Subject: Kenosha Update - 08/26/2020 0900

Sirs,

Latest information from Kenosha as requested.

(b)(7)(E) to Kenosha this morning for a damage assessment of the two SSA facilities (current and future), as well as the general area. The Inspector is expected to arrive shortly and we will provide an update once we get his report. At this time, we are aware of additional damage (broken windows, etc.) in the general area, but none to our protected facilities.

We engaged in discussion yesterday with the SSA Area Director (b)(6); (b)(7)(C) as well as SSA Field Services in Chicago (b)(6); (b)(7)(C) regarding the pending move. We encouraged them to complete the move on Friday if possible, including all critical assets (computers, servers, network switches, etc.). We were not making much progress in convincing them to stick with the original schedule, but we will continue to engage and encourage today.

Intel Overnight Updates:

- Two people had been shot and killed and a third injured
 - OS reports that the individual who was shot in the head was trying to physically unarm the shooter beforehand (unverified)
 - One victim shot in the head, another in the chest
 - Unknown where the other person was shot, but video posted on social media showed someone had been shot in the arm
 - www.facebook.com/1802310518/videos/10215070982526947/?extid=o5c8HFtjNOTScyR4
- Individuals with the militia group were clashing with protestors at a gas station. A short time later, shots were heard near a gas station located at 63rd Street and Sheridan Road. This could be the same event where the above individuals were shot. I have not been able to verify that yet.
- Fire observed in a building near Kenosha County Courthouse
- Numerous fires set throughout the city (cars, dumpsters, etc)
- Groups were communicating through Telegram app in an effort to be untraceable by LE
- There still has been no identified threat to any FPS-protected facility

(b)(7)(E), (b)(7)(F)

Please let me know if there are any other specific questions I missed. We will provide the damage assessment and area atmosphere ASAP.
