[REDACTED]

Tuesday is bad for me since I will be at the Intel Commanders training/meeting in Baltimore. If possible could we see if Wed in the morning would work for the call? Thank you.

David

I'd like to postpone our conversation until next week. We are still working thru some testing parameters and would rather have a more definite date to start a VFC test. Are you available next Tuesday or Wednesday for a call?

We are very excited about the opportunity to test the interface between eGaurdian and the shared space. I will be on travel status on the 12th and will be in Tallahassee on the 13th for SAR front-line officer training. If I cannot make the conference call, I will ensure that someone from my staff participates. Please let me know what further assistance I can provide.

Sincerely,
[REDACTED]

[REDACTED]

We are getting close to turning on the eGuardian interface that will allow VFC to forward its SARs to eGuardian from the Shared Space. Because of the proximity of DC and the fact that your staff already has LEO accounts, the folks at FTTTF and IJS thought VFC was the right choice to beta test this capability with live data from your system. We are looking at running this test on or about August 20th. Prior to that we will provide familiarization / refresher training to VFC supervisor staff who will have the authority to forward VFC Shared Space SARs to the FBI. I'd like to set up a Telecom to discuss this with you and others you may designate. Could we discuss this on the 12th or 13th in the morning?

Thanks
