Subject: Fw: eGuardian Services Introductory Email

This is a very significant and positive enhancement for eG. This allows agencies/fusion centers to electronically push their incidents, from their own systems into eG w/o having to create an incident in eG. This is done via the PM-ISE SAR IEPD standards, however w/o requiring the agency to use separate hardware servers like the shared space. We are in talks w/ sever other agencies.

Hello [redacted]-
I would be happy to discuss this with you. I am swamped today but do have some time Monday or Tuesday if you have a preference?

[redacted]
[redacted] *Florida Department of Law Enforcement*
Director/Florida Fusion Center

[redacted]
My name is [redacted] for eGuardian. [redacted]
[redacted] I have
cc'ed the eGuardian [redacted] and my FBI Unit Chief, [redacted] on this email.
We all work closely with [redacted] whom I know you have talked to about connecting electronically.

The purpose of this introductory email is to kick-off the discussion on "eGuardian Services", which will provide the ability for an organization such as yours to participate in eGuardian without requiring your users to actually use the eGuardian application. We are now developing the requirements for the application and we'd like to have your ideas and comments on our plans. Our preliminary requirements include:

- Capability to submit your incidents to eGuardian Services
- Capability to retrieve incident status from eGuardian Services
- Capability to Retrieve an incident in PDF format from eGuardian Services
- Possible search and query capabilities (privacy issues will be resolved first)

When would be a good time for me to call you, or for you to call me?

EGuardian-573

If you are not the correct primary point of contact for this project, or if there are others in your organization who should be included at this level, please let me know.

Thanks!
