Hi [REDACTED] I appreciate you reaching out to me. Below are some bullets that may clarify. Additionally, I am copying David Lewis (phone: 202 -305-5618) and Tom O'Reilly (202-353-8590) in this message. Either one of them can provide further clarification regarding your questions. Please let me know if I may assist with anything else regarding this. Thanks, [REDACTED]

- eGuardian will be the primary method by which investigative leads are sent to the JTTF
- eGuardian will function as another ISE Shared Space
  - Federated queries by officers or analysts will return eGuardian results along with results from the ISE Shared Spaces at state or major urban area fusion centers
  - eGuardian users will be able to access ISE-SAR information from other ISE Shared Spaces as well as from eGuardian's database
- ISE-SAR participants will be able to identify and submit a copy of those SARs that need to be referred to the JTTF
  - Interface between ISE Shared Spaces and eGuardian has been developed
  - Processes and policies have been developed
  - Capability integrated into ISE Shared Space servers to identify specific SARs for referral to the JTTF. The original report will remain in the submitting agency's ISE Shared Space

**Subject:** ISE Question

[REDACTED]

I did not know who to direct this question to. eGuardian came in and gave my group some training and there seemed to be some conflicting information with Shared Space and eGuardian. Can you or someone explain the difference? Is there a connection between eGuardian and Shared Space? Any assistance that you can provide or point me in the right direction would help.

Thank you,  
[REDACTED]
