PAGIS

Police ALPR Graphical Interface System

- Mobile (in-car) ALPR application
- Easy, intuitive GUI
- Allows for Matching Against Multiple Databases
 - NCIC
 - Local Databases
 - AMBER Alerts
 - Others
- Audible and Visual Alerts on Hits

BOSS

Back Office Server Software

- Automated Hitlist Generation
- Hittist Management
- Crimes Analysis Query and Data Mining of PAGIS Reads and Hits, Mapping
- Remote Notification of Hits
- Covert Database Capability
- Interoperability through Intra-Agency Data Sharing / Search Capability

the most advanced license plate recognition systems in the world

The synchronization of the most recent "hotlist" information from the BOSS server into PAGIS will be performed in one of two ways depending on the system's configuration.

1. Using a USB Memory Stick / Thumbdrive
2. Wireless Connection (Wi-Fi or Cellular Modem)

PAP3 TECHNOLOGY the most advanced license plate recognition systems in the world
Aptech Visual Group

For vehicles that are NOT equipped for 802.11 wi-fi or cellular communications:

- In the office, go to the PC equipped with BOSS Client Tools as instructed by your System Administrator.
- Insert your USB Thumb Drive into the assigned USB port on the PC.
- Access the Client Tools by Right Clicking on the Client Tools Icon in the system tray as seen below. (green teardrop with yellow "swoosh")
- Select Synchronize / Begin Shift
- Select the location of your thumb drive; your Administrator will most likely have this set to be the first option.
- Wait for "Synchronization Complete" message and remove the thumb drive.
- Proceed to your patrol vehicle

The Hotlist databases available for download may vary depending on operation conducted by the department. In general the Hotlist will include an extract from NCIC's database. In adherence to the APB's directive, the LPR extract was modified on 01/24/2009 to include vehicle data from additional NCIC files. The revised extract includes information from the following NCIC files:

- Stolen Vehicles,
- Stolen License Plates,
- Wanted Persons,
- Protection Orders,
- Missing Persons,
- Violent Gangs and Terrorist Organizations,
- Supervised Releases,
- Convicted Sexual Offender Registry,
- Immigration Violator Files.

Additionally, "local" databases can be added by the department as needed.

For Vehicles NOT equipped for data transfer via 802.11 wi-fi or cellular:

- Insert the thumb drive with the latest hotlist data into the designated USB port on your MDC or Laptop Computer.

For All Vehicles:

- Press the "Begin Shift" button TWICE to synchronize all hotlist data to the vehicle's ALPR Processor.
- Wait for the synchronization window to disappear from your screen.
- PAGIS is now operational.
