Hi (b) (6)

This data on site status is still pretty solid. We have some benchmark dates coming up with sites that needed initial calls, visits and executive briefings, so I think we'll see some status changes within the next 30-45 days.

The latest numbers on training and SARs are as follows:

Total 46,406 officers trained from some 1053 agencies which is about a 21% increase from the total number of officers trained reported below (May 15<sup>th</sup>)

Have a great weekend as well.

John,

Here is the data we have to answer the questions you posed regarding the NSI. We update the dashboard on site status approximately every two weeks and a new report will be coming out this week. If you need an update at the end of this week, please just let us know. I have answered the bullets below but also attached the responses as a Word document in case you need to forward it.

All the best,
