I don't think we have lost the good will from the BJA perspective. I think the real issues is the baseline issue. And all hazzards. The UASI. FC need to be there but we need to think thru how to approach it. Maybe we. Should push this to the CICC discussion next week Thomas O'Reilly

Hummm... Intersting development. If this T and TA sponsored by DHS/DOJ they need to realize some items like inviting NY etc are in the national best interest and are not optional.

If they want some "alone" time it could maybe be negotiated but seems like we've lost some overall positive good will among some NE folks.

Every two weeks [REDACTED] IIR and I have a call to coordinate the TA Services Today several policy issues surfaced that I would like your thoughts on:

The NE region does not want any UASI FC invited to the meeting. Last year Boston and NYC came. I think this is a sensitive issue but not including them is contrary to the NSIS and the concept of sharing. If we force the issue we will get [REDACTED] and [REDACTED] mad but . There are similiar thoughts in the other regions.

[REDACTED] feels we need to invite them.

The NE wants a closed session at the end w/o any Feds.

They want a list of what feds are attending.

They want to have a presentation on the FC Assoc proposal.

b(6)

They want a formal presentation on the baseline capabilities and what happened to there inputs. The big issue here is the All Hazards concept which most of the NE FC do not support other then NJ They want a status update on EGuardian and SAR. As we discussed this is still confusioning.

Finally they would like a JTTF presentation.

I took these issues under advisement and told the team I would get back to them in a couple of days.

These issues should not be BJ A taking the lead but I think we should use these questions to drive resolution.

The dates for the meeting are June 18 and 19 Thomas O'Reilly
