TERRORISM

(U//FOUO) FY20 Overview: Terrorist Incidents Impacting Critical Infrastructure and Religious Institutions in the Homeland

(U//FOUO) This *Reference Aid* provides an overview of terrorist attacks and plots that specifically targeted one or more of the 16 critical infrastructure sectors and religious institutions in the United States from 1 October 2019 – 1 October 2020. This overview surveys the threat actors, tactics and targets, ideologies, and motives involved in these incidents and is based on a body of open source and law enforcement reporting. The *Reference Aid* highlights the terrorist attacks and plots impacting critical infrastructure and does not reflect the totality of terrorist activities against the United States within the reporting period. Incidents that could not be attributed to a terrorist ideology or that are still under investigation are not included, such as incidents targeting law enforcement and government facilities amidst otherwise lawful protest activity and multi-state attacks against 5G wireless infrastructure between December 2019 – April 2020 by unidentified actors. This *Reference Aid* is intended for federal, state, local, tribal, and territorial counterterrorism and law enforcement officials, first responders, and cleared private sector partners. The information cutoff date is 1 October 2020.
