

ACLU v. United States Department of Justice, et al.

12-cv-11776

Vaughn Index

Detail description of ICE responsive records Withheld in Full¹

Entry No.	Document ID	Date	Description	Exemptions
1.	2012FOIA19286.000028-000029	5/23/12	Two satellite image maps. The maps depict proposed location for the temporary placement of license plate reader camera equipment for a specific investigation. The placement and staging of cameras for a specific investigation constitutes techniques and procedures that are not well known to the public. The disclosure of this sensitive information could reasonably be expected to risk circumvention of the law. FOIA Exemptions (b)(6) and (b)(7)(C) were applied to the information regarding the name and telephone number of an United States Border Patrol Agent.	(b)(7)(E), (b)(6), (b)(7)(C)
2.	2012FOIA19286.000098-000101, and 2012FOIA19286.00339-000342	Not Dated	NVLS License Plate Recognition Database Server Law Enforcement Agency User Agreement. After further review, ICE has determined to release this document in a supplemental release. The partial withholdings made to this document consists of technical information on the location of the storage of data and its dissemination to law enforcement agencies, the law enforcement systems to which the LEARN-NVLS server will be connected to, as well as specifications on what equipment an LPR kit contains. The information contained in this document, are techniques and procedures used for law enforcement purposes for investigations or prosecutions are that are not well known to the public. The disclosure of this sensitive information could reasonably be expected to risk circumvention of the law. An identical version of this user agreement was withheld on pages 2012FOIA19286.000339-000342 as a duplicate.	(b)(7)(E)
3.	2012FOIA19286.000157-000159	9/13/11	Six (6) Photographs. These photographs illustrate specific equipment manufactured as part of the license plate reader system for law enforcement use. These photographs were presented to ICE by the manufacturer of the equipment in order to improve the performance of the system and address certain system vulnerabilities. These types of equipment are techniques and procedures for law enforcement investigations or prosecutions that are not well known to the public. The disclosure of this sensitive information could reasonably be expected to risk circumvention of the law.	(b)(7)(E)

¹ ICE has determined to produce a supplemental release of various documents that were previously withheld in full.

4.	2012FOIA19286.000161	9/13/11	Technical information about the equipment photographed and described in pages 000157-000159. The description, capabilities, and technical information regarding the equipment illustrated in the photographs contained in pages 000157-000159 pertains to equipment for the license plate reader system to be used by law enforcement agencies. The description includes, but is not limited to, design specifications, voltage, power source, overall dimensions and shipping weight of the equipment illustrated. The technical information about the equipment photographed, are techniques and procedures for law enforcement investigations or prosecutions that are not well known to the public. The disclosure of this sensitive information could reasonably be expected to risk circumvention of the law. At the bottom of this page there is a duplicate to which no exemption has been asserted. However, this email message is an exact duplicate of one released at page 2012FOIA19286.000021.	(b)(7)(E)
5.	2012FOIA19286.000333-000334, 2012FOIA19286.000413-000414, 2012FOIA19286.000417-000418, 2012FOIA19286.000442-000443, 2012FOIA19286.000454-000455	N/A	Data Quotation for NVLS Data Subscription. After further review, ICE has determined that the documents may be released in part rather than withheld in full. ICE has determined to release this document in a supplemental release. These documents contain the price quote, unit pricing information, NVLS Tier II Data Subscriptions for a 12 month period. The information consists of proprietary technical information submitted to ICE by a potential contractor during the course of contract negotiations as well as unit pricing information. The information contained in this document, are techniques and procedures for law enforcement investigations or prosecutions that are not well known to the public. The disclosure of this sensitive information could reasonably be expected to risk circumvention of the law. FOIA Exemptions (b)(6) and (b)(7)(C) were applied to the information regarding license plate numbers, names, telephone numbers, email addresses of third parties, as well as of an Immigration and Customs Enforcement (ICE) personnel. The records withheld in full at pages 000413-000414, and 000417-000418, are duplicates of pages 000333-000334. The records withheld in full on pages 000454-000455 are duplicates of prior released pages 000485-000486.	(b)(4), (b)(6), (b)(7)(C), (b)(7)(E)
6.	2012FOIA19286.000425-000431	N/A	Duplicate versions of the NVLS document “Webinar Series 1: Breaking Through NVLS Audience Questions and Answers” document. No exemptions asserted. This document is a duplicate version of a previously released document that was withheld in part at pages 000357-000363.	duplicate
7.	2012FOIA19286.000444-000446	N/A	Statement of Work for Access to National License Plate Recognition Database. This document was withheld-in-full and marked as duplicate. After further review, ICE has determined that the document is not a duplicate of any previously-released record.	(b)(7)(E), (b)(6), (b)(7)(C)

			ICE has determined to release this document in a supplemental release. In its supplemental release, ICE is withholding in part the information contained in this document pursuant to FOIA Exemptions (b)(6), (b)(7)(C) and (b)(7)(E). This document contains information of the number of fugitive operation teams in the field offices, the location of operations, the NVLS Tier II Data Subscriptions, and technical information. The information contained in this document, are techniques and procedures for law enforcement investigations or prosecutions that are not well known to the public. The disclosure of this sensitive information could reasonably be expected to risk circumvention of the law. FOIA Exemptions (b)(6) and (b)(7)(C) were applied to the information regarding the name and telephone number of an Immigration and Customs Enforcement (ICE) law enforcement officer.	
8.	2012FOIA19286.000458-000462 (withheld in part), 2012FOIA19286.000518-000522(withheld in part)	1/20/12	Draft version of the Baltimore Field Office Local Policy License Plate Recognition Program. Two version of an unsigned, undated draft policy sought to establish guidelines for the deployment, maintenance, training, and data storage associated with the use of license plate readers systems by Immigration and Customs Enforcement (ICE)/Enforcement and Removal Operations (ERO) personnel. A Supplemental release of page 000518 will be made for purpose of consistency.	(b)(5)
9.	2012FOIA19286.000532-000533	5/11/12	Information bulletin from the Maryland Coordination and Analysis Center, Intelligence Analysis Division. The Information Bulletin discusses and explains the capabilities of a new law enforcement tool implemented by Immigration and Customs Enforcement (ICE)/Enforcement and Removal Operations (ERO), which will assist in the operation of the license plate readers system used by law enforcement agencies. This bulletin discusses what this new law enforcement tool is comprised of, what it includes and the effect it will have on the law enforcement community. The information contained in this document, are techniques and procedures for law enforcement investigations or prosecutions that are not well known to the public. The disclosure of this sensitive information could reasonably be expected to risk circumvention of the law. FOIA Exemptions (b)(6) and (b)(7)(C) were applied to information regarding the name, email address and telephone number of an ICE law enforcement officer, as well as the name, telephone number and email address of a third party.	(b)(7)(E), (b)(7)(C), (b)(6)
10.	2012FOIA19286.000714-000715	N/A	Technical Specification. This document contains technical specifications for system and server requirements needed by law enforcement agencies prior to the installation and use of license plate reader software. The information contained, are techniques and	(b)(7)(E)

			procedures for law enforcement investigations or prosecutions that are not well known to the public. The disclosure of this sensitive information could reasonably be expected to risk circumvention of the law.	
11.	2012FOIA19286.000769	N/A	Step-by-step instructions on how law enforcement agencies can navigate the license plate reader software in order to create a local hotlist. Technical instructions and information about how to navigate the license plate reader software. The information contained, are techniques and procedures for law enforcement investigations or prosecutions that are not well known to the public. The disclosure of this sensitive information could reasonably be expected to risk circumvention of the law.	(b)(7)(E)
12.	2012FOIA19286.000771-000772	N/A	Data Conversion Summary provided by Remington ELASG Law Enforcement Systems, LLC. Technical information on how to navigate the license plate reader software. The information contained, are techniques and procedures for law enforcement investigations or prosecutions that are not well known to the public. The disclosure of this sensitive information could reasonably be expected to risk circumvention of the law.	(b)(7)(E)
13.	2012FOIA19286.000777-000778	N/A	Criminal History Download for LPR Systems. Software instructions on how to download criminal information into a license plate reader system. This document also contains the IP address, user name and password required to access the system. The information contained in this document, are techniques and procedures for law enforcement investigations or prosecutions that are not well known to the public. The disclosure of this sensitive information could reasonably be expected to risk circumvention of the law. FOIA Exemptions (b)(6) and (b)(7)(C) were also applied to protect the name of a third party.	(b)(7)(E), (b)(6), (b)(7)(C)
14.	2012FOIA19286.000784	N/A	Image. This image illustrates the technical information about the effective range, fields of view, and placement of license plate reader cameras. The information contained, are techniques and procedures for law enforcement investigations or prosecutions that are not well known to the public. The disclosure of this sensitive information could reasonably be expected to risk circumvention of the law.	(b)(7)(E)
15.	2012FOIA19286.000794	2/3/12	Screenshot image of TECS database. A screenshot image from TECS, a law enforcement database, which contains the different capabilities that the system offers to conduct law enforcement queries. The information contained, are techniques and procedures for law enforcement investigations or prosecutions that are not well known to the public. The disclosure of this sensitive information could reasonably be expected to risk circumvention of the law.	(b)(7)(E)
16.	2012FOIA19286.000800-000801	8/8/12	Report of data from license plate reader. The report contains data that is obtained	(b)(7)(E)

			from the system and reflects how many plates the system scans versus the number of alarms it receives as well as how often the system is uploaded with the data it receives. The information contained, are techniques and procedures for law enforcement investigations or prosecutions that are not well known to the public. The disclosure of this sensitive information could reasonably be expected to risk circumvention of the law.
