Teaching in the BAT training class

On June 25, 2012 I attended the BAT T-3 Co-facilitators class. The T-3 class was taught by Terrance Bennett. In the class there were 3 instructors and 8 BDO's receiving an overview on the BAT class. The purpose of this class was to inform the BDO Co-facilitators at which part of the class (b) (3) suicide bomber indicators will be shown. BDO Co-facilitators were to talk about the (b) (3) suicide bomber indicators and answer any questions the TSO's may have regarding those (b) (3) behaviors.

On June 27, 2012 I Co-facilitated the BAT class. Jameka Barnes and Terrance Bennett were the instructors for the class. During, BAT class I demonstrated the (b) (3) suicide bomber behaviors. I talked about what the TSO's may see in the environmental baseline on the checkpoint. I discussed what the norms would be and what would stand outside of the norm. I answered questions asked by TSO's regarding the environmental baseline during (b)(3)49 U.S.C. § The TSO's also asked about the suicide bomber indicator behaviors. The TSO's wanted to know how can the suicide indicators (b)(3)49 U.S.C. § 114(n) when they see that all the time. I explained that it (b)(3)49 U.S.C. § 114(n) to warrant a LEO call. I enjoyed the experience of teaching the TSO's and opening their eyes to being aware of their surrounding.
