Document No. DT-045

Version 1.3

March 17, 2008

Prepared by:

Counterterrorism Division Foreign Terrorist Tracking Task Force Information Technology Support Unit

EGuardian-942

ALL INFORMATION CONTAINED HEREIN IS SENSITIVE BUT UNCLASSIFIED

Executive Summary

The Counterterrorism Division's (CTD) Guardian Threat Tracking Application was introduced in 2002 and has grown to be of critical importance in supporting the Counterterrorism mission. The Guardian infrastructure supports the storage, assignment and the triage evaluation of terrorism-related suspicious activity information. This information is also searchable by Federal Bureau of Investigation (FBI) employees and other government agency (OGA) partners needing intelligence.

State, local and tribal law enforcement (LE) partners have expressed a need for a application similar to Guardian. As a result, eGuardian is being developed as the state, local and tribal threat tracking application. The eGuardian application will be accessible through the FBI's Law Enforcement Online (LEO) network to allow our state, local and tribal LE partners to directly share threat data with the FBI. Information will be shared between Guardian and eGuardian using content filters, screening and human examination. Urgent LE matters, investigative issues, and higher classified matters will continue to be worked through existing. established FBI channels. The eGuardian application is intended to supplement. not replace, existing Joint Terrorism Task Force (JTTF) and Fusion Center coordination.

These enhancements support:

- Executive Order No. 13388, October 25, 2005 "Further Strengthening the Sharing of Terrorism Information to Protect Americans".
- FBI's number one priority to, "Protect the United States from terrorist attack".
- Counterterrorism Division mission to, "Provide information that helps keep foreign terrorists and their supporters out of the United States, or leads to their removal, location, detention, prosecution or other action".

APPROVALS

We certify that we have reviewed and do hereby ap System Requirements Specification.	prove this eGuardian
