SUBJECT: ALPR UPDATES:

DATE: February 23, 2011

FILE REF:

Sir:

I respectfully inform T.A.R.U. has been experiencing troubles updating the ALPR system: The troubles arise when our T.A.R.U. server would not connect via Radmin Viewer to The B.B. Server, software used to remotely connect to different servers. The solution used to be to call M.I.S. and have them reboot the B.B. Server, until the last couple of times. We have called them to reboot the Server and they do, but we still experiencing the troubles not being able to connect. I respectfully suggest for an I.T. Technician to look into this matter.

Respectfully Submitted;

Sir:

I respectfully report that the ALPR updates have been done and are currently up to date on our T.A.R.U. Server. Unfortunately, due to technical problems with the ALPR system (no connectivity) in the 702 car, the updates could not be applied to the vehicle. A representative from GTBM (creator of InfoCop and ALPR) will be responding to TARU on February 16, 2011 to fix the hardware problem.

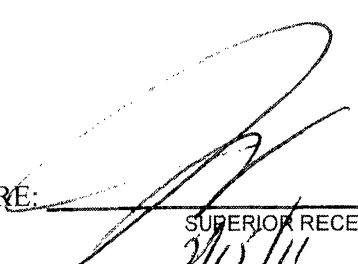

During the time period of Monday February 7, 2011 to and including Sunday February 13, 2011 there were 4,064 reads of which 154 were hits. During the previous time period of Monday January 31, 2011 to and including Sunday February 6, 2011 there were 0 reads.

Please be informed that the ALPR system was not used during the following dates: January 31, February 1, February 2, February 3, February 4, February 5, February 6, February 7, February 8, February 12, and February 13.
