Subject: RE: TN Fusion Center SARs

Hi [REDACTED]

Thanks for your message. The purpose of this upgrade was twofold

1. Enable you to review the SARs in your Shared Space
2. Ability to push the SARs to eGuardian in a timely manner

We understand that TN does not want to use the Shared Space at this time to send SARs. Please also note that at this time, there are no specific requirements to change anything related to the Memex.

My primary purpose in asking you for the reason (more of a policy question) was that we could insert a value automatically in the Shared Space which could say that TN has decided to share the SARs to eGuardian through another method. I did not want to put a reason in the Shared Space without your knowledge and approval.

I apologize if my emails have caused any confusion.

Thanks

[REDACTED]

As mentioned earlier, we did not intend to have this update put in place at our site as we were unclear on the requirements for participation. The requirements for this enhancement have trickled in over a period of time. We need to gather them into a single document, review our system for gaps in the requirements, take steps to close those gaps and then begin the testing process. We are not in a position to respond to these issues at this time.

Additionally, we have a history of getting SARs to eGuardian in a more timely manner. It is my understanding that our SARs sit in a number of queues before they are moved through the process of submission and are made available to the national audience.

If you require other information, please reach out to me using the contact numbers below.

Subject: RE: TN Fusion Center SARs

Hi [REDACTED]

Thanks for your message. We will ensure that no SARs are sent to eGuardian from the TN Shared Space unless you decide.

However, please give me a reason as to why you are not sending these SARs. If you want us to use a reason such as "SARs already shared with eGuardian" or any other reason that you would want us to include in the reason field, I would appreciate it. This is to enable us to keep track of the reasons why sites have decided not to send the SARs to eGuardian.

Thanks

It is our decision to hold off on submission of SARs to eGuardian via the ISE path at this time. Please take any steps that are required to insure we are not submitting to eGuardian via ISE Shared Space.

Subject: RE: TN Fusion Center SARs

Hi [REDACTED]

Thanks for your message and hope you had a good weekend. At this point in time, there is no requirement to make any changes to the Memex solution. These changes are already reflected in the NSI upgrade that you have.

We will continue to send the SARs to the TN Shared Space however, we need to reflect the reason that you are not sending the SARs to eGuardian. This reason can either be manually entered using the NSI "Gadget" which you have access to or we can put in a default value for the reason. Please let us know which option you would like to use. If you prefer to use a default value, please let us know what reason you would like us to insert in this field.

If you have any questions, please do not hesitate to contact us.

Thanks

[REDACTED]

At this time, we were unaware of the specific requirements to update the Memex utility and Memex application to include this and other new fields. We have various pieces of information scattered across several emails that include the eGuardian requirements and have not scheduled the activity needed to understand the changes that would be required of our system and our system interface to ISE. We wish to continue to send our SARs to the ISE as has been the case for months.

Please insure our SARs are not forwarded to eGuardian at this time as changes to Memex and the interface have not been made to meet their field requirements.. We will complete our work at this end and send a document that outlines the changes we need to make and ask for your concurrence, we will then schedule the time required to make the changes should we decide to make use of the ISE to eGuardian push.

Thanks,

Subject: TN Fusion Center SARs

Hi [REDACTED]

Hope you are well. The NSI Upgrade has been installed in the TN Fusion Center. As [REDACTED] must have explained, the purpose of this upgrade was to enable the TN Fusion Center to push the SARs to the TN Shared Space only or to the TN Shared Space and eGuardian.

Based on the discussion that [REDACTED] had with your team, we have configured the gadget to allow TN to decide which SARs they would want to send to eGuardian. However, this means that for the SARs that are not being pushed to eGuardian, the TN Fusion Center needs to put a reason as to why it is not being pushed to eG. We were looking at your Shared Space and see many SARs that do not have a reason as to why these SARs were not pushed to eGuardian. The NSI PMO has asked all Fusion Centers to record the reason as to why the Fusion Center is not sharing a particular SAR to eGuardian. They further require that the SARs are not ingested into the Common Box without this reason being filled in.

Some of the Fusion Centers have elected to use a default code. Please let us know what you would like us to do.

If you have any questions, please let me know at your earliest.

Thanks,
[REDACTED]
