4. How could today's session be improved?

ASAC COMMENTS

- Move this to an earlier training session.

SIA COMMENTS

- It would have been nice to have a "TIP" to take back as an example for IAs/SAs in the
- I am excited about today's tour, should be fun. Might have been better to put in on the last day so there was more room for targeting discussions.

- Speakers need a microphone-you really can't hear discussions/questions/answers when AC fan is on in back of room. PPT slides text too small/handouts' text too small.

SA COMMENTS

- The session was great. It accomplished the mission.
- I don't think you can. I appreciated that the day started with a recap and addressed questions/issues posed from the previous days discussions and evaluations
- WFOs [Redacted] presentation should be expanded to one full day.

• [REDACTED]

- Excellent team building session!

SSA COMMENTS

- I have always found that agents and analysts work well when they actually have a case to take ownership of and accountability for.

SA COMMENTS

- The [REDACTED] block did not allow for the very limited resources currently devoted in small to medium field offices to [REDACTED] When used to support cases the concern is not new, all agents think of how to develop sources as cases are opened.
- Yes- to answer Mr Mudds last question- poses-please do this training again and again, and again, and then some more.

• -----

Mr. Mudd,

This training was extremely beneficial and definitely should happen again- the value gained is interacting and learning from other field offices is incredible and it needs to happen often.

This shift in thinking and focus, I believe, is integral and necessary to the future of the FBI as a domestic intelligence agency. It's a great thing for the Bureau that is being pushed and all the pushing needs to continue.

I agree that an excellent future topic cover methods of deploying agents into the field for collection. We can have excellent analytical products that highlight the gaps and vulnerabilities, but without effective collection, the analytical product has little purpose.

One thing that I would like to see is an advisory committee of sorts made up of special agents and IAs who are directly involved with these projects-advisory for you and for us to hear what is happening @HQ.-so you can get and maintain a good ____??? For what's happening in the field-and communication for us-to be able to speak to others in our same positions who are experiencing similar or difficult challenges and successes. I know the idea sort of bucks the chain of command, but I feel it is necessary and beneficial for direct communication to take place in addition to communication through the chain. It's just that

sometimes the ASAC & SAC-although terrific and very involved -might have a different view/belief of what is happening/ should/ happen/can happen than those on the front line.

Again, thanks for doing this-it has so much potential.
