David
I will attend. FYI I think Tuesday morning would work as well. In addition, I would suggest that [REDACTED] attend with [REDACTED]
[REDACTED] what do you think?

Subject: RE: discussion with the FBI on mapping

To all;

I have a meeting today with the FBI on their plan to both (A) ingest the files we send them through the UI, and (B) populating the FBI SS Box with eGuardian files. The meeting today is only to hear and work on the plan to make these two things happen. The next step would be a meeting between the two teams to discuss the mapping of the elements for both A and B.

Since [REDACTED] group has already established the secure FTP as a method to send the files to eGuardian (as an interim solution) I do not think it's necessary for them to come to DC for the mapping meeting. It's my understanding that [REDACTED] is available for a meeting on Monday at 10 am. [REDACTED] or [REDACTED] is there anyone else from that team you feel should be present for this meeting? I will not be available, but the meeting will be monitored by either [REDACTED] or [REDACTED] from the PM-ISE's office.

As a precursor, this is going to be very difficult meeting. The two things we have to get out of the meeting and for the FBI team to understand are:

1. When we send the files to them they will all be in the same LEXS format and that our files need to have a header tag in eGuardian showing which SS submitted the SAR.

2. We need to have the extract from eGuardian in a particular format to populate the SS box. Also, when they populate the FBI SS box it should only contain items created in eGuardian and not what they have received from the SS locations. This will assist in reducing duplicate results in a search.

I know the time is short, but can we make this a focus for the Friday tech call? What I would like to get out of the call is a list of all the items that need to be addressed to bring the FBI on board. Thoughts?

David
