Subject: Confusion

David and I have been discussing the confusion over SAR, NDex and EGuardian and what the attributes of each are as it relates to SARs.

We would like IIR to take a shot at doing a chart that would lay out the functionality of each. This could give a picture of what each can or can not do for reporting incidents vs intel etc.

What do you think?

It might be the best thing we can do to address all the mis information out there.

Tom
