Re: LPR Quote

YOU SHOULD RECEIVE 4 PAGE(S), INCLUDING THIS COVER SHEET. IF YOU DO NOT RECEIVE ALL THE PAGES, PLEASE CALL (916) 870-2266.

NOTES: Debbie,

Here is, the LPR quote from Plate Scan. I don't see the point in going after any others since they all started out higher than the Plate Scan quote for the same systems.

The other things I found attractive about the Plate Scan system was:

1. Sac PD is using the same system
2. We may be able to work out an MOU w/SPD that allows us to share their back office system and info.
3. Sac Probation is also using the same system
4. They come to us to do install and training.

Let me know.

Rocky:

I've included a new quote. I have reduced the system price and, with installation, it is less than the original price for the system alone.

I can't do anything about the tax, however. Sorry.

Please let me know if this works for you.

Bob

To: Bob Pinzler
Subject: LPR Quotes

Hey Bob,

We're in the final phase of getting my vehicle ready for the LPRs. Still trying to find out how its going to work with Sac PD and their back office system. I think we're kicking it some \$\$ there, Debbie asked me to get updated "Invoice" type quotes from everyone so we and the County knows exactly what our costs would be. The system you quoted me on before was Part #YS-C-3+1-CR-X for \$21,995.00. I think you said we could get it at that price which would include a back office system. Is that correct? If so can you send a quote for that system which is more complete as if it was an Invoice. If you have a question about that, I would ask that you call Debbie @ (530)666-8396.

FYI- I had the Yakima rack with the Thule box installed on the roof of my car to house the IR cameras.

Thanks Bob.

This is to certify that we have issued a valid Workers' Compensation Insurance policy in a form approved by the California Insurance Commissioner to the employer named below for the policy period indicated.

This policy is not subject to cancellation by the Fund except upon 30 days advance written notice to the employer.

We will also give you 30 days advance notice should this policy be cancelled prior to its normal expiration.

This certificate of insurance is not an insurance policy and does not amend, extend or alter the coverage afforded by the policy listed herein. Notwithstanding any requirement, term or condition of any contract or other document with respect to which this certificate of insurance may be issued or to which it may pertain, the insurance afforded by the policy described herein is subject to all the terms, exclusions, and conditions, of such policy.

Mobile, Transportable and Fixed ALPR
 Effective July, 2009

MOBILE

FULL CAR CONFIGURATIONS

All the following include the **PlateScan Back Office**, a comprehensive **back office** software system with extensive data mining and mapping capability, multi jurisdiction and multi vehicle linkage options, installed on a **department supplied server**.

All full car configuration costs quoted assume that the system will be networked to an existing, compatible in-car computer or MDT with a display or touch-screen mounted in the front of the vehicle.

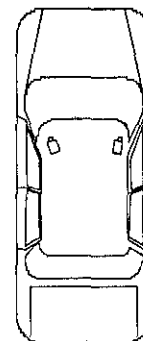

SYSTEM: SYS-A-2-R

(2 external infrared "dual" cameras with color overview)

System contains:

- PlateScan PSC-CPU1 trunk-mounted processor unit with PlateScan ALPR software preinstalled,
- 2 PSC-7 external infrared dual cameras mounted on a "standard" light-bar, and
- full installation kit including all cables and necessary components for mounting the cameras and processor unit

PlateScan

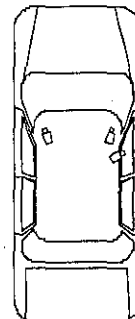

July, 2009

SYSTEM: SYS-B-3-R

(3 external infrared "dual" cameras with color overview)

System contains:

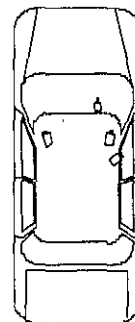

- PlateScan PSC-CPU1 trunk-mounted processor unit with PlateScan ALPR software preinstalled
- 3 PSC-7 external infrared dual cameras mounted on a "standard" light-bar, and
- full installation kit including all cables and necessary components for mounting the cameras and processor unit

**SYSTEM SYS-C-3+1-CR**

(3 external infrared "dual" cameras with color overview and 1 internal color recognition camera)

System contains:

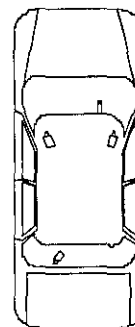

- PlateScan PSC-CPU1 trunk mounted processor unit with PlateScan ALPR software preinstalled
- 3 PSC-7 external infrared dual cameras mounted on a "standard" light-bar
- 1 PSC-C2 internal color recognition camera and
- full installation kit including all cables and necessary components for mounting the cameras and processor unit

**SYSTEM SYS-D-2+2-CR**

(2 external infrared "dual" cameras with color overview and 2 internal color recognition cameras)

System contains:

- PlateScan PSC-CPU1 trunk mounted processor unit with PlateScan ALPR software preinstalled
- 2 PSC-7 external infrared dual cameras mounted on a "standard" light-bar
- 2 PSC-C2 internal color recognition cameras and
- full installation kit including all cables and necessary components for mounting the cameras and processor unit

PlateScan

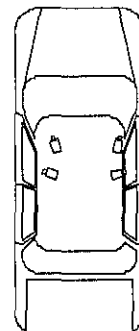

July, 2009

SYSTEM SYS-E-4-R

(4 external infrared "dual" cameras with color overview)

System contains:

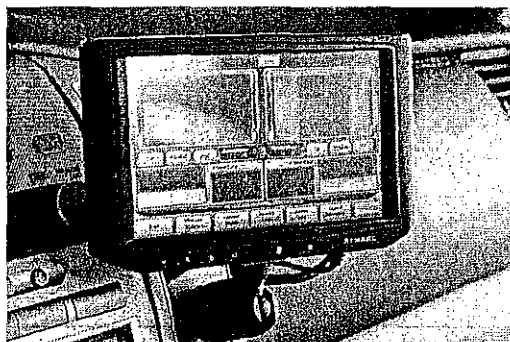

- PlateScan PSC-CPU1 trunk mounted processor unit with PlateScan ALPR software preinstalled
- 4 PSC-7 external infrared dual cameras mounted on a "standard" light-bar
- full installation kit including all cables and necessary components for mounting the cameras and processor unit

**Software maintenance, upgrades and hardware maintenance**

Beyond the first free year, these are available at an annual rate of 13.5% of the initial contract system price (excluding training costs).

Touch screen and keyboard

Should a vehicle not have an available display in the front of the vehicle, PlateScan can provide a touch screen and keyboard.

July, 2009

MDT CONFIGURATIONS

SYSTEM: SYS-MDT-1-C

(1 internal color camera connected to a compatible MDT)

System contains:

- PlateScan ALPR software installed on existing MDT
- Color camera (PSC-C2)
- Frame grabber
- Camera mount

SYSTEM: SYS-MDT-2-C

(2 internal color camera connected to a compatible MDT)

System contains:

- PlateScan ALPR software installed on existing MDT
- 2 color cameras (PSC-C2)
- 2 frame grabbers
- Camera mounts

July, 2009

PlateScan Back Office (PS-DAM)

A comprehensive **back** office software system with extensive data mining and mapping capability, multi jurisdiction and multi vehicle linkage options, installed on a department supplied server.

Options:

Touch screen and keyboard

With full vehicle configurations, should a vehicle not have an available display in the front of the vehicle, PlateScan can provide a touch screen and keyboard.

Software maintenance, upgrades and hardware maintenance

All systems (**hardware and software**) are warranted for one year.

Full car configurations and MDT **configurations**:

Beyond the first free year, these are available at an annual rate of 13.5% of the initial contract system price (excluding training costs).

July, 2009

TRUNK-PC COLOR CONFIGURATIONS

All the following include the PlateScan **Back Office**, a comprehensive **back office** software system with extensive data mining and mapping capability, multi jurisdiction and multi vehicle linkage options, installed on a **department** supplied server.

All configuration costs quoted **assume** that the system will be networked to an existing, compatible **in-car** computer or MDT with a **display** or touch-screen mounted in the front of the vehicle.

SYSTEM: SYS-T-1-C

(1 color camera connected to a recognition computer mounted in vehicle trunk)

System contains:

- PlateScan PSC-CPU1 trunk mounted processor unit with PlateScan ALPR software preinstalled
- 1 PSC-C2 color recognition camera
- full installation kit including all cables and necessary components for mounting the cameras and processor unit

SYSTEM: SYS-T-2-C

(2 color cameras connected to a recognition computer mounted in vehicle trunk)

System contains:

- PlateScan PSC-CPU1 trunk mounted processor unit with PlateScan ALPR software preinstalled
- 2 PSC-C2 color recognition cameras
- full installation kit including all cables and necessary components for mounting the cameras and processor unit

SYSTEM: SYS-T-3-C

(3 color cameras connected to a recognition computer mounted in vehicle trunk)

System contains:

- PlateScan PSC-CPU1 trunk mounted processor unit with PlateScan ALPR software preinstalled
- 3 PSC-C2 color recognition cameras
- full installation kit including all cables and necessary components for mounting the cameras and processor unit

July, 2009

SYSTEM: SYS-T-4-C

(4 color cameras connected to a recognition computer mounted in vehicle trunk)

System contains:

- PlateScan PSC-CPU1 trunk mounted processor unit with PlateScan ALPR software preinstalled
- 4 PSC-C2 color recognition cameras
- full Installation kit including all cables and necessary components for mounting the cameras and processor unit

PlateScan Back Office (PS-DAM)

A comprehensive **back office software system** with extensive data mining and mapping capability, multi jurisdiction and multi vehicle linkage options, installed on a department supplied server.

Options:

Touch screen and keyboard

With full vehicle configurations, should a vehicle not have an available display in the front of the vehicle, PlateScan can provide a touch screen and keyboard.

Software maintenance, upgrades and hardware maintenance

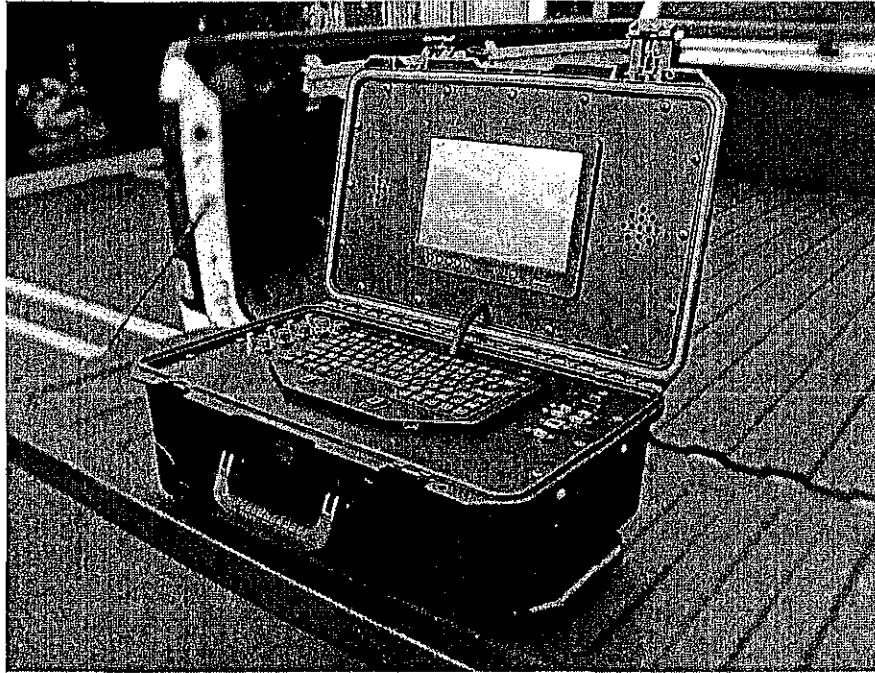

All systems (**hardware and software**) are warranted for one year.

Beyond the first free year, these are available at an annual rate of 13.5% of the initial contract system price (excluding training costs).

July, 2009

TRANSPORTABLE CONFIGURATIONS

PlateScan's portable automatic license plate system offers its users the power of a fully configured in-vehicle system with the flexibility to be easily moved from place-to-place and vehicle-to-vehicle. It can run from one to four cameras simultaneously, including any combination of infrared and color cameras.

The system consists of two ruggedized cases. One contains the recognition computer, keyboard, monitor and connections for attaching cameras, memory sticks and GPS devices. The other contains cameras, cables, mounts and other supporting equipment.

This portable system can operate directly from a 12v DC source, such as a pair of cigarette lighters, or from 110v AC, connected to the system via a standard power converter. It can be set up and dismantled quickly, enabling the users to respond to tactical changes any situation requires.

Once powered up, the system initializes with the click of one button and will be reading plates within one minute. Any number of databases of "vehicles of interest" can be loaded into the system either wirelessly or manually via memory stick. If the system is connected wirelessly to a central server, matches to license plates listed in those databases can be automatically transmitted, enabling the agency to act on them accordingly.

All plate reads can also be stored in the portable system for later use or batched and transmitted back to a central server on a regular schedule so that data analysts and other

July, 2009

Interested users can make use of the information quickly. This information can be automatically entered into PlateScan's powerful back office data management system, PlateScan Connect.

When the operation is completed, a single click of the same button automatically shuts the system down safely and turns the power off.

All the following include **PlateScan Connect**, a comprehensive back office software system with extensive data mining and mapping capability, multi-jurisdiction and multi-vehicle linkage options, installed on a department supplied server.

SYSTEM: SYS-AP-2-R

(2 external infrared "dual" cameras with color overview)

SYSTEM SYS-DP-2+2-CR

(2 external infrared "dual" cameras with color overview and 2 internal color recognition cameras)

SYSTEM SYS-EP-2+1-CR

(2 external infrared "dual" cameras with color overview and 1 internal color recognition camera)

SYSTEM SYS-FP-2-C

(2 internal color recognition cameras)

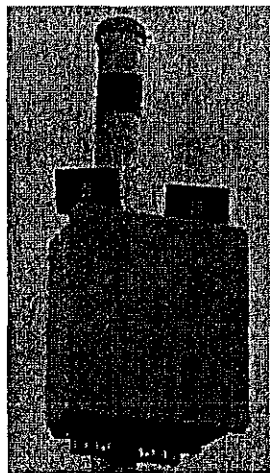

Software maintenance, upgrades and hardware maintenance

Beyond the first free year, these are available at an annual rate of 13.5% of the initial contract system price (excluding training costs).

July, 2009

FIXED CONFIGURATIONS

PlateScan's fixed position automatic license plate system can run one or two cameras capable of covering one or two traffic lanes, respectively.

The system consists of a ruggedized, NEMA-approved enclosure containing the recognition computer, power management equipment, keyboard, monitor and connections for attaching cameras cables, mounts, wireless communication hardware and software, if necessary, and other supporting equipment. Either one or two "dual" PSC-R7 cameras, depending on the order, are also included.

This system operates directly from 110v AC. It will continuously read plates recording each read and alerting designated recipients of database matches. Date, time and camera location will be "stamped" on each plate recognition event.

Any number of databases of "vehicles of interest" can be loaded into the system automatically. If the system is connected wirelessly or by phone connection to a central server, matches to license plates listed in those databases can be automatically transmitted, enabling the agency to act on them accordingly.

All plate reads can also be stored in the system for later use or batched and transmitted back to a central server on a regular schedule so that data analysts and other interested users can make use of the information quickly. This information can be automatically entered into PlateScan's powerful back office data management system, PlateScan Connect.

Each the following include **PlateScan Connect**, a comprehensive back office software system with extensive data mining and mapping capability, multi-jurisdiction and multi-vehicle linkage options, installed on a department **supplied** server.

Rocky,

Attached is the budgetary pricing you inquired about today. Please note that the pricing is even less expensive by \$1,612, if you do not include the PDRC (Monitor), which you wouldn't need.

It was a pleasure speaking with you and I hope we can work together in the near future.

Sincerely,

Michael Harlow

EXECUTIVE SUMMARY

VisoMetrix is pleased to have the opportunity to present budgetary pricing for YOLO COUNTY DA/ SACCATS. We understand the crucial role that proactive video surveillance plays in law enforcement, we are confident that our VisoMetrix technology will become an invaluable tool to you and your police officers.

The following is a description of VisoMetrix License Plate Recognition (LPR) Solution:

- A streamlined processor unit running the VisoMetrix LPR Engine.
- Computer server software to be deployed at a centralized location. The VisoMetrix Back Office software application for data management and for data mining.
- Camera assemblages including a color overview camera, an Infra-red license plate camera, and an infra-red illuminator. Both cameras have variable focus lenses with a range to 75 feet that can be remotely focused via software.

Features:

- **Back Office** > searches can be conducted based on time, date, license plate, partial license plate, or address/location (i.e. lanes). Results are plotted on a detailed map and can be interfaced with other data.
- **Geo Fencing** > perimeters can be defined around specified points and alarms generated when a given plate enters the defined space.

Our experience is that LPR systems significantly augment existing surveillance techniques: the quick training and simplified interface results in improved performance and employee satisfaction.

It is important to note that LPR technology is only as good as the input it gets and so where license plates are missing, badly damaged or obscured, then the system should not be expected to translate the image into a valid recognition. VisoMetrix LPR technology uses the best techniques and methods to get the highest accuracy of any competitive alternatives.

In summary, the reality of practical and environmental conditions can challenge system performance.

We guarantee is that our system will give the highest possible rates of detection from the images we capture and analyze.

The entire VisoMetrix organization stands behind every sale: we draw upon technical and sales resources to address unique customer requirements. Our team is headquartered in Foothill Ranch, California where software development, sales engineering, and technical support are based. We are a dedicated team that stands behind its customers, ensuring your satisfaction.

The VisoMetrix support for the YOLO COUNTY DA/ SACCATS will be led by members of our team:

- Michael Harlow Vice President, Sales & Marketing
- Jeremiah Orlando Technical Services

We look forward to building a long and successful business relationship with the YOLO COUNTY DA/ SACCATS.

THE VISOMETRIX DIFFERENCE

What makes VisoMetrix different to many companies that offer similar solutions is the combination of features and dedication to customer support that define our business:

Open Standards > the VisoMetrix LPR solution is built on open industry standards. By employing open standards throughout, you always have access to state-of-the-art technology that enables your system to be easily expanded and upgraded throughout its operational life. Moreover, there is no lock-in to proprietary add-ons: VisoMetrix chooses the best-in-class solutions to integrate with our own technology.

Scalability > we ensure your system has the capability to expand without limit – and that includes multiple locations, vast storage arrays and integration with other systems as your needs evolve and your requirements expand.

Intuitive User Interface > an easy-to-use Graphical User Interface (GUI) simplifies the wealth of features within VisoMetrix. In this way, training costs are lowered and deputies quickly pick up the power of the system.

Service & Support > VisoMetrix is committed to establishing and maintaining long-term relationships with our customers. Our claim to support our customers throughout the life of their video surveillance system is backed-up by the many long-term relationships we've developed, and the fact that nearly all of our customers return to VisoMetrix as their businesses grow.

COMPANY PHILOSOPHY

VisoMetrix understands the value of building long-term relationships with our customers. Not only does it ensure follow-on business, but it creates a more satisfying environment for your staff and ours. Building partnerships with our customers is important to us. This is why our customers stay with us, because our technologies evolve with their needs and we have offered cost effective expansion.

We're committed to our customers' success – and we enable our technologies to perform in the most demanding of settings. Our technical support team offers an immediate response to your phone calls or email.

In short, we're proud that our company ideology is apparent through our products, and in the performance of our people.

**PROPOSED AUTOMATED LICENSE PLATE RECOGNITION SOLUTION FOR THE YOLO COUNTY DA/
SACCATS.**

STATEMENT OF WORK

It is understood that YOLO COUNTY DA/ SACCATS wishes to obtain budgetary pricing for 4 scenarios.

COST PROPOSAL

This proposal outlines a multi-channel mobile VisoMetrix automated license plate recognition system.
This system will consist of:

1 Camera System with Back Office (Full System)

	VisoMetrix Model #	VISO METRIX	Per Unit	Extended Cost
One-Camera Law Enforcement Package	Vision75	Vision75 - Camera Assemblage (includes a vari- focal LPR camera module, a vari-focal color overview camera module and vari-focal infra-red illuminator). Range - 8' to 75' vari-focal and illumination.	\$ 2,596	1 \$ 2,596
VMP Processor	VMP	Ruggedized PC with VisoMetrix LPR software engine installed - for mobile or fixed applications	\$ 5,495	1 \$ 5,495

Database Management and Data mapping Sharing Admin +1 user to be included	OSVR	VisoMetrix Back Office Software Application	\$ -	1 \$ -
Touch Screen Monitor	PDRC	Touch Screen Monitor w/ Keyboard	\$ 1,612	1 \$ 1,612
Installation/Assembly	INSTALL	Installation/Assembly/Training	\$ 1,800	1 \$ 1,800
2-Year Warranty (Parts/Labor), On-site	WARRANTY	2-Year Warranty (Parts/Labor), On-site	\$ 1,113	1 \$ 1,113
TOTAL:				1 \$ 21,754 \$ 24,897

SET-UP & COMMISSIONING

VisoMetrix will install the LPR system for the YOLO COUNTY DA/ SACCATS outlined in this proposal, ensuring that it is not only functional, but optimized for the environment. This high level of service and support is included in the quoted price below. Only that equipment specifically listed in the quote above is included in this quotation.

COMMERCIAL TERMS

- These Budgetary Numbers are valid for acceptance for 30 days after date of issue.
- Payment of Invoices within 30 days from date of invoice.
- VisoMetrix and GateWorks Terms and Conditions of Sale will apply.
- Applicable taxes will apply.
- Delivery of LPR System -60 days or sooner, from date of P.O.

EXTENDED TECHNICAL SUPPORT OPTIONS

Extension to your Hardware Warranty and Software Maintenance Agreement are available as an option in 1, 2 and 3 year increments to ensure the reliability and effectiveness of your VisoMetrix system, and to enhance it with the latest features on an ongoing basis.

VISOMETRIX SIMPLIFIED WARRANTY

VisoMetrix is committed to our customers: we have developed a simplified warranty to ensure that each and every client is satisfied with their investment in our technology.

Our License Plate Recognition system is warranted for two (2) years from the date of purchase.

THE FINE PRINT: The Product must be operated in conformance with relevant installation, environmental, mechanical and electrical requirements. Malfunction which is the result of misuse, abuse, vandalism, or improper installation is not covered. All service must be performed by VisoMetrix employees or factory authorized installers for the warranty to remain valid. Interconnected hardware and networks must meet or exceed the specifications contained in this proposal. The foregoing warranty is subject to buyer's: (a) prompt written claim and (b) timely provision to VisoMetrix of an opportunity to inspect and test the component claimed to be defective.

SUPPORTING OUR CUSTOMERS: Your LPR system software and will be updated for a period of one year from system purchase. You will be entitled to all upgrades and new features that become available.

VisoMetrix provides its customers and partners with direct factory assistance. All of our employees are committed to customer satisfaction, and they are empowered to resolve technical issues.

Regular support is provided on the following basis:

- VisoMetrix will provide telephone support so that local personnel can obtain advice and assistance.
- VisoMetrix personnel will provide *second-line* maintenance. This assumes local personnel will have first attempted to repair faults under the direction of VisoMetrix telephone support.
- If the client cannot fix any fault, a VisoMetrix engineer will visit the site to make the repair.
- Any faulty parts that are returned to VisoMetrix will be repaired or replaced without further charge (Note some faulty components such as disks will have to be discarded because they cannot be repaired). Each party shall be responsible for their own (outgoing) packing, insurance and shipping cost.
- Extension to your Hardware Warranty and Software Maintenance Agreement are available as an option in 1, 2 and 3 year increments to ensure the reliability and effectiveness of your VisoMetrix system, and to enhance it with the latest features on an ongoing basis.

Subject: Vigilant Video Quotes
Attachments: Yolo_4_Cam_Site_Server.pdf; Yolo_DA_2_Site_Server.pdf; Yolo_3_Cam_Site_Server.pdf

Rocky,

I apologize for the delay in documents/quotes. After my dental appointment I was out for the count, then I traveled all last week.

So without further delay, please find your 2,3,4 camera quotes above to include the Server Hardware. We can reduce each quote by \$6,100.00 by removing the Server Hardware and Licensed Software MYSQL, and Windows if you have your own Server and Licensed Software.

Everything else is needed to operate and install the Car Detector Systems Software (which comes with the purchase). The Site License is a one time fee. Should any systems be purchased in the future, this fee would not be charged, just the cost of the camera system, and set up. So it gets cheaper to add future systems, once the initial purchase has been made.

www.vigilantvideo.com is our manufacturers website, if you haven't already looked around.

www.wattco.net is my rep group site.

Please call or email me with any questions, or if you'd like to make any changes to the quotes. I can also send over some documents on the cameras, server minimum requirements, and computer minimum requirements if you'd like to review those as well.

Thanks,

Michael McGee

Please review this quote carefully. If complete and accurate, you may place your order online at www.dell.com/qto (use quote number above). POs and payments should be made to *Dell Marketing L.P.*

If you do not have a separate agreement with Dell that applies to your order, please refer to www.dell.com/terms as follows:

If purchasing for your internal use, your order will be subject to *Dell's Terms and Conditions of Sale-Direct* including Dell's U.S. Return Policy, at www.dell.com/returnpolicy#total. If purchasing for resale, your order will be subject to *Dell's Terms and Condition of Sale for Persons or Entities Purchasing to Resell*, and other terms of Dell's PartnerDirect program at www.dell.com/partner. If your order includes services, visit www.dell.com/servicecontracts for service descriptions and terms.

Quote information is valid for U.S. customers and U.S. addresses only, and is subject to change. Sales tax on products shipped is based on "Ship To" address, and for downloads is based on "Bill To" address. Please indicate any tax-exempt status on your PO, and fax your exemption certificate, with seller listed as *Dell Marketing L.P.*, to Dell's Tax Department at 800-433-9023. Please include your Customer Number.

For certain products shipped to end-users in California, a State Environmental Fee will be applied. For Asset Recovery/Recycling Services, visit www.dell.com/assetrecovery.
