Picking up on [REDACTED] idea, I think we could also work with the FCs to get them prepared to push to the production eGuardian. This means identifying the "approvers" so that [REDACTED] can update his list and [REDACTED] can do the same on his end.
Or we can just wait until the smoke clears on whether eGuardian is covered under the DOJ Privacy policy and take care of this later.

David,
The checklist items that IIR is responsible for are complete.

I would suggest a new item for the checklist. That we have at least one registered SAR Portal user who has appropriate privileges to upload SARs to eGuardian.

Thanks,
[REDACTED]

I just saw that their privacy policy was approved. Has the checklist been completed for Las Vegas? Please verify and if completed we can add them to the search environment.

David
