional charge, of all defective system components, both hardware and software.

The terms of the Extended Warranty are the same as PlateScan's original warranty and replacement or repair is solely at the discretion of PlateScan's engineers. The cost is 13.5% of the initial billed cost of the system. It is due and payable 12 months from the original installation date, and on the same date each subsequent year. Should an extension be purchased at the time of the original sale, a 10% discount would be provided.

All routine updates and upgrades to the PlateScan License Plate Recognition Software and PS Connect Back Office Software available during the Extended Warranty period will be provided to purchaser free of additional charge, for installation by purchaser or remotely by PlateScan engineers. If a PlateScan engineer is required by Purchaser to install a replacement component or updated or upgraded software, covered by the extended warranty, at a client site, then PlateScan's published daily rates for travel and labor will apply, and a separate purchase order will be required.

---

Chris,  
attached the quote for 2x Equipment transfers.  
Do you think it will be possible to forward us pictures form the new vehicles ?  
we are particular interested in trunk space and location of other installed equipment  
regards
