All,

Please see the attached screen shots of the new CVE HSIN Portal. (b)(6) will be presenting the new HSIN portal in the CVE WG meeting tomorrow, so if possible, please try to attend in person. For those who will be dialing in, please refer to the attached screen shots.

Thanks,

(b)(6)

 Subject: HSIN CVE Portal Update
 Importance: High

The HSIN engineers have done a great job of rebuilding the HSIN site for CVE Training and Resources in a day.

Attached are some screen shots of the new lay out. There are still tweaks to be made, for example on the SME pages, I have asked to standardize the view to have the picture, Name, Topic area of expertise and contact information on the graphic.

There are also some files and folders that were in foster homes during the rebuild that need to be put back with their appropriate families.

Let me know what comments you have
