SUBJECT: TARU ALPR Problems
RE: 702 Car

DATE: February 15, 2011

FILE REF:

Sir:

On Tuesday, February 15, 2011 the undersigned attempted to do the weekly ALPR Updates and discovered problems with the connectivity in the 702 Car. The PAGIS program will not allow the updates to go through and will not read any plates.

The undersigned called Anthony from GTBM (creator of InfoCop and ALPR) and notified him of the problems with the ALPR system. Anthony stated that he will be contacting his boss and will be sending a representative to TARU either today (February 15, 2011) or tomorrow (February 16, 2011) to fix the problems with the connectivity.

RE: Blackberry Server

DATE: February 14, 2011

FILE REF:

Sir:

On Monday, February 14, 2011 the undersigned attempted to do the weekly ALPR Updates and discovered problems with the connectivity to the Blackberry Server located in MIS. When attempting to update the ALPR, it is necessary to connect to the Blackberry Server. Without connectivity, the ALPR will not receive the required updates.

Every week there has been more and more problems while doing the updates. In previous weeks MIS was notified and was requested to reset/reboot the Blackberry Server. At first the reset worked on the first attempt and TARU was able to get connectivity. Now, the server has gotten to the point where it needs to be reset numerous times during the updates. This has made sending the weekly status report to Deputy Chief DeMaio, when it is due at 1100, impossible.

As of 1100 on February 14, 2011 I have tried to connect to the Blackberry Server nine (9) times (0927, 0940, 0946, 1001, 1020, 1029, 1033, 1040, 1100) and had MIS reset it two (4) times (0928, 0953, 1021, 1041).

Finally, at 1100 I was able to connect to the Blackberry Server and do the updates.

Respectfully submitted,
