**Subject:** RE: testing of a push from the shared space to eGuardian

If they are only for testing purposes you can pull any 10-15 SARs you want from the shared space that belong to us. We would just like them purged after the testing phase. . . unless of course the FBI makes an arrest based on the SAR information!

[REDACTED] and [REDACTED]

I hope you both had a great Thanksgiving. This email is a follow up to our conference call awhile back with regard to a sample push to the eGuardian. Would it be possible for each of you to select 10-15 SARs from your shared space to push to eGuardian for a test purpose only? We are still attempting to fine tune the ingest process and bringing SARs from multiple locations will be a great test.

We have gotten a commitment from Miami-Dade and wanted to follow up with each of you. I know the question of privacy policy was where we left it after the call and we have not gotten an answer at this point. That is why this will be a test push of information, but the SARs would not be make available to share at this time.

Let me know if you have any questions and we can possible do a follow up call.

David
