Subject: Response to e-Guardian Data Call

(b)(3)-P.L. 86-36

Classification: UNCLASSIFIED//~~FOR OFFICIAL USE ONLY~~

Stephanie,

I am a security officer/staff officer on the NSA Security Staff.

In response to the recent data call for implementation cost estimates for eGuardian, please consider this NSA's response to that task.

The various offices within NSA Security that would be involved in implementation of eGuardian have considered the facts associated with the data call. Based on our participation in related working groups and our initial view of how eGuardian would be implemented at NSA, we believe that such implementation can be accomplished with existing resources.

Consequently we will not be providing an implementation cost estimate.

Thank you for the opportunity to review, assess and comment on this issue.

Should you have additional questions you can pass them to me at your convenience.

Regards,
