Tom,

This isn't an issue. The vetting is already set up in eGuardian. As part of the vetting the local puts it in then it goes through the department must go to the FC before it can be published or be sent to the JTTF.

Did you hear any more from the guy at Scotland Yard that was interested in NIEM? Maybe give him a flow up and maybe we can get something going.

I was thinking about the E Guardian/ Shared Space issue. I know you are working on the push from the SS to E Guardian but is there an electronic solution to move the SAR from E guardian to the FC for vetting when a town decides not to do SS and then when the FC vets and approves it to electronically send it from the FC back to the E Guardian server and then finally to the E Guardian SS Server? I think this is an issue.

Tom
