OPCL-51

I was a temporary contact when Mary retired but shouldn't be now. Thanks.

OPCL-52

Meghann:

This system is top priority. It is in your in-box. I have concerns and have made changes to the SORN and proposed rule. I have specifically noted comments for you with your initials noted in the comment box. The remainder are for the component POC. As per Niels, Ken still has the PIA for the system (I have enclosed the last draft Niels provided and it is in the file). I have tailored the SORN to the draft PIA. If there are changes based on Ken's review, they will not be noted in the SORN. The SORN would then have to be modified to reflect any of Ken's changes, if necessary.

Note: In the NPRM, the component refers to Joo as the POC for OPCL. Is there some agreement between FBI and OPCL and Joo was chosen as the POC on this one?

There have been numerous discussions between FBI and OPCL on eGuardian. These discussions occurred prior to and after I arrived. I don't have any of the background data regarding those discussions, so you may need to go to Kirsten for information.

None of the FR documentation has been completed. Awaiting further review prior to preparing those letters.

Robin
