SJRA

Due to all the inconsistencies in this program I've decided to make [redacted] coordinator for San Jose. [redacted] will have [redacted] assigned to him and will come up with a spread sheet to keep track of their status. [redacted] will need help once in a while for arrests and when we get too many for him to handle. I will still make the assignments - but he has agreed to take on the mission - as impossible as it may seem. With [redacted] as the central point of reference we won't have to constantly figure out where or what is going on [redacted] I don't think it's the same [redacted] as on Account temps - but who knows!!! You can thank him for alleviating some of the headaches you may have had.
