Subject: Re: Corrected Lanes Document

The NY data was moved to the shared space box today, but no testing from the tech team could be done because the backgrounds have not gone through.

 FBI/e-Guardian's latest comments attached. Let's discuss early next week. Also, how soon do we expect NY to be up? Tx.

 eGuardian sections highlighted in red capture the changes reflected in the Lanes document attached, drafted by TMU. This is the an official opinion from the FBI's Counterterrorism Division's, Threat Monitoring Unit responsible for the

Development and Business production of the eGuardian system. I strongly caution that no changes are to be made with regards to content of the eGuardian fields set forth in the attachment without prior approval from a TMU eGuardian Program Manager. If you need to discuss these items please feel free to contact me I would be happy to discuss further.
