

Serial Description ~ Unrecorded Serial

The diagram illustrates the structure of polymeric materials. It features a central horizontal chain labeled 'P' (polymer). Above and below this chain are various functional groups and cross-linking agents. On the left, there are groups labeled 'G', 'N', 'O', and 'S'. On the right, there are groups labeled 'G', 'N', 'O', and 'S'. A cross-linking agent 'C' is shown connecting the polymer chain to the functional groups. The structure is labeled with 'a' and 'b' indicating different regions or components. The diagram shows a network of polymer chains and cross-linking agents, forming a complex structure.
