During the dates of January 23rd, 2012 to January 29th, 2012 there were a total of 27475 reads, and of those results there were only 907 hits.

During the prior week, the dates of January 16th, 2012 to January 22nd, 2012 there were a total of 22634 reads, and of those results there were only 589 hits.

Note that during the above week the ALPR System was not used on January 21st, and January 22nd, 2012.

The ALPR system has a total number of 1,336,608 reads of which 32,371 are hits up until the current date of January 30th, 2012 at 0953 hours.

The reason for the delay is that there was a connection problem between the server and the ALPR server. The issue 9v power supply adapter was eventually corrected by Det. Edwin Padilla.

I respectfully report that the A.L.P.R. updates have not been done to the ALPR Server. The following information is up to date as of January 16th, 2012.

During the dates of January 2nd, 2012 to January 8th, 2012 there were 0 reads, and of those results there 0 hits.

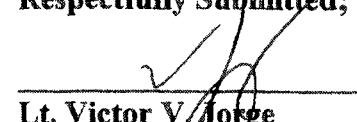

*This is due to a problem with the A.L.P.R. cameras in MPU #702. The vehicle was driven to T.A.R.U. on Monday January 9th, 2012, by P/O Michael Grainger because he was experiencing problems getting the reads. Det. Edwin Padilla of T.A.R.U. checked the vehicle and stated that the cameras were not operational possibly due to a power shortage. Lt. Angelo Zamora, of Fleet Management was advised of the problem. The vehicle was rebooted and appeared to be working, but upon further analysis it was determined that the vehicles computer was still not operational and we are in the process of having the vendor, INFOCOP respond to assess the situation.

During the dates of January 2nd, 2012 to January 8th, 2012 there were a total of 9308 reads, and of those results there were only 250 hits.
