Project Narrative (Joint) – Attachment 1

Edward Byrne Memorial Justice Assistance Grant (JAG) Program FY 2010 Local Borough of Paramus, City of Hackensack, Township of Teaneck- Bergen County NJ Joint Application

The joint application by the referenced three Bergen County, New Jersey, municipalities fully utilizes their JAG funding allocations in areas most needed within their respective communities. The funding requests support components of the criminal justice system that will have maximum impact within their jurisdictions while addressing issues deemed as priorities by their Governing Bodies. Their application of JAG funds will certainly improve the effectiveness and efficiency of their criminal justice systems, processes and procedures while strengthening their capacities to provide mutual aid and joint services on all levels to other agencies throughout the county, region and state.

The **Borough of Paramus** proposes technology infrastructure improvement programs that will expand and enhance the areas of: law enforcement programs; prosecution and court programs; corrections and community corrections as well as planning, evaluation and technology. The borough's proposal will augment its criminal justice information systems to assist law enforcement, prosecution, courts and corrections' organizations, including an automated fingerprint identification system.

The proposed Paramus Police Department's (PPD) improvements to its Management Information Systems will provide the added administrative support it has also identified as a priority within its agency.

The Borough of Paramus is located in Bergen County approximately 13 miles from the George Washington Bridge and 20 miles from the Lincoln Tunnel, both of which connect northern NJ to Manhattan. Paramus is 10.75 square miles with a

population of approximately 28,000; there are 8,209 residential and 2,465 commercial properties throughout the borough. Paramus is intersected by State Highways 4 and 17 as well as the Garden State Parkway. There are several extremely large shopping malls within the community, miles of strip malls and a substantial number of retail stores; in fact, it is one of the largest shopping areas in the country with over \$5 billion in annual retail sales, more than any zip code in the U.S. There are also several light industrial parks as well as numerous office complexes. Because of its commercial activity, Paramus' daytime population swells to an astonishing 350,000 people. Paramus is home to three Tier 1 critical infrastructure shopping malls so it remains imperative that the PPD maximize technology to ensure the safety and well-being of the over 350,000 that frequent the borough daily.

Through its requested JAG funds, the PPD will install a core data switch in its criminal justice information network to further develop its system infrastructure and facilitate an effectual flow of data through its internal and external systems. At the foundation of an agile, scalable data center is a reliable, secure, energy-efficient network switching and routing infrastructure; a flexible and agile network foundation that reduces complexity is critical to rapid service deployment. A core-to-edge switch portfolio provides a foundation that delivers rich functionality to ensure an "always-on" network experience for end users. Optimizing application delivery, enhancing employee productivity and ensuring business continuity are benefits a core data switch. Enhanced core data networking will better help the agency adapt to the changing needs of their environment and allow them to better deliver the best available, most adaptive services and solutions to fulfill their public safety mission.

With constant challenges in growing information capabilities, managing costs and mitigating risks, this core data switch lets the PPD deliver one of the best networking solutions to an identified problem. The cost for this core data network switch is \$3,167.

Moreover, a disk array storage device will be installed on the PPD Criminal Information System Network to provide additional records storage as well as increase recovery capability for the system. A disk storage array is predominantly used for shared storage between two clustered servers. Its redundant architecture includes dual active-active RAID controllers, mirrored cache, and I/O multi-patching to achieve a high degree of data availability. It provides more management capability than a simple storage enclosure; and data protection features include the ability to take periodic snapshots or Virtual Disk Copies (VDCs) of critical data - if a file is accidentally altered it is easily recovered by reverting back in time to a previous, trouble-free state.

Specifically, the iSCSI disk storage array enables the connection of servers and storage using a readily available IP network infrastructure. The iSCSI array can be shared by multiple servers on a network, therefore providing a flexible alternative to direct attached storage and potentially a lower cost alternative to a Fiber Channel-based storage network. The cost for this iSCSI disk array is \$7,840.

The **City of Hackensack** first proposes a technology improvement program that will expand and enhance the areas of: law enforcement programs; corrections and community corrections as well as planning, evaluation and technology. A second proposed project would institute another technology-related improvement to enhance the areas of law enforcement programs and planning, evaluation and technology.

The first City proposal will provide the necessary funding to purchase four mobile radios, in the UHF band, for installation in the City's mobile command post as well as three field supervisors' vehicles. Implementation of these radios will undoubtedly expand its channel capacity and function while enabling enhanced communication capabilities with area departments operating on that band.

The second City proposal requests funding to purchase and install roof-mounted LED emergency light bars on marked police vehicles in the Hackensack Police Department's (HPD) patrol fleet. The higher output of the LED lights will enhance the visibility of the police vehicles, which will improve the safety of the officers and the well-being of the general public.

The City of Hackensack is the seat of Bergen County in northeastern New Jersey; 12 miles from mid-town Manhattan and 7 miles from the George Washington Bridge. The City was named for "Sagamore of Hacquinsacq," the Lenni Lenape Chief Oratam, who deeded the land to early settlers in 1664. Hackensack's 42,521 residents occupy 4.6 square miles; with a density of 9,243.7 persons per square mile. The city's population is 25.5% African-American, 52.4% White, 7.9% Asian American, and 34.3% Hispanic and Latino. As the county seat, the city houses county and state courts, the administrative offices of Bergen County, the County Department of Public Works, and the County Police Department. The city also hosts Federal Bureau of Investigation, the Treasury Department, and Social Security Services offices. The Hackensack University Medical Center, a 781-bed teaching and research hospital that provides the largest inpatient and outpatient services provider in NJ and the fourth largest in the nation, is rated by HealthGrades as one of America's 50 best hospitals. NJ Routes 4, 17, 46 and I-80 all run

through the city, granting shoppers easy access to its Main Street Shopping District. Its commercial and government activities swell Hackensack's daytime population to nearly three times its number of residents.

The HPD is continually upgrading its communications equipment and capabilities in a concerted effort to maintain compliance with current and impending FCC mandates, as well as enhance our interoperability aptitude with other public safety agencies.

Through this funding opportunity, the HPD plans to purchase four mobile radios in the UHF band to be installed in our mobile command post as well as our three field supervisors' vehicles. The new radios will expand our channel capacity and functionality which will amplify our communication wherewithal with area departments operating on that band in the event of an incident requiring multi-agency response, as well as enabling the use of additional statewide interoperability channels.

The HPD police vehicles' present light bars use mechanical rotators and incandescent lights which puts a large demand on the vehicle's electrical and charging systems. In addition, with the normal wear and tear of moving parts, replacement and repair items are often necessary and have become increasingly difficult to find. This is especially true with the older units, many of which date back to the late 1980's and early 1990's.

Current technology has progressed to LED-based lighting equipment, which incorporates no moving parts and uses much less power from the vehicle's electrical systems while providing much greater light output. The result is extended life for the vehicle's charging and wiring systems. At the same time, the improved visibility provides an additional margin of safety for the officers as well as the general public, whether in a

response situation where the vehicle must make its presence known in varying traffic conditions, or in a stationary position at the scene of an emergency where oncoming vehicles must be alerted to potential hazards.

Further, the light bars will offer “side to side” visibility; they are bright all around, so the department is able to offset cars in traffic stops to protect the officer. It is critical to ensure that the vehicle with a light bar is just as bright when parked at an angle as when it is parked parallel to the highway.

The **Township of Teaneck** proposes a technology program that will expand and enhance the areas of law enforcement programs; prosecution and court programs; corrections and community corrections as well as planning, evaluation and technology. The township’s proposal will augment its criminal justice information systems and existing technology to assist in law enforcement, investigations, crime fighting as well as prevention.

In an ongoing effort to achieve maximum efficiency while meeting the demands of a public who depend on them, the Township of Teaneck Police Department (TPD) plans to purchase a complete Mobile Automatic License Plate Recognition (ALPR) System. Purchase of the system will provide a powerful resource and technology and its implementation permits the TPD to pursue a wide and diverse range of new and enhanced policing strategies. Overall, the ALPR system will improve overall operational efficiency and productivity and consequently enhance public safety.

The Township of Teaneck has a rich history going back to the 17th century, when Dutch Settlers first recorded the existence of trade routes and campsites near the Hackensack River. This Bergen County Township was officially established on February

19, 1895. It has a population of 40,967, living within 6.25 square miles; making it the second-most populous among Bergen County's 70 municipalities; with a density of 6,554.7 people per square mile. According the Census Bureau's 2006-2008 estimate, its white community accounts for 51.8% (21,231 residents); its African-American community 30% (12,310); the Hispanic/Latino community 15.7% (6,470 people), and Asian Americans 10.5% (4,303). Teaneck lies at the crossroads of I-95 and the eastern terminus of I-80; it is bisected north and south by Route 4 and east and west by the CSX Transportation West Shore Line. Located in one of the most densely populated regions of the country; Teaneck is home to a Medical Center, University, Schools, Houses of Worship, Hotels, and it is in very close proximity to New York City.

Basically, mobile automatic license plate recognition (ALPR) is a surveillance method that uses optical character recognition on images to read the license plates on vehicles. By tackling the very heart of the criminals' ability to travel, a whole range of criminality can be prevented. Volume crimes such as auto-crime, missing persons and burglary at one end of the spectrum, right up to terrorism, drug-trafficking and homicide at the other end can be more effectively policed using ALPR technology.

Research has shown that patrol officers equipped with the technology can be as much as *twelve times* as effective, in terms of performance, than officers working without it. This will deliver reductions in crime, augment community safety and boost safer roads.

The technology is extremely effective; it can be employed in tandem with an intercept team or the data can be gathered and instantly compared to any number of databases with policing tactics decided after careful evaluation of the data. Even though the most common uses are the identification of stolen vehicles, felony warrants, Amber

Alerts and parking violations; the integration with other essential database and records sources can achieve stunning results. Web-based interoperable software allows for the sharing of tactical crime information in real time. The technology provides a conduit to mobile police units and surrounding jurisdictions enabling them to wirelessly update their databases either via a hot zone or continually if a wireless structure is in place.

A complete License Plate Recognition System offers a platform to provide mobile, on-the-fly, license plate reading, surveillance and analysis. The types of advanced system that the TPD intends to acquire provides on board storage, and remote access for database updates, data offload, and video records retrieval as well as permitting "hot list" information to be entered or imported into the on-board computer system to supply flag and alert information to the operator for license plates that have been designated as plates of interest through local and national databases.

TPD plans to select a system designed for use in Law Enforcement patrol vehicles. By delivering mobile license plate recognition while cruising on patrol, scanning parking lots or stationed at check points; these systems seamlessly integrate with the Law Enforcement Archival Reporting Network (LEARN), Vigilant Video's data management solution. In fact, even though the system is being used by a patrol officer for one purpose, if it relates to an on-going investigation, the technology will confidentially email the investigative officer of the case.

The acquisition of this system allows the TPD to focus on better serving and protecting the public. As stated above, the mounted, in-vehicle system increases performance and efficiency and permits data to be quickly and securely exchanged between the officer, the vehicle and the agency's central computer. The capability of

instant access to crime databases and subsequently suspect data, the ability to secure information on public dangers and the capacity to obtain accurate identifications, all in a swift and timely manner, enables officers to prevent crime in a most efficient manner. Not only is this degree of communications paramount in today's law enforcement environment, but it also can save time and lives.

Funding for the aforementioned projects will provide the tools for these three Bergen County communities to better implement their respective community policing strategies as well as enhance community partnerships, organizational and structural capacity and law enforcement initiatives.

The Borough of Paramus, the City of Hackensack and the Township of Teaneck thank the BJA for the opportunity to apply for 2010 JAG funding.

Budget & Budget Narrative – Attachment 2

Edward Byrne Memorial Justice Assistance Grant (JAG) Program FY 2010 Local Borough of Paramus, City of Hackensack, Township of Teaneck- Bergen County NJ Joint Application

The investment of JAG funds by the **Borough of Paramus** will be for equipment to enhance its Management Information Systems and its Criminal Information System Network. The two pieces of equipment the municipality will purchase are:

The selected data core switch, which will consist of a modular chassis that provides a flexible, cost-effective LAN solution as an alternative to stackables. The switch offers a proven chassis form factor with high quality and reliability in 10/100 and 10/100/1000 scalable solutions that integrate easily into any network. 64MB ram, 24MB flash, 1GBPS transfer rate, and an mpc8245: 330 MHz processor makes this an ideal choice for this technology upgrade.

Cost of data core switch = \$3,167

The selected iSCSI disk array will be a next generation iSCSI SAN solution, ideal for entry-level storage consolidation in virtualized environments that require high availability; high performance designed to deliver storage consolidation and data management capabilities. The array will consolidate up to 16 full redundant servers (hosts), expand to support up to 90TB of data and up to 45 disk drives; supports SAS and SATA drives.

Cost of iSCSI disk array = \$7,840

Borough of Paramus JAG Funding Request = Equipment = \$11,007

The investment of JAG funds by the **City of Hackensack** will be for equipment to expand and enhance its communications network and to ensure the safety of its officers

and the well-being of the public through the acquisition of roof-mounted emergency light bars. The equipment the municipality will purchase is:

The City of Hackensack will purchase and install four Motorola XTL2500 radios (with antenna) to our mobile command post and three field supervisors' vehicles. Each radio is estimated to cost \$2,369 with installation slated at \$150.00 per radio for a total of \$2,519 per unit; or a total appropriation of \$10,076. The new radios will expand the HPD channel capacity and functionality, which will amplify its communication wherewithal with area departments operating on that band in the event of an incident requiring multi-agency response; it further enables the use of additional statewide interoperability channels.

Total cost for radios = \$10,076

Also, through this funding opportunity, the HPD plans to have six marked police cars equipped with roof-mounted Sound Off Systems EPL9000 LED emergency light bars to replace the present outdated mechanical/incandescent ones. The absence of moving parts and improvements in technology will reduce the demands on the vehicle's electrical and charging systems thereby helping to extend the life of the vehicle, as well as minimizing the long term need for repair and replacement of parts on the light bars. Based on recent purchases and cost research, the HPD anticipates the cost of equipment, installation and software to be approximately \$1,480 (\$1,330 for light bars and \$150 for installation) per vehicle. The total for six vehicles would therefore be \$8,880.

Total cost for emergency light bars = \$8,880.

City of Hackensack JAG Funding Request = Equipment = \$18,956

The investment of JAG funds by the **Township of Teaneck** will be for equipment to implement a Mobile Automatic License Plate Recognition (ALPR) System to expand and enhance its law enforcement, investigative and community policing initiatives. Purchase of this license plate reader system will assist officers and personnel and help fight crime, enhance public safety and allow the TPD to better serve the residents of its community. The equipment the municipality will purchase is:

A complete Mobile Automatic License Plate Recognition System, which includes installation of a high resolution camera, a pan & tilt drive system and other related onboard equipment and software; the acquisition will also include a service to exclusively support the system and Headquarters operations and integration. The system will include all recognized, established and applicable departmental, county, state and federal databases and software installed.

All equipment as well as installation and training @ \$16,330 (\$14,730 equipment and \$1,600 installation and training). Total project amount of \$16,330; funding request through JAG allocation is \$9,997; non-federal share/balance is \$6,333.

Township of Teaneck JAG Funding Request = Equipment = \$9,997

Note: All equipment will be put out to public bid pursuant to open public contract laws or vendors on the State Contract lists will be used in compliance with open public contract laws.

Review Narrative – Attachment 3

Edward Byrne Memorial Justice Assistance Grant (JAG) Program FY 2010 Local Borough of Paramus, City of Hackensack, Township of Teaneck- Bergen County NJ Joint Application

Pursuant to grant requirements, the Borough of Paramus, City of Hackensack and the Township of Teaneck have made the 2010 Local Solicitation grant application available for review by their respective Governing Bodies; said action was more than 30 days before the submittal of their joint application on June 30, 2010. Because of the prior scheduling of the respective Governing Body meetings, we are unable to provide Resolutions at this time documenting such actions; however, once adopted by the respective Governing Body, and once all are received by the lead agency, Borough of Paramus, the Resolutions will be forwarded to DOJ, OJP, BJA.

As part of the Resolutions submitted, it will be specified that an opportunity to comment was provided to the municipalities' citizens pursuant to applicable law and established procedures. The municipalities participating in this joint application will comply with this 30-day public comment period.

The City of Hackensack's Mayor and Council is prepared to address this grant opportunity at their meeting scheduled for July 13, 2010. At this time the Council will pass a resolution accepting and supporting the projects listed in this grant opportunity, will initiate a Memorandum of Understanding with partner police department(s) and will open the meeting for public comment. Copies of the grant request will be available for public review and there will be a 30 day window of opportunity for residents and business owners to cast their remarks. All public statements and commentaries will be

properly logged and recorded and will be made available to the Granting Agency for review along with the authorizing resolution.

The Borough of Paramus and the Township of Teaneck will address the grant opportunity at their next meetings and will adhere to the procedures outlined by Hackensack immediately above.

**Memorandum of Understanding (MOU)
Disparate Allocation
Statement**

**Edward Byrne Memorial Justice Assistance Grant (JAG) Program FY 2010 Local
Borough of Paramus, City of Hackensack, Township of Teaneck- Bergen County NJ
Joint Application**

The MOU between the Borough of Paramus and the City of Hackensack and the Township of Teaneck is currently being worked on by all parties. After all appropriate and applicable action is taken by their respective Governing Body's, a copy will be forwarded to BJA.

Thank you for your understanding of this situation.

INTERLOCAL DIVISION OF GRANT FUNDS AGREEMENT

THIS AGREEMENT, is made this 13 July 2010 by and between of the BOROUGH OF PARAMUS, a Municipal Corporation of the State of New Jersey, with offices located at One Jockish Square, Paramus, New Jersey 07652 ("Paramus") and each of the following government entities:

- A. The City of Hackensack, having offices at 65 Central Avenue, Hackensack, NJ 07601 ("Hackensack");
- B. The Township of Teaneck, having offices at 818 Teaneck Road, Teaneck, NJ 07666 ("Teaneck").

Failure of this agreement to be signed by authorized representatives of one or more of the above entities shall render the agreement ineffective as to that entity only and shall remove that entity as a party to this agreement, but shall not void this agreement as between the parties who have signed hereto.

WHEREAS, the Paramus applied for an Edward Byrne Memorial Justice Assistance Local solicitation FY2010 Multi-Jurisdiction Justice Assistance Grant (the "JAG"), and was notified of the award of the sum of \$43,175 (the "JAG funds");

WHEREAS, the terms of the grant mandated that Paramus act as a judiciary agent submitting an application on behalf of Hackensack, Teaneck and Paramus (collectively "the jurisdictions," individually "jurisdiction"); and

WHEREAS, the Department of Justice will not release the awarded funds without an agreement between the jurisdictions regarding division of the awarded grant fund; and

WHEREAS, the jurisdictions each find that the performance of this agreement is in its best interest, and in the best interest of the public, and that the division of funds is fair and equitable given the above circumstances; and

WHEREAS, the jurisdictions believe it to be in their best interests to divide the JAG funds.

NOW THEREFORE, the jurisdictions agree as follows:

1. Paramus agrees to pay Hackensack and Hackensack agrees to accept JAG funds received from the Department of Justice by Paramus, equaling \$18,956.00
2. Paramus agrees to pay Paramus and Paramus agrees to accept JAG funds received from the Department of Justice by Paramus, equaling \$11,007.00 and \$3,217.00 for administration costs related to grant.
3. Paramus agrees to pay Teaneck and Teaneck agrees to accept JAG funds from the Department of Justice by Paramus, equaling \$9,997.00.
4. Each jurisdiction, by signing this agreement, recognizes that receipt of the JAG funds is contingent upon Paramus receiving the JAG funds from the Department of Justice. If for any reason Paramus does not receive the JAG funds, Paramus shall have no

obligation to pay such funds, or any portion thereof; the jurisdictions shall not have any claim against Paramus, and shall hold Paramus harmless. This paragraph shall not be construed to relieve any other party of the obligations imposed by paragraphs "15" and "16" of this agreement.

5. Each jurisdiction, by accepting the JAG funds listed in Paragraphs "1" through "13" above, represents that it has a plan to utilize the JAG funds for a permitted purpose, and agrees to use the JAG funds in accordance with all terms and conditions attached to the JAG by the Department of Justice.
6. Each party to this agreement shall be responsible for its own actions in utilizing the JAG funds received pursuant to this agreement. No party to this agreement shall be responsible for another party's failure to comply with the terms and conditions of the JAG. Each party to this agreement agrees to indemnify the other parties to this agreement, should the JAG funds be withheld for failure of a party to this agreement to comply with the terms and conditions of the JAG. This paragraph shall not create any liability on the part of Paramus should the department of Justice refuse to provide the JAG funds for any reason relating to the process of applying for the JAG or arranging for division of the JAG funds.
7. All provisions of law which are not enumerated in the agreement but which are required to be made a party of this agreement are hereby deemed incorporated herein.
8. This document contains the entire agreement between the parties and supersedes any prior agreements of the parties with respect to its subject matter. This agreement may only be altered by a written amendment signed by the authorized representative of each party to this agreement.
9. Nothing in this agreement shall create or give to third parties any claim or right of action against the parties to this agreement beyond such as many legally exist irrespective to this agreement. Furthermore this agreement shall not create any rights in any party not a signatory hereto.

IN WITNESS WHEREOF, the parties hereto have caused this Interlocal agreement to be executed by their duly authorized representatives on the day and year first above written. This agreement may be executed in counterpart, the integration of all signature pages constituting the final agreement hereto.

AUTHORIZING 2010-2011 MULTI-JURISDICTION JUSTICE ASSISTANCE GRANT ("JAG") IN THE AMOUNT OF \$43,175.00 FOR THE PURPOSE OF IMPROVING THE POLICE DEPARTMENT'S MANAGEMENT INFORMATION SYSTEMS AND TECHNOLOGY INFRASTRUCTURE

WHEREAS, the Borough of Paramus has received notice of and applied for a FY 2010-2011 Multi-Jurisdiction Justice Assistance Grant ("JAG") in the amount of forty-three thousand, one hundred and seventy-five dollars (\$43,175.00) for the purpose of improving the Police Department's management information systems and technology infrastructure;

WHEREAS, the terms of the Grant require that the fund be shared with the City of Hackensack and the Township of Teaneck; and

WHEREAS, Bergen County did not qualify for a direct award from BJA; but in compliance with JAG legislation must remain a partner with the local jurisdictions receiving funds and enter as a signatory on the required Interlocal Division of Grant Funds Agreement or any Memorandum of Understanding; and

WHEREAS, the Borough of Paramus notified the City of Hackensack and the Township of Teaneck of said Grant Award; and

WHEREAS, the Borough of Paramus shall receive \$11,007 in JAG funds as well as \$3,215 in administrative fees through the JAG grant; and

WHEREAS, the Borough of Paramus shall pay to the City of Hackensack \$18,956 and to the Township of Teaneck \$9,997 in allocated JAG funds; and

WHEREAS, the Borough of Paramus has agreed to provide for all reporting requirements which may be required by the grant; and

WHEREAS, the Borough of Paramus reviewed all related documents to said Grant Award and found them acceptable and the Governing Body recommends participation in the Grant; and

WHEREAS, the Mayor and Borough Council through the introduction of this Resolution, gives the citizens of the Borough of Paramus an opportunity to publicly comment on the Grant.

NOW, THEREFORE BE IT RESOLVED that the Mayor and Borough Council of the Borough of Paramus agrees to the submittal of this Grant on behalf of the Borough of Paramus and all of the parties noted herein; and

FURTHER BE IT RESOLVED that the appropriate Municipal Officials be and are hereby authorized to execute an Interlocal Division of Grant Funds Agreement with the City of Hackensack, the Township of Teaneck and the County of Bergen.

Approved: July 20, 2010 by a roll call vote.

Certification

I, Toni Falato, RMC, Municipal Clerk of the Borough of Paramus in the County of Bergen and the State of New Jersey do hereby certify that the foregoing resolution is a true copy of the original resolution duly passed and adopted by the Governing Body at the meeting of July 20, 2010

 Seconded: C. Toffler

WHEREAS, the Borough of Paramus applied for an Edward Byrne Memorial Justice Assistance Local solicitation FY 2010 Multi-Jurisdictional Justice Assistance Grant (the "JAG") for the purpose of funding the Recovery and Reinvestment Act of 2009, and was notified of the award of the sum of \$43,175 (the "JAG funds"); and

WHEREAS, the terms of the grant mandated that Paramus acts as a judiciary agent submitting an application on behalf of Hackensack, Teaneck, and Paramus (collectively "the jurisdictions", individually "jurisdiction"); and

WHEREAS, the Department of Justice will not release the awarded funds without an agreement between the jurisdictions regarding division of the awarded grant funds; and

WHEREAS, the jurisdictions each find that the performance of this agreement is in its best interest, and in the best interest of the public, and that the division of funds is fair and equitable given the above circumstances; and

WHEREAS, the jurisdictions believe it to be in their best interests to divide the JAG funds; and

WHEREAS, the Borough of Paramus notified the Township of Teaneck of said grant award in June of 2010; and

WHEREAS, the Township of Teaneck's funding shall be \$9,997 said amount determined by the Borough of Paramus; and

WHEREAS the Borough of Paramus has agreed to provide for all reporting requirements which may be required by the grant; and

WHEREAS, the Township Attorney has reviewed all related documents to said grant award and advised they are acceptable and the Municipal Manager recommends participation in the grant.

NOW, THEREFORE BE IT RESOLVED that the appropriate Municipal Officials be and hereby authorized to execute an inter local division of grant funds agreement.
