I am pleased to advise you that the regional calls with the fusion center directors were completed yesterday and were successful.

Representatives from the FBI, DHS, and the NSI PMO were available to share pertinent information, address questions, and update the stakeholders on technology enhancements available via the NSI. From a high-level, the following was addressed:

- Discussion of the recently issued DAG announcement regarding the intended FBI Privacy adjustments, etc;
- Discussion of the SAR Functional Standard and its relationship to the SARs in the Shared Space;
- Discussion of the importance of facilitating the FBI's detailed analysis of NSI SARs against their internal files consistent with their designated role;
- Discussion of current and future methods available to move the SAR electronically from the SS to eG;
- Open discussion / questions and answers to address any outstanding issues; and,
- Closing discussion re collective support to engage in this solution immediately.

Of the 72 FCs that were invited to participate, 40 were able to make the schedule. As part of these calls, several issues resulted that are worthy of noting:

(b) (5), (b) (7)(E)

(b) (5), (b) (7)(E)

A large black rectangular redaction box covering several lines of text at the top of the page.

Though this process has taken a significant amount of time, it is apparent that there has been significant progress made. I am hopeful that a continued dialogue will advance SAR collection, reporting, vetting, analysis, and dissemination protocols currently in place.

Please advise me of any questions you may have. Thank you.

Tom
