Department of Homeland Security

Title V

Fiscal Year 2016

Explanation of Changes – General Provisions

Title V - Fiscal Year 2015 Explanation of Changes – General Provisions

Proposal to Amend *Old* Section 503

SEC. 503

a. (a) None of the funds provided by this Act, provided by previous appropriations Acts to the agencies in or transferred to the Department of Homeland Security that remain available for obligation or expenditure in fiscal year [2015] 2016, or provided from any accounts in the Treasury of the United States derived by the collection of fees available to the agencies funded by this Act, shall be available for obligation or expenditure through a reprogramming of funds that:

1. (1) creates a new program, project, or activity;
2. (2) eliminates a program, project, office, or activity;
3. (3) increases funds for any program, project, or activity for which funds have been denied or restricted by the Congress;
4. (4) proposes to use funds directed for a specific activity by either of the Committees on Appropriations of the Senate or the House of Representatives for a different purpose; or
5. (5) contracts out any function or activity for which funding levels were requested for Federal full-time equivalents in the object classification tables contained in the fiscal year [2015] 2016 Budget Appendix for the Department of Homeland Security, as modified by the report accompanying this Act,

unless the Committees on Appropriations of the Senate and the House of Representatives are notified 15 days in advance of such reprogramming of funds.

b. (b) None of the funds provided by this Act, provided by previous appropriations Acts to the agencies in or transferred to the Department of Homeland Security that remain available for obligation or expenditure in fiscal year 2015, or provided from any accounts in the Treasury of the United States derived by the collection of fees or proceeds available to the agencies funded by this Act, shall be available for obligation or expenditure for programs, projects, or activities through a reprogramming of funds in excess of \$5,000,000 or 10 percent, whichever is less, that:

1. (1) augments existing programs, projects, or activities;
2. (2) reduces by 10 percent funding for any existing program, project, or activity;
3. (3)

reduces by 10 percent the numbers of personnel approved by the Congress; or

4. (4) results from any general savings from a reduction in personnel that would result in a change in existing programs, projects, or activities as approved by the Congress,

unless the Committees on Appropriations of the Senate and the House of Representatives are notified 15 days in advance of such reprogramming of funds.

- c. (c) Not to exceed 5 percent of any appropriation made available for the current fiscal year for the Department of Homeland Security by this Act or provided by previous appropriations Acts may be transferred between such appropriations, but no such appropriation, except as otherwise specifically provided, shall be increased by more than 10 percent by such transfers: *Provided*, That, subject to approval by the Director of the Office of Management and Budget, any unobligated funds within such department or agency may be transferred between appropriations in order to expedite a more rapid and effective response to a Presidentially-declared major disaster, as provided in the National Response Plan required under Public Law 107–296: *Provided further*, That any transfer under this section shall be treated as a reprogramming of funds under subsection (b) and shall not be available for obligation unless the Committees on Appropriations of the Senate and the House of Representatives are notified 15 days in advance of such transfer.
- d. (d) Notwithstanding subsections (a), (b), and (c) of this section, no funds shall be reprogrammed within or transferred between appropriations based upon an initial notification provided after June 30, except in extraordinary circumstances that imminently threaten the safety of human life or the protection of property.
- e. (e) The notification thresholds and procedures set forth in this section shall apply to any use of deobligated balances of funds provided in previous Department of Homeland Security Appropriations Acts.

Explanation: The Department requests routine date changes to extend this provision for fiscal year 2016.

Proposal to Amend *Old* Section 504

SEC. 504. The Department of Homeland Security Working Capital Fund, established pursuant to section 403 of Public Law 103–356 (31 U.S.C. 501 note), shall continue operations as a permanent working capital fund for fiscal year [2015] 2016: *Provided*, That none of the funds appropriated or otherwise made available to the Department of Homeland Security may be used to make payments to the Working Capital Fund, except

for the activities and amounts allowed in the President's fiscal year [2015] 2016 budget: *Provided further*, That funds provided to the Working Capital Fund shall be available for obligation until expended to carry out the purposes of the Working Capital Fund: *Provided further*, That all departmental components shall be charged only for direct usage of each Working Capital Fund service: *Provided further*, That funds provided to the Working Capital Fund shall be used only for purposes consistent with the contributing component: *Provided further*, That the Working Capital Fund shall be paid in advance or reimbursed at rates which will return the full cost of each service: *Provided further*, That the Committees on Appropriations of the Senate and House of Representatives shall be notified of any activity added to or removed from the fund: *Provided further*, That the Chief Financial Officer of the Department of Homeland Security shall submit a quarterly execution report with activity level detail, not later than 30 days after the end of each quarter.

Explanation: The Department requests routine date changes to extend this provision for fiscal year 2016.

Proposal to Amend *Old* Section 505

SEC. 505 Except as otherwise specifically provided by law, not to exceed 50 percent of unobligated balances remaining available at the end of fiscal year [2015] 2016, as recorded in the financial records at the time of a reprogramming request, but not later than June 30, [2016] 2017, from appropriations for salaries and expenses for fiscal year [2015] 2016 in this Act shall remain available through September 30, [2016] 2017, in the account and for the purposes for which the appropriations were provided: *Provided*, That prior to the obligation of such funds, notification shall be submitted to the Committees on Appropriations of the Senate and the House of Representatives in accordance with section 503 of this Act.

Explanation: The Department requests routine date changes to extend this provision for fiscal year 2016.

Proposal to Amend *Old* Section 506

SEC. 506 Funds made available by this Act for intelligence activities are deemed to be specifically authorized by the Congress for purposes of section 504 of the National Security Act of 1947 (50 U.S.C. 414) during fiscal year [2015] 2016 until the enactment of an Act authorizing intelligence activities for fiscal year [2015] 2016.

Explanation: The Department requests routine date changes to extend this provision for fiscal year 2016.

Proposal to Amend *Old* Section 516

SEC. 516 (a) The Secretary of Homeland Security shall submit a report not later than October 15, [2015] 2016, to the Office of Inspector General of the Department of Homeland Security listing all grants and contracts awarded by any means other than full and open competition during fiscal year [2015] 2016.

(b) The Inspector General shall review the report required by subsection (a) to assess Departmental compliance with applicable laws and regulations and report the results of that review to the Committees on Appropriations of the Senate and the House of Representatives not later than February 15, [2016] 2016.

Explanation: The Department requests routine date changes to extend this provision for fiscal year 2016.

Proposal to Delete *Old* Section 517

SEC. 517. None of the funds provided or otherwise made available in this Act shall be available to carry out section 872 of the Homeland Security Act of 2002 (6.U.S.C. 452).

Explanation: The Department requests deletion of this provision as it is unduly restrictive and interferes with Department's ability to effectively respond to mission requirements.

Proposal to Amend *Old* Section 519

SEC. 519 Section 831 of the Homeland Security Act of 2002 (6 U.S.C. 391) is amended—

(1)

in subsection (a), by striking "Until September 30, [2014] 2015," and inserting "Until September 30, [2015] 2016,";

(2)

in subsection (c)(1), by striking "September 30, [2014] 2015," and inserting "September 30, [2015] 2016,".

Explanation: The Department requests routine date changes to extend this provision for fiscal year 2016.

Proposal to Delete *Old* 524

[SEC. 524. Section 550(b) of the Department of Homeland Security Appropriations Act, 2007 (Public Law 109–295; 6 U.S.C. 121 note), as amended by section 536 of the Department of Homeland Security Appropriations Act, 2014 (Public Law 113–76), is further amended by striking "on October 4, 2014 and inserting "on October 4, 2015.]

Explanation: The Department requests deletion of this section because section 550(b) of the Department of Homeland Security Appropriations Act, 2007 (Public Law 109–295; 6 U.S.C. 121 note), as amended by section 536 of the Department of Homeland Security Appropriations Act, 2014 (Public Law 113–76), was repealed by Section 2107 of the Protecting and Securing Chemical Facilities from Terrorist Attacks Act of 2014.

Proposal to Amend *Old* Section 532

SEC. 532 The Department of Homeland Security Chief Information Officer, the Commissioner of U.S. Customs and Border Protection, the Assistant Secretary of Homeland Security for U.S. Immigration and Customs Enforcement, the Director of the United States Secret Service, and the Director of the Office of Biometric Identity Management shall, with respect to fiscal years **[2014, 2015]**, 2016, and 2017, submit to the Committees on Appropriations of the Senate and the House of Representatives, at the time that the President's budget proposal for fiscal year **[2016] 2017** is submitted pursuant to the requirements of section 1105(a) of title 31, United States Code, the information required in the multi-year investment and management plans required, respectively, under the headings "U.S. Customs and Border Protection, Salaries and Expenses" under title II of division D of the Consolidated Appropriations Act, 2012 (Public Law 112–74); "U.S. Customs and Border Protection, Border Security Fencing, Infrastructure, and Technology" under such title; section 568 of such Act; and "Office of the Chief Information Officer", "United States Secret Service, Acquisition, Construction, Improvements, and Related Expenses", and "Office of Biometric Identity Management" under division D of the Homeland Security Appropriations Act, 2013 (Public Law 113–6).

Explanation: The Department requests routine date changes to extend this provision for fiscal year 2016.

Proposal to Delete *Old* Section 541

[SEC. 541

(a) The Secretary of Homeland Security shall submit to Congress, 180 days after the date of enactment of this Act and annually thereafter beginning with the submission of the President's budget proposal for fiscal year [2016] 2017 pursuant to section 1105(a) of title 31, United States Code, a comprehensive report on the purchase and usage of ammunition, subdivided by ammunition type. The report shall include—

- 1. (1) the quantity of ammunition in inventory at the end of the preceding calendar year, and the amount of ammunition expended and purchased, subdivided by ammunition type, during the year for each relevant component or agency in the Department of Homeland Security;**
- 2. (2) a description of how such quantity, usage, and purchase aligns to each component or agency's mission requirements for certification, qualification, training, and operations; and**
- 3. (3) details on all contracting practices applied by the Department of Homeland Security, including comparative details regarding other contracting options with respect to cost and availability.**

(b) The reports required by subsection (a) shall be submitted in an appropriate format in order to ensure the safety of law enforcement personnel.]

Explanation: The Department requests to delete this provision as unnecessarily burdensome.

Proposal to Delete *Old* Section 542

[SEC 542. Of the fees deposited under the heading "Transportation Security Administration-Aviation Security" in fiscal year 2013 and sequestered pursuant to section 251A of the Balanced Budget and Emergency Deficit Control Act, as amended (2 U.S.C.901a), \$104,220,263 shall be available until September 30, 2016.]

Explanation: The Department requests this provision be deleted because separate authority is being pursued within the Aviation Security appropriation.

Proposal to Delete *Old* Section 543

[SEC. 543 For fiscal year [2015] 2016—

- (a) section 44940 of title 49, United States Code, shall be applied as follows:**
- 4. (1)**

as if subsections (a)(2) and (d)(1) were reinstated as they existed prior to enactment of the Bipartisan Budget Act of 2013 (Public Law 113–37); and

5. (2)

in subsection (c), as if "\$6.00" were substituted for "\$5.60", and as if "has at least one segment that" were inserted before "originates".

(b) The Secretary of Homeland Security shall implement the fee increase authorized by subsection (a)(2)—

6. (1)

beginning on January 1, 2015; and

7. (2)

through the publication of notice of such fee in the Federal Register, notwithstanding section 9701 of title 31, United States Code, and the procedural requirements of section 553 of title 5, United States Code.]

Explanation: The Department requests this provision be deleted to pursue separate authorizing legislation.

Proposal to Amend *Old* Section 545

SEC [545] 541 Funding For United States Citizenship Foundation. Notwithstanding section 286(u) of the Immigration and Nationality Act (8 U.S.C. § 1356(u)), the Director of U.S. Citizenship and Immigration Services may pay up to \$3,000,000 of the premium processing fees described in section 286(u) to the U.S. Citizenship Foundation in fiscal year [2015] 2016.

Explanation: The Department requests routine date changes to extend this provision for fiscal year 2016.

Proposal to Delete *Old* Section 546

[SEC. 546 DAM SAFETY ACT. The National Dam Safety Program Act, as amended (33 U.S.C. 467 note) is amended -

a. (a)

In section 8(e) (33 U.S.C. 467f) by inserting after paragraph (6) the following new paragraphs: "(7) PERFORMANCE-BASED EVALUATION-FEMA shall establish performance measures for its assessment of State programs participating in the National Dam Safety Program. FEMA shall assess State performance under this section using these measures. FEMA shall establish targets for the States for the performance measures within 120 days of the enactment of this Act and may update them, as needed, each fiscal year. "(8) ALLOCATION- IN GENERAL.-Subject to subparagraphs (C) and (D), for each fiscal year, amounts made available under this subsection to carry out section 8 shall be

allocated among the states as follows: "(A) One-third of the funds shall be awarded among states that qualify as eligible for assistance under this section. "(B) Two-thirds of the funds shall be awarded among states that not only qualify as eligible for assistance under this section, but also meet or exceed their target established for the performance measures referred to in section 8(e)(7). "(C) MAXIMUM AMOUNT OF ALLOCATION.-The amount of funds allocated to a State under this paragraph may not exceed the funds committed by the State to implement dam safety activities. "(D) DETERMINATION.-The Administrator shall determine the amount allocated to States."

- b. (b) By redesignating sections 11 through 13, as sections 12 through 14, respectively, and by inserting after section 10 the following new section: "Sec.11.PUBLIC AWARENESS AND OUTREACH FOR DAM SAFETY. The Administrator, in consultation with other Federal agencies, State, and local governments, dam owners, the emergency management community, the private sector, non-governmental organizations and associations, and universities and academia, and others as appropriate, shall carry out a nationwide public awareness and outreach program to provide risk information to the public related to the hazards of dam failures and related matters."
- c. (c) In section 14, as redesignated by this Act, (33 U.S.C. 467j) by -
 - i. (1) striking subsection (a) and inserting "(a) APPROPRIATIONS-There is authorized to be appropriated to FEMA to carry out the National Dam Safety Program Act (in addition to any amounts made available for similar purposes included in any other Act) \$14.8 million for fiscal year 2015, \$15.2 million for fiscal year 2016, \$15.7 million for fiscal year 2017, \$16.2 million for fiscal year 2018.";
 - ii. (2) striking subsections (c), (d) and (e); and
 - iii. (3) redesignating subsection (f) as subsection (c).]

Explanation: The Department request to delete this provision because the Water Resources Reform and Development Act of 2014 (Pub. L. 113-121) provides the necessary authority to meet program objectives.

Proposal to Amend *Old* Section 547

SEC. [547] 543. Of the unobligated balance available to "Federal Emergency Management Agency, Disaster Relief Fund", [\$200,000,000] \$250,000,000 are hereby permanently cancelled: *Provided*, That no amounts may be cancelled from amounts that were designated by the Congress as an emergency requirement pursuant to a concurrent resolution on the budget or the Balanced Budget and Emergency Deficit Control Act of

1985, as amended: *Provided further*, That no amounts may be cancelled from the amounts that were designated by the Congress as being for disaster relief pursuant to section 251(b)(2)(D) of the Balanced Budget and Emergency Deficit Control Act of 1985.

Explanation: The Department requests this one-time cancellation of funds.

Proposal to Amend *Old* Section 548

[Sec. 548

a. (a)

(1) For fiscal year 2015, the fees imposed in subsection (a) of section 13031 of the Consolidated Omnibus Budget Reconciliation Act of 1985 (19 U.S.C. 58c(a)) shall be applied by substituting the following amounts for the amounts provided in such subsection:

- 1. (A)
For paragraph (1), \$594;**
- 2. (B)
For paragraph (2), \$7.50;**
- 3. (C)
For paragraph (3), \$11.25;**
- 4. (D)
For paragraph (4), \$37.50;**
- 5. (E)
For paragraph (5), \$7.50 for the fee imposed in subparagraph(A) and \$2.60 for the fee imposed in subparagraph (B);**
- 6. (F)
For paragraph (6), \$7.50;**
- 7. (G)
For paragraph (7), \$188; and**
- 8. (H)
For paragraph (8), \$150.**

(2) For fiscal year 2015, the dollar amounts in subsection (b) of section 58c of title 19, United States Code, shall be applied by substituting the following amounts for the amounts provided in such subsection:

- 9. (A)
For paragraphs (2) and (3), \$135;**
- 10. (B)
For subparagraph (A) of paragraph (5), \$8,316;**
- 11. (C)
For paragraph (6), \$2,100;**
- 12. (D)
For subparagraph (A)(ii) of paragraph (9), \$1.36; and**

13. (E)

For subparagraph (B)(i) of paragraph (9), not more than \$3.00 per individual airway bill or bill of lading.]

(3)

As authorized by section 601(b) of the United States-Colombia Trade Promotion Agreement Implementation Act (Public Law 112–42) fees collected from passengers arriving from Canada, Mexico, or an adjacent island pursuant to section 13031(a)(5) of the Consolidated Omnibus Budget Reconciliation Act of 1985 (19 U.S.C. 58c(a)(5)) shall be available until expended.

b. [(b) For fiscal year [2015] 2016, the fees imposed in section 286 of the Immigration and Nationality Act (8 U.S.C. 1356) shall be applied by substituting the following amounts for the amounts provided in such section:

i. (1)

For subsection (d), \$9; and

ii. (2)

For paragraph (3) of subsection (e), \$9].

Explanation: The Department requests to delete part of this provision in order to pursue increases with the Authorizing Committees.

Proposal to Insert New Section 542

As authorized by section 601(b) of the United States-Colombia Trade Promotion Agreement Implementation Act (Public Law 112–42) fees collected from passengers arriving from Canada, Mexico, or an adjacent island pursuant to section 13031(a)(5) of the Consolidated Omnibus Budget Reconciliation Act of 1985 (19 U.S.C. 58c(a)(5)) shall be available until expended.

Explanation: The Department requested to delete old section 548 except for section (a)(3). The Department requests to recodify the undeleted portion of old section 548 as new section 548.

Proposal to Insert New Section 543

Sec.543. Notwithstanding sections 503 and 505 of this Act, the Secretary may reallocate within or transfer to the U.S. Coast Guard for the Offshore Patrol Cutter Project: (1) amounts made available by this Act, to remain available until September 30, 2017, and (2) the unobligated balances of amounts made available by prior Acts: Provided, That any amounts reallocated or transferred under this section shall not be available for obligation unless the Committees on Appropriations of the Senate and the House of Representatives are notified 15 days in advance of such transfer: Provided further, That

this section shall not apply to amounts that were designated by the Congress for Overseas Contingency Operations/Global War on Terrorism or as an emergency requirement pursuant to the Concurrent Resolution on the Budget or the Balanced Budget and Emergency Deficit Control Act of 1985, as amended.

Explanation: The Department requests this provision to provide the Coast Guard with enhanced authority to transfer funds to support the Offshore Patrol Cutter Project.

Proposal to Insert New Section 544

SEC. 544. Of amounts transferred to the Disaster Assistance Direct Loan Program pursuant to the Community Disaster Loan Act of 2005 (Public Law 109-88), \$100,000,000 are rescinded.

Explanation: The Department requests a one-time rescission of the referenced funds to provide discretionary budget authority for other Department priorities.

Proposal to Insert New Section 545

SEC. 545. (a) For an additional amount for Financial Systems Modernization, \$42,977,000, which shall remain available until September 30, 2017.

(b) Funds made available in subsection (a) for Financial Systems Modernization may be transferred by the Secretary of Homeland Security between appropriations for the same purpose, notwithstanding section 503 of this Act.

(c) No transfer described in subsection (b) shall occur until 15 days after the Committees on Appropriations of the Senate and the House of Representatives are notified of such transfer.

Explanation: The Department requests multi-year funding for Financial Systems Modernization to maximize efficiency and reflect potential delays.

Proposal to Insert New Section 546

SEC. 546 The FEMA Administrator may expend funds appropriated under the heading "National Predisaster Mitigation Fund" in this and prior Acts to carry out the predisaster mitigation grant program under Section 203 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5133) notwithstanding any directed obligations under that heading in this and prior Acts if the intended recipient of the directed obligation either: (a) informs FEMA in writing that no application will be submitted for the funding; or (b) does not apply to FEMA for the funding before the end of the second fiscal year succeeding the fiscal year in which the directed obligation was appropriated; Provided, That amounts appropriated under the heading "National Predisaster Mitigation Fund" in this and prior Acts shall be available for administrative expenses of carrying out the predisaster mitigation grant program.

Explanation: The Department requests this new provision in order to expend unobligated funds appropriated without fiscal year limitation in prior years, which designated for specific grant program projects as authorized under Section 203 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5133).

Title V - Fiscal Year 2015 Explanation of Changes – General Provisions

Proposal to Amend *Old* Section 503

SEC. 503

- a. (a) None of the funds provided by this Act, provided by previous appropriations Acts to the agencies in or transferred to the Department of Homeland Security that remain available for obligation or expenditure in fiscal year [2015] 2016, or provided from any accounts in the Treasury of the United States derived by the collection of fees available to the agencies funded by this Act, shall be available for obligation or expenditure through a reprogramming of funds that:
1. (1) creates a new program, project, or activity;
 2. (2) eliminates a program, project, office, or activity;
 3. (3) increases funds for any program, project, or activity for which funds have been denied or restricted by the Congress;
 4. (4) proposes to use funds directed for a specific activity by either of the Committees on Appropriations of the Senate or the House of Representatives for a different purpose; or
 5. (5) contracts out any function or activity for which funding levels were requested for Federal full-time equivalents in the object classification tables contained in the fiscal year [2015] 2016 Budget Appendix for the Department of Homeland Security, as modified by the report accompanying this Act,
- unless the Committees on Appropriations of the Senate and the House of Representatives are notified 15 days in advance of such reprogramming of funds.
- b. (b) None of the funds provided by this Act, provided by previous appropriations Acts to the agencies in or transferred to the Department of Homeland Security that remain available for obligation or expenditure in fiscal year 2015, or provided from any accounts in the Treasury of the United States derived by the collection of fees or proceeds available to the agencies funded by this Act, shall be available for obligation or expenditure for programs, projects, or activities through a reprogramming of funds in excess of \$5,000,000 or 10 percent, whichever is less, that:
1. (1) augments existing programs, projects, or activities;
 2. (2) reduces by 10 percent funding for any existing program, project, or activity;
 3. (3) reduces by 10 percent the numbers of personnel approved by the Congress; or
 4. (4) results from any general savings from a reduction in personnel that would result in a change in existing programs, projects, or activities as approved by the Congress,
- unless the Committees on Appropriations of the Senate and the House of Representatives are notified 15 days in advance of such reprogramming of funds.
- c. (c) Not to exceed 5 percent of any appropriation made available for the current fiscal year for the Department of Homeland Security by this Act or provided by previous appropriations Acts may be transferred between such appropriations, but no such appropriation, except as otherwise specifically provided, shall be increased by more than 10 percent by such transfers: *Provided*, That, subject to approval by the Director of the Office of Management and Budget, any unobligated funds within such department or agency may be transferred between appropriations in order to expedite a more rapid and effective response to a Presidentially-declared major disaster, as provided in the National Response Plan required under Public Law 107-296: *Provided further*, That any transfer under this section shall be treated as a reprogramming of funds under subsection (b) and shall not be available for obligation unless the Committees on Appropriations of the Senate and the House of Representatives are notified 15 days in advance of such transfer.
- d. (d) Notwithstanding subsections (a), (b), and (c) of this section, no funds shall be reprogrammed within or transferred between appropriations based upon an initial notification provided after June 30, except in extraordinary circumstances that imminently threaten the safety of human life or the protection of property.
- e. (e) The notification thresholds and procedures set forth in this section shall apply to any use of deobligated balances of funds provided in previous Department of Homeland Security Appropriations Acts.

Explanation: The Department requests routine date changes to extend this provision for fiscal year 2016.

Proposal to Amend *Old* Section 504

SEC. 504. The Department of Homeland Security Working Capital Fund, established pursuant to section 403 of Public Law 103-356 (31 U.S.C. 501 note), shall continue operations as a permanent working capital fund for fiscal year **[2015] 2016**: *Provided*, That none of the funds appropriated or otherwise made available to the Department of Homeland Security may be used to make payments to the Working Capital Fund, except for the activities and amounts allowed in the President's fiscal year **[2015] 2016** budget: *Provided further*, That funds provided to the Working Capital Fund shall be available for obligation until expended to carry out the purposes of the Working Capital Fund: *Provided further*, That all departmental components shall be charged only for direct usage of each Working Capital Fund service: *Provided further*, That funds provided to the Working Capital Fund shall be used only for purposes consistent with the contributing component: *Provided further*, That the Working Capital Fund shall be paid in advance or reimbursed at rates which will return the full cost of each service: *Provided further*, That the Committees on Appropriations of the Senate and House of Representatives shall be notified of any activity added to or removed from the fund: *Provided further*, That the Chief Financial Officer of the Department of Homeland Security shall submit a quarterly execution report with activity level detail, not later than 30 days after the end of each quarter.

Explanation: The Department requests routine date changes to extend this provision for fiscal year 2016.

Proposal to Amend *Old* Section 505

SEC. 505 Except as otherwise specifically provided by law, not to exceed 50 percent of unobligated balances remaining available at the end of fiscal year **[2015] 2016**, as recorded in the financial records at the time of a reprogramming request, but not later than June 30, **[2016] 2017**, from appropriations for salaries and expenses for fiscal year **[2015] 2016** in this Act shall remain available through September 30, **[2016] 2017**, in the account and for the purposes for which the appropriations were provided: *Provided*, That prior to the obligation of such funds, notification shall be submitted to the Committees on Appropriations of the Senate and the House of Representatives in accordance with section 503 of this Act.

Explanation: The Department requests routine date changes to extend this provision for fiscal year 2016.

Proposal to Amend *Old* Section 506

SEC. 506 Funds made available by this Act for intelligence activities are deemed to be specifically authorized by the Congress for purposes of section 504 of the National Security Act of 1947 (50 U.S.C. 414) during fiscal year **[2015] 2016** until the enactment of an Act authorizing intelligence activities for fiscal year **[2015] 2016**.

Explanation: The Department requests routine date changes to extend this provision for fiscal year 2016.

Proposal to Amend *Old* Section 516

SEC. 516 (a) The Secretary of Homeland Security shall submit a report not later than October 15, **[2015] 2016**, to the Office of Inspector General of the Department of Homeland Security listing all grants and contracts awarded by any means other than full and open competition during fiscal year **[2015] 2016**.

(b) The Inspector General shall review the report required by subsection (a) to assess Departmental compliance with applicable laws and regulations and report the results of that review to the Committees on Appropriations of the Senate and the House of Representatives not later than February 15, **[2016] 2016**.

Explanation: The Department requests routine date changes to extend this provision for fiscal year 2016.

Proposal to Delete *Old* Section 517

SEC. 517. None of the funds provided or otherwise made available in this Act shall be available to carry out section 872 of the Homeland Security Act of 2002 (6.U.S.C. 452).

Explanation: The Department requests deletion of this provision as it is unduly restrictive and interferes with Department's ability to effectively respond to mission requirements.

Proposal to Amend *Old* Section 519

SEC. 519 Section 831 of the Homeland Security Act of 2002 (6 U.S.C. 391) is amended—

- (1) in subsection (a), by striking "Until September 30, [2014] 2015," and inserting "Until September 30, [2015] 2016,";
- (2) in subsection (c)(1), by striking "September 30, [2014] 2015," and inserting "September 30, [2015] 2016,".

Explanation: The Department requests routine date changes to extend this provision for fiscal year 2016.

Proposal to Delete *Old* 524

[SEC. 524. Section 550(b) of the Department of Homeland Security Appropriations Act, 2007 (Public Law 109–295; 6 U.S.C. 121 note), as amended by section 536 of the Department of Homeland Security Appropriations Act, 2014 (Public Law 113–76), is further amended by striking "on October 4, 2014 and inserting "on October 4, 2015.]

Explanation: The Department requests deletion of this section because section 550(b) of the Department of Homeland Security Appropriations Act, 2007 (Public Law 109–295; 6 U.S.C. 121 note), as amended by section 536 of the Department of Homeland Security Appropriations Act, 2014 (Public Law 113–76), was repealed by Section 2107 of the Protecting and Securing Chemical Facilities from Terrorist Attacks Act of 2014.

Proposal to Amend *Old* Section 532

SEC. 532 The Department of Homeland Security Chief Information Officer, the Commissioner of U.S. Customs and Border Protection, the Assistant Secretary of Homeland Security for U.S. Immigration and Customs Enforcement, the Director of the United States Secret Service, and the Director of the Office of Biometric Identity Management shall, with respect to fiscal years [2014, 2015], 2016, and 2017, submit to the Committees on Appropriations of the Senate and the House of Representatives, at the time that the President's budget proposal for fiscal year [2016] 2017 is submitted pursuant to the requirements of section 1105(a) of title 31, United States Code, the information required in the multi-year investment and management plans required, respectively, under the headings "U.S. Customs and Border Protection, Salaries and Expenses" under title II of division D of the Consolidated Appropriations Act, 2012 (Public Law 112–74); "U.S. Customs and Border Protection, Border Security Fencing, Infrastructure, and Technology" under such title; section 568 of such Act; and "Office of the Chief Information Officer", "United States Secret Service, Acquisition, Construction, Improvements, and Related Expenses", and "Office of Biometric Identity Management" under division D of the Homeland Security Appropriations Act, 2013 (Public Law 113–6).

Explanation: The Department requests routine date changes to extend this provision for fiscal year 2016.

Proposal to Delete *Old* Section 541

[SEC. 541

(a) The Secretary of Homeland Security shall submit to Congress, 180 days after the date of enactment of this Act and annually thereafter beginning with the submission of the President's budget proposal for fiscal year [2016] 2017 pursuant to section 1105(a) of title 31, United States Code, a comprehensive report on the purchase and usage of ammunition, subdivided by ammunition type. The report shall include—

1. (1) **the quantity of ammunition in inventory at the end of the preceding calendar year, and the amount of ammunition expended and purchased, subdivided by ammunition type, during the year for each relevant component or agency in the Department of Homeland Security;**
2. (2) **a description of how such quantity, usage, and purchase aligns to each component or agency's mission requirements for certification, qualification, training, and operations; and**
3. (3) **details on all contracting practices applied by the Department of Homeland Security, including comparative details regarding other contracting options with respect to cost and availability.**

(b) The reports required by subsection (a) shall be submitted in an appropriate format in order to ensure the safety of law enforcement personnel.]

Explanation: The Department requests to delete this provision as unnecessarily burdensome.

Proposal to Delete *Old* Section 542

[SEC 542. Of the fees deposited under the heading "Transportation Security Administration-Aviation Security" in fiscal year 2013 and sequestered pursuant to section 251A of the Balanced Budget and Emergency Deficit Control Act, as amended (2 U.S.C.901a), \$104,220,263 shall be available until September 30, 2016.]

Explanation: The Department requests this provision be deleted because separate authority is being pursued within the Aviation Security appropriation.

Proposal to Delete *Old* Section 543

[SEC. 543 For fiscal year [2015] 2016—

(a) section 44940 of title 49, United States Code, shall be applied as follows:

4. (1)

as if subsections (a)(2) and (d)(1) were reinstated as they existed prior to enactment of the Bipartisan Budget Act of 2013 (Public Law 113-37); and

5. (2)

in subsection (c), as if "\$6.00" were substituted for "\$5.60", and as if "has at least one segment that" were inserted before "originates".

(b) The Secretary of Homeland Security shall implement the fee increase authorized by subsection (a)(2)—

6. (1)

beginning on January 1, 2015; and

7. (2)

through the publication of notice of such fee in the Federal Register, notwithstanding section 9701 of title 31, United States Code, and the procedural requirements of section 553 of title 5, United States Code.]

Explanation: The Department requests this provision be deleted to pursue separate authorizing legislation.

Proposal to Amend *Old* Section 545

SEC [545] 541 Funding For United States Citizenship Foundation. Notwithstanding section 286(u) of the Immigration and Nationality Act (8 U.S.C. § 1356(u)), the Director of U.S. Citizenship and Immigration Services may pay up to \$3,000,000 of the premium processing fees described in section 286(u) to the U.S. Citizenship Foundation in fiscal year [2015] 2016.

Explanation: The Department requests routine date changes to extend this provision for fiscal year 2016.

Proposal to Delete *Old* Section 546

[SEC. 546 DAM SAFETY ACT. The National Dam Safety Program Act, as amended (33 U.S.C. 467 note) is amended -

a. (a)

In section 8(e) (33 U.S.C. 467f) by inserting after paragraph (6) the following new paragraphs: "(7) PERFORMANCE-BASED EVALUATION-FEMA shall establish performance measures for its assessment of State programs participating in the National Dam Safety Program. FEMA shall assess State performance under this section using these measures. FEMA shall establish targets for the States for the performance measures within 120 days of the enactment of this Act and may update them, as needed, each fiscal year. "(8) ALLOCATION- IN GENERAL.-Subject to subparagraphs (C) and (D), for each fiscal year, amounts made available under this subsection to carry out section 8 shall be allocated among the states as follows: "(A) One-third of the funds shall be awarded among states that qualify as eligible for assistance under this section. "(B) Two-thirds of the funds shall be awarded among states that not only qualify as eligible for assistance under this section, but also meet or exceed their target established for the performance measures referred to in section 8(e)(7). "(C) MAXIMUM AMOUNT OF ALLOCATION.-The amount of funds allocated to a State under this paragraph may not exceed the funds committed by the State to implement dam safety activities. "(D) DETERMINATION.-The Administrator shall determine the amount allocated to States."

b. (b)

By redesignating sections 11 through 13, as sections 12 through 14, respectively, and by inserting after section 10 the following new section: "Sec.11.PUBLIC AWARENESS AND

OUTREACH FOR DAM SAFETY. The Administrator, in consultation with other Federal agencies, State, and local governments, dam owners, the emergency management community, the private sector, non-governmental organizations and associations, and universities and academia, and others as appropriate, shall carry out a nationwide public awareness and outreach program to provide risk information to the public related to the hazards of dam failures and related matters."

- c. (c) In section 14, as redesignated by this Act, (33 U.S.C. 467j) by -
- i. (1) striking subsection (a) and inserting "(a) APPROPRIATIONS-There is authorized to be appropriated to FEMA to carry out the National Dam Safety Program Act (in addition to any amounts made available for similar purposes included in any other Act) \$14.8 million for fiscal year 2015, \$15.2 million for fiscal year 2016, \$15.7 million for fiscal year 2017, \$16.2 million for fiscal year 2018.";
 - ii. (2) striking subsections (c), (d) and (e); and
 - iii. (3) redesignating subsection (f) as subsection (c).]

Explanation: The Department request to delete this provision because the Water Resources Reform and Development Act of 2014 (Pub. L. 113-121) provides the necessary authority to meet program objectives.

Proposal to Amend *Old* Section 547

SEC. [547] 543. Of the unobligated balance available to "Federal Emergency Management Agency, Disaster Relief Fund", [\$200,000,000] \$250,000,000 are hereby permanently cancelled: *Provided*, That no amounts may be cancelled from amounts that were designated by the Congress as an emergency requirement pursuant to a concurrent resolution on the budget or the Balanced Budget and Emergency Deficit Control Act of 1985, as amended: *Provided further*, That no amounts may be cancelled from the amounts that were designated by the Congress as being for disaster relief pursuant to section 251(b)(2)(D) of the Balanced Budget and Emergency Deficit Control Act of 1985.

Explanation: The Department requests this one-time cancellation of funds.

Proposal to Amend *Old* Section 548

[Sec. 548

a. (a)

(1) For fiscal year 2015, the fees imposed in subsection (a) of section 13031 of the Consolidated Omnibus Budget Reconciliation Act of 1985 (19 U.S.C. 58c(a)) shall be applied by substituting the following amounts for the amounts provided in such subsection:

1. (A) For paragraph (1), \$594;
2. (B) For paragraph (2), \$7.50;
3. (C) For paragraph (3), \$11.25;
4. (D) For paragraph (4), \$37.50;
5. (E) For paragraph (5), \$7.50 for the fee imposed in subparagraph(A) and \$2.60 for the fee imposed in subparagraph (B);
6. (F) For paragraph (6), \$7.50;
7. (G) For paragraph (7), \$188; and
8. (H) For paragraph (8), \$150.

(2) For fiscal year 2015, the dollar amounts in subsection (b) of section 58c of title 19, United States Code, shall be applied by substituting the following amounts for the amounts provided in such subsection:

9. (A) For paragraphs (2) and (3), \$135;
10. (B) For subparagraph (A) of paragraph (5), \$8,316;
11. (C) For paragraph (6), \$2,100;
12. (D) For subparagraph (A)(ii) of paragraph (9), \$1.36; and

13. (E)

For subparagraph (B)(i) of paragraph (9), not more than \$3.00 per individual airway bill or bill of lading.]

(3)

As authorized by section 601(b) of the United States-Colombia Trade Promotion Agreement Implementation Act (Public Law 112-42) fees collected from passengers arriving from Canada, Mexico, or an adjacent island pursuant to section 13031(a)(5) of the Consolidated Omnibus Budget Reconciliation Act of 1985 (19 U.S.C. 58c(a)(5)) shall be available until expended.

- b. [(b) For fiscal year [2015] 2016, the fees imposed in section 286 of the Immigration and Nationality Act (8 U.S.C. 1356) shall be applied by substituting the following amounts for the amounts provided in such section:**
- i. (1)**
For subsection (d), \$9; and
 - ii. (2)**
For paragraph (3) of subsection (e), \$9].

Explanation: The Department requests to delete part of this provision in order to pursue increases with the Authorizing Committees.

Proposal to Insert New Section 542

As authorized by section 601(b) of the United States-Colombia Trade Promotion Agreement Implementation Act (Public Law 112-42) fees collected from passengers arriving from Canada, Mexico, or an adjacent island pursuant to section 13031(a)(5) of the Consolidated Omnibus Budget Reconciliation Act of 1985 (19 U.S.C. 58c(a)(5)) shall be available until expended.

Explanation: The Department requested to delete old section 548 except for section (a)(3). The Department requests to recodify the undeleted portion of old section 548 as new section 548.

Proposal to Insert New Section 543

Sec. 543. Notwithstanding sections 503 and 505 of this Act, the Secretary may reallocate within or transfer to the U.S. Coast Guard for the Offshore Patrol Cutter Project: (1) amounts made available by this Act, to remain available until September 30, 2017, and (2) the unobligated balances of amounts made available by prior Acts: Provided, That any amounts reallocated or transferred under this section shall not be available for obligation unless the Committees on Appropriations of the Senate and the House of Representatives are notified 15 days in advance of such transfer: Provided further, That this section shall not apply to amounts that were designated by the Congress for Overseas Contingency Operations/Global War on Terrorism or as an emergency requirement pursuant to the Concurrent Resolution on the Budget or the Balanced Budget and Emergency Deficit Control Act of 1985, as amended.

Explanation: The Department requests this provision to provide the Coast Guard with enhanced authority to transfer funds to support the Offshore Patrol Cutter Project.

Proposal to Insert New Section 544

SEC. 544. Of amounts transferred to the Disaster Assistance Direct Loan Program pursuant to the Community Disaster Loan Act of 2005 (Public Law 109-88), \$100,000,000 are rescinded.

Explanation: The Department requests a one-time rescission of the referenced funds to provide discretionary budget authority for other Department priorities.

Proposal to Insert New Section 545

SEC. 545. (a) For an additional amount for Financial Systems Modernization, \$42,977,000, which shall remain available until September 30, 2017.

(b) Funds made available in subsection (a) for Financial Systems Modernization may be transferred by the Secretary of Homeland Security between appropriations for the same purpose, notwithstanding section 503 of this Act.

(c) No transfer described in subsection (b) shall occur until 15 days after the Committees on Appropriations of the Senate and the House of Representatives are notified of such transfer.

Explanation: The Department requests multi-year funding for Financial Systems Modernization to maximize efficiency and reflect potential delays.

Proposal to Insert New Section 546

SEC. 546 The FEMA Administrator may expend funds appropriated under the heading "National Predisaster Mitigation Fund" in this and prior Acts to carry out the predisaster mitigation grant program under Section 203 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5133) notwithstanding any directed obligations under that heading in this and prior Acts if the intended recipient of the directed obligation either: (a) informs FEMA in writing that no application will be submitted for the funding; or (b) does not apply to FEMA for the funding before the end of the second fiscal year succeeding the fiscal year in which the directed obligation was appropriated; Provided, That amounts appropriated under the heading "National Predisaster Mitigation Fund" in this and prior Acts shall be available for administrative expenses of carrying out the predisaster mitigation grant program.

Explanation: The Department requests this new provision in order to expend unobligated funds appropriated without fiscal year limitation in prior years, which designated for specific grant program projects as authorized under Section 203 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5133).

Department of Homeland Security

ii. Status of Congressionally Requested Studies, Reports and Evaluations

**Department of Homeland Security
Departmental Management and Operations
Status of Congressionally Requested Studies, Reports, and Evaluation**

Fiscal Year	Due Date	Reference/Citation	Requirement	Status
FY 2015	1/30/2015	FY 2014 Joint Explanatory Statement, House Report 113-91	FY15 1st Quarter Update - Official and Non-Official Travel - The Department is to provide a quarterly report to the committees not later than 30 days after the end of each fiscal quarter, beginning with the end of the first quarter after the date of enactment of this act. The report shall detail all costs of official and non-official travel by the Secretary and the Deputy Secretary delineated by each trip for that quarter within all DHS appropriations	In the component for draft and review
FY 2014	11/15/2014	FY 2014 Joint Explanatory Statement;	FY14 4th Quarter - Border Security Status Report - The Secure Border Initiative shall now be called the Border Security Status Report and shall continue to include all performance metrics and resource data from past reports in their current format, with the exception that they no longer should include resource data on SBI total budget obligations and outlays and budget execution reports. that is included in the BSFIT expenditure plan. Additionall the report shall include the following: a. estimates of the impact of programs (such as Operation Streamline) that are intended to reduce the rate of recidivism of illegal border crossers; b. for ports of entry, the maritime domain and between the ports of entry: 1. border crossings, 2. the rate of apprehension of attempted border crossings, 3. the inflow into the US of illegal entrants that evade apprehension and c. data on the subsequent enforcement actoins associated with CBP apprehensions such as voluntary return, expedited removal, transfer to ICE custody, transfer to criminal prosecution, Mexican Interior Repatriation Program, and other categories necessary to provide an accurate accounting of such actions.	In the component for draft and review

FY 2015	2/15/2015	FY 2015 Joint Explanatory Statement;	FY15 1st Quarter - Border Security Status Report - The Secure Border Initiative shall now be called the Border Security Status Report and shall continue to include all performance metrics and resource data from past reports in their current format, with the exception that they no longer should include resource data on SBI total budget obligations and outlays and budget execution reports. that is included in the BSFIT expenditure plan. Additionall the report shall include the following: a. estimates of the impact of programs (such as Operation Streamline) that are intended to reduce the rate of recidivism of illegal border crossers; b. for ports of entry, the maritime domain and between the ports of entry: 1. border crossings, 2. the rate of apprehension of attempted border crossings, 3. the inflow into the US of illegal entrants that evade apprehension and c. data on the subsequent enforcement actoins associated with CBP apprehensions such as voluntary return, expedited removal, transfer to ICE custody, transfer to criminal prosecution, Mexican Interior Repatriation Program, and other categories necessary to provide an accurate accounting of such actions.	In the component for draft and review
FY 2015	1/30/2015	FY 2014 Joint Explanatory Statement	FY15 Q1 Working Capital Fund Activity - ... of this Act instead directs quarterly reporting on obligations, expenditures and the projected operating level for each WCF activity	In the component for draft and review
FY 2015	4/30/2015	FY 2014 Joint Explanatory Statement	FY15 Q2 Working Capital Fund Activity - ... of this Act instead directs quarterly reporting on obligations, expenditures and the projected operating level for each WCF activity	In the component for draft and review
FY 2015	30 days after FY 2015 enactment	Public Law 113-76; FY 2014 Joint Explanatory Statement	FY16-20 FYHSP - SEC 874 of Public Law 107-296 - the Department shall submit a Future Years Homeland Security Program budget as part of the fiscal year 2015 budget justification. Further, the report is to provide a 5 - year capital investment plan for all major acquisitions	In the component for draft and review
FY 2015	1/30/2015	FY 2014 Joint Explanatory Statement; Senate Report 113-77	FY15 1st Quarter - Official Reception and Representation Expenses - The Department is to continue to submit quarterly reports to the Committee listing obligations for all reception and representation expenses, as directed in the Senate Report.	In the component for draft and review
FY 2015	4/30/2015	FY 2014 Joint Explanatory Statement; Senate Report 113-77	FY15 2nd Quarter - Official Reception and Representation Expenses - The Department is to continue to submit quarterly reports to the Committee detailing the obligation of all DHS Reception and Representation Expenses by purpose and dollar amount.	In the component for draft and review
FY 2015	2/5/2015	FY 2014 Joint Explanatory Statement; Senate Report 112-74; House Report 112-91	FY 2015 December Budget Execution and Staffing - SEC. 514 General Provisions: within 45 days after the end of each month, the CFO of the Department of Homeland Security shall submit to the Committees on Appropriations of the Senate and the House of Representatives a monthly budget and staffing report for that month that includes total obligations, on-board vesus funded full-time equivalent staffing levels, and the number of contract employees for each office of the Department.	In the component for draft and review

FY 2015	3/5/2015	FY 2014 Joint Explanatory Statement; Senate Report 112-74; House Report 112-91	FY 2015 January Budget Execution and Staffing - SEC. 514 General Provisions: within 45 days after the end of each month, the CFO of the Department of Homeland Security shall submit to the Committees on Appropriations of the Senate and the House of Representatives a monthly budget and staffing report for that month that includes total obligations, on-board versus funded full-time equivalent staffing levels, and the number of contract employees for each office of the Department.	In the component for draft and review
FY 2015	4/5/2015	FY 2014 Joint Explanatory Statement; Senate Report 112-74; House Report 112-91	FY 2015 February Budget Execution and Staffing - SEC. 514 General Provisions: within 45 days after the end of each month, the CFO of the Department of Homeland Security shall submit to the Committees on Appropriations of the Senate and the House of Representatives a monthly budget and staffing report for that month that includes total obligations, on-board versus funded full-time equivalent staffing levels, and the number of contract employees for each office of the Department.	In the component for draft and review
FY 2015	30 days after FY 2015 enactment	Public Law 113-76; FY 2014 Joint Explanatory Statement; House Report 112-492; Senate Report 112-169	Comprehensive Acquisition Report - Provided further, That the Under Secretary for Management shall, pursuant to the requirements contained in 112-331, submit to the Committees on Appropriations of the Senate and the House of Representatives a Comprehensive Acquisition Status Report with the President's budget for fiscal year 2014 as submitted under section 1105(a) of title 31, United States Code, and quarterly updates to such report not later than 45 days after the completion of each quarter.	In the component for draft and review
FY 2015	2/15/2015	Public Law 113-76; FY 2014 Joint Explanatory Statement; House Report 112-492; Senate Report 112-169	Comprehensive Acquisition Report - Q1 FY 2015 Update - Provided further, That the Under Secretary for Management shall, pursuant to the requirements contained in 112-331, submit to the Committees on Appropriations of the Senate and the House of Representatives a Comprehensive Acquisition Status Report with the President's budget for fiscal year 2014 as submitted under section 1105(a) of title 31, United States Code, and quarterly updates to such report not later than 45 days after the completion of each quarter.	In the component for draft and review
FY 2015	2/2/2015	House Report 113-481	Common Appropriations Structure - OCFO is directed to provide a report to accompany the President's budget request for fiscal year 2016 that outlines a notional framework for a common appropriation structure, contains appropriation crosswalks for each component demonstrating the format of the new structure and comparisons with the current structure, and details any assumptions, particularly regarding proposed changes to reprogramming authorities, that would be required to make the new structure work efficiently.	In the component for draft and review

FY 2015	3/2/2015	FY 2014 Joint Explanatory Statement; Senate Report 112-170	DHS User Fees Q1 FY 2016 - In addition, the Secretary shall provide a contingency plan for making up any shortfall between expected collections and budgeted amounts, by DHS component, no later than 60 days after the date of enactment of this Act, and quarterly thereafter.	In the component for draft and review
FY 2015	3/4/2015	FY 2014 Joint Explanatory Statement, Senate Report 113-77	FFRDC - As detailed in the Senate report, though on an annual rather than semiannual basis, the Department shall report to the Committees each year, concurrent with the submittal of the President's budget request and beginning with the fiscal year 2015 submittal to Congress, on current projects tasked to Federally Funded Research and Development Centers.	In the component for draft and review

BUDGET REQUEST AND SUPPORTING INFORMATION

Departmental Management and Operations Office of the Secretary and Executive Management

I. Appropriation Overview

A. Mission Statement for Office of the Secretary and Executive Management:

The Department of Homeland Security (DHS) Office of the Secretary and Executive Management (OSEM) provides leadership, direction, and management to the Department. OSEM establishes and implements policy and provides various support functions and oversight to all entities within the Department. OSEM also oversees the Department's ongoing efforts to integrate and consolidate its resources in order to create a more seamless organization and align resources to the highest Department-wide priorities.

B. Budget Activities:

OSEM is a separate appropriation within Departmental Management and Operations (DMO) that provides resources for 12 separate Programs, Projects and Activities (PPAs) including: Immediate Office of the Secretary; Immediate Office of the Deputy Secretary; Chief of Staff (COS); Office of the Executive Secretary (ESEC); Office of the General Counsel (OGC); Office for Civil Rights and Civil Liberties (CRCL); Office of Public Affairs (OPA); Office of Legislative Affairs (OLA); Privacy Office (PRIV); Office of the Citizenship and Immigration Services Ombudsman (CISOMB); Office of Policy (PLCY); and the Office of Intergovernmental Affairs (IGA). Below are brief descriptive summaries of the PPAs.

Immediate Office of the Secretary: The Office of the Secretary's role is to provide executive leadership, management, direction, and oversight for the Department's Components. The Secretary represents DHS to the President, Congress, state, local, tribal and territorial partners, and the general public.

Immediate Office of the Deputy Secretary: The Office of the Deputy Secretary supports the Secretary by providing leadership to the Department, especially regarding internal management and direction.

Chief of Staff: The COS is responsible for coordinating policy initiatives and other actions of the Department's Components, Directorates, and offices.

Office of the Executive Secretary: ESEC supports the Offices of the Secretary and Deputy Secretary with management of their correspondence, decision documents, and other written communications; Congressional questions for the record, and testimony for all Departmental hearings. ESEC is charged with ensuring that all materials presented to the Secretary and Deputy Secretary for signature has been thoroughly cleared with all relevant Components.

Office of the General Counsel: The General Counsel is the chief legal officer for DHS and oversees and integrates more than 1,800 attorneys throughout the Department. OGC is responsible for ensuring that Departmental activities comply with applicable legal requirements, as well as establishing that the Department's efforts to secure the Nation are consistent with the civil rights and civil liberties of the public and observe the rule of law. OGC provides legal advice on areas such as national security, immigration, litigation, international law, maritime safety and security, transportation security, border security law, cyber security, fiscal and appropriations law, environmental law, and many others. OGC also provides legal services in several areas where the law intersects with the achievement of mission goals, such as the coordination of the Department's rulemaking activities, managing interdepartmental clearance of proposed legislation, and providing legal training for law enforcement officers. OGC provides legal counsel for all DHS offices (except those specifically excluded by statute).

Office for Civil Rights and Civil Liberties: CRCL supports the Department as it secures the Nation while preserving individual liberty, fairness, and equality under the law. CRCL performs four key functions to integrate civil rights and civil liberties into Departmental activities:

- Advising Department leadership, personnel, and partners about civil rights and civil liberties issues; ensuring respect for civil rights and civil liberties in policy decisions and in the implementation of those decisions.
- Communicating with individuals and communities whose civil rights and civil liberties may be affected by DHS activities, informing them about policies and avenues of redress, and promoting appropriate attention within the Department to their experiences and concerns.
- Investigating and resolving civil rights and civil liberties complaints filed by the public.
- Leading the Department's Equal Employment Opportunity (EEO) programs and promoting personnel diversity and merit system principles.

Office of Public Affairs: OPA is responsible for managing the Department's external and internal communications. The office responds to media inquiries, maintains and updates the Department's website, writes speeches for senior Department officials, and coordinates speaking events. The office manages the Department's organizational identity program, which includes usage of the DHS seal and related guidelines. Also, the office oversees the Department's employee communication activities, which include coordinating communications for Department-wide initiatives, town hall meetings between management and employees, and the operation and management of an intranet site. Per the Homeland Security Presidential Directive (HSPD) 5, OPA's incident communications program guides overall Federal incident communication activity and coordinates with State, local, and international partners to ensure accurate and timely information is provided to the public during a crisis.

Office of Legislative Affairs: OLA serves as the Department's primary liaison to Congress. OLA advocates for the policy interests of the Administration and the Secretary. OLA also ensures that all DHS Components are actively engaged with Congress in their specific areas of responsibility. OLA articulates views on behalf of DHS Components and their legislative initiatives, responding to requests and inquiries from congressional committees, individual Members of Congress, and their staffs. OLA also participates in the Senate confirmation process for all DHS Presidential nominees.

Privacy Office: PRIV protects the collection, use, and disclosure of Personally Identifiable Information (PII) and Departmental information. It ensures that appropriate access to information is consistent

with the vision, strategic mission, and core values of the Department. PRIV also implements the policies of the Department to defend and protect individual rights, liberties, and information interests of the public. PRIV has oversight of all privacy and disclosure policy matters, including compliance with the Privacy Act of 1974, the Freedom of Information Act (FOIA), and the completion of privacy impact statements on all new programs and systems, as required by the E-Government Act of 2002 and Section 222 of the Homeland Security Act. The DHS Privacy Office is the first statutorily-mandated Privacy Office within the Federal Government.

Citizenship and Immigration Services Ombudsman: CISOMB assists individuals and employers in resolving problems connected with pending United States Citizenship and Immigration Services (USCIS) cases. In addition, as required by statute, CISOMB identifies common problems experienced by individuals and employers when seeking USCIS services, and proposes changes to mitigate such problems and improve the delivery of immigration services. In accomplishing each of these missions, the CISOMB works impartially, soliciting information and feedback from USCIS, other government agencies, immigration benefits applicants, and the immigration stakeholder community.

Office of Policy: PLCY serves as a central resource to the Secretary and other Department leaders for policy development and review, strategic planning and analysis, and facilitation of decision-making on the full breadth of issues that may arise across the dynamic homeland security enterprise. PLCY is responsible for strengthening our Nation's homeland security by developing DHS-wide policies, programs, and planning to promote and ensure the highest level of performance, quality, consistency, and integration in the execution of all homeland security missions. PLCY represents and coordinates the consolidated DHS position at White House interagency committee meetings. The Office develops and articulates the long-term strategic view of the Department and translates the Secretary's strategic priorities into the Quadrennial Homeland Security Review (QHSR), DHS Strategic Plan, and other planning products that drive increased operational effectiveness through integration, prioritization, and resource allocation.

Office of Intergovernmental Affairs: The Office of Intergovernmental Affairs serves as a base for the expansion with a proposed consolidation of the functions of Intergovernmental Affairs, the Private Sector Office, the Office for State and Local Law Enforcement, Academic Engagement, the "If You See Something, Say Something" public awareness campaign, and the Committee Management Office. The remodeled office will be responsible for communicating and coordinating State, local, tribal, and territorial (SLTT) government interactions throughout and across the Department.

C. Budget Request Summary:

The Office of the Secretary and Executive Management requests 597 full-time positions (FTP), 597 full-time equivalents (FTE), and \$134,247,000 for the 2016 Budget. The 2016 request results in a net increase of 11 positions, 14 FTE, and \$5,478,000 from the 2015 President's Budget.

The Department completed an efficiency review of headquarter functions and identified ways to maximize the effectiveness and efficiency of the funding that the DHS receives in order to streamline operations, eliminate duplication, promote greater accountability and support transparency. As a result of the review, the overall net transfers were 19 FTP and 19 FTE and \$3.909 million which include the following:

- Transfer In – 3 positions, 3 FTE, and \$0.720 million for senior DHS liaison officers from the Office of Operations Coordination and Planning (OPS) to COS
- Transfer In – 1 position, 1 FTE, and \$0.212 million for the Office of Academic Engagement from the Office of the Chief Human Capital Officer (OCHCO) to IGA
- Transfer In – 31 positions, 31 FTE, and \$6.015 million for operations planning functions from OPS to PLCY
- Transfer Out – 9 positions, 9 FTE, and \$1.481 million from ESEC to OPS for the Secretary's briefing staff
- Transfer Out – 1 position, 1 FTE, and \$0.219 million from ESEC to the Office of the Chief Security Officer (OCSO) for DHS Headquarters Emergency Preparedness Program
- Transfer Out – 1 position, 1 FTE, and \$0.188 million from ESEC to the Office of the Chief Financial Officer (OCFO) for DHS Efficiency Review functions
- Transfer Out – 5 positions, 5 FTE, and \$1.147 million from PLCY to the Federal Emergency Management Agency (FEMA) for the Resilience STAR program
- Transfer Out - \$0.003 million for Data Center Support from PLCY to the Office of the Chief Information Officer

Other Adjustments-to-base, excluding the transfers above, result in a decrease of 15 positions, 15 FTE, and \$3.563 million include:

- Increase - \$0.226 million for the annualization of the 2015 pay raise
- Increase - \$0.885 million for the proposed 1.3 percent 2016 pay increase
- Increase – 3 FTE and \$0.398 million for the annualization of a CISOMB program change
- Increase - \$0.334 million for increased retirement contributions
- Increase – 3 positions, 3 FTE, and \$0.379 million for Working Capital Fund increases
- Decrease - \$1.423 million for the implementation of Voluntary Early Retirement Authority (VERA) and Voluntary Separation Incentive Payments (VSIP) to support the Department's effort to right-size the headquarters
- Decrease – 15 positions, 15 FTE, and \$2.377 million for reductions to vacant positions
- Decrease - \$0.133 million for cellular wireless savings
- Decrease - \$0.050 million for commercial parking subsidy savings
- Decrease - \$0.394 million for reductions to travel, contracts, supplies, materials, and training
- Decrease - \$0.361 million for the non-recur of a 2015 CISOMB program change
- Decrease - \$1.047 million for Working Capital Fund reductions

Program Changes of 4 positions, 4 FTE, and \$5.132 million include:

- Increase – 1 position, 1 FTE, and \$0.132 million for the OGC Board for Correction of Military Records
- Increase – 3 positions, 3 FTE, and \$5.0 million for the Joint Requirements Council

FY 2016 Total Request	6	6	\$1,758
Total Change 2015 to 2016	-	-	\$7

OSEM requests 6 positions, 6 FTE, and \$1.758 million in 2016 for the Immediate Office of the Deputy Secretary. Base adjustments include:

- Increase - \$0.003 million for the annualization of the 2015 pay raise
- Increase - \$0.009 million for the 2016 pay increase
- Increase - \$0.003 million for retirement contribution increases
- Decrease - \$0.005 million for VERA and VSIP
- Decrease - \$0.002 million for cellular wireless savings
- Decrease - \$0.001 million for Working Capital Fund reductions

CURRENT SERVICES PROGRAM DESCRIPTION:

The Immediate Office of the Deputy Secretary supports the Secretary by providing leadership with a focus on the internal management and direction of the Department to ensure its efficient and effective operation. The Deputy Secretary's role is to provide internal oversight of all Departmental operations, which allows the Secretary to focus on external matters concerning homeland security and DHS.

- Decrease - \$0.028 million for cellular wireless savings
- Decrease - \$0.017 million for commercial parking subsidy savings
- Decrease - \$0.541 million for Working Capital Fund adjustments

CURRENT SERVICES PROGRAM DESCRIPTION:

CRCL provides DHS with advice on the full range of civil rights and civil liberties issues, investigates complaints by the public about civil rights and civil liberties violations, and offers recommendations to solve problems uncovered by those investigations. CRCL provides training and technical assistance to DHS personnel and State, local, tribal, and territorial (SLTT) partners and conducts outreach and engagement with communities whose civil rights and civil liberties are affected by DHS activities. CRCL is specifically involved in the oversight of ICE’s 287(g) and Secure Communities programs by providing policy advice, investigations, and training to SLTT partners. CRCL also works on countering domestic violent extremism through community engagement initiatives and training for SLTT partners. The office acts as the DHS-designated single point of contact for human rights treaties and complaints. CRCL also facilitates U.S. Government-wide communication to community leaders after a security or other incident, through its Incident Community Coordination Teams. CRCL provides information to the public on the responsibilities and functions of, and how to contact, the Officer for Civil

Rights and Civil Liberties, including how to file civil rights and civil liberties complaints. It conducts administrative adjudication of disability discrimination claims under Section 504 of the Rehabilitation Act of 1973. CRCL leads the Department's EEO and diversity programs and is responsible for DHS-wide policies, training, and complaint adjudication processes to promote EEO and diversity for all employees and applicants.

CRCL 2016 Expenditure Plan

The *Fiscal Year 2014 DHS Appropriations Act* (P.L. 113-76) required the submission of an expenditure plan for the Office for Civil Rights and Civil Liberties to be submitted at the time of the President’s budget proposal for fiscal year 2015. Under the current Continuing Resolution, the Department is referencing that requirement and submitting the FY 2016 expenditure plan information for that office in the FY 2016 Congressional Justification.

Office for Civil Rights and Civil Liberties Planned Obligations:						FY 2016 (\$ in Thousands)
Office	Projected Onboard	Salaries and Benefits	Travel	Other Expenses ¹	Working Capital Fund (WCF)	Totals by Office

Staffing

Fiscal Year 2016 Planned Staffing Grades	Current On-Board	Vacancies	Anticipated On Board
Front Office	13		13
Programs Branch	23	1	24
Compliance Branch	17		17
EEO and Diversity	27		27
HQ EEO	6		6
OAST	3		3
ADG	4		4
Total Positions	93	1	94

As of December 31, 2014, CRCL has a total on-board staff count of 93 and 1 vacant position. Full-year projected salaries and benefits total is \$15,194,000, which is 73% of CRCL's total FY 2016 budget.

CRCL's staff is organized into five functional units that focus on civil rights and liberties issues that are affected by the Department's activities.

- The Programs Branch provides policy advice to the Department on civil rights and civil liberties issues; conducts training of DHS personnel and State and local law enforcement partners; and coordinates outreach and engagement activities in communities whose civil rights and civil liberties are particularly affected by DHS programs. The Programs Branch has four sections: Community Engagement; Immigration; Security, Intelligence and Information Policy; and the Civil Rights and Civil Liberties Institute.
- The Compliance Branch investigates complaints from the public alleging violations of civil rights or civil liberties by DHS personnel, programs, or activities.
- The Anti-Discrimination Group works to ensure that the Department's programs and activities do not discriminate or prohibit access to the Department's programs against individuals on the basis of race, color, national origin, limited English proficiency, age, sex, or disability.
- The Equal Employment Opportunity and Diversity Division leads the Department's efforts toward ensuring that all DHS employees and applicants enjoy equal employment opportunity, and issues final agency decisions on complaints of employment discrimination brought by DHS employees and applicants.
- The Office of Accessible Systems & Technology is a joint effort of CRCL and the DHS Office of the Chief Information Officer. It implements Section 508 of the *Rehabilitation Act of 1973* (P.L. 93-112), which requires the Federal Government to ensure information and data are accessible to persons with disabilities.

Total Expenses

Category	Amount (\$ in Thousands)
Travel	\$257
Training	\$20
Supplies, Equipment, and Maintenance	\$88
Contracts	\$1,162
WCF	\$4,233
Total	\$5,760

After salary and benefits, described in Section IV, CRCL's FY 2016 funding allows \$5,760,000 for all other expenses, which includes WCF expenses, shared services, operational travel, training, supplies and contracts.

Travel

- CRCL plans to spend \$257,000 on travel in FY 2016. Travel is used to directly support the Department's priorities related to its Community Engagement and Countering Violent Extremism outreach efforts. The Community Engagement Section expects to coordinate and participate in engagement events in at least 17 metropolitan areas with 15 regularly held roundtable meetings, and maintain engagement in Washington, DC; Chicago, IL; Los Angeles, CA; Boston, MA; Detroit, MI; Tampa/Orlando, FL; Columbus, OH; Seattle, WA; Atlanta, GA; Denver, CO; Houston, TX; New York, NY; Phoenix, AZ; and Minneapolis, MN.
- Further, The Countering Violent Extremism Section will be expanding its Community Awareness Brief and the Community Resilience Exercises to other cities nationwide, and will continue to work with Federal, State, and local partners to assist in the development of a prevention and intervention framework for those individuals and communities vulnerable to the violent extremist narrative and the draw to engage in foreign conflict zones, such as Syria or Somalia.
- Also, in partnership with Customs and Border Protection, CRCL will conduct a national dissemination and outreach effort, to ensure that all persons detained for secondary inspection at the border have meaningful access to information on their rights and responsibilities.
- Finally, the Compliance Section will continue to conduct site visits to Immigration and Customs Enforcement facilities, to improve the conditions of detention for families and individuals being held in DHS custody.

Training

CRCL plans to spend \$20,000 on employee training. CRCL encourages staff to participate in relevant skills and leadership development programs. CRCL continues to focus on improving individual staff development plans and coordinating with the Office of the Chief Human Capital Officer.

Supplies and Materials, Equipment and Maintenance

CRCL has budgeted \$88,000 for items such as paper, toner, training tools, and other office supplies and equipment.

Working Capital Fund

This centrally managed account provides Department-wide functions, such as: finance, budget, and accounting support; information technology; and personnel administration. WCF allocates costs because of various algorithms, depending on the service provided. The \$4,233,000 reflects the estimated FY 2016 WCF costs for rent and non-rent activities.

Contracts

FY 2016 Contracts			
Office	Contract Description	Obligations (\$ in Thousands)	Expected Contract Award Date (Quarter)
All	Security Forces	\$121	Q1
All	Special Services, Language Translation/Interpretation, Statistician and General Administrative Support	\$100	Q1
All	OCIO - MicroPact Support	\$156	Q2
EEO HQ	Investigations and Counseling Services	\$175	Q2
EEO HQ	EEO HQ Mediation	\$5	Q2
EEO HQ	EEO HQ Sign Language	\$55	Q2
Compliance Branch	Consulting Experts for Civil Rights Investigations	\$550	Q2
Total Planned Contracts		\$1,162	

FY 2016, CRCL has allocated \$1,162,000 for mission-critical procurement actions that support the CRCL mandate. Specifically, these procurement actions support the following functions and activities:

Security Forces: CRCL reviews intelligence products created by DHS to ensure that the products do not violate civil rights or liberties. We conduct these reviews via access to an onsite Sensitive Compartmented Information Facility (SCIF) that became operational in February 2011. The SCIF requires access to security services 24 hours per day, and the FY 2016 service cost is approximately \$121,000.

Special Services and Administrative Support: CRCL utilizes expert services to develop statistical oversight methodologies for DHS programs and activities. Language interpretation and translation services also are utilized as part of the complaints process. For FY 2016, \$100,000 covers these services, along with other general administrative support.

MicroPact Support: CRCL and the Office of the Chief Information Officer’s (OCIO) Enterprise System Development Office (ESDO) work together to manage the services required to support the delivery of the Micropact applications (iComplaints, Entellitrak, and eVersity) in the Data Center 2 within the shared virtualized infrastructure. ESDO provides these services as part of its Customer Relationship Management (CRM) as a service offering in support of the Infrastructure as a Service (IaaS) Offering. For FY 2016, \$156,000 will cover the costs for this service.

EEO HQ Investigations and Counseling Services: The EEO HQ contract funds the EEO Counseling and Investigative support services performed in accordance with the Equal Employment Opportunity Commission (EEOC) Regulations set forth at 29 C.F.R. Part 1614, and the EEOC Management Directive (MD) 110, and any subsequent law, statute, regulation, or directive. DHS HQ EEO ensures that programs, policies and procedures involving internal and external EEO matters are addressed in an integrated and comprehensive manner. Total costs for FY 2016 are \$175,000.

EEO HQ Mediation Contract: The EEO HQ contract funds mediators to aid in CRCL’s regulatory obligations. Total costs for FY 2016 are \$5,000.

Sign Language Interpreters: CRCL’s use of a pool of sign language interpreters is funded by \$55,000, to comply with Rehabilitation Act requirements for DHS to communicate effectively with people with hearing impairments. This funding covers only the needs of CRCL and the Immediate Office of the Secretary.

Compliance Branch Consulting Experts: CRCL requires experts to assist in carrying out its statutory authority under 6 U.S.C. § 345 and 42 U.S.C. § 2000ee-1, to review and investigate information concerning abuses of civil rights, civil liberties, and profiling based on race, ethnicity, or religion by DHS employees and officials. For example, CRCL requires medical experts to evaluate and provide expertise on complaints related to the provision, administration, and quality of medical care offered to DHS detainees in immigration detention. Other experts address mental health care, health and environmental safety, child/family-specific issues in custody, and security issues in immigration detention. Approximately \$550,000 is budgeted for this purpose to satisfy new and ongoing contracts with individuals, or groups of experts.

Obligation Schedule

	Q1 FY 2016 Planned	Q2 FY 2016 Planned	Q3 FY 2016 Planned	Q4 FY 2016 Planned

- Decrease - \$0.010 million for cellular wireless savings
- Decrease - \$0.182 million for reductions to travel, contracts, supplies, materials, and training
- Decrease - \$0.031 million for Working Capital Fund reductions

CURRENT SERVICES PROGRAM DESCRIPTION:

The Office of Public Affairs (OPA) is responsible for oversight and management of all external and internal communications. On a daily basis, OPA responds to media inquiries, maintains and updates the Department’s website, writes speeches for principals and reviews and coordinates speaking events for Department officials. OPA fosters strategic communication throughout DHS and with external stakeholders. OPA manages the DHS Organizational Identity Program, which provides guidelines for the proper use of the DHS seal and related identities. OPA oversees DHS employee communication activities which include DHS Connect, and town hall meetings between management and employees. The Incident Communications Team coordinates incident communications with the White House, Federal departments and agencies, and State, local and international partners to ensure accurate and timely information is provided to the public during an incident. Communicating emergency public information is mandated by HSPD-5, Management of Domestic Incidents, to ensure that potentially life-saving information is provided to the public in a timely manner.

- Decrease - \$0.009 million for cellular wireless savings
- Decrease - \$0.012 million for commercial parking subsidy savings

CURRENT SERVICES PROGRAM DESCRIPTION:

OLA serves as the Department’s primary liaison to Congress and advocates for the policy interests of the Administration and the Secretary. OLA ensures that all DHS Components are actively engaged with Congress in their specific areas of responsibility. OLA responds to requests and inquiries from congressional committees, individual Members of Congress, and their staffs, and participates in the Senate confirmation process for all DHS Presidential nominees.

- Decrease - \$0.016 million for commercial parking subsidy savings
- Decrease - \$0.060 million for reductions to travel, contracts, supplies, materials, and training
- Decrease - \$0.004 million for Working Capital Fund reductions

CURRENT SERVICES PROGRAM DESCRIPTION:

The Privacy Officer is responsible for protecting the Department's collection, use, and disclosure of Personally Identifying Information (PII) and other departmental information. These responsibilities include coordinating and implementing policy development and compliance Department-wide for the FOIA and for the Privacy Act. The office adjudicates all appeals from denials of access, by any Department Component, for information under these two Acts. The Office has oversight of all privacy and disclosure policy matters, including the completion of privacy impact statements on all new programs and systems, as required by the E-Government Act of 2002 and Section 222 of the Homeland Security Act.

Privacy 2016 Expenditure Plan

The *Fiscal Year 2014 DHS Appropriations Act* (P.L. 113-76) required the submission of an expenditure plan for the Privacy Office to be submitted at the time of the President’s budget proposal for fiscal year 2015. Under the current Continuing Resolution, the Department is referencing that requirement and submitting the FY 2016 expenditure plan information for that office in the FY 2016 Congressional Justification.

² Other Expenses includes training and non-reoccurring expenses for printing, postal service, leasehold improvements, and transportation of things.

Staffing

Teams	FY 2015	FY 2016
PRIV Front Office	5	5
Administrative Coordination Team	6	6
FOIA	15	15
Policy and Oversight	4	4
Compliance	5	5
Security, Information Sharing and Safeguarding	5	5
Totals	40	40

As of December 31, 2014 the Privacy Office has a total on-board staff count of 37. FY 2016 full-year projected salaries and benefits, totals \$6,114,000. These projected salaries and benefits account for 76 percent of the Privacy Office's total budget.

Total Expenses

Category	Amount
Travel	\$57
Supplies & Materials	\$60
Contracts and IAA's	\$230
Working Capital Fund	\$1,545
Other Expenses	\$25
Total	\$1,917

Travel

The Privacy Office plans to spend \$57,000 on travel in FY 2016. Travel is used to directly support the Department's priorities related to: training DHS units, and other law enforcement agencies pursuant to the 9/11 Commission Act; engagement with international counterparts to negotiate information-sharing agreements; and the conduct of in-person meetings of the Data Privacy and Integrity Advisory Committee, comprised of private-sector and nonprofit experts.

Supplies and Materials, Equipment and Maintenance

The Privacy Office projects \$60,000 in costs for supplies and materials. Supplies and materials include commodities that are ordinarily consumed or expended within one year, such as copier paper, toner cartridges, training tools, and other office equipment and services.

Working Capital Fund (WCF)

The Privacy Office reimburses the WCF, which is a reimbursable fund that finances a full range of administrative support services to DHS components. This centrally managed account provides Department-wide functions, such as: finance, budget, and accounting support; information technology; and personnel administration. WCF allocates costs because of various algorithms, depending on the service provided. The \$1,545,000 reflects the estimated FY 2016 WCF costs for rent and non-rent activities.

Other Expenses

The Privacy Office projects a total of \$25,000 to be used for other expenses which includes workforce development skills, training and other miscellaneous non-reoccurring expenses such as printing, postal service, leasehold improvements, and logistics. The Privacy Office encourages staff to participate in Leadership development, rotational/detail assignments, and other training programs to enhance current performance and potential for future assignments. The ability to invest in continuous learning and career development for our employees results in improved performance and productivity not only in the Privacy Office, but throughout the Department.

FY 2016 Total Request	29	29	\$6,312
Total Change 2015 to 2016	(1)	2	(\$116)

OSEM requests 29 positions, 29 FTE, and \$6.312 million in 2016 for the Citizenship and Immigration Services Ombudsman (CISOMB). Base adjustments include:

- Increase - \$0.010 million for the annualization of the 2015 pay raise
- Increase - \$0.040 million for the 2016 pay increase
- Increase - \$0.012 million for retirement contribution increases
- Increase - 3 FTE and \$0.398 million for the annualization of a 2015 program change
- Increase - \$0.005 million for Working Capital Fund increases
- Decrease - \$0.045 million for VERA and VSIP
- Decrease - 1 positions, 1 FTE, and \$0.159 million for reductions to vacant positions
- Decrease - \$0.011 million for cellular wireless savings
- Decrease - \$0.005 million for commercial parking subsidy savings
- Decrease - \$0.361 million for the non-recur of a 2015 CISOMB program change

CURRENT SERVICES PROGRAM DESCRIPTION:

The statutory mission of CISOMB is to assist individuals and employers in resolving problems with USCIS and to propose changes in USCIS’s administrative practices. CISOMB accomplishes this mission through individual case assistance in the employment-based, family and humanitarian areas; and by proposing impartial, operationally sound recommendations to USCIS. CISOMB engages in outreach to national and community-based organizations, trade and industry associations, faith-based communities, and immigration professionals. CISOMB also meets regularly with USCIS officials across the country, as well as with other Federal and State partners. CISOMB hosts an annual conference, and, by statute, provides Congress with a comprehensive annual report analyzing pervasive and serious problems affecting the delivery of immigration services.

CISOMB 2016 Expenditure Plan

The *Fiscal Year 2014 Department of Homeland Security (DHS) Appropriations Act* (P.L. 113-76) required the submission of an expenditure plan for the Citizenship and Immigration Services Ombudsman to be submitted at the time of the President's budget proposal for fiscal year 2015. Under the current Continuing Resolution, the Department is referencing that requirement and submitting the FY 2016 expenditure plan information for that office in the FY 2016 Congressional Justification.

FY 2016 Operating Plan

Executive Division	3		3
Policy Division	3		3
Casework Division	14	3	17
Public Engagement	1		1
Operations Division	3	2	5
Total Positions	24	5	29

The Ombudsman anticipates having an on board staff of 29 positions, which will continue to aid the Ombudsman in meeting performance goals to review all incoming requests for case assistance within 30 days, and take action to resolve 90 percent of case-related inquiries within 90 days of receipt.⁴ The FY 2016 full-year projected salaries and benefits total is \$4,332,000, which is 69 percent of the office's total budget.

Total Expenses

Category	Amount
Travel	\$74
Training	\$20
Supplies, Equipment, and Maintenance	\$70
Contracts	\$130
IAAs ⁵	\$457
WCF	\$1,230
Total	\$1,980

Travel

The Ombudsman plans to spend \$74,000 on travel in FY 2016. Travel is used to directly meet its statutory mission to identify systemic issues. The Ombudsman travels to meet with stakeholders across the country and to visit USCIS offices and facilities and the immigration service officials who work there. These site visits are critical to the office's review of USCIS's operations, practice, and procedures; they provide the opportunity for the Ombudsman to learn important information used in the drafting of recommendations.

The Ombudsman also will focus on making USCIS site visits and meeting with employment-based stakeholders across the country, hosting roundtables in major metropolitan areas, and meeting with employers in various industries including academia, agriculture, construction, financial services,

⁴ Based on data-based projections related to DACA program requests for assistance, the Ombudsman anticipates needing an increased staffing level to continue meeting performance goals and serving customers in an effective and timely fashion.

⁵ See Section VI for breakdown of contracts and IAAs.

healthcare, hospitality, and information technology. The Ombudsman and senior staff will travel to the USCIS service centers in California, Nebraska, Texas, and Vermont that receive and adjudicate most employment-based immigration benefits.

Training

The Ombudsman plans to spend \$20,000 on training in FY 2016, which includes onsite group training and substantive individual training.

Supplies and Materials, Equipment and Maintenance

The Ombudsman has budgeted \$70,000 for items such as paper, toner, training tools, and other office supplies and equipment. This cost projection includes all costs associated with the Ombudsman’s annual conference.

Working Capital Fund

The Ombudsman reimburses WCF, which is a fully reimbursable fund that finances a full range of administrative support services to DHS for services provided. This centrally-managed account provides Department-wide functions, such as: finance, budget, and accounting support; information technology; and personnel administration. WCF allocates costs because of various algorithms, depending on the service provided. The \$1,230,000 reflects the estimated FY 2016 WCF costs for rent and non-rent activities.

OSEM requests 186 positions, 186 FTE, and \$39.339 million in 2016 for the Office of Policy. Base adjustments include:

- Transfer In - 31 positions, 31 FTE, and \$6.015 million for operations planning functions from OPS
- Realign Out - 20 positions, 20 FTE, and \$4.404 million to IGA for external affairs functions
- Transfer Out - 5 positions, 5 FTE, and \$1.147 million FEMA for the Resilience STAR program
- Transfer Out - \$0.003 million for Data Center Support to the Office of the Chief Information Officer
- Increase - \$0.068 million for the annualization of the 2015 pay raise
- Increase - \$0.262 million for the 2016 pay increase
- Increase - \$0.084 million for retirement contribution increases
- Decrease - \$0.006 million for reductions to travel, contracts, supplies, materials, and training

CURRENT SERVICES PROGRAM DESCRIPTION:

The transfers in of OPS planning functions and the transfers out of external affairs functions and the Resilience STAR program are part of the Department's ongoing efforts to integrate and consolidate its resources in order to create a more a seamless organization and align resources to the highest Department-wide priorities.

PLCY serves as a central resource to the Secretary and other Department leaders for policy development and review, strategic planning and analysis, and facilitation of decision-making on the full breadth of issues that may arise across the dynamic homeland security enterprise. PLCY is responsible for developing DHS-wide policies, programs, and planning to promote and ensure the highest level of performance, quality, consistency, and integration in the execution of all homeland security missions. The office develops and articulates the long-term strategic view of the Department and translates the Secretary's strategic priorities into capstone planning products that drive increased operational effectiveness through integration, prioritization, and resource allocation.

PLCY also represents the Department at White House interagency policy committee meetings on the areas in the mission portfolios and also represents DHS on strategic planning efforts and major interagency strategy reviews. The office develops long-term strategic priorities to increase operational effectiveness and mission execution, especially related to screening coordination, law enforcement, information sharing, border issues, immigration, and trade portfolios. Furthermore, PLCY is charged with and provides the Department with an integrated and DHS-wide capability for strategy development, strategic and operational planning, long-term assessment, and decision analysis, including statistical and economic analysis and risk assessment and modeling.

The Office leads several congressionally mandated and authorized programs, including the development and execution of the Quadrennial Homeland Security Review (QHSR); work and interagency review concerning cases brought before the Committee on Foreign Investments in the United States (CFIUS); and the delivery of the quarterly Border Security Status Report (BSSR).

PLCY plays a critical role in developing and achieving integrated foreign engagement driven by the Secretary's priorities. It monitors and reviews the negotiation of all international agreements and arrangements and leads cross-cutting negotiations on behalf of the Secretary, the Deputy Secretary, and the DHS Components. In coordination with other DHS components, PLCY serves as the principal point of liaison with the Department of State and the diplomatic community. PLCY develops, coordinates and drives departmental strategies, plans, and activities for DHS to develop foreign partner security capabilities and international cooperative programs that align with the overarching DHS strategy.

PLCY FY16 Expenditure Plan

The *Fiscal Year 2014 DHS Appropriations Act* (P.L. 113-76) required the submission of an expenditure plan for the Office of Policy to be submitted at the time of the President’s budget proposal for fiscal year 2015. Under the current Continuing Resolution, the Department is referencing that requirement and submitting the FY 2016 expenditure plan information for that office in the FY 2016 Congressional Justification.

⁷ Planned Working Capital Fund charges in the expenditure plan account for Unity of Effort transfers and will not match the Schedule J.

Office of Policy

PLCY serves as the Department's principal source of policy development and decision analysis for DHS senior leadership and Secretarial initiatives and for other critical matters that may arise in a dynamic threat environment. PLCY includes four sub-offices, all of which are managed by the PLCY Executive Office.

Office of Policy Executive Office

The Executive Office includes the Assistant Secretary and Principal Deputy Assistant Secretary positions and also manages the following: the Executive Secretariat functions; training and education programs, which include intern and Presidential Management Fellow programs; operations and resource management; Freedom of Information Act requests and inquiries; Privacy and Audit Liaison functions; and the Department's coordination process for Interagency Policy Committees (IPCs). Moreover, The Executive Office provides a centralized coordination point for developing and communicating policies across multiple sub-offices within PLCY, throughout the Department, and across the homeland security enterprise. The Assistant Secretary serves as the coordinator of Department-wide policies and planning to advance and ensure consistency and integration among DHS missions.

Threat Prevention & Security Policy

Threat Prevention and Security Policy (TPSP) is responsible for the policy development and policy coordination in all DHS mission areas related to screening coordination, law enforcement, and information sharing policies. DHS has substantial federal law enforcement responsibilities, and TPSP ensures coordination and consistency across the Department's law enforcement agencies and with other U.S. Government law enforcement agencies. TPSP also works to improve screening coordination and risk-based programs and policies to allow the Department to interdict threats at the earliest opportunities. DHS is both a producer and a consumer of information used by the national security, intelligence, and military communities, and TPSP ensures proper sharing and coordination of information essential to DHS's ability to fulfill its mission.

Strategy, Plans, Analysis & Risk

Strategy, Plans, Analysis & Risk (SPAR) provides the Department with an integrated and DHS-wide capability for strategy development, strategic planning, long-term assessment, and decision analysis, including statistical and economic analysis and risk assessment and modeling. The Assistant Secretary for SPAR serves as the Department's primary point of contact for strategy and policy planning offices in DHS Components, other federal departments and agencies, and the White House. SPAR also represents DHS on the National Security Council's Strategic Planning IPC and major interagency strategy reviews. SPAR is taking a leading role across FY 2016 in implementing the Secretary's "Guidance to Results" efforts within the Department to link strategy and policy with capabilities and joint requirements analysis, programming and budgeting, operational planning and major investment oversight. SPAR is also leading many of the Secretary's focused "Unity of Effort" initiatives, intended to build and mature the Department into one that is greater than the sum of its parts, enhancing

traceability between strategic objectives, budgeting, acquisition decisions, operational planning and mission execution, in order to improve both Departmental cohesiveness and operational effectiveness.

Border, Immigration & Trade Policy

Border, Immigration & Trade (BIT) provides policy development and analysis across the Department's mission priorities, including foreign investment, trade, transport security, immigration, and America's policies. BIT develops and coordinates policy for security of transportation systems and the global supply chain and advises on policy matters and leadership decisions regarding the impact of trade and immigration/migration flows on border and cargo security. BIT leads DHS engagement with governments, international organizations, and regional groups in the Western Hemisphere on the full range of issues within the DHS portfolio. BIT serves as the Department's primary representative to the National Security Council IPCs related to the topics outlined above and to include Transborder Security, Maritime Security, Immigration, the Arctic, Unmanned Aircraft System, country-specific IPCs for Western Hemisphere Countries, Beyond the Border, 21st Century Border, and North American Leaders' Summit. BIT also supports the Department's engagement with Western Hemisphere countries and leads intra-DHS policy deliberations and processes.

International Engagement

International Engagement provides the Department with planning, integration, and facilitation of international engagement activities and serves as the principal coordinator to the Office of the Secretary and other leadership of the Department for cross-Component international activities outside of the Western Hemisphere. Additionally, International Engagement coordinates, integrates, and facilitates the strategic development and execution of the Department's international plans and policies, including international relations, initiatives, training, visits, and preparation and placement of personnel abroad, for the countries of Africa, Asia, Europe, and the Middle East.

International Engagement conducts, coordinates, and facilitates DHS multilateral, regional, and bilateral relations with foreign governments, international organizations, and international non-governmental organizations (NGOs), as well as serves as a lead departmental representative in coordinating DHS positions in interagency policy deliberations affecting foreign relations, for countries outside of the Western Hemisphere.

Staffing

Fiscal Year 2016 Planned Staffing	Current On-Board⁸	Vacancies	Anticipated On Board
Policy Executive Office	26	0	26
Threat Prevention & Security Policy	30	5	35
Strategy, Plans, Analysis & Risk	52 ⁹	23 ¹⁰	75
Border, Immigration & Trade Policy	31	4	35
International Engagement	13	2	15
Total Positions	152	34	186

As of December 31, 2014 the Office of Policy has a total on-board staff count of 152. FY 2016 full-year projected salaries and benefits, totals \$27,342,000. These projected salaries and benefits account for 70 percent of the PLCY's total budget.

Total Expenses

Category	Amount
Travel	\$533
Training	\$26
Supplies, Equipment, and Maintenance	\$59
Contracts	\$2,011
IAAs	\$1,865
WCF ¹¹	\$7,504
Total	\$11,998

Travel

PLCY plans to spend \$533,000 on travel in FY 2016. Travel is used to directly support the Department's priorities related to raising international aviation security standards, improving global cargo and supply chain security, enhancing domestic and foreign security operations, and expanding international collaboration in travel, border security, and cybersecurity. In addition, travel plays a key role in enforcing congressionally mandated initiatives, including Visa Waiver Program negotiations, compliance, and enforcement as well as Committee on Foreign Investment in the United States (CFIUS) monitoring, compliance, and enforcement. For details on necessary travel, see section VI.

⁸ Excludes PLCY positions currently associated with the following functions: CBRN Policy, CT Policy, Resilience, and Partnership & Engagement.

⁹ Includes 28 positions detailed from the Office of Operations Coordination and Planning (OPS) to PLCY.

¹⁰ Includes 12 vacant Statistician positions within the Office of Immigration Statistics.

¹¹ Planned Working Capital Fund charges in the expenditure plan account for Unity of Effort transfers and will not match the Schedule J.

Training

PLCY plans to spend \$26,000 on employee training. The objectives are to meet mandatory training requirements, set internal office-wide training benchmarks, formulate individual professional development standards, and help employees build upon and enhance individual and group skills. Employees participate in a variety of training programs such as the DHS Fellows Program and Graduate School classes. There is a particular emphasis on developing thought leaders with expertise in program management as well as cross-Component and intergovernmental coordination. The aim is to help managers address complex problems through practical solutions. The funding covers educational programs, seminars, and training sessions, including those managed through individual development plans.

Supplies and Materials, Equipment and Maintenance

PLCY has budgeted \$59,000 for items such as paper, toner, training tools, and other office supplies and equipment.

Working Capital Fund¹²

PLCY reimburses WCF, which is a fully reimbursable fund that finances a full range of administrative support services to DHS for services provided. This centrally managed account provides Department-wide functions, such as: finance, budget, and accounting support; information technology; and personnel administration. WCF allocates costs because of various algorithms, depending on the service provided. The \$7,504,000 reflects the estimated FY 2016 WCF costs for rent and non-rent activities.

¹² Planned Working Capital Fund charges in the expenditure plan account for Unity of Effort transfers and will not match the Schedule J.

Anticipated Travel

Trip	# of Trips	Description/ Purpose	Cost Per Trip (\$K)	Total Cost (\$K)
Free Trade Negotiations	8	DHS Trade PLCY team anticipates representing the Department on several free trade agreements including: Trans-Pacific Partnership, Trans-Atlantic Trade and Investment Partnership, and Trade in International Services Agreement.	\$8	64
Quarterly Committee on Commercial Operations (COAC) of U.S. Customs and Border Protection (CBP) meetings	2	COAC is a committee of private-sector representatives that advises the Secretaries of the Department of Treasury and DHS on the commercial operations of CBP and related DHS functions. At least two of these are outside of the National Capital Region.	2.2	4.4
CFIUS and Team Telecom Compliance (Domestic)	10	Site visits required to monitor and enforce multiple national security risk mitigation agreements entered into under the auspices of CFIUS and Team Telecom.	2.5	25

FY 2016 Program Change	-	-	-
FY 2016 Total Request	36	36	\$10,025
Total Change 2015 to 2016	22	22	\$7,596

OSEM requests 36 positions, 36 FTE, and \$10.025 million in 2016 for the Office of Intergovernmental Affairs. Base adjustments include:

- Realign In - 20 positions, 20 FTE, and \$4.404 million from Policy for external affairs functions
- Realign In- 1 position, 1 FTE, and \$3.000 million from OPA for the “If You See Something, Say Something™” public awareness campaign
- Transfer In – 1 position, 1 FTE, and \$0.212 million for the Office of Academic Engagement from the Office of the Chief Human Capital Officer (OCHCO)
- Increase - \$0.013 million for the annualization of the 2015 pay raise
- Increase - \$0.059 million for the 2016 pay increase
- Increase - \$0.005 million for retirement contribution increases
- Increase - \$0.001 million for Working Capital Fund increases
- Decrease - \$0.003 million for cellular wireless savings
- Decrease - \$0.095 million for reductions to travel, contracts, supplies, materials, and training

CURRENT SERVICES PROGRAM DESCRIPTION:

IGA serves as the voice and advocate for the State, local, tribal, and territorial (SLTT) elected and appointed officials within the Department as well as the primary liaison between those officials and DHS leadership and senior officials. IGA’s stakeholder community consists of the Nation's more than 500,000 elected and appointed officials.

These officials include governors, state homeland security advisors (HSAs), mayors, county executives, city and county appointed officials, leadership of the 566 federally recognized Native American and Native Alaskan tribes, emergency managers, and the various national associations

that represent these officials. On a daily basis, IGA coordinates and consults with the Department's stakeholders in the homeland security enterprise as they develop and implement policy and budget decisions that impact SLTT homeland security efforts as well as the Department and our operations.

IGA manages communications with SLTT officials and coordinates outreach activities across the spectrum of Departmental issues, initiatives, and programs confronting all agencies and Components of the Department. IGA also coordinates with counterpart Intergovernmental Affairs Offices within other Executive Branch agencies and the White House. IGA strives to ensure that elected and appointed government officials across the nation at the State, local, tribal and territorial levels are informed of DHS policies, programs, and priorities.

IGA 2016 Expenditure Plans

The *Fiscal Year 2014 DHS Appropriations Act* (P.L. 113-76) required the submission of an expenditure plan for the Office of Intergovernmental Affairs to be submitted at the time of the President’s budget proposal for fiscal year 2015. Under the current Continuing Resolution, the Department is referencing that requirement and submitting the FY 2016 expenditure plan information for that office in the FY 2016 Congressional Justification.

Office of Intergovernmental Affairs Planned Obligations: FY 2016 (\$ in Thousands)							
Office	Projected Onboard	Salaries and Benefits	Travel	Other Expenses ¹⁴	Contracts	Working Capital Fund (WCF) ¹⁵	Totals by Office
Office of Intergovernmental Affairs	36	\$5,418	\$258	\$88	\$3,016	\$1,245	\$10,025

¹⁴ Other expenses include training, supplies, and equipment & maintenance.

¹⁵ Planned Working Capital Fund charges in the expenditure plan account for Unity of Effort transfers and will not match the Schedule J.

Office of Partnership and Engagement

The Office of Partnership and Engagement serves as the Department's lead for engagement with external stakeholders to include Governors, Mayors, Tribal Officials, County officials, law enforcement, private sector and business leaders, academic institutions, as well as all the national associations that represent all of these stakeholders. The Office supports the Secretary and Department by coordinating outreach and communication with these stakeholders and receiving their input and feedback during the policy development process at DHS. The Office of Partnership and Engagement are comprised of seven sub offices, and is led by the Office of Intergovernmental Affairs.

Office of Intergovernmental Affairs

The Office of Intergovernmental Affairs promotes an integrated national approach to homeland security by coordinating and advancing DHS interaction with state, local, tribal, and territorial (SLTT) governments. IGA is responsible for opening the homeland security dialogue with executive-level partners, including elected officials, at the SLTT level, along with the national associations that represent them.

SLTT governments play an important role in the creation and implementation of national policy, and IGA strives to provide a readily accessible method of direct communication for SLTT officials to raise awareness of their concerns.

Office for State and Local Law Enforcement

The Office for State and Local Law Enforcement provides the Department with primary coordination, liaison, and advocacy for state, local, tribal, and territorial law enforcement agencies. The office leads the coordination of Department-wide activities relating to the role of state and local law enforcement in preventing, preparing for, protecting against, and responding to natural disasters, acts of terrorism, and other incidents within the United States.

Private Sector Office

The Private Sector Office (PSO) provides the Secretary and Department leaders with advice on issues relevant to the private sector, including academia, non-profits, NGOs, and businesses. PSO also coordinates active engagement between DHS and the private sector to build strong partnership and enhance internal and external dialogue.

Homeland Security Advisory Council

The Homeland Security Advisory Council is composed of external senior leaders who provide advice and recommendations to the Secretary on matters related to homeland security. The council's subcommittees address several key homeland security issues including: enhancing DHS's cybersecurity workforce; enhancing border-crossing infrastructure on our borders by establishing mechanisms for public/private partnership; and improving information sharing with faith-based communities.

“If You See Something, Say Something™” Campaign

The nationwide "If You See Something, Say Something™" public awareness campaign is a simple and effective program to raise public awareness of indicators of terrorism and terrorism-related crime, and to emphasize the importance of reporting suspicious activity to the proper local law enforcement authorities. Recent expansions of the "If You See Something, Say Something™" campaign include partnership with numerous sports teams and leagues, transportation agencies, private sector partners, states, cities, law enforcement, and universities.

Office of Academic Engagement

The Office of Academic Engagement (OAE) manages the Homeland Security Academic Advisory Council (HSAAC) which provides advice and recommendations to the Secretary and senior leadership on matters related to homeland security and the academic community. Additionally OAE work with academia and the Department on issues related to campus resiliency at FEMA, academic research at S&T, student intern program, as well as working with ICE on the Student and Exchange Visitor Program.

Staffing

Fiscal Year 2016 Planned Staffing	Current On-Board	Vacancies	Anticipated On Board
Office of Partnership and Engagement (formerly IGA) - (lead office)	13	1	14
Private Sector Office (re-aligned from PLCY)			7
Homeland Security Advisor Committee & Committee Management Office (re-aligned from PLCY)			6
State and Local Law Enforcement (re-aligned from PLCY)			7
“If You See Something, Say Something™” (re-aligned from OPA)			1
Office of Academic Engagement (transferred from OCHCO)			1
Total Positions	13	1	36

As of December 29, 2014, IGA has a total on-board staff count of 13 and anticipates on-boarding another GS-11 and GS-12 during FY 2015. The current FY 2016 full-year projected salaries and benefits total is \$5,418,000, which is 54 percent of IGA’s total budget.

Total Expenses

Category	Amount (\$ in Thousands)
Travel	\$258
Training	\$36
Supplies, Equipment, and Maintenance	\$47
Contracts	\$3,016
Other	\$5
WCF ¹⁶	\$1,245
Total	\$4,607

Travel

IGA plans to spend \$258,000 on travel in FY 2016. Travel is used to directly support the Department's priorities related to IGA's mission requirements. IGA senior leadership and SLTT coordinators travel throughout the country to facilitate communication and serve as Departmental liaisons between DHS, SLTT governments, law enforcement, academia, the private sector, local community members, and the organizations that represent them. IGA's participation at meetings, regional summits, and other conferences to discuss the Administration's and Departmental goals and priorities demonstrates to stakeholders the Department's commitment to collaborate with them, as well as provides useful information about Department efforts and programs available to stakeholders. DHS stakeholders have communicated the importance of DHS's presence at these local meetings, summits, and on the ground engagement because DHS is able to see firsthand the challenges stakeholders face.

Training

Office of Partnership and Engagement plans to spend \$36,000 on employee training that focuses on professional development.

Supplies and Materials, Equipment and Maintenance

Office of Partnership and Engagement has budgeted \$47,000 for items such as paper, toner, and other office supplies and equipment.

Working Capital Fund¹⁶

This centrally managed account provides Department-wide functions, such as: finance, budget, and accounting support; information technology; and personnel administration. WCF allocates costs because of various algorithms, depending on the service provided. The \$1,245,000 reflects the estimated FY 2016 WCF costs for rent and non-rent activities.

¹⁶ Planned Working Capital Fund charges in the expenditure plan account for Unity of Effort transfers and will not match the Schedule J.

Contracts

FY 2016 Contracts

IV. Program Justification Change

**Department of Homeland Security
Departmental Management and Operations
Office of the Secretary and Executive Management
Justification of Program Changes**
(Dollars in Thousands)

Program Increase 1: OGC Board for Correction of Military Records
PPA: Office of General Counsel
Program Increase: Positions 1, FTE 1, Dollars \$132

Funding Profile

	FY 2014 Revised Enacted			FY 2015 President's Budget			FY 2016 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							2	2	\$253
Program Increase							1	1	\$132
Total Request	2	2	\$250	2	2	\$253	3	3	\$385

Description of Item

Within the OGC, the Board for Correction of Military Records (BCMR) annually reviews approximately 300 cases in which current or retired former members of the Coast Guard seek to correct their military records. Under current law, each military department, including DHS and the Coast Guard, must operate a board of civilians to correct military records. See 40 U.S. Op. Atty. Gen. 504 (Feb. 24, 1947). These boards, including DHS's BCMR, fulfill an important function because they relieve Congress from the burden of addressing requests for corrections from service members through private bills. Under 10 U.S.C. § 1552(a), and in accordance with 33 C.F.R. § 52.2, the Secretary of Homeland Security and the Coast Guard fulfill this requirement through the BCMR operated by DHS OGC.

Justification

The Office of the General Counsel requests a total program increase of \$132,000 for 1 position, 0.5 FTE. This increase will allow OGC to fund one additional attorney of the Board for Correction of Military Records of the U.S. Coast Guard. Currently, funding is available for one attorney and one paralegal. The program increase will allow for the full funding of two attorneys and one paralegal.

The Board for Correction of Military Records consists of panels of civilian DHS attorneys who serve as members of the Board as well as a permanent staff, including a Chair and Deputy Chair of the Board. See 33 C.F.R. §52.11. By statute (14 U.S.C. § 425), DHS must issue its decisions within 10-months of receipt of each application for relief. Applicants whose cases are not decided within the 10-month requirement may file suit against the Coast Guard for the requested relief. The Board for Correction of Military Records reviews cases that impact Coast Guard service members' retirements,

promotions, performance evaluations, disciplinary actions, and various other monetary benefits of Coast Guard members. The types of cases include:

- officer and enlisted performance evaluations and promotions;
- removal from primary duty or relief for cause;
- non-judicial punishment (captain’s mast);
- discrimination and retaliation;
- housing and travel allowances;
- reservists’ drill points for retirement;
- enlistment, selective reenlistment, and critical skills training bonuses;
- mistakes on Coast Guard Certificates of Discharge;
- medals and awards; and
- disability ratings and retirement pay.

Impacts on Performance

Funding the additional attorney for the BCMR will enable OGC to perform the following:

- Review and complete over 300 cases;
- Adhere to the statutory mandate to complete cases within 10-months of receipt;
- Reduce the Coast Guard’s litigation risk arising for applications for relief;
- Provide advice and recommendations to the Coast Guard concerning
 - methods to more efficiently process cases, and
 - trends in decisions and significant issues with the goal of improving Coast Guard personnel operations.
- Expedite applications for relief by active duty service members at the request of the Coast Guard.

Department of Homeland Security
Departmental Management and Operations
Office of the Secretary and Executive Management
Justification of Program Changes
(Dollars in Thousands)

Program Increase 2: Joint Requirements Council
PPA: Immediate Office of the Secretary
Program Increase: Positions 3, FTE 3, Dollars \$5,000

Funding Profile

	FY 2014 Revised Enacted			FY 2015 President's Budget			FY 2016 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$0
Program Increase							3	3	\$5,000
Total Request	0	0	\$0	0	0	\$0	3	3	\$5,000

Description of Item

The new Component-led Joint Requirements Council (JRC) will formulate recommendations to DHS leadership on options to meet the capability needs of DHS operators and provide a vital link between strategic guidance and investments. The JRC will look at cross-component requirements and develop recommendations for investment, as well as changes to training, organization, operational processes and procedures, and proposed law changes. By linking Department-wide strategies and investments, the JRC will increase operational efficiencies by achieving economies of scale and eliminating unnecessary duplication. Additionally, the JRC will improve traceability and defensibility of DHS resource decision making to committee oversight and Components. The program increase will fund three permanent positions responsible for managing day to day activities for the JRC and six reimbursable detailees responsible for aligning operational requirements with mission needs.

Justification

The JRC will strengthen the integration of key DHS process elements that assist the Secretary in linking DHS strategic guidance and investments, making department-wide informed decisions from feasible alternatives, and balancing the Department's operational activities to meet DHS objectives. The JRC will consolidate and integrate requirements, capabilities and other processes to drive HQ and Component budget planning and acquisition programs to ensure the proper oversight, authorities, management, and responsibilities.

Ultimately, the JRC will ensure that investments align with the DHS mission goals by ensuring a transparent, collaborative, centralized process and accountable governance to review requirements; improving nationwide homeland security preparation, mitigation, response and recovery capabilities; and considering options to achieve affordable readiness, e.g., data driven decision making, common business practices, coordination of assets and logistics

FY 2016 Planned JRC Costs (\$K)	
Staffing	
Permanent	529
Reimbursable	1,193
Working Capital Fund Costs	619
Analytical and Program Support	1,662
Systems and Process	996
Total	5,000

Staffing

With the program increase, the JRC will hire three permanent positions at an approximate cost of \$529,000 whose efforts will be devoted to managing day to day activities for the JRC. The JRC will hire a chief of staff to oversee all administrative and staff related issues related to the JRC; an analytics lead to oversee requirements related research, analysis and development; and a secretariat to perform administrative duties including agenda, calendar and budget.

The JRC will also reimburse a rotating JRC chairperson detailed from Components and five mission portfolio leads responsible for aligning operational requirements with mission needs detailed from Components at an approximate cost of \$1.193 million for salaries and benefits.

In addition to salaries and benefits costs, JRC anticipates approximately \$619,000 in Working Capital Fund expenses as a result of the additional 9 permanent and detailed positions.

Specific positions and grade levels are as follows:

- One GS-15, Chief of Staff/Gatekeeper, permanent staff
- One GS-14, Analytics Lead, permanent staff
- One GS-14, Secretariat, permanent staff
- One SES, JRC Chair, reimbursable detailee
- Five GS-15, Mission Portfolio Leads, reimbursable detailees

Analysis and Program Management

In order to meet the department's need for the research, analysis, and development of department-wide operational requirements in alignment with mission needs, the JRC will require contractual analytic and programmatic support at an approximate cost of \$1.662 million. This support will be critical for building capability across JRC portfolios to ensure that requirements are based on data driven information, total asset visibility, common business practices, and shared services, as necessary.

Systems and Processes

To ensure transparency, record management, streamlined decision making, and accountability, the JRC will operate and maintain a knowledge management system that compliments existing DHS programming, budgeting, and acquisition systems at an approximate cost of \$996,000 for development, operations and maintenance costs. The system will support the processes and procedures necessary for the council to define needed capabilities, guide materiel development and direct the production of

capabilities for future department programs. The JRC system will ensure the combined needs of DHS Components by providing a single system of record for key documents and decision making transparency. Additionally, the JRC system and processes will enable mission and functional operators to give feedback early in the development process to ensure that their requirements are met.

Impacts on Performance

The JRC will assist the Department in its efforts to manage its broad and complex DHS mission space, optimize current resources, and empower DHS components to effectively execute their operations. The JRC will transparently incorporate DHS components into unified and repeatable decision-making processes and analytic efforts that inform operational decisions and unity of effort.

The end result will be a department that increases its operational effectiveness at reduced costs through common materiel solutions, such as interoperable technology, shared equipment, standard operating procedures, training, doctrine, and policy. The JRC provides DHS with the most efficient manner to strengthen its mission capability, enhance and coordinate operational planning and execution across Components, and ensure acquisition programs achieve department-wide strategic goals.

V. Exhibits and Other Supporting Material

A. Justification of Proposed Legislative Language

For necessary expenses of the Office of the Secretary of Homeland Security, as authorized by section 102 of the Homeland Security Act of 2002 (6 U.S.C. 112), and executive management of the Department of Homeland Security, as authorized by law, [\$128,769,000]\$134,247,000¹: Provided, That not to exceed \$45,000 shall be for official reception and representation expenses: Provided further, That all official costs associated with the use of government aircraft by Department of Homeland Security personnel to support official travel of the Secretary and the Deputy Secretary shall be paid from amounts made available for the Immediate Office of the Secretary and the Immediate Office of the Deputy Secretary. Provided further, that expenditure plans for the Office of Policy, the Office of Intergovernmental Affairs, the Office of Civil Rights and Civil Liberties, the Citizenship and Immigration Services Ombudsman, and the Privacy Officer shall be submitted at the time the President's budget proposal for fiscal year [2016] 2017² is submitted pursuant to Section 1105(a) of title 31, United States Code.

Language Provision	Explanation

Immediate Office of the Secretary Mission Statement

The Office of the Secretary provides central leadership, management and direction for the entire Department of Homeland Security. This office provides oversight for all offices within the Departmental Operations function as well as all other entities of the Department. It is the Secretary's role to serve as the top representative of Homeland Security to the President, Congress and the general public.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
11.1 Full-time Permanent	\$710	\$650	\$1,048	\$398
11.3 Other than Full-Time Permanent	\$250	\$100	\$101	\$1
11.5 Other Personnel Compensation	\$2	\$4	\$10	\$6
11.8 Special Personal Services Payments	\$100	\$100	\$1,368	\$1,268
12.1 Civilian Personnel Benefits	\$303	\$244	\$385	\$141
Total, Salaries & Benefits	\$1,365	\$1,098	\$2,912	\$1,814

Salaries and Benefits fund compensation directly related to duties performed by Federal civilian employees. The 2016 request reflects an annualization of the 2015 pay increase of \$3,000; a 1.3% pay inflation increase of \$10,000; a retirement benefit increase of \$6,000; a decrease of \$34,000 for VERA/VSIP savings; a \$101,000 realignment within the office; and a program increase of \$1,728,000 for Joint Requirements Council staffing.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
21.0 Travel and Transportation of Persons	\$1,900	\$1,900	\$1,950	\$50

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The 2016 request reflects an increase of \$50,000 due to anticipated increases in cost of USCG plane.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
23.1 Rental Payments to GSA	\$324	\$305	\$481	\$176

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The 2016 request includes a decrease of \$5,000 due to reduction in rent costs funded through the Working Capital Fund and a program increase of \$181,000 for rent for the Joint Requirement Council.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.1 Advisory and Assistance Services	\$0	\$0	\$2,648	\$2,648

The FY16 request reflects a program increase of \$2,648,000 for contractual analytic and programmatic support and a knowledge management system.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.3 Other Goods and Services from Federal Sources	\$382	\$551	\$845	\$294

Purchases from government accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. Specifically, funds support the purchase of goods and services from DHS WCF and other government agencies including interagency service requirements. The 2016 request includes a net increase of \$294,000 to include a decrease of \$145,000 for a decrease to the Working Capital Fund charges, \$4,000 for cellular wireless savings, and a program increase of \$443,000 for Joint Requirements Council Working Capital Fund costs.

Immediate Office of the Deputy Secretary Mission Statement

The Office of the Deputy Secretary directly supports the Office of the Secretary by providing leadership to the Department. This focuses on internal management and direction, which ensures that the Department will continue to operate efficiently and effectively in carrying out its mission. It is the Deputy Secretary's role to provide internal oversight to all Departmental Operations, which allows the Secretary to focus more on external matters concerning DHS.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
11.1 Full-time Permanent	\$588	\$350	\$404	\$54

Chief of Staff Mission Statement

The Office of the Chief of Staff promotes the coordination of the agencies and directorates that have been consolidated into the Department of Homeland Security. The Office of the Chief of Staff is responsible for all operational functions that relate to the Immediate Office of the Secretary (budget, information technology, and personnel), and coordinates activities with the Department Headquarters continuity of operations. With the inherent challenges of a concurrent creation of a new department, reorganization, consolidation, and several new offices, the Office of the Chief of Staff seeks to streamline, coordinate, and deliver highly effective initiatives and policies that will ensure our safety, response capacity, and our freedoms.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
11.1 Full-time Permanent	\$853	\$870	\$1,280	\$410
11.3 Other than Full-Time Permanent	\$200	\$200	\$203	\$3
11.5 Other Personnel Compensation	\$10	\$10	\$10	-
12.1 Civilian Personnel Benefits	\$366	\$413	\$545	\$132
Total, Salaries & Benefits	\$1,429	\$1,493	\$2,038	\$545

Salaries and Benefits fund compensation directly related to duties performed by Federal civilian employees. The 2016 request reflects a transfer in of \$608,000 for Senior Liaison Officers from OPS; an annualization of the 2015 pay increase of \$5,000; a 1.3% pay inflation increase of \$20,000; a retirement benefit increase of \$6,000; a decrease of \$23,000 for VERA/VSSIP savings; a decrease of \$114,000 for reductions to vacancies; and a \$43,000 realignment within the office.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
21.0 Travel and Transportation of Persons	\$169	\$169	\$184	\$15

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The 2016 request reflects a program increase of \$15,000 for Senior Liaison Officers.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
23.1 Rental Payments to GSA	\$72	\$66	\$77	\$11

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The 2016 request includes a net increase of \$11,000 due to an increase of \$1,000 in GSA rent funded through the Working Capital Fund and a transfer in of \$10,000 for rent charges for Senior Liaison Officers.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.3 Other Goods and Services from Federal Sources	\$350	\$358	\$380	\$22

Purchases from government accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. Specifically, funds support the purchase of goods and services from DHS WCF and other government agencies including interagency service requirements. The 2016 request includes a net increase of \$22,000 for non-rent Working Capital Fund costs to include an \$87,000 transfer in for Senior Liaison Officers, a decrease of \$4,000 for Cellular Wireless savings, and a decrease of \$61,000 in non-rent Working Capital Fund costs.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
26.0 Supplies and Materials	\$23	\$19	\$30	\$11

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The 2016 request includes an increase of \$11,000 for realignment of funds within the account.

Salaries and Benefits fund compensation directly related to duties performed by Federal civilian employees. The 2016 request reflects a transfer out of \$1,222,000 for the Secretary's Briefing Staff to OPS; a transfer out of \$181,000 for the DHS HQ Emergency Preparedness Program to OCSO; a transfer out of \$150,000 for Efficiency Review Functions to OCFO; an annualization of the 2015 pay increase of \$10,000; a 1.3% pay inflation increase of \$39,000; a retirement benefit increase of \$20,000; a decrease of \$71,000 for VERA/VSIP savings; a decrease of \$126,000 for reductions to vacancies; and a \$370,000 realignment within the office.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
21.0 Travel and Transportation of Persons	\$4	\$4	\$6	\$2

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The 2016 request reflects a realignment of \$2,000 within the account.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
23.1 Rental Payments to GSA	\$588	\$540	\$448	(\$92)

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The 2016 request includes a decrease of \$92,000 due to transfers out.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.2 Other Services from Non-Federal Sources	\$5	\$5	\$25	\$20

Other services include contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The 2016 request includes an increase of \$20,000 for training.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.3 Other Goods and Services from Federal Sources	\$1,062	\$1,567	\$837	(\$730)

Purchases from government accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. Specifically, funds support the purchase of goods and services from DHS WCF and other government agencies including interagency service requirements. The 2016 request reflects a net decrease of \$730,000 to include \$243,000 for transfers out, a decrease of \$12,000 for Cellular Wireless savings, and a decrease of \$475,000 for non-rent Working Capital Fund charges.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
26.0 Supplies and Materials	\$60	\$52	\$84	\$32

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The 2016 request includes a net increase of \$32,000 due to a realignment within the account.

Office of General Counsel Mission Statement

The Office of the General Counsel (OGC) provides legal counsel for all DHS offices (except those specifically excluded by regulation or directive), determines the Department's position in order to provide effective legal services dealing with claims, with protests, with litigation, and with alternative dispute resolution, and represents the Department in all legal forums.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
11.1 Full-time Permanent	\$9,895	\$11,060	\$9,885	(\$1,175)
11.3 Other than Full-Time Permanent	\$989	\$1,170	\$1,184	\$14
11.5 Other Personnel Compensation	-	\$50	\$50	-
11.8 Special Personal Services Payments	\$82	\$98	\$99	\$1
12.1 Civilian Personnel Benefits	\$2,889	\$3,418	\$3,026	(\$392)
Total, Salaries & Benefits	\$13,855	\$15,796	\$14,244	(\$1,552)

Salaries and Benefits fund compensation directly related to duties performed by Federal civilian employees. The 2016 request reflects an annualization of the 2015 pay increase of \$40,000; a 1.3% pay inflation increase of \$153,000; a retirement benefit increase of \$92,000; a decrease of \$617,000 for VERA/VSIP savings; a decrease of \$1,352,000 for reductions to vacancies; and a program increase of \$132,000 for the Board for Correction of Military Records.

Office for Civil Rights and Civil Liberties Mission Statement

The mission of the Office for Civil Rights and Civil Liberties (CRCL) is to protect civil rights and civil liberties, to support DHS by providing policy advice on the full range of civil rights and civil liberties issues, and to serve as an information and communication channel with the public regarding all aspects of these issues. Section 705 of the Homeland Security Act provides that the Officer for Civil Rights and Civil Liberties shall: Review and assess information alleging abuses of civil rights, civil liberties, and racial and ethnic profiling by employees and officials of the Department; and make public through the internet, radio, television, or newspaper advertisements information on the responsibility and function of, and how to contact, the Officer. Submit to the President of the Senate, the Speaker of the House of Representatives, and the appropriate committees and subcommittees of Congress through the Secretary on an annual basis a report on the implementation of this section, including the use of funds appropriated to carry out this section, and allegations of abuses described under subsection (a)(1) and any actions taken by the Department in response to such allegations.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
11.1 Full-time Permanent	\$10,894	\$11,359	\$11,125	\$(234)
11.3 Other than Full-Time Permanent	\$299	\$316	\$320	\$4

Office of Public Affairs Mission Statement

The Assistant Secretary for Public Affairs oversees all external and internal communications for Homeland Security. On a daily basis, the Office of Public Affairs (OPA) responds to national media inquiries, maintains and updates the Department's web site, and coordinates speaking events for Department officials across the country. OPA also develops and manages various public education programs. The Office of Public Liaison, within OPA, fosters strategic communication with the Department's external stakeholders. OPA directs the Department's Incident Communications program that guides overall Federal incident communication activity and coordinates with State, local, and international partners to ensure accuracy and timely information to the public during a crisis.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
11.1 Full-time Permanent	\$2,044	\$2,199	\$2,108	\$(91)
11.3 Other than Full-Time Permanent	\$663	\$856	\$866	\$10

Privacy Officer Mission Statement

The Department of Homeland Security's Privacy Office protects the collection, use, and disclosure of personal and Departmental information. The Privacy Office ensures that appropriate access to information is consistent with the vision, mission, and core values of DHS, and implements the policies of the Department to defend and to protect the individual rights, liberties, and information interests of our citizens. Through internal education outreach and the establishment of internal clearance procedures and milestones for program development, the Privacy Office is helping DHS components to consider privacy whenever developing new programs or revising existing ones. The Privacy Office is evaluating the use of new technologies to ensure that privacy protections are given primary consideration in the development and implementation of these new systems. In this process, DHS professionals have become educated about the need to consider and the framework for considering the privacy impact of their technology decisions. The Chief Privacy Officer and the staff review Privacy Act system notices before they are sent forward and ensure that they collect only those records that are necessary to support DHS mission. The Privacy Office also guides DHS agencies in developing appropriate privacy policies for their programs and serves as a resource for any questions that may arise concerning privacy, information collection or disclosure.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
11.1 Full-time Permanent	\$3,993	\$4,361	\$4,227	\$(134)
11.3 Other than Full-Time Permanent	\$347	\$367	\$372	\$5
12.1 Civilian Personnel Benefits	\$1,447	\$1,537	\$1,515	\$(22)
Total, Salaries & Benefits	\$5,787	\$6,265	\$6,114	\$(151)

Salaries and Benefits fund compensation directly related to duties performed by Federal civilian employees. The 2016 request reflects an annualization of the 2015 pay increase of \$16,000; a 1.3% pay inflation increase of \$62,000; a retirement benefit increase of \$21,000; a decrease of \$105,000 for VERA/VSIP savings; and a decrease of \$145,000 for reductions to vacancies.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
23.1 Rental Payments to GSA	\$520	\$569	\$489	(\$80)

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2016 request reflects a reduction of \$80,000 due to a decrease in GSA rent funded through the Working Capital Fund.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.1 Advisory and Assistance Services	\$140	\$74	\$124	\$50

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The 2016 request includes an increase of \$50,000 due to decreased Working Capital Fund costs.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.2 Other Services from Non-Federal Sources	\$66	\$38	\$8	(\$30)

Other services include contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The 2016 request includes a decrease of \$30,000 attained through a reduction in scope to current contracts.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.3 Other Goods and Services from Federal Sources	\$1,212	\$1,155	\$1,154	(\$1)

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. Specifically, funds support the purchase of goods and services from DHS WCF and other government agencies including interagency service requirements. The FY 2016 request reflects a net decrease of \$1,000 for the following: a decrease of \$11,000 for cellular wireless savings, a decrease of \$16,000 for commercial parking subsidy savings, and a general WCF increase of \$26,000.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
26.0 Supplies and Materials	\$50	\$90	\$60	(\$30)

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The 2016 request reflects a realignment of \$30,000 to offset increased costs to non-rent Working Capital Fund activities

Citizenship and Immigration Services Ombudsman Mission Statement

The mission of the Citizenship and Immigration Service Ombudsman (CISOMB) is to assist individuals and employers in resolving problems with the United States Citizenship and Immigration Service (USCIS). Section 452 of the Homeland Security Act of 2002 requires that CISOMB assist individuals and employers in resolving problems with the Bureau of Citizenship and Immigrations Service, identify areas in which individuals and employers have problems in dealing with USCIS, and to the extent possible, propose changes in the administrative practices of the USCIS to mitigate problems.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
11.1 Full-time Permanent	\$2,521	\$2,928	\$3,100	\$172

Office of Policy Mission Statement

The Office of Policy is the primary coordinator of Department-wide policies, programs, and planning to ensure consistency and integration of missions throughout the entire Department. It provides the Department with a central office to develop and communicate policies across multiple components of the homeland security network and strengthens the Department's ability to maintain policy and operational readiness needed to protect the homeland. It also provides the foundation and direction for Department-wide strategic planning and budget priorities. A central DHS policy office that bridges Headquarters, Components, and operating agencies improves communication among DHS entities, eliminates duplication of effort, and translates policies into timely action.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
11.1 Full-time Permanent	\$18,690	\$18,427	\$18,703	\$276
11.5 Other Personnel Compensation	\$332	\$196	\$199	\$3
12.1 Civilian Personnel Benefits	\$5,378	\$8,234	\$8,439	\$205
Total, Salaries & Benefits	\$24,400	\$26,857	\$27,341	\$484

Salaries and Benefits fund compensation directly related to duties performed by Federal civilian employees. The 2016 request reflects a transfer out of \$3,391,000 for the external affairs functions to IGA; a transfer out of \$849,000 for the Resilience Star program to FEMA; a transfer in of \$4,310,000 for planning functions from OPS; an annualization of the 2015 pay increase of \$68,000; a 1.3% pay inflation increase of \$262,000; and a retirement benefit increase of \$84,000.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
21.0 Travel and Transportation of Persons	\$650	\$621	\$533	(\$88)

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The 2016 request reflects a transfer out of \$69,000 to IGA and a realignment of \$19,000 to fund increases in non-rent Working Capital Fund activities.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
23.1 Rental Payments to GSA	\$2,528	\$2,496	\$2,545	\$49

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The 2016 request reflects a transfer out of \$200,000 to IGA, a transfer in of \$230,000 from OPS, and an increase of \$19,000 in GSA rent funded in the Working Capital Fund.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.3 Other Goods and Services from Federal Sources	\$7,451	\$6,753	\$7,179	\$426

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. Specifically, funds support the purchase of goods and services from the DHS WCF and other government agencies including intra-agency service requirements. The 2016 request reflects a net increase of \$426,000 which includes the transfer out of \$612,000 for WCF costs to IGA, the transfer out of \$298,000 for WCF costs to FEMA, a transfer in of \$1,339,000 from OPS for WCF costs for planning personnel, and a transfer out of \$3,000 for Data Center Support to OCIO.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.6 Medical Care	\$29	\$29	\$30	\$1

Medical care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help. The 2016 request reflects a net \$1,000 increase which includes a transfer out of \$3,000 to IGA and a transfer in of \$4,000 from OPS.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
26.0 Supplies and Materials	\$61	\$62	\$59	(\$3)

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The 2016 request reflects a net decrease of \$3,000 which includes a transfer out of \$20,000 to IGA, a transfer in of \$23,000 from OPS, and a general offset of \$6,000.

Office of Intergovernmental Affairs Mission Statement

The Department proposes the consolidation of like functions into a new “Office of Partnerships and Engagement.” The proposed office consolidates the functions of Intergovernmental Affairs, the Private Sector Office, the Office for State and Local Law Enforcement, Academic Engagement, the “If You See Something, Say Something” public awareness campaign, and the Committee Management Office. The remodeled office will be responsible for communicating and coordinating State, local, tribal, and territorial (SLTT) government interactions throughout and across the Department.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
11.1 Full-time Permanent	\$796	\$1,143	\$3,783	\$2,640

BUDGET REQUEST AND SUPPORTING INFORMATION

Departmental Management and Operations Under Secretary for Management

I. Appropriation Overview

A. Mission Statement for Under Secretary for Management:

The Department of Homeland Security (DHS) Management Directorate ensures delivery of effective and efficient business and management services throughout the Department, to enable the Department to achieve its mission to lead the unified national effort to secure America. It does so by providing policy, guidance, operational oversight and support, and innovative solutions for the management needs of the entire Department.

B. Budget Activities:

USM is an appropriation within Departmental Management and Operations (DMO) that provides resources for seven separate Programs, Projects, and Activities (PPAs) including: Immediate Office of the Under Secretary for Management, Office of the Chief Readiness Support Officer, the DHS Nebraska Avenue Complex Project, Office of the Chief Human Capital Officer, Human Resources Information Technology, Office of the Chief Procurement Officer, and Office of the Chief Security Officer. Below are brief descriptive summaries of each PPA:

Immediate Office of the Under Secretary for Management

The primary mission of the Immediate Office of the Under Secretary for Management's (OISM) is to provide leadership and oversight for all Departmental management lines of business including information technology, security, budget and financial management, procurement and acquisition, human capital, and administrative services.

Office of the Chief Readiness Support Officer

The Office of the Chief Readiness Support Officer (OCSRO) is responsible for the overall leadership, internal controls and oversight of Department-wide logistics; asset life-cycle management, including aircraft, motor vehicles, ships, boats and sensitive assets; real property; personal property; environmental management; historic preservation; energy; DHS Headquarters consolidation; reduction of the DHS facilities footprint Nationwide; and support of DHS Headquarters operations. The OCSRO focus is to deliver affordable readiness, which entails providing affordable support products and services needed to enable employees across DHS to perform their missions effectively. The OCSRO team accomplishes this through building partnerships and collaboration, leveraging best practices, and fostering innovation.

DHS Nebraska Avenue Complex Consolidation Project

The Nebraska Avenue Complex (NAC) currently serves as the headquarters facility for DHS, as well as the location for many mission support functions. DHS continues to invest in this property to sustain our overall operational capabilities. The NAC investments will be leveraged as the Department realigns the overall real estate portfolio to support the integration of DHS operations in the National Capital Region.

Office of the Chief Human Capital Officer

The Office of the Chief Human Capital Officer (OCHCO) provides overall management and administration for the Department's human capital policies, programs, and practices for attracting, retaining, and developing the skilled workforce needed to protect and secure our Nation. The work of the OCHCO is critical to supporting and enabling the Secretary's workforce strategy, which centers around four key goals: building an effective, mission-focused, diverse, and inspiring cadre of leaders; recruiting a highly qualified and diverse workforce; retaining an engaged workforce; and solidifying a unified DHS culture of mission performance, adaptability, accountability, and results.

Human Resources Information Technology

The Human Resources Information Technology (HRIT) program provides leadership and enterprise IT solutions to enable core HR functionality and data access efficiency. The program manages, in partnership with the Operational Components and the Office of the Chief Information Officer, the Department's HRIT portfolio and consolidates, integrates, and modernizes core HR systems by planning, acquiring, configuring, implementing, and supporting the ongoing operation of enterprise HRIT systems and services.

Office of the Chief Procurement Officer

The Office of the Chief Procurement Officer (OCPO) is responsible for the overall management, administration, and oversight of Department-wide acquisition, financial assistance, strategic sourcing, and competitive sourcing programs, including direct management and oversight of the Office of Procurement Operations. OCPO activities include oversight and strategic support; policy and acquisition workforce issues; procurement ombudsman and industry liaison; and, small and disadvantaged business utilization. The DHS procurement mission is to effectively deliver mission capability through the contracting of critical supplies and services.

Office of the Chief Security Officer

The Office of the Chief Security Officer (OCSO) leads the collaborative security program to safeguard DHS employees, information, and property. The office develops, implements, and oversees the Department's security policies, programs, and standards; delivers security training and education to DHS personnel; and, provides security support to DHS Components. The office manages operational security systems and Homeland Security Presidential Directive-12 card issuance for the Department through the Working Capital Fund (WCF).

C. Budget Request Summary:

The Under Secretary for Management (USM) requests 829 FTP, 822 FTE and \$193,187,000 for FY 2016. This is a net decrease of 25 FTP and 32 FTE and \$2,099,000 from the FY 2015 President's Budget.

III. Current Services Program Description by PPA

**Department of Homeland Security
Departmental Management and Operations
Immediate Office of the Under Secretary for Management
Program Performance Justification**
(Dollars in Thousands)

PPA: Immediate Office of the Under Secretary for Management

	<u>Perm. Pos.</u>	<u>FTE</u>	<u>Amount</u>
FY 2014 Revised Enacted	17	17	\$2,970
FY 2015 President's Budget	17	17	\$2,757
2016 Adjustments-to-Base	-	-	(\$107)
FY 2016 Current Services	17	17	\$2,650
FY 2016 Program Change	-	-	\$761
FY 2016 Total Request	17	17	\$3,411
Total Change 2015 to 2016	-	-	\$654

The Immediate Office of the Under Secretary for Management (OUSM) requests 17 FTP, 17 FTE, and \$3.411 million for FY 2016. This is a net increase of \$0.654 million from the FY 2015 President's Budget.

OUSM Adjustments-to-Base include:

- Increase of \$0.018 million for the 2016 pay raise.
- Increase of \$0.005 million for annualization of the 2015 pay raise.
- Increase of \$0.011 million for Retirement Contribution.
- Decrease of \$0.066 million for travel, supplies, and decreased IT costs.
- Decrease of \$0.065 million for HQ Efficiencies for Voluntary Early Retirement Authority (VERA)/Voluntary Separation Incentive Program (VSIP).
- Decrease of \$0.010 million in HQ Efficiencies for Commercial Parking Subsidy and Cellular Wireless Savings.

OUSM Program Changes include:

- Increase of \$.761 million for the Interagency Management Council.

CURRENT SERVICES PROGRAM DESCRIPTION:

OUSM ensures the offices within the Management Directorate function effectively and efficiently in support of the Department. The requested funding will allow the OUSM to continue to oversee the functions of the Management Directorate offices; further DHS efforts to enhance functional integration; respond quickly to inquiries from within and outside the Department; and, identify and track performance related to the responsibilities of the Department. The USM continues using an integrated approach to the management of strategic investments and resource allocation decisions to build a

strong and accountable management foundation, remaining committed to demonstrating measurable, sustained progress over the coming years in all management functions.

PPA: Office of the Chief Readiness Support Officer

	<u>Perm. Pos.</u>	<u>FTE</u>	<u>Amount</u>
FY 2014 Revised Enacted	110	110	\$29,955
FY 2015 President's Budget	110	110	\$29,272
2016 Adjustments-to-Base	(7)	(7)	(\$1,922)
FY 2016 Current Services	103	103	\$27,350
FY 2016 Program Change	-	-	-
FY 2016 Total Request	103	103	\$27,350
Total Change 2015 to 2016	(7)	(7)	(\$1,922)

The Office of the Chief Readiness Support Officer (OCRSO) requests 103 FTP, 103 FTE, and \$27.355 million for FY 2016. This is a net decrease of 7 FTP/FTE and \$1.917 million from the FY 2015 President's Budget.

OCRSO Adjustments-to-Base include:

- Transfer out of 1 FTP/FTE and \$0.275 million to OCSO for the Employee Preparedness program.
- Transfer out of \$0.005 million to OCIO for the Data Center Support.
- Increase of \$0.115 million for the 2016 pay raise.
- Increase of \$0.063 million for retirement contribution.
- Increase of \$0.030 million for annualization of the 2015 pay raise.
- Decrease of \$0.723 million for contractor support savings, including cross-Component fuel integration, mail delivery alternatives, and Warehouse Integration.
- Decrease of 6 FTP/FTE and \$1.035 million for the HQ Efficiencies for Vacancies and VERA/VISIP.
- Decrease of \$0.087 million for the HQ Efficiencies for Commercial Parking Subsidy and Cellular Wireless Savings.

CURRENT SERVICES PROGRAM DESCRIPTION:

OCRSO is responsible for the overall leadership, internal controls and oversight of Department-wide logistics; asset life-cycle management, including aircraft, motor vehicles, ships, boats and sensitive assets; real property; personal property; environmental management; historic preservation; energy; DHS Headquarters consolidation; reduction of the DHS facilities footprint nationwide; and, support of DHS Headquarters operations.

OCRSO mission is achieved through the following programs:

Asset and Sustainability Management Program (ASMP): ASMP provides oversight, assessment, and guidance over DHS asset management and sustainability programs, which include: Real Property; Mobile Assets (Motor Vehicles, Aviation, & Marine); Personal Property; Energy Management; Environmental Planning & Historic Preservation; and Environmental & Sustainability Programs. ASMP responsibilities and authorities include: (1) the development and promulgation of consistent and correct policies to ensure Departmental compliance with laws, regulations, Executive Orders, and sound business practices (2) consolidating DHS asset & environmental data into meaningful information and reporting at the Departmental level (3) developing and deploying fact based analytical and planning processes, (4) providing strategic guidance and oversight to ensure effective management of the Department's program portfolios.

Operations Support: Operations Support provides effective delivery of Department administrative support services. The Office of Support Services integrates and centrally manages corporate or "shared" services to allow common work practices, standardization, control and monitoring to ensure the corporate services comply with the laws and DHS policies, and provide economic benefit due to consolidating like functions and economies of scale. Office of Support Services provides the day-to-day services that support mail screening and delivery operations, the transit subsidy benefits program, employee parking, executive sedan, employee shuttle, executive dining facility, Federal Occupational Health clinics, occupational health and safety, and facilities management support. The Office of HQ Real Property provides management of space assignments, occupancy agreements, and tracking/planning for all requirements, as well as project management, move management, furniture services, and cost controls for HQ NCR component offices. The Office of Headquarters Projects focuses on HQ consolidation at the St. Elizabeths campus. The approach of OCRSO is to strengthen these support services through an integrated portfolio approach and by building stronger relationships with other DHS support organizations while aggressively driving down costs without sacrificing readiness.

Affordable Readiness and Integration: Affordable Readiness and Integration serves as the focal point to collaborate on the efficiency of mission support activities across the Department. The primary functions of this organization include logistics integration, aviation integration, regional support coordination, metrics, and Departmental collaboration. This is achieved through identifying opportunities for shared mission support services across the components, developing and implementing common business practices, achieving total asset visibility across all DHS asset categories and making data-driven decisions. The mission support activities impacted by this program include real estate, fuel, vehicles, aviation, and other mission support-related activities. The goal in each of these areas is to identify opportunities for greater efficiency (e.g., shared facilities, greater standardization of assets) and then to guide and/or lead the development and implementation of a plan to realize that efficiency. The efficiencies are focused on achieving affordable readiness – meeting mission needs at the lowest cost.

**Department of Homeland Security
 Departmental Management and Operations
 DHS HQ NAC Project
 Program Performance Justification
 (Dollars in Thousands)**

PPA: DHS HQ NAC Project

	<u>Perm. Pos.</u>	<u>FTE</u>	<u>Amount</u>
FY 2014 Revised Enacted	-	-	\$4,500
FY 2015 President's Budget	-	-	\$4,493
2016 Adjustments-to-Base	-	-	(\$1,562)
FY 2016 Current Services	-	-	\$2,931
FY 2016 Program Change	-	-	-
FY 2016 Total Request	-	-	\$2,931
Total Change 2015 to 2016	-	-	(\$1,562)

The DHS Headquarters Project at the Nebraska Avenue Complex (NAC) requests \$2.931 million for FY 2016. This is a net decrease of \$1.562 million from the FY 2015 President’s Budget.

Adjustments-to-Base include:

- Decrease of \$2.112 million in construction and move management requirements.
- Increase of \$.550 million for NAC Access improvements.

CURRENT SERVICES PROGRAM DESCRIPTION:

The NAC currently serves as the headquarters facility for DHS. The NAC and other current locations continue to operate at nearly full capacity in order to meet the Department’s current space demands. DHS’s long-range headquarters consolidation plans include the retention of the NAC as a key location for Departmental programs. The NAC investments will be leveraged as the overall real estate portfolio is realigned to support DHS operations and integration in the National Capital Region (NCR). Accordingly DHS will need to continue to invest in this property in order to sustain operational capabilities and use it as one of the sites for DHS Components within the NCR. Funding is required to support the upkeep of the NAC and is used for contractor support towards design, construction, furniture, and move management.

Due to other DHS mission critical funding requirements the NAC has reduced their funding request by \$1.562 million in an adjustment to base (ATB). This ATB will be realized by the reduction of contractor support used to provide design, construction, furniture, and move management. These requirements will still be offered by OCRSO to the tenants but there will be a delay in the overall NAC implementation timeline.

**Department of Homeland Security
 Departmental Management and Operations
 Office of the Chief Human Capital Officer
 Program Performance Justification**
 (Dollars in Thousands)

PPA: Office of the Chief Human Capital Officer

	<u>Perm. Pos.</u>	<u>FTE</u>	<u>Amount</u>
FY 2014 Revised Enacted	114	114	\$21,968
FY 2015 President's Budget	114	114	\$21,253
2016 Adjustments-to-Base	(6)	(6)	(\$1,919)
FY 2016 Current Services	108	108	\$19,334
FY 2016 Program Change	14	7	\$5,056
FY 2016 Total Request	122	115	\$24,390
Total Change 2015 to 2016	8	1	\$3,137

The Office of the Chief Human Capital Officer (OCHCO) requests 122 FTP, 115 FTE, and \$24.390 million for FY 2016. This is a net increase of 8 FTP, 1 FTE, and \$3.137 million from the FY 2015 President's Budget.

OCHCO Adjustments-to-Base include:

- Transfer out of 1 FTP/FTE and \$0.212 million to OSEM/Office of Intergovernmental Affairs (IGA) for Academic Engagement.
- Increase of \$0.136 million for the 2016 pay raise.
- Increase of \$0.094 million for the 2016 retirement contribution.
- Increase of \$0.035 million for annualization of the 2015 pay raise.
- Decrease of 5 FTE and \$1.303 million for the HQ Efficiencies for Vacancies and VERA/VISIP.
- Decrease of \$0.144 million for the HQ Efficiencies for Commercial Parking Subsidy and Cellular Wireless Savings.
- Decrease of \$0.525 million for the Federal View Point Survey.

OCHCO Program Changes include:

- Increase of 14 FTP, 7 FTE and \$5.056 million for the Cyberskills Support Initiative.

CURRENT SERVICES PROGRAM DESCRIPTION:

OCHCO provides overall management and administration of the Department's human capital policies, programs, and practices for attracting, retaining and developing the skilled workforce needed to protect and secure our Nation. DHS must build a strategic workforce planning capability to serve as the foundation for a balanced workforce and build a pipeline of talent to ensure the continued development, recognition, and advancement of our current workforce. OCHCO is committed to implementing the DHS Workforce Strategy. This strategy outlines the human capital goals of the Department and the development and implementation of plans to address the inherent complexities and significant challenges the Department continues to face as it matures.

OCHCO's key programs are:

Human Capital Policy and Programs: Human Capital Policy and Programs develops and implements Department-wide policy, programs, and strategic human capital guidance. The program ensures policies reinforce the highest standards of commitment, performance excellence, integrity and accountability in terms of alignment with mission priorities and compliance with laws and regulations. Human Capital Policy and Programs represent the Department to external stakeholders, participates in government-wide working groups and task forces, and serves as the liaison to Office of Personnel Management on human capital initiatives.

Strategic Workforce Planning and Analysis: Strategic Workforce Planning and Analysis (SWPA) is responsible for providing an integrated and consistent strategic human capital framework, planning for the DHS workforce, ensuring the proper mix of federal employees and contractors, and determining the number of workers and specific competencies and skills needed to reduce the Department's mission risk. SWPA improves responsiveness, consistency, accuracy, and value of human capital data reporting through leading a DHS-wide human capital data governance process, deploying a dashboard with key performance measures, and conducting data analysis to enable sound workforce decisions in support of the DHS mission.

Learning and Leader Development: OCHCO coordinates Department-wide training and development strategies, policy and programs to cultivate a capable workforce with the critical knowledge, skills, and abilities to lead DHS in mission accomplishment. This includes strategic leadership of the DHS-wide training community, and programs including the Secretary's Honors Program, Pathways Program, Presidential Management Fellows Program, Academic Programs like the DoD Advanced Education Program, and Rotations and Mentoring Programs. Additionally, LLD manages the DHS Leader Development Program (LDP), which provides an integrated framework to enable both Department-wide consistency and mission-related Component flexibility in fostering a DHS culture of effective leadership and to sustain a high-performing, diverse, engaged, and inspiring cadre of leaders, at five levels of leadership, now and into the future.

Diversity and Inclusion: Diversity and Inclusion (D&I) leads the execution of the Department's first comprehensive Diversity and Inclusion Strategic Plan in partnership with the Office for Civil Rights and Civil Liberties. D&I provides Department-wide leadership and guidance on diversity and inclusion management, including: recruitment and outreach, career development and workplace inclusion, leadership commitment, and management accountability. D&I oversees and manages the Department's efforts regarding veteran's employment as required by Presidential Executive Order 13583. Among other responsibilities, the DHS Veterans Employment Program Office within D&I develops and implements strategies to increase the number of veterans hired and employed by DHS.

FY 2016 Total Request	22	22	\$9,578
Total Change 2015 to 2016	(2)	(2)	(\$300)

The Human Resources Information Technology (HRIT) requests 22 FTP, 22 FTE, and \$9.578 million for FY 2016. This is a net decrease of 2 FTP/FTE and \$0.300 million from the FY 2015 President's Budget.

HRIT Adjustments-to-Base include:

- Increase of \$0.019 million for the 2016 pay raise.
- Increase of \$0.005 million for annualization of the 2015 pay raise.
- Increase of \$0.019 million the 2016 retirement contribution.
- Decrease of 2 FTE and \$0.343 million for the HQ Efficiency Vacancies.

CURRENT SERVICES PROGRAM DESCRIPTION:

The HRIT program, managed by Human Capital Business Systems (HCBS), was established to support the mission of consolidating, integrating, and modernizing the Department's HRIT infrastructure. HRIT provides the flexibility and management information that will allow the Department to evolve in response to changing business, legislative, and economic drivers. The program is governed by the HRIT Executive Steering Committee (ESC) which was established January 2010

The HRIT program drives efficiencies and reforms across the Department to achieve four strategic goals aimed at consolidating and strengthening decision support information across the Department:

- Optimize HRIT capabilities to support efficient HR processes across DHS.
- Improve transparency, accountability, and efficiency of HRIT services to support the advancement of DHS enterprise HR services.
- Strengthen and unify the Department's ability to collect and share actionable enterprise HR information in support of the DHS mission.

- Enhance operations support and service delivery for enterprise HR systems and services across the Department.

This investment will increase transparency of HRIT spend data, allowing for the reduction of data calls and leveraging the existing DHS reporting processes. This will reduce duplicative investments, identify potential opportunities for the reuse of HRIT assets and will help establish priorities for future investments. It will also provide analysis on Component investment into HR systems which is a core necessity for effective HRIT business case analysis, as well as a key driver for investment and consolidation decisions. In addition, it will allow for optimized strategic sourcing to leverage purchasing power and eliminate the burden of managing duplicate contracts.

Key Strategies and Action Plans:

The HRIT Strategic Plan FY 2012/2016 established the direction and approach for achieving a prescribed shift toward Departmental/Federal HRIT systems and services. In FY 2016, HRIT will continue to move forward with projects identified in the FY 2014/2015 Annual Operations plan such as the PALMS, the Medical Case Management System and Data Management Information and Sharing. The FY 2014/2015 Annual Operations Plan initiated projects based on the priorities established by the Executive Steering Committee (ESC) and the funding available while aligning with the following key principles of HRIT Portfolio Management:

- *Enterprise Services:* Maintain the commitment demonstrated by executive stakeholders to achieve a major transformation for HRIT from a Component and system-centric model toward an enterprise services model where department and government-wide services are selected that meet the majority of the HR business needs across DHS. This shift will reduce HRIT redundancies and promote economies of scale to enhance the quality and consistency of every aspect of HRIT, promote seamless processing, and drive cost efficiencies.
- *Strategic Sourcing:* Enhance the use of strategic sourcing to leverage purchasing power and eliminate the burden of managing duplicate contracts. Continued access to a comprehensive DHS systems inventory and HRIT contract information is paramount to this effort. Identify and leverage solutions that currently exist within the Department, where possible, to reduce the cost and time to deliver enterprise services.
- *Governance:* Continue to engage and develop partnerships among HR, Training and IT leadership through the HRIT ESC, working groups (e.g. the HRIT Advisory Team) and management councils (e.g. the Human Capital Leadership Council and Training Leaders Council). The ESC will foster communication and collaboration among Components on the planning and budgeting of the HRIT portfolio and investments; resulting in enterprise services that address Departmental needs efficiently and effectively.
- *Investment Planning:* Place a greater emphasis on developing investment strategies to drive cost reductions and improve budget alignment across the Department. Added levels of rigor in the planning process will help ensure Components better understand and prepare for the cost implications associated with the transition to enterprise services that benefit the entire Department.
- *Project Execution:* Actively involve stakeholders in the identification of core needs and drive toward common business processes and requirements that can be delivered using modular development to shorten the time to implement enterprise services. Adhere to the direction set

forth in the DHS IT Strategic Plan, where appropriate, to align with key initiatives, such as the shift toward cloud computing in alignment with the Federal CIO's 25 point implementation plan. Institutionalize change management practices by creating a communication plan, launching business process meetings, and establishing formal governances including charters to increase success of enterprise systems and services implemented.

MAJOR ACQUISITIONS

DHS Human Resources Information Technology

The HRIT Investment mission, as outlined in the Future Year Homeland Security Plan (FYHSP) is to implement and manage a consolidated suite of modernized HRIT business solutions, reducing redundancies and increasing the functionality of HR systems across the Enterprise. HRIT funds are used to plan for, acquire, configure, and implement Commercial Off the Shelf (COTS)/ Government Off the Shelf (GOTS) packages and eGov/ Human Resources Line of Business (HRLoB) shared services to consolidate, modernize, and/or replace HRIT systems at the Enterprise-level. Upon successful acquisition and deployment to DHS components, the Operations and Maintenance (O&M) resource requirement are funded by Working Capital Fund (WCF) component contributions.

HRIT is currently in the process of implementing the Performance and Learning Management System (PALMS). PALMS is the enterprise wide solution for the automated administration of training courses and developmental opportunities across the Department. PALMS will consolidate the nine Learning Management Systems currently used by the Department into one. It will also include an Employee Management System that will improve the efficiency in employee work plan and the appraisal system.

This project is proposed to be funded out of multiple PPAs in FY 2016, as follows:

- HRIT Appropriated \$9.578 million
- E-training WCF Fee for Service \$4.955 million.

HRIT Appropriated:

FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Funding President's Budget Request (\$\$\$ thousands)	FY 2016 Activity Request (\$\$\$ thousands)
\$7,815	\$9,878	\$9,578

FY 2016 HRIT Appropriated Funding Breakout:

Program Area (Funding in \$\$\$ thousands)	Sub-Program	Mission Need
FTEs (\$5,225)	Salaries and Expenses	Funding supports government salaries, benefits, awards, travel, training and Working Capital Fund (WCF) charges for employees funded within this PPA. The 22 FTEs requested provide management oversight for the Department's HRIT infrastructure and critical support for mandatory HR IT Departmental activities (including time and attendance, payroll, personnel actions, and training).
Performance Learning and Management System (PALMS) (\$2,737)	Implementation and Program Support	PALMS (formerly the Enterprise Talent Management System), consolidates nine Component-based Learning Management Systems (LMS) and automates Employee Performance Management (EPM) processes into a single Department-wide integrated LMS/EPM solution.
Enterprise Services and Portfolio Management (\$1,616)	Support for Key Enterprise Projects, Program and Project Support	Support for ongoing enterprise projects to include PALMS and the deployment of WebTA to CBP (planning phase commencing FY 2016). Funding additionally supports Human Capital (HC) data and HRIT Portfolio Management.

 (Dollars in Thousands)

PPA: Office of the Chief Procurement Officer

	<u>Perm. Pos.</u>	<u>FTE</u>	<u>Amount</u>
FY 2014 Revised Enacted	353	353	\$64,862
FY 2015 President's Budget	335	335	\$64,036
2016 Adjustments-to-Base	(27)	(27)	(\$6,277)
FY 2016 Current Services	308	308	\$57,759
FY 2016 Program Change	-	-	\$1,230
FY 2016 Total Request	308	308	\$58,989
Total Change 2015 to 2016	(27)	(27)	(\$5,047)

The Office of the Chief Procurement Officer (OCPO) requests 308 FTP, 308 FTE, and \$59.004 million for FY 2016. This is a net decrease of 27 FTP/FTE and \$5.032 million from the FY 2015 President's Budget.

OCPO Adjustments-to-Base include:

- Transfer out of 10 FTE and \$3.619 million to OCFO for the Cost Analysis Division program.
- Transfer out of \$0.015 million to OCIO for the Data Center Support.
- Increase of \$0.359 million for the 2016 pay raise.
- Increase of \$0.092 million for annualization of the 2015 pay raise.
- Increase of \$0.225 million 2016 retirement contribution.
- Decrease of 1 FTP/FTE and \$1.515 million for the HQ Efficiencies for Vacancies and VERA/VSIP.
- Decrease of \$0.204 million for the HQ Efficiencies for Commercial Parking Subsidy and savings from a reduction in the Cellular Wireless Contract within the WCF NCRIO Activity.
- Decrease of 16 FTE and \$1.585 million for the Acquisition Professional Career Program (APCP).

OCPO Program Changes include:

- Increase of \$1.230 million for the DATA Act/Procurement ID.

CURRENT SERVICES PROGRAM DESCRIPTION:

The DHS Procurement mission is to effectively deliver mission capability through the contracting of critical supplies and services. OCPO is responsible for the overall management, administration, and oversight of Department-wide acquisition, financial assistance, strategic sourcing, and competitive sourcing programs; including direct management and oversight of the Office of Procurement Operations. OCPO activities include oversight and strategic support, policy and acquisition workforce, Procurement Ombudsman and Industry Liaison, and small and disadvantaged business utilization.

OCPO key programs are:

Acquisition Support and Oversight: OCPO is responsible for facilitating centralized hiring of the acquisition workforce; including the Acquisition Professional Career Program for initial entry into select acquisition career fields, and strategic acquisition workforce planning to ensure succession, development, and retention of a professional workforce. The acquisition workforce serves as the principle liaison for the acquisition community. They are responsible for developing and implementing a DHS acquisition oversight strategy in accordance with DHS Management Directive (MD) 0784 and implementing internal controls for DHS's acquisition function in accordance with OMB Circular A-123. Finally, OCPO provides support to program managers Department-wide and assist in the development of a DHS-wide acquisition management system.

Strategic Initiatives: OCPO is responsible for developing DHS acquisition regulations and policies, developing proposed acquisition legislation, and responding to proposed acquisition legislation. OCPO is responsible for the Department's implementation of the Federal Activities Inventory Reform (FAIR) Act of 1998, the Revised OMB Circular A-76 and the President's Management Agenda (PMA) Competitive Sourcing Initiative. Lastly, OCPO is responsible for managing the DHS strategic sourcing program and developing corporate strategies for the acquisition of shared commodities to achieve efficiencies and economies of scale.

Office of Small and Disadvantaged Business Utilization (OSDBU): In support of the Small Business Act to maximize small business procurement opportunities, the OSDBU assists, counsels, and advises small businesses of all types on procedures for contracting with the DHS. Additionally, the OSDBU works closely with each Departmental organizational element to implement the Department's small business procurement assistance program.

Program Accountability and Risk Management (PARM):

Program Accountability and Risk Management (PARM) Budget FY14 -FY16

	FY14 Enacted	FY15 President's Budget	FY16 President's Budget
Funding Level	\$12,481,381	\$12,481,381	\$8,862,381
FTE	55	55	45

PARM is transferring the Cost Analysis Division, 10 FTE/\$3.6 million in FY 2016 to the OCFO to better align functions within lines of business. PARM develops, maintains and updates the Department’s primary acquisition policy, MD 102-01, and its implementing instructions and supporting guidance. PARM provides acquisition decision support to the Chief Acquisition Officer (CAO) and Acquisition Review Board (ARB) in accordance with MD 102-01. The acquisition oversight program provides early review and continuous verification that system requirements are being achieved, and monitor the planning and execution of acquisitions throughout the entire development and acquisition lifecycle. Proactive oversight allows PARM to provide support and assistance to the Department’s acquisitions and acquisition personnel when needed.

FY 2016 Program Change	-	-	-
FY 2016 Total Request	257	257	\$66,538
Total Change 2015 to 2016	3	3	\$2,941

The Office of the Chief Security Officer (OCSO) requests 257 FTP, 257 FTE, and \$66.538 million for FY 2016. This is a net increase of 3 FTP/FTE and \$2.941 million from the FY 2015 President's Budget.

OCSO Adjustments-to-Base include:

- Transfer in of 3 FTP/FTE and \$0.423 million from the Office of Operations Coordination and Planning (OPS) for the Employee Preparedness program.
- Transfer in of 1 FTP/FTE and \$0.275 million from OCRSO for the Employee Preparedness program.
- Transfer in of 1 FTP/FTE and \$0.219 million from OSEM / Executive Secretary for the Employee Preparedness program.
- Transfer in of \$3.376 million from HQ Consolidated for rent at St. Elizabeths.
- Transfer out of \$0.011 million to OCIO for the Data Center Support
- Increase of \$0.338 million for the 2016 pay raise.
- Increase of \$0.088 million for annualization of the 2015 pay raise.
- Increase of \$0.116 million for Retirement Contribution.
- Decrease of 2 FTE and \$0.626 million for the HQ Efficiencies for Vacancies and VERA/VSIP.
- Decrease of \$0.103 million for the HQ Efficiencies for Commercial Parking Subsidy and Cellular Wireless Savings.
- Decrease of \$0.600 million for the reduction to administrative costs for managing the NAC Security contract.
- Decrease of \$1.574 million for the reduction to travel, communications and operational security services.
- Increase of \$1.000 million for a one-time Security, Suitability, and Credentialing Line of Business cost that will transfer to The Office of the National Director of Intelligence (ODNI).

CURRENT SERVICES PROGRAM DESCRIPTION:

The OCSO is the Department's designated Senior Agency Official (SAO) and Cognizant Security Authority (CSA) responsible for the governance, oversight, integration, and administration of the collaborative DHS security program. Through direct leadership and consultation with component chief security officials, the OCSO exercises its Department wide authorities predominantly through the provision of operational security services to DHS HQ Offices and Directorates; while also developing, implementing, and promulgating Department wide policies, standards, and business practices designed to effectively and efficiently safeguard the Department's personnel, assets, facilities, and information.

The OCSO provides a multitude of security services directly supporting the missions and objectives of DHS Components and DHS HQ Offices and Directorates. The integration of these services are provided within the following disciplines:

Administrative Security: OCSO implements and oversees policies, programs, and standards necessary to ensure the protection of collateral classified and sensitive but unclassified information; creates self-inspection programs that ensure classified and sensitive information is protected; and safeguards information for DHS, State and local fusion centers, major metropolitan police departments, and State emergency operations centers.

Internal Security and Investigations: OCSO administers security audits, inspections, and investigations involving alleged crimes against DHS or its employees, and allegations of illegal activities by DHS personnel; provides investigative and liaison support to the intelligence community on security matters affecting DHS.

Special Security Programs: OCSO provides security policy oversight, management, and guidance for the protection of Sensitive Compartmented Information (SCI) and information received from the intelligence community; provides administrative, industrial, and operational security programs for the handling and protection of SCI; and delivers security education and training.

Physical Security: OCSO manages and implements physical security policies, programs, and standards for DHS facilities; provides access control, physical barriers, surveillance equipment, and technical services.

Personnel Security: OCSO provides personnel security and suitability policies, programs, and standards, including procedures for granting, denying, and revoking access to classified information; initiates and adjudicates personnel security and suitability background investigations and periodic reinvestigations of applicants and appointees.

Systems Security: OCSO manages, supports, and coordinates the OCSO systems and related processes, and collaborates with the OCIO to secure the OCSO proprietary operational systems.

Employee Preparedness: The FY 2016 Request proposes the transfer of personnel, duties, and funding from OPS, Executive Secretary, and OCRSO to OCSO for The Office of Employee Preparedness. This will provide the USM to provide Department-wide policy, business processes, guidance and oversight to a variety of programs and activities to ensure protection of employees and mission in the face of potential dangers and threats including fire, weather events, natural disasters and terror attacks. Core to the mission of the Office is the implementation of a risk management framework to guide planning, and development of Occupant Emergency Plans for facilities and operations. Performance objectives and metrics are a key element to ensure Component implementation.

Security, Suitability, and Credentialing Line of Business (SSCLoB): As in FY 2015, OCSO will execute a non-expenditure transfer of \$1M to The Office of the National Director of Intelligence (ODNI) to support implementation efforts set forth in the 120 Day Suitability and Security Processes Report to the President and to support the ongoing reform efforts of the Performance Accountability Council (PAC).

IV. Program Justification Changes

Department of Homeland Security
Office of the Under Secretary for Management
Justification of Program Changes
(Dollars in Thousands)

Program Increase 1: Interagency Management Council
PPA: Immediate Office of the Under Secretary for Management
Program Increase: Positions 0, FTE 0, Dollars \$761

Funding Profile

	FY 2014 Revised Enacted			FY 2015 President's Budget			FY 2016 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$0
Program Increase							0	0	\$761
Total Request	0	0	\$0	0	0	\$0	0	0	\$761

Description:

Under Section 721 of PL 113-76, major Federal agencies currently contribute to the General Services Administration in support of the interagency management councils, which have supported numerous cross-agency management reforms and efficiencies for more than a decade. Building on the success of this cross-agency work, the FY 2016 President’s Budget will request an increase of \$15 million Government – wide in this authority to support implementation of the Administration’s Cross Agency Priority (CAP) Goals.

Justification:

To fund this request, the Department of Homeland Security is requesting \$761,000 in FY 2016 to fund this increase as part of the overall effort of \$15 million.

Impact on Performance:

The FY 2016 President’s Budget will request an increase in this authority to support implementation of the Cross Agency Priority (CAP) Goals.

Department of Homeland Security
Office of the Under Secretary for Management
Justification of Program Changes
(Dollars in Thousands)

Program Increase 2: Cyberskills Management Support Initiative
PPA: Office of the Chief Human Capital Officer
Program Increase: Positions 14, FTE 7, Dollars \$5,056

Funding Profile

	FY 2014 Revised Enacted			FY 2015 President's Budget			FY 2016 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$0
Program Increase							14	7	\$5,056
Total Request	0	0	\$0	0	0	\$0	14	7	\$5,056

Description: This program increase requests formal establishment of the CyberSkills Management Support Initiative (CMSI) in the Office of the Chief Human Capital Officer (OCHCO). The mission of CMSI is to develop and implement human capital strategies, policies, and programs to support the current and future DHS cybersecurity workforce. The overarching goal of the CMSI program is to increase the Department’s capacity of skilled cyber professionals to ensure effective execution of all operational priorities.

Justification: With continued and escalating cyber threat facing the nation, it is urgent that the Department coordinate to efforts ensure our cybersecurity workforce can effectively execute all operational priorities. In June 2012, the former Secretary established a Homeland Security Advisory Council Task Force on CyberSkills. In accordance with the findings and recommendations the Task Force released in October 2012, DHS leadership launched a department-wide effort to implement a variety of changes that would enable DHS to create a world-class cybersecurity workforce and expand the pipeline for critical cybersecurity talent.

To maintain focus and momentum on this important issue, CMSI was launched on April 1, 2013, under the direction of DHS senior leadership, including the former Under Secretary for Management and Chief Human Capital Officer. With a staff of detailees, CMSI has been working with cybersecurity program managers and human capital staff across DHS to develop Department-wide human capital strategies, policies, and programs to enhance the DHS cybersecurity workforce. All CMSI efforts aim to ensure component organizations performing cybersecurity functions are staffed for on-going mission readiness.

Through the OCHCO’s existing oversight and management processes, CMSI will be able to reach and collaborate with component senior and human capital leadership to ensure consistent adoption of and support for cybersecurity workforce support activities. Department-wide human capital strategies, policies, and programs to enhance the DHS cybersecurity workforce would be created and managed from the same organization focused on similar initiatives for the entire DHS workforce. This co-

location would promote economies of scale, alignment of cybersecurity efforts to departmental approaches, and the opportunity to expand cybersecurity workforce innovations to additional DHS mission critical populations.

Impact on Performance: As a part of OCHCO, CMSI would support the safeguarding and securing of cyberspace by developing skilled cybersecurity professionals. CMSI will also contribute to more overarching departmental efforts to mature and strengthen the Homeland Security Enterprise by enabling components to recruit, hire, retain, and develop a highly qualified, diverse, effective, mission-focused, and resilient workforce.

In FY 2016 and subsequent fiscal years, CMSI would continue existing projects started by detailed staff and launch additional efforts related to cybersecurity workforce analysis, recruitment, retention, training, and pipeline development. With a department-level focus on cybersecurity workforce issues, CMSI will seek to leverage component best practices and create comprehensive, efficient programs to meet the human capital requirements of the various DHS cybersecurity missions and objectives. Initial priority activities for a funded CMSI would include:

- Continuing to refine workforce inventory processes to improve insight into current workforce capacity and capability, including how employees are deployed to support specific ongoing or incident-related functions.
- Expanding current student and temporary opportunities, including the Secretary's Honors Program Cyber Student Volunteer Initiative, and piloting additional programs for identifying and developing junior talent for success at DHS.
- Continuing to augment the Automated Cybersecurity Positions Description Tool, consult with Components as they fill critical vacancies, and supporting important flexibilities, including the OPM-granted Schedule Appointing Authority for Cybersecurity.
- Expanding cybersecurity-focused mentoring pilot to reach additional DHS employees, and continuing to pursue the creation of intensive, technical training courses targeting both baseline and expert-level proficiency in specific mission critical areas.

Several performance measures will be monitored to ensure the impact of CMSI activities on strategic goals. Examples include the Fill Rate for Mission Critical Cybersecurity Positions and the Growth of Cybersecurity Professional Development Program Participation. CMSI will aim to maintain a fill rate of at least 95% for mission critical cybersecurity positions, and to significantly expand cybersecurity workforce development program participation rates to meet regularly reassessed targets.

Department of Homeland Security
Office of the Under Secretary for Management
Justification of Program Changes
(Dollars in Thousands)

Program Increase 3: DATA Act/Procurement ID
PPA: Office of the Chief Procurement Officer
Program Increase: Positions 0, FTE 0, Dollars \$1,230

Funding Profile

	FY 2014 Revised Enacted			FY 2015 President's Budget			FY 2016 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$0
Program Increase							0	0	\$1,230
Total Request	0	0	\$0	0	0	\$0	0	0	\$1,230

Description: To implement the President’s recommendation President from the Government Accountability and Transparency Board and the DATA Act requirement for unique identifiers for Federal awards that can be consistently applied government-wide, the Federal Acquisition Regulation (FAR) was updated to require a standardized numbering system that will produce unique identification numbers for procurement awards (e.g., contracts, orders).

This ability to uniquely and uniformly identify procurement transactions is key to linking obligations with expenditures and supports the move to electronic invoicing, shared financial services, and implementation of the DATA Act.

Justification: This funding will be used to support changes to DHS systems related to procurement spending and management as well as acquisition workforce changes required in the implementation of the Federal Acquisition Regulation (FAR) Case 2012-023, Uniform Procurement Identification.

Impact on Performance: The Secretary supports the Administration’s priorities of providing high-quality, transparent Federal spending information to the public and using this expanded data to achieve a more effective and efficient allocation of resources to meet mission needs as well as using this data to improve overall agency performance.

V. Exhibits and Other Supporting Material

A. Justification of Proposed Legislative Language

For necessary expenses of the Office of the Under Secretary for Management, as authorized by sections 701 through 705 of the Homeland Security Act of 2002 (6 U.S.C. 341 through 345), [\$195,286,000] ***\$183,090,000***¹, of which not to exceed \$2,250 shall be for official reception and representation expenses: Provided, That of the total amount made available under this heading, [\$4,493,000] ***\$2,381,000***² shall remain available until September 30, [2019] ***2020***³, solely for the alteration and improvement of facilities, tenant improvements, and relocation costs to consolidate Department headquarters operations at the Nebraska Avenue Complex; and [\$9,878,000] ***\$9,578,000***⁴ shall remain available until September 30, [2016] ***2017***⁵, for the Human Resources Information Technology program: *Provided further*, That the Under Secretary for Management shall, pursuant to the requirements contained in House Report 112-331, submit to the Committees on Appropriations of the Senate and the House of Representatives at the time of the President’s budget proposal for fiscal year 2017 is submitted pursuant to section 1105(a) of title 31, United States Code, a Comprehensive Acquisition Status Report, which shall include the information required under the heading “Office of the Under Secretary for Management” under title I of division D of the Consolidated Appropriations Act, 2012 (Public Law 112-74), and quarterly updates to such report not later than 45 days after the completion of each quarter.

Immediate Office of the Under Secretary for Management Mission Statement

The Immediate Office of the Under Secretary for Management's primary mission is to provide leadership and oversight for all departmental management functions which include information technology, security, budget and financial management, procurement and acquisition, human capital, and administrative services.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
11.1 Full-time Permanent	\$1,390	\$1,216	\$1,182	(\$34)
11.3 Other than Full-Time Permanent	\$111	\$112	\$112	-
11.5 Other Personnel Compensation	\$39	\$39	\$39	-
12.1 Civilian Personnel Benefits	\$606	\$561	\$564	\$3
Total, Salaries & Benefits	\$2,146	\$1,928	\$1,897	(\$31)

The Immediate Office of the USM requests \$1,897,000 to fund the salaries and benefit costs for 17 FTE, providing departmental leadership, management and oversight in FY 2016. This is a net decrease of \$31,000 from the FY 2015 request due to the annualization of the 2015 pay increase, 2016 pay increase, retirement contribution, and projected and projected savings from VERA/VSIP acceptance as well as the backfilling of attrited positions at a lower grade mix.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
21.0 Travel and Transportation of Persons	\$10	\$10	\$8	(\$2)

There is a reduction of \$2,000 due to the use of conference calls or virtual meetings instead of physical travel.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
23.1 Rental Payments to GSA	\$376	\$329	\$346	\$17

GSA Rent includes all payments to the General Services Administration (GSA) for rented space and related services. There is an increase of \$17,000 due to inflationary factors.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.3 Other Goods and Services from Federal Sources	\$376	\$428	\$1,098	\$670

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. There is an increase of \$670,000 due to the reduction of the Headquarters Efficiency Cellular Wireless requirement and an increase for the Interagency Management Council. The Immediate Office of the Under Secretary for Management will also work to reduce their WCF charges in areas such as NCRIO and other non-GSA Rent activities.

Office of the Chief Readiness Support Officer Mission Statement

The mission of the Office of the Chief Readiness Support Officer (OCRSO) is to ensure USM offices function effectively and efficiently in support of the Department as a whole and in direct support of other USM offices.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
11.1 Full-time Permanent	\$8,503	\$8,832	\$7,938	\$(894)
11.3 Other than Full-Time Permanent	\$89	\$89	\$89	-
11.5 Other Personnel Compensation	\$232	-	-	-
12.1 Civilian Personnel Benefits	\$2,598	\$2,750	\$2,537	\$(213)
Total, Salaries & Benefits	\$11,422	\$11,671	\$10,564	\$(1,107)

The OCRSO requests \$10,564,000 to fund the salaries and benefit costs for 103 FTEs in FY 2016. This is a net decrease of \$1,107,000 and includes annualization of the 2015 pay increase, pay increase for 2016, retirement contribution, and the transfer of 1 FTE to OCSO for the Employee Preparedness Division. Also included, are the decreases of 6 FTE for vacancies due to efficiencies and projected savings from VERA/VSIP acceptance.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
23.1 Rental Payments to GSA	\$1,419	\$1,267	\$977	(\$290)

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. There is a decrease of \$290,000 due to space consolidation.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.3 Other Goods and Services from Federal Sources	\$5,104	\$5,149	\$4,624	(\$525)

The FY 2016 Request includes a decrease of \$525,000 due to a reduction in contract support services, a reduction due to efficiencies for Parking and Cellular Wireless costs, and the transfer from CRSO Data Center Support to DHS CIO.

DHS HQ NAC Project Mission Statement

The Nebraska Avenue Complex (NAC) currently serves as the headquarters facility for DHS, as well as the support location for additional mission support functions. DHS continues to invest in this property to sustain our overall operational capabilities.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.3 Other Goods and Services from Federal Sources	\$4,500	\$4,493	\$2,931	(\$1,562)

The request includes a decrease of \$1,562,000 in contractor support services for move management, construction, painting, and carpeting. This work is still required, but due to other DHS mission priorities, DHS will delay improvements.

HRIT Mission Statement

The HRIT Investment's mission is to implement and manage a consolidated suite of modernized HRIT business solutions, reducing redundancies and increasing the functionality of HR systems across the Enterprise. HRIT funds the planning, acquisition, configuration, and implementation of COTS/GOTS packages and eGov/HRLoB shared services to consolidate, modernize, and/or replace HRIT systems at the Enterprise-level. Once IT solutions have been acquired and deployed to DHS components, their Operations and Maintenance (O&M) is funded via Component contributions to Working Capital Funds (WCF).

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
11.1 Full-time Permanent	\$1,548	\$1,563	\$1,322	\$(241)

Office of the Chief Procurement Officer Mission Statement

The Office of the Chief Procurement Officer (OCPO) is responsible for the overall management, administration, and oversight of Department-wide acquisition, financial assistance, strategic sourcing, and competitive sourcing programs, including direct management and oversight of the Office of Procurement Operations. OCPO activities include oversight and strategic support, policy and acquisition workforce, Procurement Ombudsman and Industry Liaison, and small and disadvantaged business utilization. The DHS Procurement mission is to effectively deliver mission capability through the contracting of critical supplies and services

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
11.1 Full-time Permanent	\$28,269	\$27,398	\$22,952	\$(4,446)
11.3 Other than Full-Time Permanent	\$590	\$590	\$590	-
11.5 Other Personnel Compensation	\$264	\$267	\$267	-
12.1 Civilian Personnel Benefits	\$8,430	\$8,565	\$6,948	\$(1,617)
Total, Salaries & Benefits	\$37,553	\$36,820	\$30,757	\$(6,063)

The OCPO requests \$30,757,000 to fund the salaries and benefit costs for 308 FTE in FY 2016. This is a net decrease of \$6,063,000 and includes annualization of the 2015 pay increase, and the pay increase for 2016. Also included is a decrease of 1 FTE for vacancies due to efficiencies, projected savings from VERA/VSIP acceptance, and the reduction of 16 FTE from the Acquisition Professional Career Program.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
23.1 Rental Payments to GSA	\$3,536	\$3,426	\$3,254	(\$172)

Included is a decrease of \$172,000 in FY2016 due to space consolidation.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.1 Advisory and Assistance Services	\$13,649	\$13,701	\$14,931	\$1,230

Included is an increase of \$1,230,000 to support the DATA Act/Procurement ID.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.3 Other Goods and Services from Federal Sources	\$4,898	\$4,976	\$4,934	(\$42)

The FY 2016 Request includes a decrease of \$42,000 due to efficiencies in parking, cellular wireless, and the transfer from CPO Data Center Support to DHS CIO.

Office of the Chief Security Officer Mission Statement

The OCSO leads the collaborative security program to safeguard the Department's people, information, and property so that the Department can secure the homeland. The office develops, implements, and oversees the Department's security policies, programs, and standards; delivers security training and education to DHS personnel; conducts investigations of criminal activities within or directed against DHS; and provides security support to DHS Components and operational security services to DHS HQ. The OCSO also manages and governs the operational security systems and HSPD-12 card issuance on behalf of the Department through the WCF.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
11.1 Full-time Permanent	\$25,452	\$25,718	\$26,205	\$487
11.3 Other than Full-Time Permanent	\$61	\$62	\$62	-
11.5 Other Personnel Compensation	\$1,146	\$866	\$866	-
12.1 Civilian Personnel Benefits	\$7,648	\$8,082	\$8,448	\$366
Total, Salaries & Benefits	\$34,307	\$34,728	\$35,581	\$853

The OCSO requests \$35,581,000 to fund the salaries and benefit costs for 257 FTE in FY 2016. This is a net increase of \$853,000 and 3 FTE. This includes annualization of the 2015 pay increase, pay increase for 2016, increase for retirement contribution, and the

decrease of 2 FTE for vacancies due to efficiencies. Also included is a projected savings from VERA/VSIP acceptance, and the transfers of 5 FTE for the Employee Preparedness program from OPS, OCRSO, and OSEM/Executive Secretary.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
21.0 Travel and Transportation of Persons	\$230	\$230	\$190	(\$40)

Request includes a decrease of \$40,000 due to the consolidation of trips, conference calls and other virtual meetings will replace physical travel.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
23.1 Rental Payments to GSA	\$4,343	\$4,666	\$6,967	\$2,301

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The increase of \$2,301,000 is due to the transfer of the St. Elizabeths guard service rent from the DHS HQ Consolidated appropriation to OCSO.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.3 Other Goods and Services from Federal Sources	\$19,992	\$19,440	\$19,267	(\$173)

The FY 2016 request includes a decrease of \$173,000 due to efficiencies achieved for parking and cellular wireless, planned reductions to contracts for communication and security, a reduction to WCF consumption of services such as NCRIO, and the transfer from CSO Data Center Support to DHS OCIO. \$1,000,000 is also included for Security, Suitability, and Credentialing Line of Business (SSCLoB) that will transfer to The Office of the Director of National Intelligence (ODNI).

BUDGET REQUEST AND SUPPORTING INFORMATION

Departmental Management and Operations Office of the Chief Financial Officer

I. Appropriation Overview

A. Mission Statement:

The mission of the Office of the Chief Financial Officer (OCFO) is to ensure that the funds necessary to carry out the Department's mission are obtained, allocated, and spent in support of the Department's priorities and in accordance with law and policies.

The DHS OCFO goals are to:

- Provide timely, accurate, and actionable financial information to decision makers and stakeholders.
- Integrate performance and develop program plans and budgets that are well-justified and balanced to support DHS priorities.
- Provide assurance that internal controls are effective.
- Provide quality, cost-effective financial management services and operations.
- Develop and maintain financial and resource management skillsets to ensure sustained achievement of the DHS CFO mission.
- Strengthen financial assistance accountability.

The following functions are within the OCFO:

- Budget
- Program Analysis and Evaluation (PA&E)
- Cost Analysis Division (CAD)
- Financial Management
- Risk Management and Assurance
- Financial Assistance Policy and Oversight
- Financial Operations
- General Accountability Organization (GAO) and Office of Inspector General (OIG) Liaison
- Resource Management Transformation
- Workforce Development

C. Budget Request Summary:

The OCFO requests \$96,775,000, and 230 full-time positions (FTP)/ 228 full-time equivalents (FTE). This is an increase of \$2,149,000 from FY 2015 President's Budget when including the funds appropriated by a General Provision and managed by OCFO for DHS Financial Systems Modernization efforts.

CURRENT SERVICES PROGRAM DESCRIPTION:

OCFO ensures that the funds necessary to carry out the Department's mission are obtained, allocated, and expended in accordance with the Department's priorities and relevant law and policies. This mission is supported by the Budget, PA&E, Cost Analysis, and Financial Operations divisions. OCFO also provides guidance and oversight of the Department's budget, financial management, and resource management systems. This guidance and oversight is supported by the Financial Management, Risk Management and Assurance, Financial Assistance Policy and Oversight, GAO and OIG Audit Liaison, Resource Management Transformation, and Workforce Development divisions.

Adjustments to Base include:

- Transfer of 10 FTP/FTE and \$3.619 million from the Office of the Chief Procurement Officer for the Cost Analysis Division.
- Transfer of 1 FTP/FTE and \$0.188 million from The Office of the Executive Secretary for Efficiency Review functions.
- Transfer of \$0.002 million to the Office of the Chief Information Officer for Data Center Support Costs.
- Increase of \$0.378 million for the 2016 pay raise.
- Increase of \$0.049 million for annualization of the 2015 pay raise.
- Increase of \$0.113 million for Retirement Contribution.
- Increase of 4 FTE and \$0.614 million for annualization of Capabilities and Requirements.
- Decrease of 1 FTP/FTE and \$0.755 million for the HQ Efficiencies for Voluntary Early Retirement Authority (VERA)/Voluntary Separation Incentive Program (VSIP) and for Vacancies.

- Decrease of \$0.106 million for the HQ Efficiency for Commercial Parking Subsidy and Cellular Wireless Savings.
- Non-recur of \$45.370 million for Component Financial Systems Modernization.

Program Changes include:

- An increase of 4 FTP/2FTE and \$0.444 million in support of the Cost Analysis Division.
- Increase of \$42.977 million for Component Financial Systems Modernization.

Under OCFO, the following Divisions fulfill these functions:

Budget:

- Issue guidance to the Department's Components to ensure that all phases of budget formulation and execution are effectively and efficiently completed;
- Determine that sufficient resources are available to support activities of the appropriate fiscal year;
- Administer the Department's budget, appropriations, and expenditures of funds;
- Collaborate with Program Analysis & Evaluation (PA&E) and DHS Components to formulate annual budget submissions, ensure these properly reflect DHS requirements, and assist in the presentation and defense of submissions to the Office of Management and Budget (OMB) and Congress;
- Coordinate and review budget execution for each Component and appropriation, conduct spend plan and execution reviews, and act on requests for modifications;
- Conduct special studies and analyses of execution of financial plans and recommend reprogrammings as necessary for effective funds utilization;
- Prepare budgetary reports as necessary or as required by OMB and Congress;
- Prepare the Secretary to testify on the budget request and coordinate responses to Questions for the Record;
- Track, monitor status, and validate budgetary information of reports to Congress required by appropriations bills;
- Ensure technical accuracy and consistency of Component budget materials in accordance with OMB or Congressional guidance;
- Manage and coordinate Components' input into MAX, the on-line budget data system;
- Analyze budgetary impact of pending legislation, testimony, and other documents; and,
- Coordinate and review apportionments, reapportionments, and allotments for all DHS appropriations.

Program Analysis and Evaluation (PA&E):

- Develop and perform analyses and evaluations of alternative plans, programs, personnel levels, and budget submissions for the Department in relation to homeland security objectives, projected threats, vulnerability assessments, estimated costs, resource constraints, and the most recent homeland security strategy;
- Provide guidance and oversee the development of the Future Years Homeland Security Program (FYHSP) of the Department;
- Lead the performance measurement and reporting for DHS mission-oriented programs, and oversee preparation of the DHS performance plan and other performance reporting;

- Integrate performance measurement into strategic planning, resource allocation, program evaluation, evaluation of management personnel, and the culture of DHS;
- Act as the Deputy Performance Improvement Officer (PIO) in order to supervise performance management activities, provide advice on program performance goals, convene responsible parties to assess and improve program performance, and guide the use of performance measures in personnel performance appraisals;
- Develop and promote improved analytical tools and methods for analyzing homeland security planning and resource allocation;
- Establish policies for and oversee the integration of the planning, programming, and budgeting system of the Department;
- Coordinate with and support the Office of Policy on DHS long-term strategic planning; and
- Improve strategic analysis and Department-wide acquisition decision-making through capabilities and requirements analysis.

Cost Analysis Division (CAD):

- Advise the Undersecretary for Management (USM), Chief Financial Officer (CFO), and Component Acquisition Executives on cost estimating and analysis issues;
- Lead the Department in cost estimating and analysis policy, policy implementation, and guidance;
- Review, analyze, and evaluate Program Life Cycle Cost Estimates (LCCEs) and ensure the cost of DHS programs are presented to the Acquisition Decision Authority and CFO accurately and completely to support acquisition and resource decisions; and
- Advise the Homeland Security Acquisition Institute (HSAI) on career field certification, training, and education for the cost estimating and analysis community.

Financial Management:

- Develop and oversee Departmental financial management policy;
- Provide guidance for and oversee Financial Systems Modernization (FSM) efforts in conjunction with the Resource Management Transformation (RMT) Division;
- Coordinate the Department's participation in government-wide financial management initiatives;
- Manage the DHS Treasury Information Executive Repository (TIER);
- Prepare the Department's consolidated financial statements and other required financial information, including the Annual Financial Report;
- Provide guidance and oversight to DHS Components on accounting and financial reporting requirements and coordinate the annual audit of the Department's financial statements included in the Annual Financial Report; and
- Administer the DHS Bankcard Program (purchase, travel, and fleet), develop and document bankcard policy, provide training and internal controls to provide reasonable assurance that the objectives of the Bankcard Program are met, and ensure that fraudulent or improper use and untimely payment are identified in a timely manner and appropriate corrective action is taken.

Risk Management and Assurance:

- Lead the Department's assessment of internal controls;
- Coordinate the development and implementation of Mission Action Plans to address material weaknesses and other significant conditions;
- Issue guidance on and coordinate preparation of the Secretary's year-end Internal Control Assurance Statements; and
- Conduct reviews of key financial processes to ensure internal controls are designed and operating effectively, with the goal of identifying weaknesses before they become problems.
- Lead efforts to identify, recover, and prevent improper payments.

Financial Assistance Policy and Oversight:

- Advise senior DHS leadership regarding the situation-specific application of government-wide statutes, regulations, OMB circulars, Executive Orders, and DHS Financial Assistance Policy as these relate to use of federal funds;
- Define the DHS Financial Assistance Line of Business, including streamlining and standardizing business models and business processes and developing supporting technology;
- Develop and distribute DHS Financial Assistance Policy for use across DHS to communicate legal requirements, regulation, circulars, Executive Directives, Comptroller General Decisions, and other legal issuances related to the use of federal funds;
- Provide oversight to ensure DHS and recipient compliance with requirements regarding the use of federal funds;
- Assess high risk audit findings from Single Audits, resolve high risk findings backlog, and develop Cost Policy to assist recipients in avoiding repeat high risk findings;
- Oversee the reporting requirements of the Federal Financial Accountability and Transparency Act of 2006 for the Department;
- Increase the accuracy, timeliness, and reliability of all DHS financial assistance award data and ensure any end-to-end system has auto reporting capabilities; including file transfer to public venues and robust ad hoc query capability; and
- Develop and maintain Grant Officer/Assistance Officer standards and qualifications.

Financial Operations:

- Oversee budget formulation and execution for Departmental Management and Operations (DMO) offices, including the Offices of the Secretary and Executive Management (OSEM) and the Under Secretary for Management (USM);
- Provide budget execution, accounting, and financial management and reporting services for DMO including managing apportionments, allotments, funds certifications, invoice processing, general ledger, payroll reconciliations, bank card, and travel;
- Oversee and manage the DHS Working Capital Fund (WCF);
- Perform internal audits and audit follow-up for DMO offices; and
- Provide reasonable assurance on internal controls over financial reporting and internal controls over operations.

GAO and OIG Audit Liaison:

- Coordinate the Department’s engagement in Government Accountability Office (GAO) and Office of the Inspector General (OIG) audits; including entrance and exit conferences, and the Department’s response to audit reports and findings;
- Track the Department’s implementation of audit recommendations; and
- Provide oversight and guidance to Component-level GAO and OIG audit liaison offices and to DHS employees involved in audits, investigations, and inspections.

Resource Management Transformation:

- Provide guidance, training, integration assistance, and implementation of the new eTravel system (ETS2) for DHS;
- Provide guidance for and oversee Financial Systems Modernization (FSM) efforts in conjunction with the Financial Management (FM) Division; and
- Oversee and develop business intelligence activities and capabilities including developing executive reporting capabilities and implementing tracking databases.

Workforce Development:

- Provide the training and tools to support individual staff performance and career path development, and execute talent management initiatives to recruit the next generation of financial management leaders;
- Provide experiences and opportunities designed to establish a strong foundation in financial management disciplines to optimize career building at DHS; and
- Create a pipeline of strong candidates for senior financial management leadership roles at DHS.

MAJOR ACQUISITIONS

Financial Systems Modernization

To address legacy financial management system inadequacies, DHS launched the Financial Systems Modernization (FSM) initiative in 2011 to modernize financial management systems at Components. DHS is improving core financial functions for Components with the greatest need through financial management systems modernization, and expanding business intelligence capabilities to deliver DHS-wide financial data and accelerate and strengthen decision making.

DHS must invest in modernizing financial management systems in order to improve financial accountability and financial reporting. The FSM initiative follows DHS Directives, OMB guidance, and processes developed by Treasury’s Office of Financial Innovation and Transformation.

Funding is requested by OCFO on behalf of DHS Components to support requirements related to FSM initiatives. FSM initiatives are proposed to be funded out of a single PPA in FY 2016, as follows:

- PPA OCFO: \$42,977 million

FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Funding (\$\$\$ thousands)	FY 2016 Activity Request (\$\$\$ thousands)
\$29,548	\$45,370	\$42,977

FY 2016 FSM Funding Breakout:

Program Area (Funding in \$\$\$ thousands)	Mission Need
Component FSM (\$36,647)	<ul style="list-style-type: none"> • United States Coast Guard will continue migration efforts to a Federal Shared Service Provider. • Transportation Security Administration will continue migration efforts to a Federal Shared Service Provider. • Domestic Nuclear Detection Office will continue migration efforts to a Federal Shared Service Provider. • Science & Technology will continue migration efforts to a Federal Shared Service Provider. • Departmental Management & Operations will continue migration efforts to a Federal Shared Service Provider. • National Protection & Programs Directorate will continue migration efforts to a Federal Shared Service Provider. • Support other Component FSM programs.
FSM Quality Assurance and Oversight (\$4,000)	<ul style="list-style-type: none"> • Provide subject matter experts to support the day to day oversight and governance of the FSM programs. • Reduce risk and ensure data is cleansed and ready for migration to service provider. • Quality assurance oversight to ensure best practices are adhered to for FSM programs.
Business Intelligence (\$2,330)	<ul style="list-style-type: none"> • Expansion of business intelligence and analytics tools.

Justification of Program Changes**
(Dollars in Thousands)

Program Increase 1: Cost Analysis Division
PPA: Office of the Chief Financial Officer
Program Increase: Positions 4, FTE 2, Dollars \$444

Funding Profile

	FY 2014 Revised Enacted			FY 2015 President's Budget			FY 2016 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							10	10	\$3,619
Program Increase							4	2	\$444
Total Request	0	0	\$0	0	0	\$0	14	12	\$4,063

Description of Item

The Cost Analysis Division (CAD) is an independent cost analysis team that provides subject matter expert support directly to DHS Component Acquisition Executives (CAEs), provides acquisition oversight and DHS policy on all matters related to cost estimating and analysis, and is building a future DHS Independent Cost Estimating (ICE) capability. This budget proposes realignment of funding to the Office of the Chief Financial Officer (OCFO) from the Office of the Chief Procurement Officer to focus efforts on enhancing the credibility of Program Life Cycle Cost Estimates (LCCEs), developing ICEs and assessing affordability for major acquisitions.

CAD personnel perform the following for OCFO:

- Advises the Undersecretary for Management (USM), the Chief Financial Officer (CFO), and Component Acquisition Executives on cost estimating and analysis issues.
- Leads the Department in cost estimating and analysis policy, policy implementation, and guidance.
- Reviews, analyzes, and evaluates Program LCCEs and ensures the cost of DHS programs are presented to the Acquisition Decision Authority and CFO accurately and completely to support acquisition and resource decisions.
- Advises the Homeland Security Acquisition Institute (HSAI) on career field certification, training, and education for the cost estimating and analysis community.

Justification

As part of CAD's realignment to the OCFO, the Department requests funding for an additional four positions to bring the total number of positions to fourteen. The new positions will focus on addressing the Division's additional responsibilities of developing Independent Cost Estimates and Assessments as described below:

- Initiate the development of an ICE team. The additional positions will develop one or two ICEs per year to provide timely, unbiased, accurate and realistic estimates of cost for making acquisition and resource decisions. The development of which is a best practice as outlined by GAO and executed by other Government offices such as the Department of Defense (DoD) and National Intelligence agencies.
- Enhance the existing knowledge base of DHS specific cost data for future estimating through the development of ICEs.

This proposal directly addresses GAO recommendations documented in the GAO Audit 12-629 "Cost Estimation: Agencies Need to Address Significant Weaknesses in Policies and Practices and gives DHS the ability to respond directly to OMB without having to go to external agencies, such as DoD, to conduct independent analysis."

Impact on Performance

Funding this proposal enables DHS to address the valid concerns of the GAO and provides the DHS CFO with the underlying capability to more accurately estimate the cost of major acquisition programs thereby supporting the management of the integrated investment life cycle with analytically based decisions. (DHS Mission: Mature and Strengthen Homeland Security Strategic Goal 6).

Program Increase							0	0	\$42,977
Total Request	0	0	\$29,548	0	0	\$45,370	0	0	\$42,977

Description of Item

OCFO requests, on behalf of DHS Components, funding to support requirements related to Component migrations to new financial systems. DHS must invest in modernizing Component financial management systems in order to improve financial accountability and financial reporting, mitigate financial risk, and enable business processes standardization.

FY 2016 Funding Breakout	(\$K)
Component	
USCG	\$2,931
TSA	\$7,224
DNDO	\$3,814
S&T	\$3,941
MGMT	\$2,923
NPPD	\$15,776
CFO FSM (Other)	
FSM Support Contract	\$1,900
HQ Requirement (QA)	\$1,100
Data Cleanup	\$1,000
Business Intelligence Solution (CFO Horizon)	\$2,330
FY17 Carryover	\$38
FY16 Total for FSM	\$42,977

Justification

Funds will be used for a number of items including the Domestic Nuclear Detection Office (DNDO), Transportation Security Administration (TSA) and United States Coast Guard (USCG) financial system modernization initiatives.

Additionally, funding is requested for the Science and Technology Directorate (S&T), US Citizenship and Immigration Services (USCIS) National Protections and Programs Directorate (NPPD), and Departmental Management Operations (DMO) to begin transition to a financial management solution that eliminates operational constraints, fills existing mission gaps, complies with federal requirements and guidelines, and provides a fully automated, integrated, streamlined, and reliable core financial system.

Funds will be used for base requirements development, configuration and design work, data migration and conversion, the first year of software licenses, basic organizational change management and training, user acceptance testing, and quality assurance and contractor support.

This funding will allow DHS to support the migration of these Components to a financial system that will address areas such as systematic internal control weaknesses, audit readiness/sustainability and improve the Department's ability to effectively and efficiently process and report financial data. DHS considers the FSM initiative a high priority and all stakeholders are committed to its success. DHS actions are ongoing and include:

- Establishing governance and senior level sponsorship at DHS Headquarters;
- Working with Treasury's Office of Financial Innovation and Transformation to address financial systems needs for each DHS Component;
- Working with Components to draft key documents, such as Alternatives Analyses, for their financial systems modernization initiative;
- Working with Components as they complete a Discovery phase with a Federal shared service provider;
- Providing governance and support to Components as they migrate to their selected FSM solution;
- Ensuring Components implement the new DHS Accounting Classification Structure as they modernize systems in order to standardize data across the Department;
- Coordinating FSM efforts across DHS lines of business; and
- Enhancing business intelligence to support management decisions.

Impact on Performance

Modernization of the DHS financial systems is critical to sustaining progress towards maturing financial management at DHS and maintaining a clean audit opinion. By closing capability gaps, DHS will be able to better manage its resources, provide Department-level information more quickly in order to support critical decision making, reduce costs by modernizing financial systems, promote

good business practices through the standardization of processes and data where possible, and to allow DNDO, TSA, USCG, S&T, USCIS, NPPD, and DMO to focus on their core missions.

V. Exhibits and Other Supporting Material

A. Justification of Proposed Legislative Language

For necessary expenses for enforcement of the Office of the Chief Financial Officer as authorized by section 103 of the Homeland Security Act of 2002 (6 U.S.C. 113) [~~\$94,626,000~~ **53,798,000**¹: Provided, That the Secretary of Homeland Security shall submit to the Committees on Appropriations of the Senate and the House of Representatives at the time the President’s budget proposal for fiscal year [2016] **2017**² is submitted pursuant to section 1105(a) of title 31, United States Code, the Future Years Homeland Security Program, as authorized by section 874 of Public Law 107-296 (6 U.S.C. 454).

General Provision: Sec. 545 (a) For an additional amount for Financial Systems Modernization, [45,370,000] **\$42,977,000, to remain available until September 30, 2017.**³ (b) Funds made available in subsection (a) for Financial Systems Modernization may be transferred by the Secretary of Homeland Security between appropriations for the same purpose, notwithstanding section 503 of this Act. (c) No transfer described in subsection (b) shall occur until 15 days after the Committees on Appropriations of the Senate and the House of Representatives are notified of such transfer.

Language Provision	Explanation
¹ ...[\$94,626,000] <u>53,798,000</u>	Dollar change only. No substantial change proposed. Amount reflects only the non-FSM portions of the OCFO request.
² ...[2016] <u>2017</u> ...	Date change
³ General Provision: ...[45,370,000] <u>\$42,977,000, to remain available until September 30, 2017</u>	This general provision would provide the authority to transfer funds between appropriations subsequent to Congressional notification, notwithstanding Sec. 503 limitations. Given the complexity of such multi-component efforts, this provision will allow CFO to ensure that appropriated funds are optimally allocated in the year of execution to most effectively further the goals of the program. Language reflects dollar change amount for the FSM portion of the OCFO Request as well as a request for two-year funding.

Office of the Chief Financial Officer Mission Statement

The mission of the Office of the Chief Financial Officer (OCFO) is to provide guidance and oversight of the Department's budget, financial management, investment review, and resource management systems to ensure funds necessary to carry out the Department's missions are obtained, allocated, and expended in accordance with the Department's priorities and relevant law and policies.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
11.1 Full-time Permanent	\$22,086	\$24,404	\$27,972	\$3,568
11.3 Other than Full-Time Permanent	\$1,007	\$1,017	\$1,017	-
11.5 Other Personnel Compensation	\$348	\$351	\$351	-
12.1 Civilian Personnel Benefits	\$6,789	\$7,571	\$8,615	\$1,044
Total, Salaries & Benefits	\$30,230	\$33,343	\$37,955	\$4,612

The OCFO requests \$37,955,000 to fund the salaries and benefit costs for 228 FTEs. This is an increase of \$4,612,000 from the FY2015 request and includes the transfer of 10 FTE from the Office of the Chief Procurement Officer (Cost Analysis Division), 1 FTE from EXEC for Efficiency Review Functions, 4 FTP/2 FTE for the initiation of the cost estimator intern program, the annualization of the 2015 pay increase, and the 2016 pay increase, a reduction of 1 FTE for Headquarters Efficiency vacancies, and projected savings from Headquarters Efficiencies VERA/VSIP acceptance.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
23.1 Rental Payments to GSA	\$2,876	\$2,795	\$2,387	(\$408)

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The decrease of \$408,000 is due to the consolidation of space.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.1 Advisory and Assistance Services	\$32,685	\$48,616	\$46,631	(\$1,985)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The reduction of \$1,985,000 is due to the Financial Systems Modernization program change.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.3 Other Goods and Services from Federal Sources	\$8,814	\$8,929	\$8,859	(\$70)

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2016 request includes a net decrease of \$70,000 due to Headquarters Efficiencies for parking and cellular wireless. This amount also includes the \$2,000 transfer to OCIO for Data Center Support costs.

BUDGET REQUEST AND SUPPORTING INFORMATION

Departmental Management and Operations Office of the Chief Information Officer

I. Appropriation Overview

A. Mission Statement for Office of the Chief Information Officer:

The Department of Homeland Security (DHS) Office of the Chief Information Officer (OCIO), in collaboration with the DHS Chief Information Officer Council, is responsible for implementing the programs necessary to align DHS's Information Technology (IT) personnel, resources, and assets, including all systems and infrastructure, to support Department-wide missions and activities. OCIO's mission is to provide DHS and its partners with the IT services required to lead a unified national effort to prevent and deter terrorist attacks as well as protect against and respond to threats and hazards.

The Department's goals and priorities require IT capabilities and services to:

- Establish secure IT services and capabilities to protect the Homeland and enhance our Nation's preparedness, mitigation, and recovery capabilities;
- Strengthen and unify the Department's ability to share information and services internally and with Federal, State, local, tribal, international, and private industry partners;
- Improve IT service and program performance, transparency, accountability, and efficiencies through effective governance and enterprise architecture (EA); and
- Develop and implement a comprehensive approach to IT employee recruitment, development, retention, and recognition to ensure that the right personnel and skill sets are in place to achieve Department-wide excellence in IT delivery.

These goals directly align to the Office of Management and Budget's (OMB) *25 Point Implementation Plan to Reform Federal Information Technology Management*. Specifically, the DHS CIO is committed to implementing modular system development, improving performance on IT programs, implementing a "Cloud First" policy, and reducing the number of data centers. OCIO is driving consolidation of commodity IT, in particular IT infrastructure.

Per OMB memorandum M-11-29, *Chief Information Officer Authorities*, the role of Agency CIOs is changing from policymaking and infrastructure maintenance to managing by portfolio to deliver enterprise-wide IT solutions. The OCIO has implemented OMB's PortfolioStat process to identify opportunities to eliminate duplication, consolidate the acquisition and management of commodity IT services, and increase the use of shared-service delivery models. The CIO is also responsible for implementing an enterprise information security program to protect sensitive mission data through continuous monitoring of DHS networks, and developing an enhanced risk assessment process.

DHS continues the OMB TechStat review process for troubled IT programs and has implemented the process at the Component level. This process has improved the transparency of

program health across the Department and is focused on identifying program risks and failures and taking corrective action in alignment with the tenets of IT reform.

To achieve its mission, OCIO is committed to recruiting talented, capable IT program managers that are held accountable for the performance of IT programs.

B. Budget Activities:

OCIO activity functions are divided into four Programs, Projects, and Activities (PPAs):

- Salaries and Expenses
- Information Technology Services
- Infrastructure and Security Activities
- Homeland Secure Data Network

C. Budget Request Summary:

DHS requests \$320,596,000, and 398 full-time positions (FTP)/382 full-time equivalents (FTE) for the CIO. The total Adjustments-to-Base include an increase of \$24,561,000, and 49 FTP/FTE from the FY 2015 President's Budget. Program Changes total \$39,692,000, and 59 FTP/43 FTE above the FY 2015 President's Budget.

II. Summary of FY 2016 Budget Estimates by Program/Project Activity (PPA)

III. Current Services Program Description by PPA

Department of Homeland Security
Departmental Management and Operations
Office of the Chief Information Officer (CIO)
Salaries and expenses
Program Performance Justification
(Dollars in Thousands)

PPA: Salaries and expenses

	<u>Perm. Pos.</u>	<u>FTE</u>	<u>Amount</u>
FY 2014 Revised Enacted	274	274	\$115,000
FY 2015 President's Budget	290	290	\$95,444
2016 Adjustments-to-Base	49	49	\$8,998
FY 2016 Current Services	339	339	\$104,442
FY 2016 Program Change	9	5	\$865
FY 2016 Total Request	348	344	\$105,307
Total Change 2015 to 2016	58	54	\$9,863

The OCIO requests \$105.307 million for this activity. This is an increase of 58 FTP/54 FTE and \$9.863 million from the FY 2015 President’s Budget.

The Adjustments-to-Base are as follows:

- Increase of 25 FTP/FTE and \$3.950 million for the transfer of Homeland Security Information Network (HSIN) and Common Operating Picture (COP) from the Office of Operations Coordination and Planning (OPS) to OCIO.
- Increase of \$3.149 million for the transfer of Data Center operations and maintenance support costs from various DHS Components to OCIO.
- Increase of 27 FTP/FTE for the realignment of Data Center support personnel to OCIO appropriation versus reimbursable.
- Increase of \$0.517 million for the 2016 pay raise.
- Increase of \$0.132 million for the annualization of the 2015 pay raise.
- Increase of \$0.202 million for the retirement contribution increase.
- Increase of \$3.276 million for the pay increase for Cybersecurity Professionals.
- Decrease of \$1.519 million and 3 FTP/FTE for HQ Efficiencies for Vacancies and for Voluntary Early Retirement Authority (VERA)/ Voluntary Separation Incentive Program (VSIP).
- Decrease of \$0.499 million for HQ Efficiencies for Commercial Parking Subsidy and Cellular Wireless Savings.
- Realignment of \$0.050 million from the S&E PPA to Information Technology Services (ITS) PPA for Office of Accessible Systems and Technology (OAST).
- Realignment of \$0.160 million from the S&E PPA to ITS PPA for Records, Forms, and

Printing.

The Program Changes are as follows:

- Increase of 2 FTP/1 FTE and \$0.177 million for Enterprise Implementation of Single Sign-On.
- Increase of 7 FTP/4 FTE and \$0.688 million for DHS Data Framework.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Salaries and Expenses PPA provides funds for the Infrastructure Operations (IO) program in addition to salaries and benefits, shared services, and payments to the DHS Working Capital Fund (WCF). Salaries and Expenses is a crosscutting program that provides executive leadership, technology management, and acquisition and financial support functions to all offices within the OCIO. It covers payments for most WCF services, such as rent, mail services, contracting support, and financial management support received from other management lines of business. Funding for the Secretary's executive travel team which provides DHS leadership with secure telecommunications capabilities, is also included within Salaries and Expenses.

Data Center Support Costs

Data Center operations and maintenance support costs currently paid to OCIO by Components via Inter-Agency Agreements (IAA) will be transferred to the Office of the Chief Information Officer appropriation in FY 2016.

OCIO is in the process of shifting data center consolidation efforts to capitalize on evolving Cloud-based technologies. By re-negotiating current data center contracts, OCIO endeavors to allow direct ordering by DHS Components and reduce overall costs and footprint. Based on this new model, funding for Component data centers will no longer be collected by OCIO, but OCIO must still pay for certain support costs including network security software and Federal data center support personnel.

For greater financial and procurement efficiency, data center support funding will be directly appropriated to the OCIO budget, as opposed to Component budgets. The funding will be transferred from Component budgets based on their respective share of total enterprise data center collections. The FTE costs are divided by Component application as a percentage of overall data center occupancy. Of the proposed \$5.030 million transfer to CIO, \$3.149 million will be placed in the Salaries and Expenses PPA and \$1.881 million will be in the Information Technology Services PPA. A breakout of the proposed transfer amounts is shown below. As USCIS is fee funded, they will continue to pay for these services via IAAs and are not shown below.

Component	Transfer Amount (\$K)
Domestic Nuclear Detection Office	\$ 31
Federal Emergency Management Agency	\$ 177
Federal Law Enforcement Training Center	\$ 7
MGMT - Chief Financial Officer	\$ 2
MGMT - Chief Procurement Officer	\$ 15
MGMT- Office of Security	\$ 11
MGMT - Chief Readiness Support Officer	\$ 5
National Protection and Programs Directorate	\$ 303
Office of Health Affairs	\$ 2
Office of Policy	\$ 3
Office of the Inspector General	\$ 12
Analysis & Operations	\$ 42
Science & Technology Directorate	\$ 17
Transportation Security Administration	\$ 409
U.S. Customs and Border Protection	\$ 473
U.S. Immigration and Customs Enforcement	\$ 996
U.S VISIT/Office of Biometric Identity Management	\$ 2,525
Grand Total	\$ 5,030

Infrastructure Operations

IO includes initiatives for IT security and continuity operations, providing alternate sites with necessary IT communications capabilities to support emergency operations during periods of activation by the President or the DHS Secretary for Continuity of Operations (COOP).

In accordance with *Presidential Decision Directive 67*, *Federal Continuity Directive 1 (FCD1)*, and *Homeland Security Presidential Directive (HSPD)-20: National Continuity Policy*, Federal agencies are mandated to develop COOP plans. A COOP facilitates the performance of, and is crucial to, the business continuity of the Department's critical systems. A COOP functions during an emergency or any other situation that may disrupt normal operation. As such, IT is a critical element of business continuity.

It is critical that DHS and its Components ensure information residing, created, received, transmitted within, and shared by the Department is secured in a manner compliant with Federal Acts, Memorandums, Circulars, Executive Orders, and Presidential Directives. OCIO has a leadership role in meeting legislative requirements and Executive directives regarding information security and using best practices to ensure the viability of systems supporting DHS business missions. OCIO is also responsible for ensuring systems and accompanying security controls and measures are functional and active, which is accomplished through use of security software residing on the DHS network.

**Department of Homeland Security
 Departmental Management and Operations
 Office of the Chief Information Officer (CIO)
 Information technology services
 Program Performance Justification
 (Dollars in Thousands)**

PPA: Information technology services

	<u>Perm. Pos.</u>	<u>FTE</u>	<u>Amount</u>
FY 2014 Revised Enacted	-	-	\$34,000
FY 2015 President's Budget	-	-	\$38,627
2016 Adjustments-to-Base	-	-	\$32,728
FY 2016 Current Services	-	-	\$71,355
FY 2016 Program Change	50	38	\$34,915
FY 2016 Total Request	50	38	\$106,270
Total Change 2015 to 2016	50	38	\$67,643

The OCIO requests \$106.270 million and 50 FTP/38 FTE in FY 2016 for Information Technology Services (ITS). This is an increase of \$67.643 million and 50 FTP/38 FTE from the FY 2015 President's Budget.

The Adjustments-to-Base are as follows:

- Transfer of \$28.672 million from Office of Operations Coordination and Planning (OPS) to OCIO for Homeland Security Information Network (HSIN)/Common Operating Picture (COP).
- Realignment of \$0.050 million to the ITS PPA from the S&E PPA for Office of Accessible Systems and Technology (OAST).
- Realignment of \$0.160 million to the ITS PPA from S&E PPA for Records, Forms, and Printing.
- Realignment of \$3.846 million to the ITS PPA from the ISA PPA for the Information Sharing Environment Office.

The Program Changes are as follows:

- Increase of \$16.012 million for Enterprise Implementation of Single Sign-On.
- Increase of \$6.366 million for DHS Data Framework.
- Increase of \$0.779 million for Single Sign-On at Fusion Centers.
- Increase of \$1.758 million for Trusted Tester.
- Increase of \$10.0 million and 50 FTP/38 FTE and for Digital Services Team.

CURRENT SERVICES PROGRAM DESCRIPTION:

Information Technology Services supports development, implementation, and maintenance of IT functional services, including enterprise architecture, enterprise data management, information sharing, IT strategic policy and planning, performance measurement, capital planning and investment control (CPIC), and program/portfolio management. It also covers geospatial technologies, application delivery, enterprise hosting, and portal consolidation. ITS also includes the OAST, which provides guidance and oversight to all DHS Components on implementing and maintaining initiatives to ensure electronic and technological information is accessible to DHS employees and customers with disabilities.

The ITS PPA provides funding for the following ten programs and one office:

Enterprise Architecture

Enterprise Architecture (EA) provides a "blueprint" for systematically defining DHS's baseline IT environment, target environment, and transition plan for implementing mission-critical capabilities. The program establishes a Department-wide roadmap to improve mission effectiveness and efficiency, eliminate existing stove-piped systems, and increase system interoperability and information sharing. EA ensures the essential evolution of information systems and the development of a common IT environment.

Enterprise Data Management

The Enterprise Data Management Program provides the architectural guidance and governance for utilization of Departmental data assets. The Enterprise Data Management Office (EDMO) establishes the guidance and provides oversight for DHS data policy, data management, and data stewardship efforts. EDMO participates in efforts to investigate and identify new opportunities for managing and delivering mission-required data more effectively and efficiently. The program supports the development of the Department-wide roadmap for identifying trusted and reliable data to eliminate existing stovepipe data systems, and increases data systems interoperability and information sharing. Data architecture is the key governance tool to ensure mission needs drive technology investments. Through the use of data architecture practices and the Federal Enterprise Architecture Data Reference Model, EDMO expects to recommend realignment of key IT investments and acquisitions that will reduce maintenance costs of existing systems and drive common requirements for development of centralized services.

EDMO initiated development of cost models to identify the value of data management efforts. To date, models have been developed for several different Component areas, the Component Enterprise and Data Architecture team, data quality efforts for system modernization, and a back office business report generation team in order to identify the value of these programs. This effort is continuing to work on cost models for several other data and architecture efforts.

EDMO holds the primary responsibility for the adoption, training, and implementation of the National Information Exchange Model (NIEM) within the Department. A national program supported by the Federal government, NIEM connects communities of people who share a common need to exchange information in order to advance their missions. The NIEM model is applied to support the development and dissemination of enterprise-wide information exchange standards and processes.

These standards and processes enable Federal, State, local and tribal jurisdictions to share critical information effectively in emergency situations and support the daily operations of agencies throughout the nation. NIEM enables information reuse, management of information as an enterprise asset, and information sharing.

Information Sharing Environment Office

Section 1016 of the Intelligence Reform and Terrorism Prevention Act (IRPTA) directs the President to create an information sharing environment (ISE) that provides and facilitates terrorism information across the entire homeland security enterprise while protecting privacy rights and civil liberties. The OCIO's Information Sharing Environment Office (ISEO) is the Department's trusted vanguard for building and enabling the ISE. It bridges the gap between mission-business requirements and the information technology that supports operational success. ISEO achieves this mission through two major enterprise service offerings. First, provides management and oversight for the delivery of the trusted platform for Sensitive but Unclassified (SBU) collaboration and situational awareness called the Homeland Security Information Network (HSIN), and the growing and maturing platform for data and information integration between the SBU and classified arenas called the DHS Data Framework. Second, it enables the ISE through identity and access services provided by the Identity, Credentials and Access Program Management Office, and information exchange services through the National Information Exchange Model Program Management Office. ISEO supports these two major service areas by also ensuring the Department's alignment with and implementation of national and Departmental strategy for information sharing and safeguarding, developing and advancing new information sharing policies and procedures, advancing adoption of the Department's common, enterprise architecture and services for information sharing, and engaging with DHS components and state, local, territorial, tribal and private sector stakeholders to implement and take part in information sharing system governance bodies.

Homeland Security Information Network (HSIN)/Common Operating Picture (COP)

DHS is requesting that the HSIN and COP programs (\$32.6 million; 25 FTE) transfer from the Office of Operations Coordination and Planning (OPS) to OCIO. OCIO has been providing the leadership and oversight of the HSIN and COP programs since July 2010 under a Memorandum of Agreement between the Director of OPS and the Chief Information Officer. In that time period, OCIO led the OMB-mandated HSIN improvement plan, including technology refresh for new the HSIN platform and migrated ~50,000 federal and non-federal users and over one terabyte of content. Simultaneous with technology refresh, the program consolidated eight similar portals and revamped operational field support of over 20 staff and overhauled communications strategy resulting in positive opinions of the program by major state and local organizations. OCIO is best suited to manage the resources for this program, under the guidance of the HSIN Executive Steering Committee (ESC) co-chaired by senior executives from Intelligence and Analysis (I&A) and OPS, with representation from all DHS Components with significant mission uses of HSIN.

The mission of HSIN is to provide stakeholders across the Homeland Security Enterprise with effective and efficient collaboration for decision making, tiered secure access to data, and accurate, timely information sharing and situational awareness. HSIN is a user-driven, web-based, information sharing platform that connects all homeland security mission partners consisting of DHS and its Federal, State, local, territorial, tribal, international, and private sector partners within a wide spectrum of homeland security mission areas. HSIN capabilities are developed based on requirements gathered

from DHS components and from State and local users—and are reflected in regular product improvement releases.

The DHS COP provides the ability to deliver enhanced Situational Awareness to the Federal, State and local homeland security partners in the event of a natural disaster, act of terrorism, or other man-made disaster per legal authorities and other applicable laws, directives, and legislative policy. The DHS COP includes a broad set of capabilities for the collection, sharing, and displaying of multi-dimensional information that facilitates collaborative planning and responses to threats and hazards to the nation. Core capabilities include role-based access, incident management, data ingest and triage, alerts and notifications, Requests for Information, and map visualization. The DHS COP, managed by the Geospatial Information Office (GIO), is built based on a services-oriented architecture allowing it to leverage existing Homeland Security investments and enterprise-class capabilities across the Federal government. The DHS COP supports decision-makers such as the White House, DHS Secretary and Deputy Secretary, DHS operations leadership, as well as other key leadership at the Federal, State, local, and tribal levels.

Geospatial Management (GIO)

The GIO serves as the central point of coordination for the alignment and integration of geospatial investments across the Department by providing oversight and guidance to DHS Components for geospatial policy and technology matters. The GIO executes a comprehensive program that enables the effective, collaborative, and integrated application of geospatial capabilities (e.g., infrastructure, software, data, and services). This provides DHS stakeholders the ability to integrate, analyze and visualize specific mission data from a mapping perspective. Such capabilities leverage base geographic data, mission specific data/infrastructure, satellite imagery, geo-coding services, and geo-analytical tools. DHS requires coordinated and, in some cases, consolidated enterprise geospatial solutions for emergency management, intelligence and operations, law enforcement, and other DHS mission objectives to ensure efficient and cost-effective shared usage of geospatial assets. The GIO provides the operational design, development and deployment of the DHS Common Operating Picture and Request for Information capabilities for situational awareness on behalf of Component mission requirements. GIO is a leader in the Program Manager-Information Sharing Environment's (PM-ISE) initiatives to develop the Identity and Access Management (IdAM) Reference Architecture and Geospatial Interoperability Reference Architecture for government-wide alignment to maximize geospatial information sharing and drive cost efficiencies. The GIO serves on the executive committee of the Federal Geographic Data Committee (FGDC) to provide leadership in developing national geospatial data policy, practice, and investment strategies in support of OMB Circular A-16 and presidential directives.

Identity, Credential, and Access Management

The Identity, Credential, and Access Management (ICAM) program funds the DHS ICAM Program Management Office (PMO). The ICAM PMO provides enterprise-level coordination and planning to enable the implementation of target state ICAM processes, policies (e.g., OMB Memorandum (M) 11-11), and technologies including implementing the use of the Smartcard required by Homeland Security Presidential Directive 12 (HSPD-12) for access to IT networks, systems, and applications; Public Key Infrastructure (PKI); Single Sign-on; and fine-grained access control in support of the DHS information sharing environment. The ICAM PMO is chartered to serve as the Departmental focal point for Federal policy, standards, and implementation guidance relating to ICAM. The ICAM PMO

delivers Department-wide leadership and continuity by combining essential coordination between Components, leveraging existing ICAM investments, justifying and providing acquisition oversight for new ICAM investments. The ICAM PMO has developed a business case, architecture and transition strategy needed to establish enterprise single sign-on and the identity attribute hub capabilities starting in FY 2015.

The ICAM program’s purpose is to ensure that access to DHS facilities, systems, and applications is provided to departmental staff, contractors, partners, and valid users. Through appropriate identity verification, only authenticated and authorized people will gain access to systems and facilities. This preserves privacy rights and civil liberties. Secondly, the ICAM Program improves secure information sharing by restricting access to personnel with approved attributes or roles. Increased sharing occurs because the information owner has a high degree of trust that users with access have been vetted and are acting in their official capacities.

For HSPD-12, the role of the ICAM PMO is to satisfy the “IT” requirements of the HSPD-12 mandate, which is separate and apart from the OCSO-managed Program for Personal Identity Verification (PIV) card issuance.

Funding addresses enterprise-wide requirements to meet the mandates of the OMB M-11-11 (DHS mandatory PIV network authentication) designed to improve the DHS cybersecurity posture by implementing mandatory use of the PIV Smartcard to authenticate to DHS networks across all components. Implementing enterprise services provide efficiencies across DHS for ensuring consistency in implementation via centralize oversight which in turn establishes technology standards to address the requirements of interoperability, interface, and integration with Component level efforts.

Major Acquisition

ICAM is funded through multiple appropriations in DHS for FY 2016 in the amount of \$21.989 million:

- DHS OCIO (\$19.815M)
- CBP (\$2.0M)
- FEMA (\$0.174M)

FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Funding (\$\$\$ thousands)	FY 2016 Activity Request (\$\$\$ thousands)
\$25,165	\$27,722	\$21,989

FY 2016 ICAM Funding Breakout:

Program Area (Funding in \$\$\$ thousands)	Sub-Program	Mission Need
ICAM PMO Program and Engineering Support (\$3,076)	ICAM PMO Support	Provide program/project management and engineering support
Single Sign-On and Trusted Identity Exchange (\$16,189)	Enterprise Support Services	Initial Operating Capability (IOC) for DHS Single Sign-on and Trusted Identity Exchange
Federal PKI Services (\$175)	Federal PKI Management Authority	PKI Federal Bridge – to continue use of PIV certificate
DHS PKI Services (\$375)	DHS PKI Management Authority	DHS PKI management services and Enterprise PKI Validation Services
Component Contributions (\$2,174)	Component ICAM: CBP (\$2.0M) FEMA (\$0.174)	Component level ICAM efforts

* Funding profile includes OCIO appropriated funds as well as DHS Component ICAM budgets.

Applications Operations & Maintenance

The Applications Operations & Maintenance (AO&M) Program maintains and oversees the Department’s Private Cloud and enterprise services, which directly support OMB’s *25 Point Implementation Plan to Reform Federal Information Technology Management*. These services include the development, test, and production environments within both of the DHS enterprise data centers (EDCs) to support secure enterprise application services. The AO&M Program provides ongoing O&M of enterprise application services such as Enterprise Correspondence Tracking, Collaboration service such as Project Server as a Service (PSaaS), Workplace as a Service (WPaaS), and Case and Relationship Management as a Service (CRMaaS) for Headquarters and Components. This funding is also used to provide quality management and security functions to ensure the Enterprise Service Development Office (ESDO) deployed services meet Federal standards and IT best practices. Additionally, this funding provides enterprise authentication services to all Components allowing for enhanced DHS security posture and customer service capabilities for single sign-on and access to over 100 DHS applications. AO&M also provides support via the Project Management and Cloud Support Division for five private cloud services that will modernize and enhance our ability to share information and deliver technology to focus more on mission needs and less on support functions. This function provides change management, release and configuration control management, resolving systemic issues with the service and other support activities related to cloud services.

Records Management and Printing

Under the Federal Records Act, DHS is mandated to properly preserve and protect agency records and establish an agency records management program. The Department has established the DHS Records Leadership Council to assist the CIO in managing, overseeing and advising on the Department’s records management policies, procedures, and operational effectiveness. The records program is leading the collaboration with Information Governance coalescing records, Freedom of Information

Act Collection, and eDiscovery collection. The records program works closely with the Office of the Chief Privacy Officer and Office of General Counsel to develop a department-wide solution in meeting the information governance challenge.

The Department consolidated fragmented printing services into a single Service Level Agreement with the Customs and Border Protection to process and provide all printing services for DHS Headquarters. This consolidation improved the Department's ability to provide quality and timely printing materials for DHS mission activities related to law enforcement, cyber security, science and technology, national protection and infrastructure and several other direct mission areas

Enterprise Application Delivery

Enterprise Application Delivery (EAD) supports the Department's aggressive move to a Cloud-based, on-demand set of service offerings as part of government-wide Data Center Migration and Cloud First strategies. The benefits of adopting Cloud-type architectures include, but are not limited to a reduction in the time-to-market for new capabilities, increased efficiencies by reusing existing capabilities (e.g., platforms, code), enhanced adoption of green technologies, and streamlined governance requirements. EAD leads the transformation through innovation by planning and delivering secure, high-quality enterprise application services for DHS customers as part of the DHS Private and Public Cloud initiatives. The request ensures identified DHS CIO High Priority Initiatives are executed by establishing robust Cloud services which meet business requirements and by deploying a Department-wide service catalog to enhance the consumer experience for DHS services. These efforts are executed by the DHS Applications Services Council, consisting of DHS Component CIO representatives, who establish capabilities and service-level agreements required to achieve Cloud services. EAD funding also supports the development and deployment of the DHS mobile development environment within the Enterprise Data Centers. The mobile development environment directly supports the White House Digital Strategy.

Program Management Support

The OCIO Enterprise Business Management Office (EBMO) provides program management support services to the OCIO, DHS management, and Component programs to maximize DHS IT program productivity. EBMO's program management support provides Departmental IT strategic planning, performance measurement, resource management and analysis, enterprise portfolio governance, program governance oversight, acquisition review assistance, policy and compliance, and IT Requirements Engineering Center of Excellence support services. The office is currently standing up Department-wide Executive Steering Committees to further enhance program governance of major IT investments. The ESCs are decision-making bodies that provide oversight and collaboration for respective programs. The ESCs membership consists of Senior Executive Leadership across the Department to ensure cross-functional participation. The ESCs roll up to one of the Department's Portfolio Governance Boards.

EBMO provides Capital Planning and Investment Control support to all Components to ensure effective resource allocation across the Department's IT investment portfolios. EBMO is responsible for conducting annual IT Portfolio Reviews, conducting program assessments and updating the Federal IT Dashboard with monthly cost, schedule and performance data, gathering information for and presenting DHS-led TechStats, providing best practices and guidance to programs as Centers of

Excellence, submitting annual OMB Exhibit 300s and Exhibit 53s, and conducting Privacy Act initiatives.

Under the OCIO EBMO, the Electronic Government (e-Gov) Program coordinates DHS participation in crosscutting, government-wide programs. Under the e-Gov umbrella, the Department manages or participates in 20 e-Gov initiatives and lines of business (LoBs) such as eRulemaking, Grants Management, Financial Management, and Budget Formulation and Execution. These initiatives / LoBs drive continuous progress and improvement using internet-based technologies, which enable citizens and businesses to interact with the Federal Government more easily, increases public participation, and saves taxpayer dollars. The EBMO e-Gov team works with OMB, other Federal Agencies (e-Gov Initiative Managing Partners), and various other internal and external stakeholders to ensure the Department remains compliant with federal e-Gov policies and mandates. The e-Gov Program also includes the Open Government Directive to support the government's commitment to increase transparency of data, expand participation of the public, and improve cross-government collaboration through systems and Web sites such as USA.gov, USAspending.gov, Data.gov, and the Federal IT Dashboard.

The Office of Accessible Systems & Technology

The Office of Accessible Systems & Technology (OAST) is dedicated to guiding and supporting all DHS Components in removing barriers to information access and employment of qualified individuals with disabilities in accord with Section 508 of the Rehabilitation Act requirements. OAST strives to ensure that electronic and information technology procured, developed, maintained, or used is accessible to DHS employees and customers with disabilities through a range of policy, training, technical assistance, and compliance activities. Every DHS employee and customer must be able to readily access information and data relevant to their job or needs including those with disabilities.

The mission of OAST is to provide the strategic direction, governance, technical support, and training to ensure DHS employees and customers with disabilities have equal access to DHS information and data. OAST leads Department-wide implementation of Section 508, offers policy and program direction and technical assistance to DHS Components, provides and develops appropriate educational activities and resources, reviews acquisitions for Section 508 compliance, and evaluates and reports on DHS compliance with Section 508. In addition, OAST offers guidance and technical assistance to DHS personnel on reasonable accommodations.

OAST consists of the Program Management, Services (including reasonable accommodations assessments), IT Governance, and the Accessibility Compliance Center of Excellence divisions. The Program Management division is responsible for: strategic planning, administrative support, contract management, asset management, administrative operations, Accessibility Help Desk operations, training and education, and outreach and awareness.

The Services division is responsible for providing comprehensive, reliable, and repeatable Section 508 testing and remediation services to DHS and to support employees with disabilities through effective IT accommodations. The IT Governance division is responsible for ensuring DHS programs fulfill Section 508 accessibility requirements by monitoring and enforcing Section 508 compliance through DHS governance activities. The Accessibility Compliance Center of Excellence (ACCOE) is responsible for providing DHS IT Program Managers and their teams with support for Section 508 compliance. The ACCOE provides proven best practices, processes and standards, workforce training, and expert consultation support for Section 508 compliance. Program Managers have support from a

network of Component-level Section 508 Coordinators and subject matter experts to assist with accessibility compliance for IT governance, testing, processes, tools, and risk reduction.

PPA: Infrastructure and Security Activities

	<u>Perm. Pos.</u>	<u>FTE</u>	<u>Amount</u>
FY 2014 Revised Enacted	-	-	\$87,200
FY 2015 President's Budget	-	-	\$52,140
2016 Adjustments-to-Base	-	-	(\$1,965)
FY 2016 Current Services	-	-	\$50,175
FY 2016 Program Change	-	-	\$3,912
FY 2016 Total Request	-	-	\$54,087
Total Change 2015 to 2016	-	-	\$1,947

The OCIO requests \$54.087 million for the Infrastructure and Security (ISA) activity in FY 2016. This is an increase of \$1.947 million from the FY 2015 President's Budget.

The Adjustments-to-Base are as follows:

- Increase of \$1.881 million for the transfer of Data Center operations and maintenance support costs from various DHS Components to OCIO.
- Realignment of \$3.846 million from the ISA PPA to ITS PPA for the Information Sharing Environment Office.

The Program Changes are as follows:

- Increase of \$1.234 million for High Risk Internal Cyber Security Remediation.
- Increase of \$1.836 million for Continuous Monitoring & Mitigation Operations and Maintenance.
- Increase of \$2.6 million for FedRAMP Joint Authorization Board (JAB).
- Decrease of \$1.758 million for OneNet.

CURRENT SERVICES PROGRAM DESCRIPTION:

ISA are a set of IT projects that provide integration and protection of DHS information. This PPA funds the DHS OCIO effort to continue to consolidate multiple disparate networks into DHS OneNet. ISA funds manage infrastructure support which includes support for network and data center services and DHS Component enterprise applications. ISA also provides funds to maintain Trusted Internet Connection (TIC) capability and move all network traffic behind the Trusted Internet Connection (TIC). OCIO's immediate and long-term goal, executed through ISA, is to protect the Department's IT resources from cyber threats, provide One DHS Infrastructure platform, and foster information sharing across the Department and with external stakeholders, such as Federal, State, and local government agencies and their partners.

ISA also includes the IT security function, which sets IT security policy, and provides security architecture, certification and accreditation (C&A) remediation, Federal Information Security Management Act (FISMA) compliance and oversight, operations and maintenance (O&M) for legacy infrastructure and new infrastructure investments, and IT awareness and training programs.

Information Security Program

Through the Information Security Program, the Chief Information Security Officer (CISO) ensures a secure and trusted computing environment, which enables the Department to use information systems resources effectively to achieve its mission.

The Information Security Program ensures protection of sensitive information and allows sharing of all mission-related data. It also ensures compliance with the FISMA and with National Institute of Standards and Technology (NIST) security policies and requirements. The Information Security Program develops and documents Departmental information security requirements; develops enterprise security management tools; and oversees the implementation of information security systems supporting Departmental Operations.

Specifically, the Information Security Program provides:

- **Security Policy** and guidance to ensure protection of DHS information resources that help secure the Homeland. The CISO provides a waiver and exception process to document and manage mitigation of system control weaknesses. The program also develops the Department-wide system configuration guidance that provides baseline security configuration for the Department's hardware and software.
- **Security Architecture** that supports development of secure enterprise information-sharing capabilities and their integration with the DHS Enterprise Architecture Technical Reference Model (TRM), System Engineering Life Cycle (SELC) methodology, and the Capital Planning and Investment Control (CPIC) and acquisition processes. The CISO supports the Department's mission by protecting its information and IT resources (e.g. systems, network resources, and supporting data).
- **Compliance and Technology** includes oversight, measurement, validation, and reporting of information systems security throughout the Department, including management of the FISMA System Inventory, Security Authorizations (SAs) and Plan of Actions and Milestones (POA&Ms), and IT audit management and Federal reporting. This includes FISMA reporting and the implementation of continuous monitoring for the Department.
- **DHS IT Security Awareness, Training, and Education** to ensure DHS complies with all Federal regulations and OMB and NIST guidance governing IT security training, and Departmental standardization of security training content development.
- **National Security Systems (NSS) Risk Management** to support risk acceptance and system authorization decisions for classified systems. The program supports secure integrated operations of classified systems and National Security Information across the Department and participates in National-level NSS governance.

- **DHS Security Operations Center (SOC)** coordinates department level support to ensure the security of DHS and its Component information systems. The SOC operations range from computer security incident response to security device configuration, event monitoring, alerts analysis, and preventive measures. The SOC is a 24x7 center that operates in the confines of a secure facility, organized, staffed, and equipped to manage security specific functions that have relevance across an enterprise.

Information Security & Infrastructure

The Information Security Infrastructure (ISI) funds infrastructure improvements that enable the Department to reduce lag time and complexity in accessing data, creates a robust platform on which to quickly launch new capabilities, and provides a cost-effective and reliable IT infrastructure. The ISI supports Network Services (OneNet), Trusted Internet Connections (TIC), Policy Enforcement Points (PEPs), High Assurance Gateways (HAG), Email Services, and Data Center Services. The infrastructure improvements streamline and standardize the network environment, minimizing the number of overlapping elements, providing operational and security support, and developing a Department-wide network topology with centralized governance and standardized procedures. DHS infrastructure transformation includes the provision of capabilities to continuously monitor and maintain the DHS IT Infrastructure in an operational and secure state.

Infrastructure Transformation Program Operations

ITP is responsible for implementing the Department's vision of "One Infrastructure". ITP is a major DHS investment with a Life Cycle Cost Estimate of \$2.6 billion. ITP supports the DHS OCIO's reliable, resilient, and secure DHS-wide data network that streamlines appropriate sharing and discovery of information within the Department and associated organizations, such as State and local law enforcement agencies. The core of this unified environment is the consolidation of legacy networks into one enterprise-wide, integrated network called OneNet. Major services provided under ITP include: DHS WAN services, including configuration management, engineering, technical requirements analysis and OneNet integration services; Network and security operations centers - Enterprise Network Operations Center (NOC) and Security Operation Center (SOC); Traffic modeling and performance analysis; Network Management and IP address administration.

The OneNet network and Security Operations Centers monitor and manage DHS's centralized systems and network infrastructure. Incident response and detection is coordinated and escalated within the network security and computing service groups, depending on the nature of the breach or failure. The OneNet NOC works with Component NOCs, Enterprise Data Operations Centers, and the Enterprise Operations Center to coordinate service restorations and troubleshooting. DHS is implementing enhancements to OneNet to meet unique Component security requirements and OMB mandates. These enhancements include Trusted Internet Connections (TIC), High Assurance Gateways (HAG) and Policy Enforcement Points (PEP).

The HAG provides selected DHS personnel with access to malicious and prohibited websites that would typically introduce risks into the Enterprise. The HAG will allow access to information in a secure virtual environment, protect the user's workstation from any malicious attacks, and provide compensating controls for anonymous Internet site access.

Email services provide additional and comprehensive communication ability across DHS and to external Federal, State, local, tribal, international, and private sector partners. Email legacy systems are consolidated within DHS as the Email as a Service (EaaS) capability is deployed at the Enterprise Data Centers (EDC). Email services will enable personnel to access critical business communications and are designed to deliver greater security, availability, and reliability. Major email services include a consolidated DHS-wide Global Address List (GAL), a standard email-naming convention, and a DHS-wide email platform.

Data Center (DC) Development

DHS is in the process of consolidating the Department's legacy data centers into the Enterprise Data Center (EDC), known as DC1 and DC2. This is in alignment with the Federal Data Center Consolidation Initiative (FDCCI). Support at the EDC includes management and control of DC hardware, operating systems software, and environmental systems. In addition, both DCs are prepared to support a higher density virtual environment from both an infrastructure and managed-service perspective. The DCs support the delivery of private cloud and "as-a-service" offerings to customers seeking a scalable and secure virtual environment of configurable computing resources that can be rapidly provisioned with minimal cost of ownership. DC1 and DC2 have the ability to continuously synchronize applications based upon mission requirements. The purpose of DC consolidation is to ensure DHS has a seamless disaster recovery capability and to significantly enhance the cyber security posture of DHS systems. DHS DC capabilities provide personnel the tools to successfully and efficiently manage service delivery and support activities.

Major services provided by DC1 and DC2 include capacity and availability management; system management and administration; hardware/software maintenance; facility monitoring, security management; and disaster recovery management and testing. Infrastructure and Security Activities funds DC consolidation and assists migrating legacy DC environments to the EDC. The Data Center Development program focuses on building capabilities at both DHS data centers.

Data Center Support Costs

Data Center operations and maintenance support costs currently paid to OCIO by Components via an Inter-Agency Agreement will be transferred to the Office of the Chief Information Officer in FY 2016.

OCIO is in the process of shifting data center consolidation efforts to capitalize on evolving Cloud-based technologies. By re-negotiating current data center contracts, OCIO endeavors to allow direct ordering by DHS components and reduce overall costs and footprint. Based on this new model, funding for Component data centers will no longer be collected by OCIO, but OCIO must still pay for certain support costs including network security software and Federal data center support personnel. Funding for the network security software piece only is included in the ISA PPA.

PPA: Homeland Secure Data Network

	<u>Perm. Pos.</u>	<u>FTE</u>	<u>Amount</u>
FY 2014 Revised Enacted	-	-	\$63,156
FY 2015 President's Budget	-	-	\$70,132
2016 Adjustments-to-Base	-	-	(\$15,200)
FY 2016 Current Services	-	-	\$54,932
FY 2016 Program Change	-	-	-
FY 2016 Total Request	-	-	\$54,932
Total Change 2015 to 2016	-	-	(\$15,200)

The OCIO requests \$54.932 million for the Homeland Secure Data Network (HSDN) activity in FY 2016. This is a decrease of \$15.2 million from the FY 2015 President's Budget.

The Adjustments-to-Base are as follows:

- Decrease of \$15.2 million for non-recurring costs in Sharing and Safeguarding Classified Information.

CURRENT SERVICES PROGRAM DESCRIPTION:

The HSDN program enables agencies to collaborate and communicate effectively at a Secret-classified level among Federal and State governments and supporting entities. HSDN provides the capabilities to enable DHS to electronically collect, disseminate, and exchange both tactical and strategic Secret-level information throughout DHS and between DHS and its partners. The HSDN PPA includes the Communications Security (COMSEC) Central Office of Record (COR) that develops and publishes policy and procedures for the operation and use of COMSEC equipment and cryptographic keying material within DHS, ensuring compliance with government-wide and Departmental policies and procedures. The HSDN PPA also includes funding for Sharing and Safeguarding Classified Information in response to Executive Order 13587, which directs structural reforms to improve information security across the Federal Government.

Homeland Secure Data Network

HSDN enables Department of Homeland Security offices and Components, other Federal departments and agencies, and State, local and tribal entities to collaborate and communicate effectively at the collateral Secret-classification level. HSDN is the primary means for communicating classified Secret information with the national network of State and Major Urban Area Fusion Centers. HSDN is strengthening its relationship to Secret Internet Protocol Router Network (SIPRNet) to enable trusted

access by Fusion Centers to SIPRNet resources, and is expanding its collaboration capabilities through applications like H-Space. Executive Order 13587: *Structural Reforms to Improve the Security of Classified Networks and the Responsible Sharing and Safeguarding of Classified Information* recognized HSDN as the primary Secret network for non-Defense and non-Intelligence Federal departments and agencies. HSDN is advancing its sharing and safeguarding posture by adopting the Department of Defense (DoD) as the Common Service Provider for hard-token based PKI authentication, advancing access management solutions, and improving auditing and monitoring capabilities.

HSDN has established 592 sites, comprised of 5,585 workstations, across the United States. The program has established user accounts for approximately 8,853 end-users who currently log on and exchange information across both HSDN and the broader Secret-level community in performing daily missions. Since April 2012, the number of HSDN workstations OCIO supports has increased by 211 percent and the number of HSDN end-users that OCIO supports has increased by 121 percent. HSDN currently operates on a continuous basis, 24 hours a day, 7 days a week.

System capabilities include the Network Operations Center (NOC)/ Security Operations Center (SOC), four-tiered help desk, data centers, system-wide telecommunications backbone, and enterprise applications, including office email and messaging in support of end-user mission requirements.

Major Acquisitions

HSDN is a classified wide-area network for DHS and its partners, providing effective interconnections to the intelligence community and federal law enforcement resources. With HSDN capabilities, DHS has the ability to collect, disseminate, and exchange both tactical and strategic intelligence and other homeland security information up to the secret level.

HSDN fills a critical capability gap. It enables the vital mission capability to communicate classified information at the secret level among DHS components, partners in the federal government and with appropriate entities in state and local government. The HSDN program provides a simplified mechanism for authorized user entities and their appropriately cleared staff to quickly acquire sophisticated tools and means to enable these communications. HSDN provides accredited end user terminals, links DHS components with one another and with external partners including DoD SIPRNet through accredited classified interconnections. It provides a common core infrastructure within which information is shared and analyzed, security monitored, and operations administered. This environment has proven scalable and extensible, supporting growing mission sets and an expanding body of users. It has grown to host enterprise applications and host particular mission specific applications that leverage classified information supplied from multiple sources connected through HSDN. The technical and management capabilities of the HSDN program have potential as a harmonizing foundation for cross-federal common classified secret capability, currently under study by the Sharing and Access Interagency Policy Committee. HSDN is planning mechanisms that strengthen information access control to those who are not only cleared but authorized for access based on their specific group and authorization attributes, ensuring appropriate control of information dissemination.

This project is proposed to be funded out of one PPA in FY 2016, as follows:

- Homeland Secure Data Network PPA: \$54.932 million

FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Funding (\$\$\$ thousands)	FY 2016 Activity Request (\$\$\$ thousands)
\$63,156	\$70,132	\$54,932

FY 2016 Funding Breakout:

Program Area (Funding in \$\$\$ thousands)	Sub-Program	Mission Need
HSDN O&M (\$42,132)	State and Local Fusion Center Build Out or Relocation	Complete the installation of HSDN to State and Local Fusion Centers (SLFCs) and begin relocation of required operational sites.
	HSDN Enhancements	Implement the HSDN over broadband capability.
	Network Consolidation	Decrease costs through network consolidation/migration to HSDN.
	HSDN Deployment to New Sites	Deploy HSDN to 72 new sites to increase information sharing.
	Technology Refresh	Improve reliability through technology refresh.
	HSDN Maintenance Tech Refresh	Maintain and improve reliability of equipment through technology refresh.
Sharing & Safeguarding Classified Information (\$12,800)	Reduce Anonymity	Required to comply with Executive Order 13587 “ <i>Structural Reforms to Improve the Security of Classified Networks and the Responsible Sharing and Safeguarding of Classified Information</i> ” by ensuring the DHS headquarters implements PKI Infrastructure that meets OMB IOC/Final Operating Capability (FOC) dates and can be sustained for overall use within the Department.
	Enterprise Audit	Required to comply with Executive Order 13587 “ <i>Structural Reforms to Improve the Security of Classified Networks and the Responsible Sharing and Safeguarding of Classified Information</i> ” by ensuring the DHS headquarters implements technical controls on its networks that enforce log audit capabilities and result in an Enterprise Audit program.
	Insider Threat	Required to comply with Executive Order 13587 “ <i>Structural Reforms to Improve the Security of Classified Networks and the Responsible Sharing and Safeguarding of Classified Information</i> ” by ensuring the DHS headquarters implements technical controls and monitoring capability on its networks that

		comply with the DHS insider threat program.
	Removable Media	Required to comply with Executive Order 13587 “ <i>Structural Reforms to Improve the Security of Classified Networks and the Responsible Sharing and Safeguarding of Classified Information</i> ” by ensuring the DHS headquarters implements technical controls and policy on its networks that enforce removable media security controls.
	Access Control	Required to comply with Executive Order 13587 “ <i>Structural Reforms to Improve the Security of Classified Networks and the Responsible Sharing and Safeguarding of Classified Information</i> ” by ensuring the DHS headquarters implements technical controls on its networks that enforce access controls based on attributes and PKI integration.

Communications Security

The Homeland Security Communications Security (COMSEC) Central Office of Record (COR) was established in accordance with national policy as delineated in the interagency *Committee on National Security Systems Instruction (CNSSI) 4005*. The DHS Management Directive 4300B provides guidance for administering the National Security Policies required to provide for accounting, safeguarding, and management control over COMSEC keying material, controlled cryptographic items, and secure communications equipment. The Central Office of Record (COR) provides consolidated COMSEC accounting services and training, and assists in acquisition and maintenance of COMSEC equipment for the Department. Additionally, the COR develops and publishes policy and procedures for the operation and use of COMSEC equipment and cryptographic keying material within DHS, ensuring compliance with National and Departmental policies and procedures.

To comply with the joint DoD and National Security Agency (NSA) Crypto Modernization program, DHS continues to migrate legacy encryptors, and COMSEC accounting infrastructure. The transition to modern cryptographic equipment and account management includes systems such as the Network-Centric Key Management Infrastructure (KMI) and the COMSEC Accounting, Reporting Distribution System (CARDS), both of which are emerging and critical components of the Global Information Grid. This migration is essential to the success of the Department by enabling and equipping the DHS COMSEC COR and accounts to migrate to new systems affording DHS the opportunity to automate, streamline, and restructure the COMSEC distribution and accounting infrastructure.

Sharing and Safeguarding Classified Information

The Sharing and Safeguarding Classified Information program directly supports Executive Order 13587, which directs structural reforms to improve information security across the Federal Government. The program funds five DHS-wide initiatives related to safeguarding classified information: Removable Media, Reduce Anonymity, Insider Threat, Access Control, and Enterprise Audit.

Removable Media is supported by three activities: automated lock down of drives, data loss prevention, and system alerts, all of which prevent DHS networks and information resources from being vulnerable to the mass removal of classified information.

Reduce Anonymity is supported by three activities: Hard token PKI, authentication, and consolidation of information resources. This is critical to DHS's connection to all other Federal classified networks such as Joint Worldwide Intelligence Communications System (JWICS) and Secure Internet Protocol Router Network (SIPRnet). These programs enable DHS to ensure that all Federal agencies that use DHS HSDN and State, local, and tribal information sharing environment users gain access to mission critical data resident on servers that use PKI (e.g., DOD).

Access Control is supported by two activities: access control (the ability to gain access to needed resources) and data discoverability (the ability to find resources and only the resources one is allowed). This allows DHS to maintain interoperability with other Federal networks which have implemented controls. With this interoperability, DHS will be able to provide adequate access control.

Enterprise Audit is used to protect national intelligence, identify threats, detect and deter penetration of classified resources, and reveal misuse and identity usage trends; thereby tying all the other initiatives together. DHS will remain connected to other Department and agencies networks, (e.g., JWICS, SIPRnet) and comply with Federal mandates.

The final initiative, Insider Threat, is classified and additional information can be provided under separate cover.

IV. Program Justification Change

**Department of Homeland Security
Departmental Management and Operations
Office of the Chief Information Officer (CIO)
Justification of Program Changes**
(Dollars in Thousands)

Program Increase 1: DHS Data Framework (S&E & ITS PPA)
PPA: Salaries and expenses, Information technology services
Program Increase: Positions 7, FTE 4, Dollars \$7,054

Funding Profile

	FY 2014 Revised Enacted			FY 2015 President's Budget			FY 2016 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$3,000
Program Increase							7	4	\$7,054
Total Request	0	0	\$3,000	0	0	\$3,000	7	4	\$10,054

Description of Item

The combination of the Neptune, Common Entity Index and Cerberus projects under the Controlled Homeland Information Sharing Environment strategy and within the Data Framework will effectively safeguard data, and provide the Department with the ability to increase productivity of analysts, reduce the information sharing burden, expand the capacity of mission-driven decision-making analysis, and improve the integrity of mission-critical information.

Justification:

The Controlled Homeland Information Sharing Environment (CHISE) is the Information Sharing & Safeguarding Governance Board (ISSGB)-approved target architecture to improve vetting in the Screening Function and enable better information sharing with the Intelligence Community (IC) for counterterrorism (CT) purposes. By design, CHISE will achieve Screening and IC information sharing mission objectives while increasing privacy protection of DHS data. Working with DHS Oversight offices—including Privacy (PRIV), Office for Civil Rights and Civil Liberties (CRCL), and the Office of the General Counsel (OGC)—the CHISE architecture has been codified into a framework called the DHS Data Framework.

The Framework supports local stewardship of DHS data, ensuring both currency and accuracy, and provides mechanisms to enable controlled sharing of DHS data internally and with the IC to deliver near real time access to mission critical data.

The DHS Data Framework provides the Homeland Security Intelligence Enterprise a single data platform for analysis for threat mitigation through “High Side Vetting.” It supports local stewardship of DHS data, ensuring both currency and accuracy, and provides mechanisms to enable controlled sharing of DHS data internally and with the IC to deliver near real time access to mission critical data. Additional funding is required to allow this vital capability to mature from its current Limited Production Capability (achieved with FY 2015 funding) to its Initial Operating Capability – a vital stage of development to achieve full, operational capability for homeland security intelligence mission users. This funding request will build on the success of the Data Framework’s FY 2014 pilots and limited production capability deployed in FY 2015. Specifically, additional FY 2016 funding will support achievement of the following milestones:

- Provide users access to three additional unclassified DHS data sets in a single classified environment.
- Allow users to visualize search results (networks, relationships, geographic, temporal) and define persistent queries & alerting.

The Data Framework Program Office will measure success of the use of additional FY16 funding through the following metrics:

Number of Users / Components Using the Data Framework for Threat Mitigation

- Initial Operating Capability (IOC) – up to 1000 users, in all DHS Intel components.

Number of Datasets Incorporated

- IOC – 3 initial datasets plus 1-2 more.

Speed by Which Datasets are Added

- IOC – 3-5 datasets per year.

Neptune and Common Entity Index (CEI)

(in thousands)

Appropriating Org	Item	Description	FY2016
CIO	Development, Modifications, and Enhancements	Funding for the development and enhancement of the software platform. This includes the development of the advanced access control framework.	\$ 1,997
CIO	New Infrastructure	Continued infrastructure build-out in DHS Data Center 1 to support user requirements. Costs include hardware, operating system, and network connectivity.	\$ 844
CIO	O&M	Covers connectivity, datacenter costs, hardware refresh, and software licensing for patching and maintenance.	\$ 269
CIO	Update/Ingest of datasets	Funding includes the software and services required to extract, transform, and load data from source systems. This includes initial costs to implement a data refresh regime.	\$ 2,944
CIO	Program Management	Program Management support costs to include security, legal, privacy, civil rights/civil liberties compliance activities.	\$ 1,000
Neptune and CEI			\$ 7,054

OCIO is requesting a total of 7 FTP to support this initiative; 4 FTP will directly support OCIO and 3 additional FTP will support PRIV (1), CRCL (1), and OGC (1). The following unclassified systems make up the DHS Data Framework:

- **Neptune** is the repository for ingesting authoritative DHS data where data is tagged—an essential first step to implementing the access controls of the Data Framework in support of Safeguarding. Neptune will then provide tagged data to the two systems authorized to receive this information: Common Entity Index (CEI) and Cerberus.
- **Common Entity Index (CEI)** will create a correlated index of identities from all DHS holdings containing person data. It will enable a consolidated, de-conflicted, authoritative view of a/an subject(s)/individual(s) across the entire Department.
- **Cerberus** is DHS’s authoritative unclassified data repository on the TS/SCI network that will enable DHS users to access and use information from DHS unclassified data sets on the TS/SCI network, enabling classified analysis and screening of unclassified DHS holdings by authorized personnel (both inside the Department and with our IC partners). The DHS funding request for Cerberus will be submitted as part of the classified budget.

The Department has successfully tested the first implementations of CHISE using the Data Framework. The Cerberus project, led by DHS I&A, and the Neptune and CEI projects, led by DHS OCIO, were prototyped successfully in December and January of FY 2014. Oversight and mission approval of these prototypes resulted in direction to begin planning for operational capability, and this funding request is a part of that planning process. It should be noted that all progress made to date has been due to the collaboration between OCIO and I&A offices in support of the broader enterprise vision. Each office has invested modest funding to ensure continued, measured forward progress.

Funded together, these systems will provide a sustainable method to share information in an architecture supportive of privacy and legal requirements under DHS control that is accessible by the IC enclaves on classified networks.

Impact on Performance (Relationship of Increase to Strategic Goals)

Neptune, CEI, and Cerberus are aligned with many strategic guiding principles within the DHS Quadrennial Homeland Security Review and FY 2014 Strategic Review. As hubs for cross-Department and cross-Government interoperability and integration, Neptune and Cerberus serve as models for participating in the networked enterprise that is necessary to secure the Homeland and as foundational capabilities for supporting intra and interagency information sharing. CEI, as an entity resolution capability, is meant to improve information sharing and analysis capabilities, and is rooted in the five partnership archetypes required to improve homeland security outcomes dependent on partner collaboration. Neptune, CEI, and Cerberus program leadership have involved OIG, Privacy, and the Office of Civil Rights and Civil Liberties (CRCL) since program inception, fostering a design that transparently demonstrates access rules, and is inclusive of the legal protections we are required to follow in order to uphold individual privacy, and civil rights and civil liberties. This partnership was the inception of the DHS Data Framework.

CEI and Cerberus are being developed in direct response to multiple National and DHS requirements and strategies for enhanced data integration and analysis (to include the Congressionally-mandated “DHS OneSearch”). As such, they sit at the forefront of DHS realizing the strategic priority of improving information sharing and safeguarding.

Department of Homeland Security

Program Increase							2	1	\$16,189
Total Request	0	0	\$4,983	0	0	\$3,626	2	1	\$19,815

Description of Item

Single Sign-on (SSO) for DHS aims to reduce the number of times someone needs to logon to one system. In some instances, users must logon to 13 different systems on any given day, and have upwards of 20 distinct username and password combinations to do their job. This initiative will improve the cyber security posture of the Department and reduce lost productivity time, operational costs, and helpdesk calls.

Justification:

The security and resilience of the DHS network depends on our stakeholders using the personal identity verification (PIV) smart card to logon to all systems, as well as having trustworthy information about the people with whom the Department works. As the agency charged with facilitating the security of .gov, partnering with the private sector, and offering outreach and guidance to the public, DHS has to lead by example within its own network environment. While daily events can dynamically change requirements, today, access to sensitive data and facilities is granted using too many logon accounts, and static, often stale, point-in-time information. DHS security procedures are manual, often paper-driven processes that are inefficient and prone to inaccuracy, creating risks to the network, and failing to meet internal operational needs and external partner expectations. This significantly increases the risk of suboptimal mission results, may potentially undermine privacy, civil rights, and civil liberties protections on data, and can lead to criminal consequences and negative public perception for the Department and individuals affected by DHS activities.

The SSO initiative is comprised of the following elements:

1. Single Sign-On for DHS (\$6.475 million) - Funding is for additional software licenses to cover all DHS identities; contract support to scale out SSO infrastructure to Department-wide IOC

capability level. This SSO for DHS funding is also needed to address several of the high risk internal cyber-security remediation requirements

2. Single Sign-On for Privileged Users (\$5.892 million) - Funding will be used to purchase privileged identity management software licenses for all protected resources accessed by approximately 10,000 privileged users across the Department.
3. Trusted Identity Exchange (TIE) (\$3.822 million) – this will fund additional software licenses to cover all DHS identities; contract support to scale out TIE infrastructure to Department-wide IOC capability level and connection to primary authoritative sources; and, development of attribute provisioning workflows.

The 2 FTEs will be providing IT governance, program, project management, and architecture leadership for the SSO initiative. Specifically, the 2 FTEs will lead enhancing governance model for SSO (including MOUs and SLAs), onboarding new applications and managing SSO service providers.

The overall SSO initiative will improve the operating stance of the Department as it will:

- **Saves Cost** - This investment will save the Department \$141.4 million in lost productivity, operational costs, and helpdesk calls. In addition, the Department will avoid spending \$56.5 million of redundant, Component-centric SSO systems.
- **Improves DHS' Cyber Security, Sharing, and Safeguarding Posture** - In some circumstances, our information sharing partners avoid applications due to the complexity associated with all the logons they need to maintain, and even worse, may share an account with the person that sits next to them. This creates a hindrance to information sharing that can negatively affect the mission if a stakeholder cannot log into a system that holds critical information. DHS staff, mission partners, and the public need immediate and flexible access to the right resources at the right time to fulfill their mission responsibilities. Implementing this initiative will also help prevent and detect illicit access to highly privileged user accounts, and strengthen current efforts related to insider threat monitoring and mitigation.
- **Fosters an Environment where Privacy, Civil Liberties, and Civil Rights Protections are built into DHS Systems** - SSO provides a foundation for safeguarding the DHS Network and the information our stakeholders generate or consume on a regular basis, it also allows the Department to transparently protect the privacy, civil liberties, and civil rights of each individual DHS has collected screening data for. By using strong credentials and person data that the Department has a high amount of confidence in, DHS will protect information from misuse both intentional and unintentional – as well as succeed in delivering potentially lifesaving intelligence information to our partners and stakeholders quicker than ever before.
- **Reduces Mission Risk** - Usernames and passwords are sometimes weak – increasing the possibility that access could be fraudulent. Passwords may be, and are, often forgotten, unnecessarily hampering access to information. All of these scenarios amplify the Departments exposure to unnecessary risk.
- **Eliminates Redundancy by Leveraging Enterprise Services** - Every system employs their own solution to log users into their system and authorize them to access information. These distinct, commoditized solutions can be collapsed into a single SSO enterprise service, eliminating redundancy and leveraging DHS enterprise SSO services.

Every system employs their own solution to log users into their system and authorize them to access information. These distinct, commoditized solutions can be collapsed into a single SSO enterprise service, eliminating redundancy and leveraging DHS enterprise SSO services.

Impact on Performance (Relationship of Increase to Strategic Goals)

There are two overarching Strategic Priorities listed in the 2014 Quadrennial Homeland Security Review that the Trusted Identity Exchange directly impacts:

1. Secure the Federal Civilian Government Information Technology Enterprise.
2. Strengthen the Cyber Ecosystem.

SSO meets the current state of market best practices and promotes the adoption of common, risk-based approach to effectively respond to the pace of the new threats.

Description of Item

DHS requires improvement to its cybersecurity operation in order to maintain its status as trusted key partner, and serve as an example for implementing cyber security to other civilian federal organizations. The cyber security infrastructure investment will ensure the DHS Chief Information Security Officer (CISO) can continue to deliver mission functions in the face of persistent cyber threats and attacks. This request provides remediation for financial, mission essential, and other systems.

The remediation portion of the cybersecurity investment will provide the DHS CISO with the necessary funding to ensure that all open security plans of actions and milestones (PO&AMs) meet compliance criteria. All aging PO&AMs would be adjusted for current status, including the expiration dates on the authorization for our systems to operate. A cycle of timely remediation for all actions would also be established. PO&AMs are often written for purposes of compliance to the requirement to actually have a plan rather than a sense of urgency to remediate security weaknesses. Issues are being identified all the time so the dynamic of the most recent issue pushes the unresolved issue to the back of the line. Funding is requested to provide resources to train the Components on effective root cause analysis and security remediation.

DHS needs to be aggressive solving its remediation problem in order to increase our information security posture and safeguards DHS' information assets. As the government lead for cybersecurity, it is critical that DHS maintain its reputation of being an industry front runner in information security.

FY 2013 was the first year DHS received an unmodified (clean) opinion on all financial statements. In order to sustain this unmodified opinion, the Department must continue remediating the remaining control deficiencies, of which, Information Technology Controls lies within the realm of DHS OCIO's area of responsibility. Our financial operations colleagues have worked diligently to qualify for this

clean audit opinion and unless DHS OCIO performs its role in maintaining effective information technology controls, that clean audit opinion will not be sustained.

When PO&AMs are created, the resource or cost required to remediate the issue on a per-PO&AM basis is entered into the DHS Information Assurance Compliance System; a total of those entries is the basis for the proposed costs to remediate our unresolved information technology weaknesses. The proposed costs of each alternative solution was based on a tally of the resource or cost from the PO&AMs for financial systems, mission essential systems, and other systems (not financial or mission essential).

The formula used to derive the cost to remediate information technology control weaknesses on DHSs financial systems is based on a nominal labor rate of \$100 per hour and does not include other direct expenses (e.g., hardware or software). Due to the wide range of potential circumstances affecting any specific control, the “best case” was used to determine the level of effort.

Included in our strategy is organizational change on the way DHS thinks about, acts on and plans remediation of information technology control weaknesses. Allowing issues to go unresolved in a repeated pattern is unacceptable. A sense of urgency must be established in our daily practice to stay on top of issues as they occur and not allow slippage into delay status. To implement this organizational change, DHS OCIO will apply resources to retrain the people responsible for creating and managing PO&AMs across the Department; this must be accomplished in a short period of time to maintain a clean audit opinion.

Impact on Performance (Relationship of Increase to Strategic Goals)

A cycle of timely remediation for all actions would be established for high risk and financial systems if funding is provided. Funding is also requested to provide resources to train the Components on effective root cause analysis and security remediation.

Departmental Management and Operations
Office of the Chief Information Officer (CIO)
Justification of Program Changes
(Dollars in Thousands)

Program Increase 4: Continuous Monitoring & Mitigation Operations and Maintenance (ISA PPA)
PPA: Infrastructure and Security Activities
Program Increase: Positions 0, FTE 0, Dollars \$1,836

Funding Profile

	FY 2014 Revised Enacted			FY 2015 President's Budget			FY 2016 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$1,969
Program Increase							0	0	\$1,836
Total Request	0	0	\$1,969	0	0	\$1,969	0	0	\$3,805

Description of Item

In examining its internal cybersecurity, the department attempted to seek out efficiencies where possible to assist with redirecting potential cost savings toward mitigating vulnerabilities at a more frequent rate, as well as to promote standardization of security products and tools in DHS to develop a common security tool knowledge base and common skill sets within department Cybersecurity programs.

Justification

Anticipating the adoption of the Continuous Diagnostics and Mitigation (CDM) program, starting during FY 2015, the department is applying an offset starting in FY 2016 to reflect a more efficient information security continuous monitoring business model. In future years, as the scope of CDM expands, DHS can further harmonize standardization of security products and tools. The reduction in disparate tools through partaking in the CDM Program will potentially save DHS expenditures which can be instead leveraged against mitigating actual technical vulnerabilities found on DHS' IT assets, modernizing IT Systems and infrastructure, and training security personnel.

Impact on Performance (Relationship of Increase to Strategic Goals)

Standardizing these tools across DHS will create a common thread of knowledge and tool usage across components. Without the requested funding, continuous monitoring will remain at the status quo - a manual effort that uses significant resources versus a more streamlined effort that is automated.

Department of Homeland Security

(Dollars in Thousands)

Program Increase 5: Digital Services Team (ITS PPA)
PPA: Information technology services
Program Increase: Positions 50, FTE 38, Dollars \$10,000

Funding Profile

	FY 2014 Revised Enacted			FY 2015 President's Budget			FY 2016 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$0
Program Increase							50	38	\$10,000
Total Request	0	0	\$0	0	0	\$0	50	38	\$10,000

Description of Item:

The DHS Digital Services team will be responsible for driving the efficiency and effectiveness of the Department’s highest-impact digital services with the DHS Chief Information Officer serving as the senior accountable official. The DHS Digital Services team is designed to build and implement software products used by citizens, businesses, and government employees to execute the Department’s core missions.

The success rate of government digital services is improved when agencies have digital service experts on staff with modern design, software engineering, and product management skills. To ensure the agency can effectively build and deliver important digital services, the FY 2016 Budget includes funding for staffing costs to build a Digital Service team that will focus on transforming the agency’s digital services with the greatest impact to citizens and businesses so they are easier to use and more cost-effective to build and maintain.

These digital service experts will bring private sector best practices in the disciplines of design, software engineering, and product management to bear on the agency’s most important services. The positions will be term-limited, to encourage a continuous influx of up-to-date design and technology skills into the agency. The digital service experts will be recruited from among America’s leading technology enterprises and startups, and will join with the agency’s top technical and policy leaders to deliver meaningful and lasting improvements to the services the agency provides to citizens and businesses.

This digital service team will build on the success of the United States Digital Service team inside of OMB, created in 2014. Since standing up, this small OMB team of has worked in collaboration with Federal agencies to implement cutting edge digital and technology practices on the nation’s highest impact programs, including the successful re-launch of HealthCare.gov in its second year, which led to

millions of Americans receiving health coverage; the Veterans Benefits Management System; online visa applications, green card replacements and renewals; among others. In addition to their work on these high priority projects, this small team of tech experts has worked to establish best practices (as published in the U.S. Digital Services Playbook at playbook.cio.gov) and to recruit still more highly skilled digital service experts and engineers into government.

This initiative will fund the creation of a team of 50 FTP and provide \$1.5 million in program management support to build a DHS Digital Services team that will support all DHS Components. As such, the majority of personnel and resources will be located with the Components.

These team members will use their expertise to champion the use of technology development and management approaches, drawing heavily upon best practices from the consumer internet industry, such as open source and agile development processes.

Justification:

The success rate of government digital services is improved when agencies have digital service experts on staff with modern digital product design, software engineering and product management skills. The goal of the DHS Digital Services team is to work with a diverse group of stakeholders across the Department to improve the digital services DHS delivers to citizens and businesses. This team will identify the most effective methods for improving government digital services across DHS, based upon quantitative and qualitative assessments of user needs.

Impact on Performance (Relationship of Increase to Strategic Goals):

The DST funding will provide DHS the resources to hire a cadre of digital service experts who will play a critical role in ensuring the Department is on the cutting edge of technological design, engineering, and product management to meet Departmental mission and customer services goals.

Department of Homeland Security
Departmental Management and Operations
Office of the Chief Information Officer (CIO)
Justification of Program Changes
(Dollars in Thousands)

Program Increase 6: Single Sign-On at Fusion Centers (ITS PPA)
PPA: Information technology services
Program Increase: Positions 0, FTE 0, Dollars \$779

Funding Profile

	FY 2014 Revised Enacted			FY 2015 President's Budget			FY 2016 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$0
Program Increase							0	0	\$779
Total Request	0	0	\$0	0	0	\$0	0	0	\$779

Description of Item

State and major urban area fusion centers currently utilize multiple DHS datasets to fulfill their missions. These stakeholders, including intelligence officers, analysts, and partners within state and local governments, have consistently identified the need for easier access to DHS data and applications. Presently, DHS systems are controlled by various components with separate sign-on processes. As a result, fusion center users spend unnecessary time supplying disparate credentials to each application. In some circumstances, our partners avoid using applications because of credential complexity, or use unsecure practices to manage their numerous credentials. Migrating DHS systems to single sign-on measures will increase security controls and safeguarding of DHS data, and allow for greater information sharing among our fusion center partners.

The Homeland Security Information Network (HSIN) is the enterprise single sign-on solution (SSO) for applications and systems accessible by “DHS trusted partners” which include fusion center personnel. HSIN provides proven two-factor authentication and identity-proofing processes needed to protect DHS data. The purpose of this initiative is to fund the necessary inclusion of an additional three to five DHS applications per year from the list of systems prioritized by the National Network of Fusion Centers to the HSIN SSO solution, resulting in increased efficiency for fusion center personnel.

In addition to efficiencies gained and increased security controls, this initiative promotes the type of information sharing called for in the Homeland Security Act of 2002, which calls for DHS to “coordinate the Federal Government’s communications relating to homeland security with state and local government authorities, the private sector, and the public.” Additionally it supports the National Strategy for Information Sharing and Safeguarding, the National Strategy for Trusted Identities in Cyberspace, and the *DHS Information Sharing and Safeguarding Strategy*.

Justification:

Requested funding will be used to provide technical support and toolkits to allow DHS system owners to leverage the HSIN SSO Enterprise Services. The funding will cover the inclusion of an additional three to five DHS applications per year from the list of systems prioritized by the National Network of Fusion Centers.

Without this funding, each system owner would continue to spend program funding for sign-on capabilities, and would be required to spend additional funding to match the data safeguarding features currently provided by HSIN. Additionally, this program increase will significantly improve information sharing and situational awareness capabilities with our fusion center partners.

Impact on Performance:

Specific performance improvements include:

- Increase efficiency of information access in fusion centers by reducing the number of different usernames and passwords needed to access DHS systems.
- Increase in cost savings through integrated digital identity management, which leads to improved interoperability.
- Reduction in help desk activity across multiple applications as digital identity management is integrated for systems moving onto the HSIN SSO solution.

Department of Homeland Security

Office of the Chief Information Officer (CIO)
Justification of Program Changes
(Dollars in Thousands)

Program Increase 7: FedRAMP JAB (ISA PPA)
PPA: Infrastructure and Security Activities
Program Increase: Positions 0, FTE 0, Dollars \$2,600

Funding Profile

	FY 2014 Revised Enacted			FY 2015 President's Budget			FY 2016 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							2	1	\$805
Program Increase							0	0	\$2,600
Total Request	2	1	\$805	2	1	\$805	2	1	\$3,405

Description of Item

The Federal Risk and Authorization Management Program (FedRAMP) is a Government-wide program designed to provide a standard approach to security assessments, authorization, and continuous monitoring of cloud products. The FedRAMP Joint Authorization Board (JAB) is comprised of CIOs from DHS, the General Services Administration (GSA), and the Department of Defense (DOD). Representatives from these departments work together to perform rigorous technical reviews of Cloud Service Providers' (CSP) authorization packages for FedRAMP compliance.

Justification:

FedRAMP compliance is mandatory before a CSP can be utilized by a Federal agency. There is currently a backlog of over 36 CSP applications awaiting technical review by the FedRAMP JAB. This increase in funding will provide for eight additional contractors to perform the technical reviews in support of the FedRAMP JAB. The additional staff support will allow for the review of 32 CSP authorization packages a year that can be reviewed and ultimately certified by the FedRAMP JAB.

The FedRAMP JAB process has resulted in significant cost avoidance across the Federal Government. Once certified, a FedRAMP compliant CSP can be utilized by any Federal agency or department, eliminating the need for time consuming and costly re-certification. To date, CSP authorizations cover over 160 known Federal Information Security Management Act (FISMA) implementations, which, at an average cost of \$250,000 each, conservatively show a cost avoidance of \$40 million to date.

Impact on Performance (Relationship of Increase to Strategic Goals)

Without an increase in funding, the current backlog in CSP applications awaiting technical review and certification will continue to grow. DHS anticipates that as the Federal Government continues to move more data onto the cloud, the demand for FedRAMP certification will only increase.

Department of Homeland Security
Departmental Management and Operations
Office of the Chief Information Officer (CIO)

(Dollars in Thousands)

Program Increase 8: Trusted Tester
PPA: Information Technology Services
Program Increase: Positions 0, FTE 0, Dollars \$1,758

Funding Profile

	FY 2014 Revised Enacted			FY 2015 President's Budget			FY 2016 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$942
Program Increase							0	0	\$1,758
Total Request	0	0	\$942	0	0	\$942	0	0	\$2,700

Description of Item:

The DHS CIO Office of Accessible Systems and Technology (OAST) developed the Trusted Tester program that is utilized Department-wide to reduce redundant testing and inconsistent test results for Section 508 of the Rehabilitation Act conformance.

With this funding, DHS will develop the Interagency Trusted Tester Program (ITTP) which will ensure skilled IT accessibility subject matter expertise in sufficient quantity and quality so that the Section 508 standards for Web and software can be effectively met, evaluated, and enforced across the Federal Government.

DHS, in coordination with the Federal CIO Accessibility Community of Practice, will establish an ITTP Executive Steering Committee that will provide the necessary governance and oversight for the ITTP Program including appropriate fees for training, certification, and recertification.

Additionally, the ITTP will develop, support, and maintain a certified tester education program that can be used government-wide; provide Instructor-led and Online Workforce Development; provide updates of education for new standards, tools and operating systems, proven testing methods, and types of electronic content; and create an accreditation process including continuing education requirements.

Justification:

Title 29 of the United States Code (U.S.C.), Section 794d, “Electronic and Information Technology” (commonly referred to as “Section 508 of the Rehabilitation Act”) requires that the Federal government make electronic and information technology (EIT) accessible to employees and customers with disabilities. The law applies to all Federal agencies when they develop, procure, maintain, or use EIT.

To comply with this requirement, agencies need to have access to skilled IT accessibility subject matter expertise so that the Section 508 standards can be effectively met, evaluated, and enforced. Without a common set of evaluation procedures, agencies inconsistently test EIT, achieve and communicate different results with the vendor community, and limit the ability of the Federal Government to seek EIT remediation.

The ITTP is a strategic solution with a three pronged approach. It will first develop much needed testing conformity by standardizing the evaluation processes and procedures for 508 testing of EIT. Second, it will increase the workforce skillset and capability by implementing a certification program for 508 testing inclusive of the standardized evaluation procedures and methodologies. Third, it will create a central repository containing all trusted tester test results. The repository will be available to all agencies to populate, access, and utilize thus eliminating the need for redundant and inconsistent testing.

Impact on Performance (Relationship of Increase to Strategic Goals):

Without this funding, DHS will be unable to expand the Trusted Tester Training and Certification Program beyond DHS, establish governance processes to manage expanded program, or support multiple agencies to adopt ITTP and to implement unified testing procedures within their organizations.

Description of Item

The Infrastructure Transformation Program (ITP) represents the Department’s full-scale move toward a DHS-consolidated information technology infrastructure supporting the cross- organizational missions of protecting the homeland, deterring crime, detecting and countering threats, and myriad other responsibilities.

Justification

ITP implements the DHS CIO’s vision of “One Infrastructure,” by unifying disparate Component information technology networks, platforms and services into a set of enterprise wide IT Services. As part of the process, DHS began to consolidate its components’ existing infrastructures into a single wide area network (WAN), known as OneNet. The concept of OneNet is to provide network segmentation between components to protect the various categories of controlled unclassified and classified information.

Impact on Performance (Relationship of Decrease to Strategic Goals)

Although the proposed reduction will impact OneNet, every effort will be made to efficiently use remaining resources to maintain a robust program.

V. Exhibits and Other Supporting Material
A. Justification of Proposed Legislative Language

For necessary expenses of the Office of the Chief Information Officer, as authorized by section 103 of the Homeland Security Act of 2002 (6 U.S.C. 113), and Department-wide technology investments [\$256,343,000], \$320,596,000¹ of which [\$95,444,000] \$105,307,000² shall be available for salaries and expenses; and of which [\$160,899,000] \$215,289,000³ to remain available until September 30, [2016] 2017⁴, shall be available for development and acquisition of information technology equipment, software, services, and related activities for the Department of Homeland Security, of which \$10,000,000 shall remain available until September 30, 2017 for Digital Service Teams.

Salaries and expenses Mission Statement

The Salaries and Expenses (S&E) PPA is a crosscutting program that provides technology-management, shared services, acquisition strategy, executive leadership support, process development, and business transformation to several offices within the DHS Office of the CIO.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
11.1 Full-time Permanent	\$38,107	\$41,968	\$49,771	\$7,803
11.3 Other than Full-Time Permanent	\$200	\$200	\$200	-
11.5 Other Personnel Compensation	\$400	\$400	\$400	-
11.8 Special Personal Services Payments	\$183	\$183	\$183	-

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
11.1 Full-time Permanent	\$38,107	\$41,968	\$49,771	\$7,803
12.1 Civilian Personnel Benefits	\$8,169	\$10,292	\$12,975	\$2,683
Total, Salaries & Benefits	\$47,059	\$53,043	\$63,529	\$10,486

The \$10,486,000 increase is due to the transfer of the Homeland Security Information Network (HSIN) and Common Operating Picture (COP) from the Office of Operations Coordination and Planning to the Office of the Chief Information Officer (OCIO); the transfer of Data Center Operations & Maintenance support costs from various DHS Components to OCIO; the program increases for DHS Data Framework and Single Sign-On; the adjustments-to base for the 2015 pay raise annualization, the 2016 pay raise, the retirement contribution increase, and the pay increase for cybersecurity professionals; and the decreases due to parking and cellular efficiencies and VERA/VSIP.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.1 Advisory and Assistance Services	\$15,221	\$6,111	\$5,911	(\$200)

The \$200,000 decrease to advisory and assistance services is due to realignment of the Office of Accessible Systems and Technology (OAST) and Records, Forms, and Printing from the S&E PPA to the ITS PPA.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.3 Other Goods and Services from Federal Sources	\$27,918	\$26,124	\$25,701	(\$423)

The \$423,000 decrease is due to a lower projected FY 2016 Working Capital Fund (WCF) bill due to decreased cellular wireless services.

Information technology services Mission Statement

The IT Services PPA supports development, implementation, and maintenance of: a comprehensive and integrated Enterprise Architecture, the information technology framework for the Department; IT program and portfolio governance; geospatial technologies; and information sharing.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
11.1 Full-time Permanent	-	-	\$4,886	\$4,886
12.1 Civilian Personnel Benefits	-	-	\$1,468	\$1,468
Total, Salaries & Benefits	-	-	\$6,354	\$6,354

The \$6,354,000 increase is due to the increase of FTE in the Digital Services Team program change.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
21.0 Travel and Transportation of Persons	\$150	\$150	\$295	\$145

The increase of \$145,000 in travel is associated with the Digital Services Team program request, as determined by the DHS cost module.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.1 Advisory and Assistance Services	\$22,108	\$21,945	\$45,783	\$23,838

The \$23,838,000 increase to advisory and assistance services is due to: the the transfer of the HSIN/COP program; Realignment - Information Sharing Environment Office and Records, Forms, and Printing; and the program increases for DHS Data Framework, Enterprise Implementation of Single Sign-On, Fusion Center Single Sign-On, Trusted Tester, and support for the Digital Services Team.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.3 Other Goods and Services from Federal Sources	\$1,655	\$1,655	\$8,639	\$6,984

The \$6,984,000 increase is due to the the transfer of the HSIN/COP program, Enterprise Implementation of Single Sign-On, and the working capital fund charges associated with the Digital Services Team program increase.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.7 Operation and Maintenance of Equipment	\$2,369	\$2,369	\$25,914	\$23,545

The \$23,545,000 increase is due to the the transfer of the HSIN/COP program and the DHS Data Framework and Enterprise Implementation of Single Sign-On program increase requests.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
26.0 Supplies and Materials	\$0	\$0	\$61	\$61

The \$61,000 increase is due to supplies and materials charges associated with the Digital Services Team program request, as determined by the DHS cost module.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
31.0 Equipment	\$0	\$0	\$6,716	\$6,716

The \$6,716,000 increase is due to the the transfer of the HSIN/COP program.

Infrastructure and Security Activities Mission Statement

Infrastructure and Security Activities (ISA) are a set of IT projects that provides integration and protection of sensitive DHS information. ISA funds manage infrastructure support, which includes support for network and data center services and DHS Component enterprise applications, and also provides funds to maintain Trusted Internet Connection (TIC) capability and move all network traffic behind the TIC. It also provides funding for the Information Security Program.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.1 Advisory and Assistance Services	\$18,289	\$20,417	\$19,641	(\$776)

The decrease of \$776,000 is partially due to the realignment of Information Sharing Environment Office funding from the ISA PPA to the ITS PPA and the program change increase for Cyber Security Remediation.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.3 Other Goods and Services from Federal Sources	\$0	\$0	\$2,600	\$2,600

The increase of \$2,600,000 is due to the FedRAMP Joint Authorization Board (JAB) program request.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.7 Operation and Maintenance of Equipment	\$68,911	\$30,737	\$30,860	\$123

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
--	----------------------------	-------------------------------	--------------------	------------------------------

The \$123,000 increase is the net of the transfer of Data Center Overhead security costs and the program decrease to the OneNet program.

Department of Homeland Security
Departmental Management and Operations
Office of the Chief Information Officer (CIO)
Homeland Secure Data Network
Summary of Requirements by Object Class
(Dollars in Thousands)

31.0 Equipment	\$6,915	\$3,415	\$3,415	-
Total, Other Object Classes	\$63,156	\$70,132	\$54,932	(\$15,200)
Adjustments	-	-	-	-
Unobligated Balance, start of year	-	-	-	-
Unobligated Balance, end of year	-	-	-	-
Recoveries of Prior Year Obligations	-	-	-	-
Total Requirements	\$63,156	\$70,132	\$54,932	(\$15,200)
Full Time Equivalents	-	-	-	-

Homeland Secure Data Network Mission Statement

The Homeland Secure Data Network (HSDN) PPA contains funding for a classified wide area network for DHS and its components, with specific and controlled interconnections to the intelligence community and federal law enforcement resources. Program funding for sharing and safeguarding classified information is also included.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.1 Advisory and Assistance Services	\$23,794	\$26,490	\$18,890	(\$7,600)

The \$7,600,000 decrease is partially due to a reduction in contractor support for the Sharing and Safeguarding Classified Information effort.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.7 Operation and Maintenance of Equipment	\$32,422	\$40,212	\$32,612	(\$7,600)

The decrease of \$7,600,000 is due to non-recurring O&M for the Sharing and Safeguarding Classified Information program.

BUDGET REQUEST AND SUPPORTING INFORMATION

Departmental Management and Operations DHS Headquarters Consolidation Project

I. Appropriation Overview

A. Mission Statement:

The focus of the DHS Headquarters (HQ) Consolidation Project is the co-location of the Department through lease consolidation and build out of the St. Elizabeths campus. The DHS HQ Consolidation Project enhances effectiveness by consolidation of HQ and Component executive leadership, operations coordination, policy and program management, and “mission execution” personnel who require a secure setting. DHS will optimize the real estate portfolio by increasing utilization efficiency integrating mobile workplace strategies.

The Management Directorate provides coordination, planning, policy, guidance, operational oversight, and innovative solutions for the management needs of the Department for the consolidated campus. The DHS HQ Consolidation Project appropriation allows the Department to provide overall management of the program.

B. Budget Activities:

The DHS HQ facilities portfolio is currently spread across more than fifty locations throughout the National Capital Region, many with sub-optimal security protections. The Department developed the DHS Headquarters Consolidation at the St. Elizabeths Campus in a secure setting. The collocation of the Secretary’s Headquarters with Component Leadership enhances command and control functions in preparation for response to natural disasters and terrorist attacks. This integrated approach allows DHS to effectively communicate and engage in critical events as they occur and share such information to help secure America.

C. Budget Request Summary:

The Under Secretary for Management requests 0 positions, 0 FTE, and \$215,822,000 for FY 2016. The FY 2016 request includes the following projects:

- St. Elizabeths Campus operational support costs (0 positions, 0 FTE, and \$11,545,000).
- St. Elizabeths HQ Consolidation construction costs (0 positions, 0 FTE, and \$178,321,000).
- St. Elizabeths HQ Consolidation Munro Reconfiguration costs (0 positions, 0 FTE, and \$25,956,000).

FY 2016 Total Request	-	-	\$204,277
Total Change 2015 to 2016	-	-	\$146,577

CURRENT SERVICES PROGRAM DESCRIPTION:

The HQ Consolidation Project requests 0 FTP, 0 FTE and \$204.277 million in FY 2016 for St. Elizabeths campus construction.

The DHS mission is to lead a unified national effort to secure America, yet the Department’s legacy facilities are currently dispersed in over fifty locations throughout the National Capital Region (NCR), adversely impacting critical communication and coordination across DHS Components. To support the incident management and command-and-control requirements of our mission, the Department developed the DHS Consolidated Headquarters at St. Elizabeths Campus in a secure setting. HQ Consolidation enables a strategic realignment of the real property portfolio in the NCR to more effectively and efficiently support the DHS mission. In addition, consolidation efforts contribute to reduced facility costs and provide quality workspace environments that attract and retain a professional workforce.

The FY 2014 Omnibus Appropriation provided partial funding for tenant requirements for the Center Building Complex, to include the physical construction of the tenant areas in the Center Building portion only. The FY 2015 request will complete the IT infrastructure, IT equipment, outfitting, commissioning, decommissioning and move costs for the Center Building for the future relocation of the Office of the Secretary and the attached surrounding buildings comprising the Center Building Complex. The FY 2016 request will support HQ Consolidation’s enhanced baseline plan, the development of the Center Building addition, construction for the future relocation of the Management Directorate in entirety to St. E’s, remaining build-out of DOC A and the employee assistance center/health unit, and the reconfiguration of the Munro Building.

MAJOR ACQUISITION

DHS HQ Consolidation

The DHS HQ Consolidation/St. Elizabeths Project- was designed to directly support the Department’s strategic goal to Strengthen and Unify DHS Operations and Management. Continued development of the DHS Consolidated Headquarters at St. Elizabeths through FY 2015 will allow the Department to enhance performance through improved communications, coordination and cooperation across all DHS Headquarters units. Consolidating will foster a “one-DHS” culture and optimize our prevention and response capabilities across the spectrum of operations. The DHS mission is to lead a unified national effort to secure America. Our mission demands an integrated approach to all hazards, yet the Department’s legacy facilities are dispersed over approximately 50 locations throughout the National Capital Region (NCR), sometimes with sub-optimal security protections and routinely impacting adversely critical communication, coordination, and cooperation across DHS components. To support the incident management and command-and-control requirements of our mission, the Department will continue development of the DHS Consolidated Headquarters at St. Elizabeths Campus in FY 2015 to house executive leadership, operations coordination, policy and program management functions in a secure setting.

FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Funding (\$\$\$ thousands)	FY 2016 Activity Request (\$\$\$ thousands)
\$35,000 ¹	\$57,000 ²	\$204,277 ³

Note 1: The FY 2014 Enacted provided \$35 million for the project. Within this \$35 million total, \$10.478 million was allocated to the Technology Integration Program (TIP).

Note 2: Within the enacted total, \$31.849 million will be allocated to the TIP.

Note 3: Within the requested level, \$0 million is planned to be allocated to the TIP.

2016 Adjustments-to-Base	-	-	(\$3,755)
FY 2016 Current Services	-	-	\$11,545
FY 2016 Program Change	-	-	-
FY 2016 Total Request	-	-	\$11,545
Total Change 2015 to 2016	-	-	(\$3,755)

CURRENT SERVICES PROGRAM DESCRIPTION:

The HQ Consolidation Project requests 0 FTP, 0 FTE and \$11.545 million in FY 2016 for St. Elizabeths campus support costs. This is a decrease of \$3.755 million from the FY 2015 Presidents Budget. Base adjustments are as follows:

- A transfer of \$3.376 million to the Office of the Chief Security Officer (OCSO) for space occupancy and a portion of security costs to be paid through the Working Capital Fund (WCF).
- A decrease of \$0.379 million for planned reductions to campus security.

The St. Elizabeths campus requires the continued services of a campus security guard force. The campus is designed to provide for the detection and deterrence of unlawful intrusion and for the protection of personnel, property, and information. Consolidating DHS facilities at the St Elizabeths campus ensures that DHS maintains the Interagency Security Committee (ISC) Level 5 security designation and provides for the proper security of personnel, property, and information. With requested funding, DHS will acquire certified contractor support at the St. Elizabeths campus to maintain systems operations, provide operation and maintenance of dedicated security IT equipment for the campus (managed through the OCSO), provide operational software licenses, replace parts for damaged or worn equipment, troubleshoot call reporting, and respond to any critical system failures.

FY 2016 St. Elizabeths Support Cost Funding Profile (\$ thousands)

St. Elizabeths Physical Security IT O&M	2,500
Campus Security Guard Force Requirements (Perimeter and Non-Perimeter)	9,045
Total HQ Consolidation Support Costs	11,545

IV. Program Justification Changes

**Department of Homeland Security
DHS Headquarters Consolidation Project
Justification of Program Changes**
(Dollars in Thousands)

Program Increase 1: St. Elizabeths Construction
PPA: HQ Consolidation - St. Elizabeths
Program Increase: Positions 0, FTE 0, Dollars \$178,321

Funding Profile

	FY 2014 Revised Enacted			FY 2015 President's Budget			FY 2016 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$0
Program Increase							0	0	\$178,321
Total Request	0	0	\$35,000	0	0	\$57,700	0	0	\$178,321

Description: The HQ Consolidation program is requesting \$178.321 million for St. Elizabeths construction. The funding will support the development of the Center Building Addition, construction for the future relocation of the entire Management Directorate to St. E’s, remaining build-out of DOC A and the Employee Assistance Center/Health Unit. The HQ Consolidation Program has revised the development strategy from the last OMB Approved Revised Baseline in June 2013 to the new Enhanced Plan. The current program of record envisioned 300,000 square feet severable segments with the old space standards that are more or less “market sized” chunks instead of full complete component requirements. The plan was also based on traditional workplace design methodologies with a 1:1 employee seat to staff ratio resulting in a total office space requirement at St. Elizabeths of 4.5 million gross square feet. Since that time, the operational and real estate landscape has changed across the Federal Government in general and within DHS in particular. DHS is no longer in a growth mode, and the current austere budget environment has required agencies to take a harder look at their real property costs. Elements impacting the current real property environment include:

- Executive Orders to reduce real property occupied by Federal agencies including Environmental, Energy, and Economic Performance and OMB’s “Freeze the Footprint” to halt the expansion of office and warehouse space.
- Emerging trend in the workplace towards “flexible workspace” designs and proliferation of remote teleworking.

In response to the changing budget environment, GSA and DHS have developed an updated or “Enhanced” Consolidation Plan. The Enhanced Plan authorizes the first change in requirements for this project: a reduction in both scope and projected cost in recognition of the changing workplace design standards, and the Administration’s commitment to reduce the federal real property portfolio through the “Freeze the Footprint” initiative.

The Enhanced Plan delivers the goals of the original consolidation plan at a lower cost and in a shorter timeframe than the current revised baseline plan. It does so by adopting new and smaller space standards, implementing flexible workplace strategies and realigning the lease expirations that are now out of sync with the development schedule due to funding reductions.

The Enhanced Plan saves money by reducing overall construction at St. Elizabeths with total office space requirement reduced by nearly 900,000 gross square feet and reducing space requirements at other anchor locations within the NCR.

Justification: The DHS Headquarters facilities portfolio is scattered throughout the National Capital Region. With the U.S. Coast Guard Headquarters complete and funding provided in the FY 2014 Omnibus Appropriation to start the Center Building portion of the Center Building Complex, it is critical for the Department to continue with development and impending occupancy of the DHS Headquarters Consolidation at the St. Elizabeths Campus. The collocation of the Secretary's Headquarters with Components will enhance command and control functions in the preparation for the response to natural disasters and terrorist attacks. This integrated approach will allow DHS to effectively communicate and engage in critical events as they occur and share such information to help secure United States of America.

Impact on Performance: This project directly supports the Department's Strategic Plan goal to Strengthen and Unify DHS Operations and Management. Continued development of the Consolidated DHS Headquarters campus at St. Elizabeths is vital to enhance command, control, planning and response to functions of the Department.

**Department of Homeland Security
DHS Headquarters Consolidation Project
Justification of Program Changes**
(Dollars in Thousands)

Program Increase 2: Munro Building Reconfiguration
PPA: HQ Consolidation - St. Elizabeths
Program Increase: Positions 0, FTE 0, Dollars \$25,956

Funding Profile

	FY 2014 Revised Enacted			FY 2015 President's Budget			FY 2016 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$0
Program Increase							0	0	\$25,956
Total Request	0	0	\$0	0	0	\$0	0	0	\$25,956

Description: The HQ Consolidation program is requesting \$25.956 million for St. Elizabeths to reconfigure the Douglas A. Munro U.S. Coast Guard Headquarters Building at St. Elizabeths to increase utilization in accordance with the DHS Revised Real Property Cost Savings and Innovation Plan (CSIP), also known as the “Freeze the Footprint Plan.” The CSIP proposes to achieve savings throughout the DHS Real Property portfolio through the adoption of flexible workplace strategies and new smaller space standards that have gained wide acceptance over the last several years. The DHS goal in the CSIP is to achieve an average of 150 useable square feet per person utilization rate.

The Douglas A. Munro Coast Guard Headquarters Building was designed in 2009 based on traditional workplace design methodologies and space standards in effect at that time that averaged in excess of 200 useable square feet per person.

Since that time, the operational and real estate landscape has changed across the Federal Government in general and within DHS in particular. DHS is no longer in a growth mode, and the Department is taking a harder look at its real property costs.

In response to this changing environment, GSA and DHS have developed an updated or “Enhanced” Consolidation Plan. The Enhanced Plan authorizes the first change in requirements for this project: a reduction in both scope and projected cost in recognition of the changing workplace design standards, and the Administration’s commitment to reduce the federal real property portfolio through the “Freeze the Footprint” initiative.

The Enhanced Plan delivers the goals of the original consolidation plan at a lower cost and in a shorter timeframe compared to the current revised baseline plan by adopting new and smaller space standards, implementing flexible workplace strategies and realigning the lease expirations that are now out of sync with the development schedule due to congressional funding reductions.

The foundation of the Enhanced Plan is to increase utilization of the Munro Building, accommodating more personnel than originally designed for, thereby reducing construction requirements at St. Elizabeths and the overall DHS real property portfolio.

The Munro Building Optimization initiative will include minor physical construction modifications to maintain unit and organizational identity for the additional occupants, the purchase of additional outfitting and reconfiguration of existing outfitting to accommodate the increased personnel load; information technology and electronic physical security reconfiguration; and move/commissioning/decommissioning costs to receive new occupants and close-out their existing lease locations.

Optimizing the Munro Building has the potential to reduce development at St. Elizabeths by up to 273,000 gross square feet of building construction.

Justification: The DHS Headquarters facilities portfolio is scattered in over 50 locations throughout the National Capital Region, many with sub-optimal security protections. With the U.S. Coast Guard Headquarters complete and the FY 2014 Omnibus Appropriation provided funding to start the Center Building portion of the Center Building Complex, it is critical the Department continue the development of the DHS Headquarters Consolidation at the St. Elizabeths Campus to complete and occupy these facilities. The collocation of the Secretary's Headquarters with Components will enhance command and control functions in the preparation for the response to natural disasters and terrorist attacks. This integrated approach will allow DHS to effectively communicate and engage in critical events as they occur and share such information to help secure America. Increasing utilization of the Munro Building provides the lowest cost alternative for the full development of the campus for both DHS and GSA.

Impact on Performance: This project directly supports the Department's Strategic Plan goal to Strengthen and Unify DHS Operations and Management. Continued development of the Consolidated DHS Headquarters campus at St. Elizabeths is vital to enhance command, control, planning and response to functions of the Department.

V. Exhibits and Other Supporting Material

A. Justification of Proposed Legislative Language

For necessary expenses to plan, acquire, construct, renovate, remediate, equip, furnish, and occupy buildings and facilities for the consolidation of department headquarters at St. Elizabeths and associated mission consolidation, and to fund operational costs within the St. Elizabeths Operations Center, [\$73,000,000] **\$215,822,000**¹ to remain available until expended.

St. Elizabeths Support Costs Mission Statement

The purpose of the HQ Consolidation Project is to consolidate the majority of the Department into a single site campus to effectively and efficiently support the Department's mission. St. Elizabeths support costs allow the Department the required resources to manage these vital functions to support Component occupancy.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
23.1 Rental Payments to GSA	\$0	\$3,515	\$139	(\$3,376)

The FY 2016 request includes the transfer of \$3.376 million of support funding to the Office of the Chief Security Officer for space and security requirements. These costs were funded under the U.S. Coast Guard budget in FY 2014.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.3 Other Goods and Services from Federal Sources	\$0	\$11,785	\$11,406	(\$379)

The FY 2016 request includes the decrease of \$379,000 for planned reductions to campus security.

BUDGET REQUEST AND SUPPORTING INFORMATION

Departmental Management and Operations Working Capital Fund

I. Appropriation Overview

A. Mission Statement:

The Working Capital Fund's (WCF) mission is to deliver cost-effective support services throughout DHS. The goal of the Under Secretary for Management is to maintain and operate a fund that promotes economy, efficiency, accountability, and to apply best practices from the public and private sectors for improving organizational performance, operational efficiencies, and ensure full cost recovery of goods and services for selected DHS costs associated with agency-wide programs, activities, and services.

The WCF provides a mechanism for Enterprise-wide services to be allocated and recouped from the consuming Component. The WCF facilitates the delivery and oversight of these services and supports selected services, activities, and programs that benefit numerous DHS organizational Components.

The WCF is continually evaluating its programs and operations with the goal of achieving across-the-board economies of scale that result in increased efficiencies and cost savings by the Working Capital Fund Governance Board (WCFGB). The WCFGB sets policy, evaluates program requirements, and tracks performance outcomes for all existing and new WCF activities. The WCFGB is comprised of six permanent Deputy Chief Executive Officers (CXOs) and ten revolving Component representatives. In an effort to control administrative spending across the Department, the WCF's FY 2016 budget includes a cost savings adjustment totaling \$3.06 million.

B. Budget Activities:

Fee for Service Activities

The largest PPA of the four PPAs, the Fee for Service activity, includes 30 separate activities, which provide or coordinate delivery of a specific service or benefit to DHS Components. The benefit/cost for providing the WCF activity is tangible and is directly linked to a Component's use of services or products. These WCF activities are reimbursed for the provision of services, and have characteristics typical of a business enterprise. The costs for operating the "business" are reimbursed by billing customers for the provision of goods and services at rates that are briefed and approved by the WCFGB. Each fee for service activity is expected to recover its operational expenses, usually at a much lower cost as the Components benefit from economies of scale. Examples include: General Services Administration (GSA) rent and real estate services, IT and telecommunication services, human resource services, procurement operations, and financial management services.

Government-wide Mandated Activities

Government-wide Mandated Activities include 14 activities which are Administration-sponsored initiatives managed by a designated Federal department to improve overall government performance. Customers are assessed for the cost of supporting the activity. The activities should also provide a direct benefit to participating Components. Examples include government-wide e-Government initiatives and the OMB-sponsored Interagency Councils such as Human Resources Line of Business, Financial Management Line of Business, and e-Gov Benefits.

DHS Crosscutting Activities

The DHS crosscutting activities include three activities which are Department-wide programs managed by a single office that yield some benefit to all DHS Components. Customers are assessed for the cost of supporting the activity. There are three activities within this PPA including Strategic Sourcing, Capital Planning and Investment Control, and Chief Procurement Officer (CPO) Shared Reporting. The actual costs of the programs are recouped by redistributing the costs to the Components based on their share of the discretionary budget, staffing or some other fair and equitable pro-rata basis.

WCF Management Activity

The WCF Management Activity is comprised of one activity for WCF operations and includes funding for the staff that develops WCF policy and procedures, formulates and executes the WCF budget, and facilitates dispute resolution of issues between service providers and customers.

C. Budget Request Summary:

The DHS WCF operating requirements for FY 2016 are estimated at \$748,577,966 in reimbursable authority and 529 FTE. This is a net change of \$57,853,942 and 0 FTE compared to the FY 2015 President's Budget. Of this net change:

Adjustment to Base:

- Decrease of \$3.064 million in efficiencies.
- Decrease of \$1.35 million for a base adjustment for Human Capital Business Systems (HCBS) transfer of payroll functions to the National Finance Center (NFC).
- Increase of \$0.187 million for 2016 pay inflation.
- Increase of \$0.561 million for annualization of 2015 pay raise.
- Increase of \$0.206 million for increased security requirements at St. Elizabeths for GSA Rent.
- Increase of \$0.807 million in staffing needs for Financial Operations activity.
- Increase of \$0.115 million in staffing needs for WCF Operations activity.
- Increase of \$0.057 million for updating the Oracle Database for the Treasury Information Executive Repository (TIER) activity.

- Increase of \$6.2 million to allow for the necessary licenses and Operations and Maintenance (O&M) costs for utilizing the WebTa application for the NFC Payroll Services and Reporting activity.
- Increase of \$49.193 million for the expansion of current Enterprise License Agreement (ELA) suites.

Program Changes:

- A decrease of \$0.107 million for e-Rulemaking for the removal of the e-Docket Support System, which was transferred to the Regulatory Services activity.
- A decrease of \$1.655 million due to a reduction in Network operations for DHS OneNet.
- An increase \$0.133 million for HQ Human Capital Services for HQ drug testing program.
- An increase of \$2.3 million for Human Capital Business System for USA Staffing consolidation.
- An increase of \$4.019 million in CLAN Operations to support new services; including desktop refresh, telephony, and video teleconferencing for the DHS enterprise TS/SCI Network.
- An increase of \$0.251 million for the inclusion of a new activity, Regulatory Services.

The WCF will continue all services and activities from the FY 2015 President's Budget. The net increase from FY 2015 to FY 2016 includes an increase of \$57.8 million in Fee for Service Activities, a decrease of \$0.107 million in Government-wide Mandated Activities, an increase of \$0.015 million in DHS Crosscutting Activities, and an increase of \$0.126 million in Working Capital Fund Operations.

1. \$995,654 was rescinded in FY 2014 from the Working Capital Fund Legacy Corpus account which is not reflected in the chart above as it is not part of the current WCF PPA structure.

III. Current Services Program Description by PPA

**Department of Homeland Security
Working Capital Fund
Fee for Service Activity
Program Performance Justification**
(Dollars in Thousands)

PPA: Fee for Service Activity

	<u>Perm. Pos.</u>	<u>FTE</u>	<u>Amount</u>
FY 2014 Revised Enacted	508	508	\$785,530
FY 2015 President's Budget	514	514	\$655,906
2016 Adjustments-to-Base	-	-	\$52,771
FY 2016 Current Services	514	514	\$708,677
FY 2016 Program Change	-	-	\$5,048
FY 2016 Total Request	514	514	\$713,725
Total Change 2015 to 2016	-	-	\$57,819

The Working Capital Fund requests \$713.7 million and 514 FTE for the Fee for Service activity in FY 2016. This is a net increase of \$57.8 million from the FY 2015 President's Budget. This request includes a request to include Regulatory Services as a new activity. Base adjustments include:

- Increase of \$0.542 million for the 2016 pay raise.
- Increase of \$0.180 million for the 2015 pay raise annualization.
- Increase of \$0.206 million for increased security requirements at St. Elizabeths for GSA Rent.
- Increase of \$0.807 million in staffing needs for Financial Operations.
- Increase of \$0.057 million for updating the Oracle Database for the TIER activity.
- Increase of \$6.2 million to allow for the necessary licenses and O&M costs for utilizing the WebTa application for the NFC Payroll Services and Reporting activity, which includes a transfer from Human Capital Business Systems (HCBS).
- Increase of \$49.19 million for the expansion of current Enterprise License Agreements suites which include Symantec, Oracle and Adobe.
- Decrease of \$3.06 million in NCRIO and parking services efficiencies.
- Decrease of \$1.35 million base adjustment to Human Capital Business Systems transfer of payroll functions to the National Finance Center.

Program Changes Include:

- An increase \$0.133 million for HQ Human Capital Services for HQ drug testing program.
- An increase of \$2.3 million for HCBS for USA Staffing consolidation.
- An increase of \$4.02 million in C-LAN Operations to support new service including desktop refresh, telephony, and video teleconferencing for the DHS enterprise TS/SCI Network.

- An increase of \$0.251 million for Regulatory Services which was transferred from the eRulemaking activity under the Government-Wide PPA to the Fee for Service PPA.
- A decrease of \$1.66 million for the reduction of Network Operations center for the DHS OneNet activity.

CURRENT SERVICES PROGRAM DESCRIPTION:

GSA Rent – Fee for Service Activity - \$144.1 million

Description of Service: The WCF Rent Activity assists customers with initiating requests for new space and working with the General Services Administration (GSA) to identify, procure, and construct appropriate office space. The WCF Rent Activity also manages space assignments and growth requirements for all existing locations within the DHS National Capital Region (NCR) portfolio, as well as reducing the DHS footprint through consolidation and telework initiatives. Along with space management, the activity is also tasked with fairly allocating the rent costs incurred for each location among the components. Costs include rental payments to GSA, Federal Protective Service (FPS) charges, and funding reimbursable agreements with GSA for overtime utilities. Centrally managing these costs and transactions through the WCF enables the Department to provide greater efficiency to its Components.

Other responsibilities of the WCF Rent Activity include managing and forecasting space and budget requirements and developing Housing Occupancy Plans to maximize the utilization of space. As effective stewards of the GSA Rent Activity, a space/rent analyst is assigned to each Customer in order to provide and meet all space related requirements, (i.e., reducing and expanding space by identifying personnel counts).

Managing Office: Office of the Chief Readiness Support Officer (OCRSO)

Pricing Basis: Pricing is based on prior year actuals plus lease escalations between 1.01 and 1.04 for the future years. New locations are based on the Occupancy Agreement amounts and a base security charge of \$0.74/sq. ft. plus escalation charges.

Cost Allocation Methodology: Customers are charged on the space they occupy in each building. The square footage is multiplied by the price per rentable square foot cost for each building. The per building rentable square foot price is based on GSA rent and includes FPS charges, overtime utilities, antenna charges, and DHS shared space.

Full Time Equivalent (FTE): This activity requires 5 FTE.

Research Library & Information Services (RLIS) – Fee for Service Activity - \$9.6 million

Description of Service: The Department of Homeland Security (DHS) Library and Information Services mission is to provide DHS program managers and their end users with timely desktop access to mission critical, authoritative, commercial information content, products and services. The activity was established in 2004 to implement DHS-wide information assets supporting decision making, enforcement, investigation, and research and academic information gathering activities of the

DHS workforce.

The activity collaborates with the Library of Congress (LOC) program through which the LOC shares its expertise in information services and consolidates buying power for Federal agencies.

Managing Office: Office of the Chief Information Officer (OCIO)

Pricing Basis: Pricing is based on stakeholders selected subscriptions and a cost proposal received from the vendor, plus 5 percent inflation charges.

Cost Allocation Methodology: The costing algorithm is based on three differing service types: enterprise-wide availability, account specific availability, and percentage of use.

Enterprise-wide Availability: Services are available enterprise-wide and made available to all DHS personnel as identified by Internet Protocol (IP) authentication. The cost distribution for these services is based on FTE numbers approved by the Office of the Chief Financial Officer. Examples of products provided under the enterprise-wide service plan include subscriptions to Leadership Directories, Newsbank, EBSCO Information Services, ASTM International, National Fire and Protection Association, and the Oxford English Dictionary.

Account Specific Availability: Services are available based on specific account availability and accessed using vendor provided user names and passwords. The cost for these services is distributed based on the actual cost of the user subscription service including applicable LOC fees. West Government Services is one of the products provided under this type of service plan and only used by certain DHS Components.

Percentage of use: Under this service plan, products and subscriptions can be accessed by all DHS Components using their user names and passwords. The cost for these services is distributed to each component organization based on prior usage percentages related to the annual product cost. Westlaw is one of the products provided under this type of service plan.

Full Time Equivalent (FTE): This activity requires 4 FTE.

Finance & Accounting Shared Services – Fee for Service Activity - \$22.5 million

Description of Service: The Immigration and Customs Enforcement /Office of Financial Management (ICE/OFM) provide the following services for its DHS Component customers: Financial Processing, Financial Analysis & Reporting, Financial Policy and Procedure, Administration, and External Reviews & Inquiries.

- Financial processing activities include: Cash management, Debit voucher processing, Reimbursable & receivables, Intra-Governmental Payment and Collection (IPAC) & Non-224 (Collection and Disbursement), Obligation Management, Payroll Accounting, Permanent Change of Station (PCS) Coordination, Government Cards Processing, Invoice Payment, Federal Financial Management System (FFMS) On-site Support, collections and reimbursable agreements, and budgetary resources.

- Financial statements reporting and issue resolution include General ledger maintenance, DHS & Treasury Financial Reporting, Financial data management, Financial analysis, Audit Support, Trading Partner Reconciliation, and Capitalized Property.
- Financial Policies and Procedures: In conjunction with all involved parties, ICE supports the implementation of any new or modified financial management procedure for processing and reporting financial transactions. In addition, ICE works to establish appropriate policies, procedures, and standards for business process activities.
- Administration (including Customer Service): ICE provides administrative tasks associated with ongoing management and resourcing of financial operations on behalf of the DHS customers. Examples of these activities include Continuity of Operations Planning (COOP), customer outreach and evaluation of services, and financial management group meetings.
- External Reviews and Inquiries: When appropriate, ICE provides responses to financial management and reporting related questions and data requests from external sources including independent auditors, the Inspector General's Office, Government Accountability Office and Congressional offices and staff.
- Financial Systems: ICE provides financial system support tasks to include hosting and maintenance of Federal Financial Management System (FFMS); administration of contract for FFMS training; FFMS and E-travel User Access; FFMS and E-travel Help Desk; Support of DHS systems modernization efforts; and system updates and enhancements.

Managing Office: Immigration and Customs Enforcement (ICE)

Pricing Basis: Pricing is based on the actual cost derived from the Customer Billing Model (CBM) of the prior year plus a 2 percent inflation rate or inflation rate guidelines provided by the WCF.

Cost Allocation Methodology: The cost allocation methodology for this activity is based on the historical cost of providing the following seven categories of financial support to each participating component: (1) financial reports, (2) obligations and payment processing, (3) system usage, (4) receipts, (5) payroll, (6) overhead, and (7) travel and cash management services.

Full Time Equivalent (FTE): This activity requires 0 FTE.

Financial Statement Audit - Fee for Service Activity - \$13.0 million

Description of Service: The DHS Office of the Inspector General (OIG) awards a contract to an independent Certified Public Accounting firm to perform financial statement audit functions. The costs under the contract include travel and incidental expenses associated with the performance of the audit as permitted by the contract and maintained by the OIG as the Contracting Officer Representative (COR). The award is made under a GSA schedule contract.

The Office of the Inspector General is the COR for the Financial Statement Audit contract. The OIG provides oversight of the contract auditor and established the scope of the work in order to estimate

cost information for performing the audit. The cost includes billable hours, travel and incidental expenses associated with the performance of the audit based on the scope of audit work to be performed each year.

The Office of the Chief Financial Officer (OCFO) coordinates and prepares the DHS consolidated financial statements and acts as primary liaison for the auditors. All DHS Departmental CFOs coordinate with the OCFO Director of Financial Management to prepare financial statements and satisfy the audit requirements.

Cost Allocation Methodology: The costs are a result of the Independent Auditor's billable hours, travel, and incidental costs associated with the performance of the audit as permitted by the contract maintained by the OIG as the COR. The OIG prepares the scope of work and the audit firm provides their estimate for completing the work. The cost allocation methodology is the estimated auditor's billable hours per Component multiplied by the hourly rate plus travel and incidental costs.

Managing Office: Office of the Chief Financial Officer (OCFO)

Pricing Basis: Pricing is based on prior year actual audit costs, which is derived by an estimate for the current year's audit contract submitted by the OIG.

Full Time Equivalent (FTE): This activity requires 0 FTE.

Internal Control Audit - Fee for Service Activity - \$1.2 million

Description of Service: The DHS Office of the Inspector General (OIG) awards a contract to an independent Certified Public Accounting firm to perform internal control audit functions. The costs include travel and incidental costs associated with the performance of the audit as permitted by the contract and maintained by the OIG as the Contracting Officer's Representative (COR). The award is made under a GSA schedule contract.

The Office of the Chief Financial Officer coordinates the assessment process to support managements assertion on internal controls and in this role acts as primary liaison for the auditors. All DHS Departmental CFOs coordinate with the Director of Financial Management in the preparation of and completion of the independent audit, and the Director of the Risk Management and Assurance on management's assessment of internal controls.

Managing Office: Office of the Chief Financial Officer (OCFO)

Pricing Basis: Pricing is based on prior year actual audit costs, which is derived by an estimate for the current year's audit contract submitted by the OIG.

Cost Allocation Methodology: The costs are a result of the Independent Auditor's billable hours, travel, and incidental expenses associated with the performance of the audit as permitted by the contract maintained by the OIG as the COR. The OIG prepares the scope of work and the audit firm provides their estimate for completing the work. The cost allocation methodology is the estimated auditor's billable hours per component multiplied by the hourly rate plus travel and incidental costs.

Full Time Equivalent (FTE): This activity requires 0 FTE.

Financial Management Support (OFO) – Fee for Service Activity - \$4.8 million

Description of Service: Financial Services is a line of business under Financial Management in the Office of Financial Operations that provides financial management services to the offices within the Office of the Secretary and Executive Management (OSEM), the Under Secretary for Management (USM), the Office of the Chief Financial Officer (OCFO), and the Office of the Chief Information Officer (OCIO). The OFO activity manages the processing of multiple types of financial documents and transactions for its customers as well as Fed Traveler Help Desk Support.

This funding provides the personnel and materials to perform the following activities:

- Procurement requisition operations and management;
- Invoice and Inter-governmental Payment and Collection System (IPAC) operations and management;
- Travel operations support and management;
- Payroll reclassification, reconciliation, and reporting management;
- End of Fiscal Year closeout coordination and support;
- Travel cards operations and management;
- Purchase card operations management; and
- Overall financial management services and oversight.

In addition, the OFO Activity supports internal control functions for headquarters. The internal control function assesses entity-level controls and conduct OMB Circular A-123 process assessments of financial reporting processes for General Ledger Management and oversees the reconciliation of the Fund Balance with Treasury for OSEM and USM offices. The internal control function helps the Office of Financial Operations meet the requirements of the Federal Managers' Financial Integrity Act and provide the required annual internal control assurance to the Secretary for Departmental Management offices.

Managing Office: Office of the Chief Financial Officer (OCFO)

Pricing Basis: Pricing is based on the projected cost of total staff and associated personnel support costs (supplies, travel, training), contract support costs required to maintain current services (based on prior years contract costs), and the projected assessments for shared service costs.

Cost Allocation Methodology: The cost allocation methodology is the percentage of FTEs per office utilizing Financial Management Support multiplied by the total estimated cost of the activity.

Full Time Equivalent (FTE): This activity requires 32 FTE.

Bankcard Program - Fee for Service Activity- \$0.05 million

DHS has selected Customs and Border Protection (CBP) as the servicing agent to provide a centralized invoicing and payment system for components within DHS. CBP has developed and implemented a system that supports the receipt of daily invoices for all of DHS.

This system assures payment of invoices within one business day of receipt, and provides transmission of an electronic file containing transaction data to each component's accounting system.

Managing Office: Office of the Chief Financial Officer (OCFO)

Pricing Basis: Pricing is based on a Memorandum of Understanding between Department of Management and Operations (DMO) and CBP, the servicing agent, and consists of personnel costs to process daily bankcard transactions.

Cost Allocation Methodology: The cost allocation methodology for this activity is based on an estimate of the time it takes CBP personnel to process daily bills for Components and the number of special reports requested by Components.

Full Time Equivalent (FTE): This activity requires 0 FTE.

Treasury Information Executive Repository (TIER) – Fee for Service Activity - \$0.7 million

Description of Service: The DHS CFO's office is responsible for creating the Department-wide financial statements. TIER is the application used by the DHS OCFO to create automated Department-wide financial statements. TIER is critical for monthly, quarterly, and annual reporting requirements, meeting accelerated timeframes for financial statement audit deliverables and producing the Annual Financial Report. DHS's use of TIER has benefited the entire Department by the cost and resource savings involved in being able to produce financial statements in a timely, automated manner.

Managing Office: Office of the Chief Financial Officer (OCFO)

Pricing Basis: Pricing is based on the IT hosting and software licensing costs, which are set by the Office of the Chief Information Officer and external software vendors. The operations and maintenance support contract is based on an established firm, fixed-price contract with discounted rates.

Cost Allocation Methodology: The cost allocation methodology for this activity is average cost equally distributed to the 15 financial reporting Components.

Full Time Equivalent (FTE): This activity requires 0 FTE.

National Finance Center (NFC) Payroll/Services and Reporting – Fee for Service Activity - \$39.0 million

Description of Service: The Department of Agriculture's (USDA) NFC provides the payroll operational support for the Department providing Payroll/Personnel services utilizing their legacy mainframe systems (payroll), WebTA (time and attendance) and EmpowHR PeopleSoft application (personnel). In addition, NFC provides Payroll/Personnel policy support and benefits reconciliation, tax reporting, and payroll problem resolution. NFC Payroll/Personnel services billed to DHS components include Earnings and Leave and Personnel Benefits statements; USDA OIG oversight of non-USDA Payroll processing; Payroll Operations branch support, claims, ad-hoc reporting; and debt

management. Along with NFC Payroll/Personnel services and EmpowHR hosting, NFC provides hosting services for the WebTA application.

Managing Office: Office of the Chief Human Capital Officer (OCHCO)

Pricing Basis: Pricing is based on known requirements for the budgeted Fiscal Year for payroll and personnel services (charges based on the number of bi-weekly employment payments), EmpowHR operations and maintenance (based on the total number of W-2's processed), Oracle EmpowHR licenses (based on number of DHS EmpowHR license users), and Web time and attendance hosting (charges based on the number of W-2s).

Cost Allocation Methodology: Component's cost allocation methodology is based on cost drivers which include pieces of mail (e.g. leave and earning statements, W-2, etc.), checked mailed, average number of employees paid, receivables established, claims processed, CPU minutes, number of manual garnishment accounts and NFC labor cost for the following:

COST AREA	COST DRIVER
Postage-Earnings and Leave and Personal Benefits Statements	Pieces of mail
Treasury FMS Postage Charges for Single Address Checks	Checks mailed
USDA OIG Oversight of Non-USDA Payroll Processing	Average # of employees paid*
Payroll Operations Branch Support	Average # of employees paid*
Tax Reporting	Average # of employees paid*
Payroll Policy Support	Average # of employees paid*
e-Pay Policy Support	Average # of employees paid*
Benefits Reconciliation and Liaison Area	Average # of employees paid*
Debt Management	Receivables established
Claims	Claims processed
Payroll Accounting	Average # of employees paid
Certification	Average # of employees paid
Ad-Hoc reporting (based on CPU Minutes used)	CPU Minutes
Data Center Operations (Other than FOCUS)	Average # of employees paid
Payroll/Personnel Baseline Services	Average # of employees paid
3 rd Party Garnishment Processing	# of manual garnishment accounts & NFC labor cost

* NFC adds together the number of employees paid for each pay period and divides by 26 for an average (which totals the number of pay periods in a year). For any given pay period, the number of active employees may increase or decrease; therefore, NFC averages the calculation cost.

Full Time Equivalent (FTE): This activity requires 0 FTE.

HQ Human Capital Services (HCS) -Fee for Service Activity- \$13.3 million

Description of Service: HCS activity provides processing of personnel actions, employee labor relations and benefits services to Headquarters (HQ) customers only. Examples of other services provided include: staffing and recruitment; position classification/position management; performance management; payroll and personnel action processing; employee and labor relations support; retirements and benefits support; time and attendance support; delegated examining unit (DEU) administration, audits and quality control services; onboarding and off boarding of employees; Employee Assistance Program (EAP) services; and new employee and other leadership/supervisory training to support ongoing initiatives.

HCS also provides Executive Resource services which includes a broad range of operational support in assisting HQ offices in recruiting and hiring/on-boarding executives and political appointees. Some of these services consist of continued support and guidance upon entrance on duty; organization and coordination of statutory Executive Resource Boards; and Performance Review Boards to ensure adequate oversight of the Department's executive cadre.

Managing Office: Office of the Chief Human Capital Officer (OCHCO)

Pricing Basis: Pricing is based on personnel support costs to maintain services in CYBERFEDS, Employee Retirement Services Tool, and USAStaffing systems. Example of services include: continued support/guidance upon entrance on duty; organization and coordination of statutory Executive Resources Boards; and Performance Review Boards to ensure adequate oversight of the Department's executive cadre.

Cost Allocation Methodology: The cost allocation methodology is a pro-rata share based on the percent of each HQ Component's FTE divided by the total number of participating Components' FTE multiplied by the total estimated cost of the activity.

Full Time Equivalent: This activity requires 81 FTE.

Human Capital Business Systems (HCBS) – Fee for Service Activity -\$9.2 million

Description of Service: The mission of the HCBS activity is to maintain and support DHS enterprise-wide human capital business systems and reduce costs by consolidating the number and variety of DHS human capital systems. The systems' capabilities meet the requirements specified by the user-community and provide services in a timely and cost-effective manner by avoiding considerable duplicative costs if DHS components proceeded independently.

HCBS supports several enterprise-wide systems to include: web-based Time & Attendance; Personnel and Payroll; the Personnel Accountability System; and the Enterprise Integration Environment (EIE) which allows hosting and integration of enterprise application data.

Managing Office: Office of the Chief Human Capital Officer (OCHCO)

Pricing Basis: Pricing is based on personnel support costs, and IT licenses. Support includes payroll, time and attendance systems and other necessary HR functions systems such as: EmpowHR, eOPF, and other enterprise HR services and applications to include support to the EIE and AXIS. HCBS employees also delivers help desk support, liaison and adjudication functions with the NFC, Office of Personnel Management's eOPF. HCBS employees provides project management oversight, financial management, budget and contract support for the deployment of enterprise-wide HR systems at the various DHS components

Cost Allocation Methodology: Costs are based on three billable areas: (1) FTE costs for providing HCBS operational support; (2) operations and maintenance of the HR systems and hosting environment; and (3) estimated costs for operational support and reporting (contract labor hours).

The cost allocation methodology for this activity is a pro-rata share based on the percent of each Component's FTE divided by total participating Components' FTE multiplied by the total estimated cost of the activity. Customers will only be billed for the areas for which they receive service.

Full Time Equivalent: This activity requires 21 FTE.

Flexible Spending Plan (FSP) - Fee for Service Activity - \$1.3 million

Description of Service: FSPs are employee-funded accounts that are used by the employee account holders to pay for medical expenses and dependent care costs that are not reimbursed by another source. Contributions to the account come from an employee's pre-taxed salary. There is a fee that is charged by the administrator of these accounts. Effective FY 2008, the law requires that an agency pay these fees on behalf of their employees.

Managing Office: Office of the Chief Human Capital Officer (OCHCO)

Pricing Basis: Pricing is based on the most recent bill received from OPM with an adjustment for inflation.

Cost Allocation Methodology: The cost allocation methodology is based on component's current year (at the time of planning) participation rates. The costs for this program are based on actual invoices received in October and March of each calendar year. The March bill includes employees of record as of January 1 of the calendar year. The October bill makes an adjustment for all new employees who have entered the program since January 1. The invoice process is managed by ADP Benefits and costs are billed to components based on actual invoices received from the vendor.

Full Time Equivalent (FTE): This activity requires 0 FTE.

DHS Senior Executive Service Candidate Development Program (SES CDP) – Fee for Service Activity - \$0.9 million

Description of Service: The SES CDP is a program approved by the Office of Personnel Management (OPM) which permits the certification of the executive qualifications of graduates by the OPM Qualifications Review Board (QRB) and selection for the SES without further competition. The SES

CDP serves as a cornerstone for sustaining a corporate leadership identity as directed in the DHS Strategic Plan, contributes to meeting succession planning goals, and creates a high-quality SES leadership cadre. It is also a critical element in sustaining a “Green” rating on OMB’s Human Capital Scorecard.

Candidates from across the Department are exposed to a core training program and will have the opportunity to participate in mentoring, developmental assignments, and other activities throughout the Department.

Managing Office: Office of the Chief Human Capital Officer (OCHCO)

Pricing Basis: Pricing is based on personnel support costs to maintain services and the actual tuition for students.

Cost Allocation Methodology: The costs are allocated based on the percentage of SES slots a Component has relative to the total DHS SES (or SES equivalent) population excluding military.

Full Time Equivalent: This activity requires 4 FTE.

HQ Leadership Development Program (HQ LDP) – Fee for Service Activity - \$0.3 million

The purpose of the HQ LDP is to provide leadership training to leaders at DHS Headquarters who are GS-14s, 15s, or members of the SES and to provide them with executive-level training to close potential competency gaps.

The HQ LDP includes the following programs:

- The Treasury Executive Institute (TEI) – TEI provides continuous learning and growth opportunities that meet the learning needs of Department executives, executive development candidates, and senior managers. TEI brings executives to the marketplace of ideas by exposing them to best practices in leadership models, new technologies, and executive competencies. TEI programs have provided both education and knowledge sharing opportunities among executives throughout the government since the creation of the Program in 1983. This Program is offered to DHS HQ Executives, GS-15s and GS-14s (at no additional charge).
- Federal Executive Institute (FEI) - The Leadership for a Democratic Society program, conducted by the Office of Personnel Management's Federal Executive Institute in Charlottesville, Va., helps executives develop broad corporate viewpoints, understand their constitutional roles, enhance essential skills, and improve government. Students link individual development to improved agency performance. The program addresses the Executive Core Qualifications of leading change, leading people, building coalitions/communication, results driven and business acumen. This program is offered to DHS HQ Executives and GS-15s.

Managing Office: Office of the Chief Human Capital Officer (OCHCO)

Pricing Basis: Pricing is based on a firm fixed price contract with the TEI and tuition cost for FEI.

Cost Allocation Methodology: Component's cost allocation methodology is based on the following factors: pro-rata share based on the number of SESs at DHS HQ.

Full Time Equivalent (FTE): This activity requires 0 FTE.

DHS One Net (formerly CIO/DHS Infrastructure Transformation (ITP) Program) – Fee for Service Activity - \$64.5 million

Description of Service: DHS OneNet Program is a group of interrelated initiatives designed to improve the Department's IT infrastructure by unifying disparate Component information technology networks, platforms, and services into a set of enterprise-wide IT Services. DHS OneNet includes Network Services (OneNet), Email Services (Email as a Service (EaaS)), Email Secure Gateway (EMSG), and the Trusted Internet Connection (TIC)/Policy Enforcement Points (PEP).

OneNet is the core unified environment and consolidation of legacy networks into one enterprise-wide, integrated network. OneNet provides the foundation for DHS's Information Sharing Environment (ISE). DHS's unclassified, classified, and secret networks utilize OneNet for information transport. Major services provided under OneNet include:

- DHS Wireless Access Network (WAN) services, including configuration management; engineering, technical requirements analysis and OneNet integration services;
- Network and security operations centers - Enterprise Network Operations Center (NOC) and Security Operation Center (SOC);
- Traffic modeling and performance analysis; and
- Network Management and IP address administration.

The OneNet network and security operations centers monitor and manage DHS's centralized systems and network infrastructure. Incident response and detection are coordinated and escalated within the network security and computing service groups, depending on the nature of the breach or failure. The OneNet NOC works with Component NOCs, Enterprise Data Operations Centers, and the Enterprise Operations Center to coordinate service restorations and troubleshooting. DHS is implementing enhancements to OneNet to meet unique Component security requirements and OMB mandates. These enhancements include TIC which includes High Assurance Gateways (HAG) and PEP.

The TIC initiative is the first of the President's Comprehensive National cyber security initiatives (HSPD-12/NSPD-54) and is led by OMB and DHS. The initiative is aimed at optimizing individual agency network services into a common solution for the Department. The TIC at the two enterprise data centers (DC1 and DC2) provides security controls across four services: the Internet; VPN; Extranet; and Application hosting that meets or exceeds Trusted Internet Connection Access Provider (TICAP) standards. The TICs are under the control of the enterprise SOC to ensure that the Department maintains the right balance between Internet access and security protections. Two specific initiatives within the TIC Services include the HAG and Reverse Proxy. The HAG protects the user's workstation from any malicious content, as well as attempts to infiltrate the users' system. Reverse Proxy provides secure network connectivity to applications that are not physically co-located with the Trusted Internet Connections at the Department's two Enterprise Data Centers, DC1 and DC2. The

HAG provides selected DHS personnel with access to malicious and prohibited websites that would typically introduce risks into the Enterprise. The HAG will allow access to information in a secure virtual environment, protect the user's workstation from any malicious attacks, and provide compensating controls for anonymous Internet site access.

Email Secure Gateway (EMSG) is part of the Department's defense in depth strategy. EMSG augments the security and protection provided by the TIC. The EMSG adds security protections to address malicious code possibly embedded within e-mails and prevents delivery of malicious code and other threats from entering into the DHS network.

PEP serves as the Component's trust zone gateway to the DHS enterprise and external sources, advancing the DHS's goal of unifying and maturing DHS through secure sharing and exchange of information. PEPs are a control point in the DHS network used to enforce policies, and monitor, capture, and playback network traffic. This reduces vulnerability and improves system access and implementation of information sharing policies across the Department through centralized change management.

EaaS, is a trusted Enterprise email system service with a common address list hosted at the Enterprise Data Centers. EaaS provides additional and comprehensive communication ability across DHS and to external Federal, State, local, tribal, international, and private sector partners. EaaS provides Components access to a common, Sensitive-but-Unclassified email system that includes Enterprise directory services. This system establishes a DHS standard for Components to share calendars and schedule meetings across organizations and delivers centralized access to DHS employee information (e.g., name, email address, phone number, etc.). As a result of this initiative, legacy email systems will be made obsolete, thus reducing overall email support costs, while increasing email efficiencies.

Managing Office: Office of the Chief Information Officer (OCIO)

Pricing Basis: Pricing is based on the DHS OneNet Network Services using the Independent Government Cost Estimates, Bill of Materials, and associated staffing required supporting the maintenance and evolution of DHS One Net.

Cost Allocation Methodology: The cost of Component contributions is based on Aggregate Bandwidth Model: $\text{Customer Bandwidth Percent} = \frac{\text{Component Bandwidth Capacity}}{\text{Total DHS Bandwidth Capacity}}$. $\text{Customer Charges} = \text{Customer Bandwidth Percent} \times \text{Total DHS IT Infrastructure investment}$.

Full Time Equivalent (FTE): This activity requires 17 FTE.

The DHS OneNet Program is a group of interrelated initiatives providing enterprise Information Technology (IT) Services for Network, Data Center, and Email to support the DHS Mission, Goals, and Objectives of strengthening the Homeland Security enterprise; improving cross-departmental management, policy and function integration; and, enhancing and integrating Departmental management functions. This investment was designed to address issues identified in the following areas: 1) create a secure, survivable enterprise network with centralized NOC, SOC and governance, 2) establish a common, reliable and standardized email communication system which provides a single enterprise Global Address List; and, 3) consolidate 43 primary Component Data Centers into two

physically secure, geographically diverse Enterprise Data Centers (EDCs). The two EDCs offer services for: computing, applications, data storage management and disaster recovery.

DHS OneNet Program addresses a capability gap by improving DHS’ Information Technology infrastructure by unifying individual Component IT networks, platforms and services into a set of Enterprise IT Services.

Major Acquisitions

The DHS OneNet WCF activity is proposed to be funded out of a single PPA in FY 2016:

- WCF Fee For Service PPA: \$64.5 million

FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Funding (\$\$\$ thousands)	FY 2016 Activity Request (\$\$\$ thousands)
\$69,600	\$66,158	\$64,539

FY 2016 Funding Breakout:

Program Area (Funding in \$\$\$ thousands)	Sub-Program	Mission Need
Network Services (\$27,159)	OneNet Operations	The core OneNet infrastructure and the staffing required to support its maintenance and evolution
	NOC	Staffing element that is required to support a 24 x 7 incident management capability
	Program Management Operation Support	Provides contractual support for engineering infrastructure designs of the Network Services
	Policy Enforcement Points (PEP)	PEP are Operations and Maintenance charges
	Federal Labor & Assessments	Provides management, oversight and reporting requirements
Security Operations (\$37,380)	Security Operations	Supporting functions at DCs, software maintenance charges and Managed Trusted Internet Protocol Service (MTIPS) cost
	SOC	Covers security operations of OneNet.
	Trusted Internet Center (TIC)	TIC are Operations and Maintenance charges
	E-Mail Secure Gateway (EMSG)	EMSG provides the Enterprise foundation for e-mail hygiene across DHS network

Note: The Future Years Homeland Security Program (FYSHP) and Comprehensive Acquisition Status Report (CASR) include Data Center Migration and other OCIO appropriated funds. Displayed above is the DHS OneNet WCF activity information only.

National Capital Region Infrastructure Operations (NCRIO) – Fee for Service Activity - \$115.7 million

Description of Service: NCRIO activity serves the DHS HQ, select Department Components, and field offices for:

- Sensitive but Unclassified Network and internet/intranet access;
- Management and delivery of unclassified desktop computing applications, equipment, email, wireless; communications, video (VTC), voice (phone) and messaging;
- Communications security and information technology (IT) operations; and
- Disaster planning and mitigation to ensure continuous operations.

The NCRIO manages and maintains all desktop applications for full functionality and continuous availability of unclassified networks, as well as full functionality of file and data storage and retrieval, printing, and remote access. The NCRIO coordinates management and delivery of these services, supports build-out of new facilities, and provides customer service through a 24/7 help desk.

The NCRIO delivers IT services to end users. It does so by subscribing to and integrating enterprise services with locally operated and maintained IT infrastructure. More specifically, the NCRIO subscribes to:

- Data Center hosting where it maintains its own user enclave for Local Area Network A;
- OneNet WAN, TIC and PEP services; and
- Enterprise services such as Email as a Service and Public Key Infrastructure.

Managing Office: Office of the Chief Information Officer (OCIO)

Pricing Basis: The budget for this activity is based on the number of users accessing each network and the hardware, software and services needed to support each network's infrastructure, security requirements, end user computing and telecommunications needs. The activity uses independent government cost estimates and industry IT benchmark data to evaluate the level of effort needed to support each network. Historical actual cost estimates and current negotiated contract rates are also used to develop the annual operations and maintenance cost. Future year cost increases for growth in user base is estimated with historical FTE growth trends.

Cost Allocation Methodology: Costs are allocated among the participating organizational Components based on their total number of accounts on the network as determined by the Global Address List (GAL). For Unclassified Local Area Network (A-LAN), the non-discrete costs are shared across the total number of network accounts, with the Component being charged for their pro-rated share of the total network accounts. A Component's discrete costs; e.g. wireless and circuits, are billed directly to the Component based on their actual consumption of these services

Full Time Equivalent (FTE): This activity requires 71 FTE.

MAJOR ACQUISITIONS

National Capital Region Infrastructure Operations

The National Capital Region Infrastructure Operations (NCRIO) program serves the DHS Headquarters (HQ), select Department Components and field offices for network and internet/intranet access; management and delivery of desktop computing applications and equipment, email, wireless communications, video (VTC), voice (phone) and messaging; communications security; IT Security; and IT operations disaster planning and mitigation to ensure continuous operations. The NCRIO manages and maintains the standard DHS HQ enterprise systems and applications for full functionality and direct or remote availability across the Department of Homeland Security's HQ unclassified and classified networks. The NCRIO also provides DHS HQ users with file and data storage and retrieval, printing, and remote network access. The NCRIO coordinates management and delivery of these services and provides customer service through a 24/7 help desk.

The request for this WCF activity is proposed to be funded out of a single PPA in FY 2016:

- WCF Fee For Service: \$115.7 million

FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Funding (\$\$\$ thousands)	FY 2016 Activity Request (\$\$\$ thousands)
\$184,777	\$118,135	\$115,741

FY 2016 Funding Breakout:

Program Area (Funding in \$\$\$ thousands)	Sub-Program	Mission Need
A-LAN Fixed Infrastructure \$105,636	IT Operations and Maintenance	Maintain IT Infrastructure for DHS HQ Components.
	End User Devices	Procure and maintain desktops, laptops, tablets, printers, etc.
	Software Operations and Maintenance	Procure and maintain approved software applications.
	Data Center	Provide application hosting, backup, and data recovery.
	LAN, Circuits, Telecommunications	Procure and maintain circuits and equipment required for connectivity to DHS networks and communications systems.
	IT Security	Provide and maintain secure applications and access to systems and data.
	Support Services	Support and resolve issues impacting IT functions and capabilities.
	Federal Oversight	Provide oversight and program management for DHS HQ infrastructure operations.
A-LAN Consumption Costs \$10,105	Cellular Wireless	Supply mobile, secure, voice, and data access for DHS HQ.
	Email as a Service	Provide reliable, cost effective email capability and support.
	Non Standard Software	Procure and maintain Component-specific applications.
	Dedicated Facility	Procure and maintain connectivity to Component-specific sites.

CLAN Operations – Fee for Service Activity - \$22.1 million

Description of Service: The Classified Local Network (CLAN) activity would serve Top Secret / Secure Compartment Information (TS/SCI) Enterprise users at DHS Headquarters (HQ), select Department Major and Sub-Components and field offices for:

- TS/SCI network and internet/intranet access;
- Management and delivery of desktop computing applications, equipment, email, communications, secure video (VTC), voice (phone) and messaging for TS/SCI networks;
- Communications security and information technology (IT) operations; and
- Data Center, Disaster Recovery planning and mitigation to ensure continuous operations.

The CLAN authority will manage delivery of IT services to TS/SCI end users, subscribing to and integrating enterprise services with a locally operated and maintained IT enterprise infrastructure. More specifically, the CLAN WCF will subscribe to:

- Data Center hosting for CLAN infrastructure, data storage, applications and CORE functions;
- OneNet WAN, TIC and PEP services;
- Enterprise services such as Enterprise Cross Domain Services and Public Key Infrastructure; and
- Provide responsive compliant solutions to OMB and the Office of the Director of National Intelligence (ODNI) Information Sharing and Safeguarding (IS&S); directives/policies applicable to TS/SCI networks.

Managing Office: The CLAN activity will be managed by the DHS Office of Intelligence and Analysis (I&A).

Pricing Basis: The budget for this activity is based on the number of users accessing each network and the hardware, software and services needed to support each network's infrastructure, security requirements, end user computing and telecommunications needs. The activity uses independent government cost estimates and industry IT benchmark data to evaluate the level of effort needed to support each network. Historical actual cost estimates and current negotiated contract rates are also used to develop the annual operations and maintenance cost. Future year cost increases for growth in user base is estimated with historical FTE growth trends.

Cost Allocation Methodology: Costs are allocated among the participating organizational Components based on their total number of accounts on the Classified network well as the total number of CLAN devices (CLAN desktop computers) that their office has. CLAN, the non-discrete costs are shared across the total number of CLAN network accounts, with the Component being charged for their pro-rated share of the total accounts. In addition, the costs associated with the CLAN devices are added to the Component bill. The total costs for devices is shared across all those offices who actually possess a CLAN device.

Full Time Equivalent (FTE): This activity requires 2 FTE.

Enterprise License Agreements (ELA) – Fee for Service Activity - \$147.8 million

Description of Service: ELA activity allows Components to leverage DHS buying power by consolidating license requirements into a single enterprise-wide procurement. The activity further helps to decrease costs, reduce paperwork, and save time by eliminating the need for repetitive, individual purchases from vendors. Increased services in this activity are a result of moving existing funded Interagency Agreements in the amount of \$49.2 million for these services into the Working Capital Fund. The Department continues to pursue opportunities to benefit from economies of scale, moving from Component or office specific software or hardware licenses to larger enterprise licenses for common services. The four existing WCF ELAs are:

Microsoft: The Microsoft Blanket Purchase Agreement (BPA) provides for the funding and management of the Microsoft Enterprise Agreement, which provides enterprise access to the Microsoft suite of products. The products include the software needed for individual desktops, laptops, and server platforms, such as MS Office, MS Project, MS Visio, MS Advanced Server, etc. This license agreement is utilized by all of DHS and this budget request reflects the contractual obligations of each of the Components.

Adobe: The Adobe BPA provides DHS desktops and servers with the suite of Adobe products, which reduce costs, eliminates inconsistent licensing, takes advantage of economies of scale to ensure the best pricing and streamlines the procedures required to procure all Adobe licenses for the Department. The Adobe BPA includes all Adobe products offered on the Adobe authorized resellers' GSA Schedule, and provides immediate Adobe Acrobat licensing for all DHS Components. This agreement is utilized by all of DHS. The request reflects the contractual obligations of each of the Components.

Oracle: The award of this DHS-wide ELA allows the DHS HQ and its Components to purchase Oracle software licenses, technical support services and training. The Department-wide vehicle not only allows for the timely renewal of software maintenance for the Department's (110,000+) Oracle licenses, but also allows for the purchase of additional software, software licenses, and software-associated products and services by Components when needed (and at greatly reduced prices) between consolidated purchase cycles.

Symantec: The Symantec BPA allows the DHS HQ and its Components to purchase Symantec software maintenance, technical support services and training all existing maintenance, through co-termination of existing contracts.

Managing Office: Office of the Chief Information Officer (OCIO)

Pricing Basis: Pricing is based on a Blanket Purchase Agreement, which includes maintenance cost on current software, support services, miscellaneous services, and software license agreement renewal.

Cost Allocation Methodology: The algorithm is Total number of licenses owned x Pre-Negotiated Cost of Licenses + Administrative Costs. DHS Components make annual payments based on base licenses owned at the beginning of the contract. The administrative costs are added on to the base

license cost to pay for support for the contract which includes FTE, benefits and WCF assessment charges.

Full Time Equivalent (FTE): This activity requires 3 FTE.

MAJOR ACQUISITIONS

Enterprise License Agreements

The ELA activity allows Components to consolidate license requirements into a single enterprise-wide procurement to leverage DHS buying power. The activity further helps to decrease cost, reduce paperwork and save time by eliminating the need for repetitive, individual purchases from vendors. The Department continues to pursue opportunities to benefit from economies of scale, moving from Component or office-specific software or hardware licenses to larger enterprise licenses for common services. The four existing ELAs are:

- **Microsoft:** The account provides for the funding and management of the Microsoft Enterprise Agreement, which provides enterprise access to the Microsoft suite of products. The products include the software needed for individual desktops, laptops, and server platforms, and is utilized by all of DHS.
- **Adobe:** The account includes all Adobe products offered on the Adobe authorized resellers' GSA Schedule, and provides immediate Adobe Acrobat licensing for all DHS Components and is utilized by all of DHS.
- **Oracle:** The account allows for the timely renewal of software maintenance for the Department's (110,000+) Oracle licenses, the purchase of additional software, software licenses, and software-associated products and services by Components when needed (and at greatly reduced prices) between consolidated purchase cycles.
- **Symantec:** This account allows the DHS HQ and its Components to purchase Symantec software maintenance, technical support services and training all existing maintenance, through co-termination of existing contracts.

This Enterprise License Agreement WCF activity is proposed to be funded out of a single PPA in FY 2016:

- WCF Fee For Service: \$147.8 million

FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Funding (\$\$\$ thousands)	FY 2016 Activity Request (\$\$\$ thousands)
\$98,639	\$98,645	\$147,845

FY 2016 Funding Breakout:

Program Area (Funding in \$\$\$ thousands)	Sub-Program	Mission Need
Software (\$147,845)	Operations and Maintenance	This service allows Components to consolidate license requirements into a single enterprise-wide procurement to leverage DHS buying power.

Office of Procurement Operations (OPO) – Fee for Service Activity - \$44.2 million

Description of Service: *Description of Service:* The OPO activity provides full service acquisition support to HQ Components. This includes a range of activities from acquisition planning and awarding to contract administration. In addition, OPO provides acquisition management services for Department-wide acquisition initiatives identified by both the Chief Information Officer and the various commodity councils within DHS that promote cost savings and small business participation. OPO also awards and administers grants and cooperative agreements to support major research and development initiatives for DHS. As a business advisor, OPO provides a full spectrum of tools and support to ensure on-time and quality execution of acquisition requirements. OPO’s focus is primarily the contracting functions; however, some of the support provided by OPO specializes in other organizational purposes such as small business support, cost and pricing, training support, systems support, workload/procurement metric tracking and business operations.

Managing Office: Office of the Chief Procurement Officer (OCPO)

Pricing Basis: Projected salaries and benefits based on an average GS Salary for authorized personnel plus an estimated shared service’s costs.

Cost Allocation Methodology: Divide each customer’s prior year total obligation by Department of Acquisition Division’s (DOAD) prior year total obligation then multiply the sum by DOAD’s full operational cost to include direct and indirect cost. The full operational cost to include direct and indirect cost is the total reimbursable amount charged to each division’s assigned customer.

Full Time Equivalent (FTE): This activity requires 246 FTE.

Homeland Security Presidential Directive -12 (HSPD-12) – Fee for Service Activity - \$21.9 million

Description of Service: HSPD-12 is a central headquarters program that is charged with managing HSPD-12 implementation across DHS through the issuance of a secure and reliable form of identification for its workforce, employees, and contractors located within an estimated 16,000 DHS facilities and sites. The Identity Management Division (IMD) in the Office of the Chief Security Officer will provide the necessary guidance and tools to facilitate this Department-wide program, creating a unified approach and solution.

The IMD business activity supports DHS with services and technology to establish the DHS HSPD-12 infrastructure and issue credentials in the following areas:

- Identity Management System (IDMS);

- Card Management System (CMS);
- Enrollment and Card Issuance Work Stations (EIWS) including printers and work station consumables;
- DHS Personal Identity Verification (PIV) Card Stock including Security Printing and laminate
- Installation and Maintenance of the EIWS;
- Hosting, Backup, Disaster Recovery, and Test Environment Server Support;
- Certification and Accreditation (C&A) Support;
- Operations and Maintenance (O&M) Support including Service Support/Help Desk;
- Appointment Scheduling Hosting and Support;
- Onsite Training Support;
- DHS Authoritative Databases Interface and Support;
- Open Interfaces/Modules for HSPD-12/DHS IDMS and CMS; and
- Public Key Infrastructure (PKI) Certificates.

These services have been and are currently provided for all DHS users of the IDMS. In addition, the IMD business activity coordinates:

- The card issuance functions at 322 DHS PIV Card Issuance Facilities nationwide;
- HSPD-12 technology evaluation for future DHS use;
- Continuous project management support for the deployment of EIWS to DHS facilities/sites nationwide;
- Vendor management and oversight of existing contracts; and
- Budget and financial management.

Managing Office: Office of the Chief Security Officer (OCSO)

Pricing Basis: Pricing is based on the number of active identities in the DHS HSPD-12 IDMS, which include costs associated with the collection/enrollment/sharing of biographic/biometric information, identity document validations, PKI certificates, and the lifecycle management of DHS PIV Cards.

Cost Allocation Methodology: Component's cost allocation methodology is based on the following factors:

1. Number of Federal and Contractor employees within each Component at the beginning of the fiscal year.
2. Sum of all costs associated with the DHS PIV Card Program supporting Components.
3. Percentage of Component identities compared to the DHS' total identities.

Full Time Equivalent (FTE): The activity currently requires 9 FTE.

MAJOR ACQUISITIONS

Homeland Security Presidential Directive-12

In August 2004, the President signed HSPD-12 Policy for a Common Identification Standard for Federal Employees and Contractors (the Directive). The Directive requires the development and agency implementation of a mandatory, government-wide standard for secure and reliable forms of identification for Federal employees and contractors. HSPD-12 requires a secure and reliable form of identification that is; a) issued based on sound criteria for verifying an individual employees identity; b) resistant to identify fraud, tampering, counterfeiting, and terrorist exploitation; c) can be rapidly authenticated electronically; and, d) is issued only by providers whose reliability has been established by an official accreditation process. To comply with HSPD-12, DHS has developed an IDMS for issuing credentials that meet the requirements in accordance with National Institute of Standards and Technology (NIST) Federal Information Processing Standards 201.

This HSPD-12 WCF activity is proposed to be funded out of a single PPA in FY 2016:

- WCF Fee For Service \$21.9 million

FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Funding (\$\$\$ thousands)	FY 2016 Activity Request (\$\$\$ thousands)
\$21,915	\$21,929	\$21,941

FY 2016 HSPD-12 Funding Breakout:

Program Area (Funding in \$\$\$ thousands)	Sub-Program	Mission Need
Identity Management System (\$7,452)	Credential Issuance and Management	Issuing and managing PIV credentials for all DHS employees and contractors.
	Management and Tracking of Identity and Attributes	Aggregating, managing and correlating biometric and biographic data from various authoritative data sources.
	Personnel vetting	Interfaces with existing processes for personnel vetting and adjudication to support the issuance, management and use of the PIV cards and associated attributes.
	Logical and physical access systems	Integrate with the Departments logical and physical access directories; and reduce the transmission and re-keying of Personally Identifying Information (PII) and identity data by interfacing / integrating with authoritative data sources and dependent systems.
	Information discovery and audit	Track the status and disposition of PIV cards from manufacture to destruction; log all access, enforcing role based controls in compliance with FIPS 201 and DHS requirements.
	Data Security and Segmentation	Protect all data elements in transit and at rest and support the segmentation of data based on DHS Component and Role.
PIV Card Issuer (PCI) Operations (\$9,285)	PCI Facilities (PCIF) Oversight and Management	Program staff developing policies/procedures, overseeing PCIF sites, PIV equipment for PIV functions involving: (i) enrollment/identity proofing; (ii) card production; (iii) card activation/issuance; or (iv) maintenance.
	Training and Procedures	Program staff developing and providing PCI training for PCIF personnel with PIV responsibilities and functions.

	PCI Assessments	Program Staff performing compliance assessments in accordance with requirements of FIPS 201, NIST SPs, Department and other supporting governance to ensure DHS PIV Cards are issued only by providers whose reliability has been established by an official certification and accreditation.
PIV Card Issuance (\$5,204)	Enrollment and Issuance Workstations (EIWS)	EIWS operations to support card activation, card printing, biometric fingerprint and facial image captures.
	Light Activation Stations	Supports self-service PIV card updates, unlocks, and Personal Identification Number (PIN) resets.
	Consumables	Provide card stock, security laminate, printer ribbon, badge holders.

e-Training – Fee for Service Activity - \$10.8 million

Description of Service: e-Training provides an enterprise approach to leveraging technology to support learning and development programs, initiatives, and capabilities. This includes an enterprise architecture approach to modernize and reduce the complexity of DHS Learning Management Systems (LMS); building enhanced capability through tools such as web conferencing; and closing existing and future gaps in structured learning opportunities by providing every DHS employee access to over 3,000 online courses and 12,000 online books. Benefits derived from this activity include:

- Centralized procurement of primary DHS LMS in use, providing greater visibility to CFOs, CIOs, and all DHS management regarding costs;
- Consistent, standardized delivery of all legislatively-mandated training to all DHS employees (and contractors where appropriate), launched IT security courses mapped to the Government Information Security Reform Act (GISRA) and the National Institute of Standards and Technology requirements;
- A 21st Century approach to training in critical areas such as Emergency Medical Technician training by assisting in the coordination of DHS Modeling and Simulation activity in regards to training; and
- Compliance with OPM and OMB requirements for reporting Enterprise Human Resources Integration training data for all DHS Federal civilian employees.

Managing Office: Office of the Chief Human Capital Officer (OCHCO)

Pricing Basis: Pricing is based on personnel and operations support costs to maintain services for the Performance and Learning Management System (PALMS), Learning Management System and Program Management Office support, Plateau (charges only for HQ and TSA components), Skillsoft Licenses and support, and Emergency Medical Service Training content.

Cost Allocation Methodology: The cost allocation methodology for this activity is a pro-rata share based on the percent of each component’s Full Time Equivalent (FTE) divided by DHS’s total FTE (excluding U.S. Coast Guard FTE) multiplied by total estimated cost of the activity.

Full Time Equivalent (FTE): This activity requires 7 FTE.

Mail Services - Fee for Service Activity - \$16.6 million

Description of Service: The Mail Service operates a Consolidated Remote Delivery Site (CRDS) for receiving, screening, processing, courier servicing, and delivery of safe mail to DHS Headquarters and Component HQ facilities in the National Capital Region (NCR). With the exception of the United States Secret Service, all DHS Components currently participate in the CRDS mail shared service support activity.

The CRDS currently receives and screens approximately 1.5 million pieces of inbound mail and delivers it to nearly 100 DHS mail delivery locations within the NCR. It processes over 8 million pieces of outbound mail and provides over 6,000 trips of courier services. The CRDS is also supported by an Inter-Agency Agreement with DHS Office of Health Affairs for biological detection services.

Managing Office: Office of the Chief Readiness Support Officer (OCRSO)

Pricing Basis: Pricing is based on current contracts negotiated with the service providers. The cost of mail services contract includes mail chemical, biological, radiological, nuclear and explosive screening, delivery services, onsite customer service, and courier services.

Cost Allocation Methodology: Pricing is based on a pro-rata share of the volume of mail delivered, the number of mail stops that receive mail, the number of locations with mail delivery, onsite customer service support, the number of courier services, and the cost of screening incoming mail for safety and security threats.

Full Time Equivalent (FTE): This activity requires 2 FTE.

Parking Services – Fee for Service Activity - \$0.6 million

Description of Service: The Parking Service is available to eligible DHS HQs employees based on space availability, parking need accessibility under American Disability Act (ADA); employee's position; employee's required work schedules; and funding approval from Office/Directorate. Permit types in order of priority are: Law Enforcement vehicles; official government vehicles (owned, leased, or rented); employees with disabilities; executive parking; unusual work hours; and carpool/vanpool.

Managing Office: Office of the Chief Readiness Support Officer (OCRSO)

Pricing Basis: Pricing is based on firm-fixed pricing, which includes garages that are within a 0.25 or 1 block radius from the DHS site. The contract is awarded by the number of unreserved and reserved spaces (handicap parkers only) for each DHS Headquarters organization.

Cost Allocation Methodology: The cost allocation methodology is a pro-rata share based on the number of spaces utilized.

Full Time Equivalent (FTE): This activity requires 1 FTE

Executive Sedan Services – Fee for Service Activity - \$1.7 million

Description of Service: The Executive Sedan Service provides transportation for authorized senior officials who travel between various locations during the course of official Government duties. It allows senior officials to conduct official business while in transit, which may not be possible on Metro or in taxicabs.

Managing Office: Office of the Chief Readiness Support Officer (OCRSO)

Pricing Basis: Pricing is based on the current Blanket Purchase Agreement with selected service providers and vehicle leasing costs, which are in accordance with GSA's annual vehicle cost listings.

Cost Allocation Methodology: The cost allocation methodology is a pro-rata share based on participant usage.

Full Time Equivalent (FTE): This activity requires 2 FTE.

Shuttle Services – Fee for Service Activity - \$1.2 million

Description of Service: The Shuttle Service provides a safe and effective means of transporting employees between DHS buildings throughout the National Capital Region (NCR). The services consist of 4 routes (North, Glebe, Tenleytown, and Federal Protective Service (FPS)) and are limited to the conduct of official business.

Managing Office: Office of the Chief Readiness Support Officer (OCRSO)

Pricing Basis: Pricing is based on the negotiated BPA rate that includes all personnel, storage, materials, supplies, vehicles (10-61 passenger), equipment, fuel, licenses, permits, authorizations, certifications, insurance, services and maintenance required to perform transportation functions for DHS and its components. Annual cost projections are based on estimated service hours for each route and vehicle type.

Cost Allocation Methodology: The Shuttle Services cost allocation methodology is distributed based on the percentage of population located on a shuttle route. The individual component contract cost is divided by the total contract cost and multiplied by 100 to obtain each component's percent of the contract cost. The percentage is multiplied by the total Salaries and Benefits (S&B) cost and other program related cost and this amount is charged back to the customers. The customer contract cost is added to the S&B and other program related cost and this determines the total cost to the customers for the WCF Shuttle Service.

Full Time Equivalent (FTE): This activity requires 1 FTE.

Transit Subsidy Services – Fee for Service Activity - \$5.6 million

Description of Service: The Transit Subsidy Program encourages Federal employees to commute to work via public transportation. This program provides a subsidy to all eligible Federal employees who

commute to and from work on a regular basis using rapid transit, public or commuter buses, commuter rail, incorporated vanpools, or any combination of the above. This helps reduce petroleum consumption, traffic congestion, and air pollution by taking vehicles off the road that are otherwise used in daily commuting.

Managing Office: Office of the Chief Readiness Support Officer (OCRSO)

Pricing Basis: Pricing is based on contract negotiations with the Sole Source Contract (The Washington Metropolitan Area Transit Authority - WMATA) and an IAA with the Department of Transportation (DOT) service providers.

Cost Allocation Methodology: The individual component Transit Subsidy contract costs are calculated based on participant's usage. The actual cost the employee incurs commuting to and from work, with the maximum amount being \$130 per employee/per month, the maximum expense requirement is the current cost methodology. Then, individual component contract cost is divided by the total contract cost and multiplied by 100 to obtain each component's percent of the contract cost. The percentage is multiplied by the total S&B cost and other program related cost and this amount are charged back to the customers. The customer contract cost is added to the S&B and other program related cost and this determines the total cost to the customers for the WCF Transit Subsidy.

Full Time Equivalent (FTE): This activity requires 2 FTE.

National Defense University – Fee for Service Activity - \$0.8 million

Description of Service: The DHS faculty at the National Defense University (NDU) design, develop, and lead homeland security-related courses and events. The faculty arrange for an array of expert speakers from various homeland security areas to visit NDU as guest speakers. DHS faculty also lead an array of domestic and international trips and studies related to homeland security missions and concerns. In addition, DHS faculty serves as advisors/mentors to all DHS employees who are enrolled as Master's Degree candidates each year. In exchange, under the terms of a Memorandum of Understanding, DHS is able to select approximately 20 individuals each year to attend a war college. Employees are selected for specific colleges by an independent DHS selection panel that utilizes a matching process based upon the panel's review of the employees' academic qualifications, work experiences, and the needs of the Department.

The five colleges are the College of International Security Affairs (CISA), Industrial College of the Armed Forces (ICAF), Information Resources Management College (iCollege), Joint Forces Staff College (JFSC), and National War College (NWC). NDU has also developed a program at the John F. Kennedy Special Warfare Center and School in Ft. Bragg, NC. The diversity in campuses allows the University to offer a variety of master's degrees, graduate certificates, and continuing education programs. Unlike private colleges and universities these degree and certificate programs can be tailored to address the varied homeland security mission requirements. The program enhances DHS' strategic leadership and decision making in national, homeland, and international security.

Managing Office: Office of the Chief Human Capital Officer (OCHCO)

Pricing Basis: Pricing is based on FTE, salary and benefits, and personnel costs such as shared services for 4 FTE's to maintain the service.

Cost Allocation Methodology: Component's cost allocation methodology is based on the following factors:

One reserved slot for each operational Component, NPPD, and HQ, for a total of nine reserved slots. Costs for the remaining 11 slots are allocated based on each component's percentage of employees eligible to attend any of the colleges supported by the program. Eligible participants are GS-14 and GS-15 employees and TSA equivalents.

Full Time Equivalent (FTE): This activity requires 4 FTE.

Regulatory Services – Fee for Service Activity - \$0.3 million

Description of Service:

Regulatory Services includes the shared costs associated with the operation of the Department's and components' regulatory programs. The Regulatory Services umbrella consists of the following two activities: (1) operation and maintenance of the Regulatory Affairs Management System (RAMS) and (2) e-Docket Support Services (an existing WCF sub-activity moving from the eRulemaking umbrella to the Regulatory Services umbrella).

RAMS is a DHS-wide, Intranet-based, information technology system that facilitates the review and clearance of all DHS and interagency regulatory actions. RAMS serves as a tracking system, a workflow management tool, a collaboration platform, and a reporting solution. RAMS matures and strengthens the homeland security enterprise by improving DHS's management systems and processes as well as DHS's programmatic and organizational alignment.

The e-Docket Support Services contract is the mechanism through which DHS and its components obtain docket center support. Docket center staff review, process, and publicly post all docket materials onto www.regulations.gov, the government-wide online docket. Docket materials include proposed and final regulations, public comments, meeting notices, supporting analyses, background materials, and guidance documents. Docket support is necessary for DHS document management, for ensuring public transparency, and for facilitating compliance with the E-Government Act of 2002. To obtain e-Docket Support Services, DHS contracts with Environmental Protection Agency (EPA), who in turn contracts with a sub-contractor for the services.

Managing Office: Office of the General Counsel (OGC)

Pricing Basis: RAMS pricing is based on costs determined by DHS OCIO. Those costs cover four major categories: the Cloud Services Production Platform, the Cloud Services Platform Development and Testing, required licensing fees, and operations and maintenance support.

e-Docket: DHS pays for the services received with respect to docket center processing of DHS documents. DHS documents are processed by billable hour. Pricing is based on the contract rate for document processing.

Cost Allocation Methodology: RAMS: All components that are part of the regulatory process pay some portion of the costs. Costs are allocated based on the component's level of regulatory activity. To inform the reimbursement amounts, OGC gathered data for the following two categories: (1) each component's past regulatory publications and (2) each component's projections for upcoming regulatory projects. OGC then apportioned RAMS reimbursement costs based on the component's regulatory activity as a portion of the overall total of the Department's regulatory activity.

e-Docket: Each component's contribution is based on the component's actual usage in the preceding fiscal year. Usage refers to the docket center processing time for documents posted on www.regulations.gov (e.g., notices, proposed and final rules) and public comments processed through the Federal Docket Management System for www.regulations.gov. OGC apportioned reimbursement costs based on the amount of materials the docket staff processed for each component in the preceding fiscal year.

Full Time Equivalent (FTE): This activity requires 0 FTE.

Department of Homeland Security
Working Capital Fund
Government Wide Mandated Service Activity
Program Performance Justification
(Dollars in Thousands)

PPA: Government Wide Mandated Service Activity

	<u>Perm. Pos.</u>	<u>FTE</u>	<u>Amount</u>
FY 2014 Revised Enacted	7	7	\$34,170
FY 2015 President's Budget	-	-	\$19,801
2016 Adjustments-to-Base	-	-	-
FY 2016 Current Services	-	-	\$19,801
FY 2016 Program Change	-	-	(\$107)
FY 2016 Total Request	-	-	\$19,694
Total Change 2015 to 2016	-	-	(\$107)

The Working Capital Fund requests \$19.7 million and 0 FTE for this activity FY 2016.

Program Change Include:

- Decrease of \$0.107 million for the transfer of the e-Docket portion from the eRulemaking activity to the Regulatory Services activity, which moved from the Government-Wide Activities PPA to the Fee for Service PPA

CURRENT SERVICES PROGRAM DESCRIPTION:

Interagency Council Funding - Government-Wide Mandated activity - \$0.8 million

Description of Service: GSA provides oversight and administers the Interagency Council funds in consultation with the Chief Financial Officers Council (CFO), the Chief Information Officers Council (CIO), the Federal Acquisition Council (FAC) and the Chief Human Capital Officers Council (CHCO).

- CFO Council funding supports the following activities:
 - Federal Audit Clearing House - Disseminates audit information to Federal agencies and the public, supports OMB oversight and assessment of Federal award audit requirements, and assists Federal cognizant and oversight agencies in obtaining OMB Circular A-133 data and reporting packages.
 - Grants Streamlining – Implements P. L. 106-107, the Federal Financial Assistance Management Improvement Act of 1999. It also proposes a standard format for Federal agency use in announcing discretionary grant and cooperative agreement funding opportunities.
- CIO Council funding supports the following activities:
 - A contract to support the Portfolio Management Office for the ongoing e-government initiatives efforts.

- Federal Enterprise Architecture —identifies and develops collaboration and consolidation opportunities across Federal agencies.
- FAC funding supports the following activities:
 - The Federal Competitive Sourcing Database facilitates comprehensive, consistent, and timely reporting of government actions related to competitive sourcing.
 - Acquisition Workforce Competency Development and Training funds the Acquisition Career Management Information System Database which provides workforce training data and OPM data to make strategic workforce decisions that affect the agency’s training and certification requirements.
 - Government-wide Performance Measures for Socio-Economic Goals tool measures business success by meeting established statutory goals.
 - The Service Acquisition Reform Act (SARA), Acquisition Advisory Panel and Report to Congress - Section 1423 of SARA requires the Administrator of OMB’s Office of Federal Procurement Policy to establish an advisory panel of recognized experts in acquisition law and policy to review laws and regulations regarding the use of commercial practices, performance-based contracting, the performance of acquisition functions across agency lines of responsibility, and the use of government-wide contracts.
 - As required by the SARA, the Acquisition Center of Excellence (ACE) is an online repository for service contracting, best practices, policy, e-tools as well as educational opportunities for utilization by the entire acquisition community.
- CHCO funding supports the following activity:
 - CHCO website - Provides a vehicle for sharing and exchanging information of interest to the federal human resource management community. The system provides a forum for the exchange of information among members of the Council in both a public and private manner.

Managing Partner: General Services Administration (GSA)

Managing Office: Office of the Chief Financial Officer (OCFO)

Pricing Basis: This is a government-wide mandated program in which the managing partner assigns costs.

Cost Allocation Methodology: The cost allocation methodology for this activity is pro-rata share based on the percent of each component’s adjusted total budget (excluding grant funding) divided by DHS’s total adjusted budget multiplied by the total estimated cost of the activity.

Full Time Equivalent (FTE): This activity requires 0 FTE.

USAJOBS - Government-Wide Mandated activity - \$1.1 million

Description of Service: The USAJOBS initiative is a government-wide initiative led by the Office of Personnel Management (OPM). All agencies fund their portion of this program (based on employment levels. Regulations contained in 5 CFR Parts 330, 333 and 335 implement section 4 of Public Law 1054-52 and authorizes OPM to charge fees to agencies in order to pay the cost of providing Federal employment information and services.

USAJOBS delivers state-of-the-art on-line recruitment services to job seekers, simplifying the process of locating and applying for Federal jobs. It delivers a number of job seeker focused features including intuitive job searching; clean, concise, understandable and attractive job announcements; on-line resume submission; applicant data-mining; and on-line feedback on status and eligibility.

Managing Partner: Office of Personnel Management (OPM)

Managing Office: Office of the Chief Human Capital Officer (OCHCO)

Pricing Basis: This is a government-wide mandated program in which the managing partner assigns costs.

Cost Allocation Methodology: Component's cost allocation methodology is based on the following factors:

- Pro-rata share based on the percentage of each component's FTE divided by DHS' total FTE multiplied by the total estimated cost of the activity.
- This activity only benefits civilian personnel. Military FTE are not included in the cost allocation methodology.

Full Time Equivalent (FTE): This activity requires 0 FTE.

Enterprise Human Resources Integration (EHRI) – Government-Wide Mandated activity - \$2.8 million

Description of Service: EHRI is a collaborative e-Government initiative designed to transform the way Federal HR Specialists and managers access human resource information and the way all Federal employees access their personnel file information. EHRI is in the process of replacing the current paper based Official Personnel Folder (OPF) with an electronic employee record for all executive branch employees, resulting in a comprehensive electronic personnel data repository covering the entire life cycle of Federal employment. In addition to streamlining personnel management actions, EHRI provides HR managers and specialists with powerful workforce analytic and planning capabilities.

Managing Partner: Office of Personnel Management (OPM)

Managing Office: Office of the Chief Human Capital Officer (OCHCO)

Pricing Basis: This is a government-wide mandated program in which the managing partner assigns costs.

Cost Allocation Methodology: Component's cost allocation methodology is based on the following factors:

- Costs for products and services will be recovered by EHRI from all agencies on an equitable basis related to the size and usage of each participating agency.

- Charges are based on distributing total EHRI costs to all clients on the basis of the number of OPFs or on the basis of actual cost, depending on the service.

Full Time Equivalent (FTE): This activity requires 0 FTE.

e-Rulemaking – Government-Wide Mandated activity - \$0.4 million

Description of Service: e-Rulemaking is a collaborative, interagency activity designed to establish a function. The activity consolidates rulemaking systems at the various departments and agencies and is centrally managed through a web-based environment offering functionality such as one-stop access, search capabilities, and public commenting. e-Rulemaking activities include:

- Expanding public understanding of the rulemaking process;
- Improving the quality of Federal rule-making decisions;
- Increasing the amount, breadth, and ease of citizen and intergovernmental participation in rulemaking;
- Administering Regulations.gov, a cross-agency, front-end Web application that posts and allows comments on proposed Federal agency rules;
- Writing memoranda to the President’s Management Council (PMC), directing agencies to include a link to Regulations.gov on agency homepages and in the synopsis of the notice of any regulatory action requesting public comment; and
- Posting the dockets for nearly 300 Federal agencies, including DHS, on EPA’s online system.

Managing Partner: Environmental Protection Agency (EPA)

Managing Office: Office of the Chief Information Officer (OCIO)

Pricing Basis: This is a government-wide mandated program in which the managing partner assigns costs.

Cost Allocation Methodology: The cost allocation methodology for this activity is pro-rata share based on the percent of each participating component’s adjusted total budget (excluding grant funding) divided by DHS’s total adjusted budget multiplied by the total estimated cost of the activity.

Full Time Equivalent (FTE): This activity requires 0 FTE.

Human Resources Line of Business (HRLoB) – Government-Wide Mandated activity - \$0.3 million

Description of Service: HRLoB provides the Federal Government with an infrastructure to support pay-for-performance systems, modernized HR systems, and the core functionality necessary for the strategic management of human capital.

The HRLoB offers a cost-effective, standardized, and interoperable HR solution which allows Federal departments and agencies to work more efficiently and effectively, while providing managers and executives with an improved means to meeting strategic objectives. The HR LoB initiative seeks to

accomplish the following four goals: 1) Improved Management, 2) Operational Efficiencies, 3) Cost Savings/Avoidance, and 4) Improved Customer Service.

Managing Partner: Office of Personnel Management (OPM)

Managing Office: Office of the Chief Human Capital Officer (OCHCO)

Pricing Basis: This is a government-wide mandated program in which the managing partner assigns costs.

Cost Allocation Methodology: Component's cost allocation methodology is based on the following factors:

- Pro-rata share based on the percent of each component's FTE divided by DHS's total FTE multiplied by the total estimated cost of the activity.
- This activity only benefits civilian personnel. Military FTE are not included in the cost allocation methodology.

Full Time Equivalent (FTE): This activity requires 0 FTE.

e-Gov Benefits – Government-Wide Mandated activity - \$0.2 million

Description of Service: The e-Gov Benefits activity provides a single point of access for citizens to locate and determine eligibility for government benefits and services, GovBenefits.gov. The site's core function is the eligibility prescreening questionnaire or "Benefit Finder." Answers to the questionnaire are used to evaluate a visitor's situation and compare it with the eligibility criteria for more than 1,000 Federally-funded benefit and assistance programs. Each program description provides citizens with the next steps to apply for any benefit program of interest.

Managing Partner: Department of Labor (DOL)

Managing Office: Office of the Chief Information Officer (OCIO)

Pricing Basis: This is a government-wide mandated program in which the managing partner assigns costs.

Cost Allocation Methodology: The cost allocation methodology for this activity is a pro-rata share based on the percent of each component's civilian FTE divided by DHS's total civilian FTE multiplied by total estimated cost of the activity.

Full Time Equivalent (FTE): This activity requires 0 FTE.

Financial Management Line of Business (FMLoB) – Government-Wide Mandated activity - \$0.2 million

Description of Service: FMLoB goals are to define, analyze, and implement options that will enhance cost savings in the financial management systems, provide for standardization of business processes and data models, promote seamless data exchange between Federal agencies and strengthen internal controls through integration of core financial and subsidiary systems. The FMLoB's current objective is to improve the cost, quality, and performance of financial management reducing the number of noncompliant systems by leveraging common standards, shared service solutions, and implementing other government-wide reforms that foster efficiencies in Federal financial operations.

Managing Partner: General Services Administration (GSA)

Managing Office: Office of the Chief Information Officer (OCIO)

Pricing Basis: This is a government-wide mandated program in which the managing partner assigns costs.

Cost Allocation Methodology: The cost allocation methodology for this activity is a pro-rata share based on the percent of each component's adjusted total budget (excluding grant funding), divided by DHS' adjusted total budget and multiplied by total estimated cost of the activity.

Full Time Equivalent (FTE): This activity requires 0 FTE.

Geospatial Line of Business (GLOB) – Government-Wide Mandated activity - \$0.2 million

Description of Service: GLOB is designed to further refine the opportunities for optimizing and consolidating Federal geospatial-related investments to reduce the cost of government and, improve services to citizens. Cross-agency coordination of geospatial activities can identify, consolidate, and reduce or eliminate redundant geospatial investments. The Geospatial LoB will result in a more coordinated approach to producing, maintaining, and using geospatial data, and will ensure sustainable participation from Federal partners to establish a collaborative model for geospatial-related activities and investments.

Managing Partner: Department of Interior (DOI)

Managing Office: Office of the Chief Information Officer (OCIO)

Pricing Basis: This is a government-wide mandated program in which the managing partner assigns costs.

Cost Allocation Methodology: The cost allocation methodology for this activity is a pro-rata share based on the percent of each component's adjusted total budget (excluding grant funding) divided by DHS's adjusted total budget multiplied by total estimated cost of the activity.

Full Time Equivalent (FTE): This activity requires 0 FTE.

Budget Formulation and Execution Line of Business (BFELoB) – Government-Wide Mandated activity - \$0.1 million

Description of Service: BFELoB builds a “budget of the future” by promoting information sharing across government agency budget offices and building a “community of practice.” With this collaboration, the budget community can start to identify best practices for all aspects of budget formulation and execution. The BFELoB strives to find solutions that link budget formulation, execution, planning, performance, and financial information. Areas of particular interest include technology, budget performance integration, data collection and tracking, financial management integration, and human capital.

Managing Partner: Department of Education (DOE)

Managing Office: Office of the Chief Information Officer (OCIO)

Pricing Basis: This is a government-wide mandated program in which the managing partner assigns costs.

Cost Allocation Methodology: The cost allocation methodology for this activity is a pro-rata share based on the percent of each Component’s adjusted total budget (excluding grant funding) divided by DHS’s adjusted total budget multiplied by total estimated cost of the activity.

Full Time Equivalent (FTE): This activity requires 0 FTE.

e-Gov Integrated Acquisition Environment (IAE) – Government-Wide Mandated activity - \$1.7 million

Description of Service: IAE is a Presidential e-Government initiative managed by GSA. IAE supports and automates the procurement process through the use of shared systems which are required by regulation. IAE funds are used for system development and sustainment, hosting, information technology security, help desk services and program support for the following systems: Contractor Performance Assessment Reporting System (CPARS); Federal Awardee Performance and Integrity Information System (FAPIIS); Past Performance Information Retrieval Systems (PPIRS); Electronic Subcontracting Reporting System (eSRS); Federal Business Opportunities (FBO); Federal Procurement Data System (FPDS); Wage Determinations OnLine (WDOL) and the System for Award Management (SAM). SAM includes Central Contractor Registration (CCR), Federal Agency Registration (FedReg), Online Representations and Certifications Application (ORCA) and the Excluded Parties List System (EPLS).

Managing Partner: General Services Administration (GSA)

Managing Office: Office of the Chief Procurement Officer (OCPO)

Pricing Basis: This is a government-wide mandated program in which the managing partner assigns costs.

Cost Allocation Methodology: The cost allocation methodology for this activity is a pro-rata share

based on the average percentage of each component's number of procurement transactions, dollar value of procurement transactions and number of procurement personnel.

Full Time Equivalent (FTE): This activity requires 0 FTE.

Disaster Management - Government-Wide Mandated activity - \$11.2 million

Description of Service: The Disaster Management activity develops and provides direction in the use of Internet-based technologies to establish standards that are reusable, cost-effective, and mission focused. Additionally, the program strives to improve Emergency Management (public safety) response through more effective and efficient interoperable data communications. It also serves as a unified point of access to Disaster Preparedness, Mitigation, and Response and Recovery information. Among the initiatives are: 21st Digital Government Strategy, Web Content Management as a Service (WCMaaS), GovDelivery, and Cloud Lifecycle Management. The 21st Digital Government Strategy focuses on web-based delivery by streamlining service via mobile applications. WCMaaS focuses on a secure and compliant hosting environment by reducing costs, consolidating web-content management, and web-hosting services. GovDelivery improves integration with social media and websites by streamlining communication across email, Short Message Service (SMS), social media and other channels. Cloud Lifecycle Management provides secure data relay, monitoring/log management, tracking, and continuous integration & automation.

Managing Partner: Federal Emergency Management Agency (FEMA)

Managing Office: Office of the Chief Information Officer (OCIO)

Pricing Basis: This is a government-wide mandated program in which the managing partner assigns costs.

Cost Allocation Methodology: The cost allocation methodology for this activity is a pro-rata share based on the percent of each Component's level of participation in disaster management divided by the total sum of all Component levels of participation in disaster management multiplied by the total estimated cost of the activity. Levels of participation are determined by measuring a Component's active participation in 16 sixteen elements of disaster management, as defined by Disaster Management e-Government Initiative Program Office within FEMA. The 16 elements of Disaster Management include the following: (1) transportation, (2) communications, (3) public works and engineering, (4) firefighting/incident command system, (5) information and planning, (6) mass care, (7) resource support, (8) health and medical services, (9) search and rescue, (10) hazardous materials, (11) food, (12) energy, (13) warnings and alerts, (14) research and development, (15) emergency/domestic preparedness, and (16) disaster relief. The 16 elements are the cost drivers for each component's assessment and because many Components are involved in various activities at different levels of participation, the cost for this activity is fairly uniform across the Components.

Full Time Equivalent (FTE): This activity requires 0 FTE.

e-Gov Integrated Acquisition Environment Loans And Grants – Government-Wide Mandated activity - \$0.2 million

Description of Service: The Federal Funding Accountability and Transparency Act of 2006 (FFATA) requires OMB to ensure the existence and operation of a single searchable website, accessible by the public at no cost that includes information on each Federal award. The law specifically requires a unique identifier for the entity receiving the award and of the parent entity of the recipient, should the entity be owned by another entity. Some contracts (and some grants) already require Data Universal Numbering System (DUNS) numbers. This will allow those areas to feed information into the FFATA portal.

Managing Partner: General Services Administration (GSA)

Managing Office: Office of the Chief Information Officer (OCIO)

Pricing Basis: This is a government-wide mandated program in which the managing partner assigns costs.

Cost Allocation Methodology: The cost allocation methodology for this activity is a pro-rata share based on the percentage of each component FTE divided by DHS total FTE and multiplied by the total estimated cost of the activity.

e-Gov Integrated Financial Assistance Environment - Government-Wide Mandated activity - \$0.4 million

Description of Service: The e-Integrated Financial Assistance Environment Activity is a collaborative, interagency activity designed to establish common, automated, and integrated approaches to managing the Federal government's financial assistance function. The activity combines government-wide financial assistance systems, i.e., USA spending, Grants.gov, and the Federal Audit Clearinghouse System (FACS), at the various departments and agencies and is centrally managed by OMB through assignment of each system to an agency for day to day operations. Grants.gov creates a single portal for all Federal financial grant and cooperative agreement program applicants to find and apply for funding on-line. This provides electronic functionality for applicants while reducing paper-based processes that previously challenged the Federal grants and cooperative agreement program environment. FACS is the government-wide repository into which independent auditors post the annual OMB Circular A-133 Audits of federal financial assistance (FA) awardees for subsequent retrieval by federal agencies. USA spending is the site where all Federal award data is posted per the requirements set forth the Federal Financial Accountability and Transparency Act.

This activity is designed to reduce inefficiencies, meet e-Gov goals, and provide benefits to both citizens and the government. Specifically, the initiative enables the government to implement streamlining activities developed by the OMB lead Committee for Financial Assistance Reform (COFAR) on which DHS is one of the eight primary funding agencies represented.

Managing Partners: Department of Health and Human Services; Commerce Department, Census Bureau

Managing Office: Office of the Chief Financial Officer (OCFO)

Pricing Basis: This is a government-wide mandated program in which the managing partner assigns costs.

Cost Allocation Methodology: The cost allocation methodology is a pro-rata share based on systems' usage plus a base fee when appropriate.

Full Time Equivalent (FTE): This activity requires 0 FTE.

Performance Management Line of Business (PMLoB) – Government-Wide Mandated activity - \$0.05 million

Description of Service: The focus of PMLoB is to facilitate transition from print-based Government Performance and Results Act (GPRA) performance plans and reports to a shared, web-based, Government-wide performance portal, as required by the GPRA Modernization Act (Sec 7 and Sec. 10), The PMLoB will help agencies efficiently meet legal requirements through a shared solution and avoid redundant stove-piped agency development and operations costs.

Managing Partner: GSA

Managing Office: Office of the Chief Financial Officer (OCFO)

Pricing Basis: This is a government-wide mandated program in which the managing partner assigns costs.

Cost Allocation Methodology: The cost allocation methodology for this activity is a pro-rata share based on the percent of each Component's adjusted total budget divided by DHS's adjusted total budget multiplied by total estimated cost of the activity.

Full Time Equivalent (FTE): This activity requires 0 FTE.

**Department of Homeland Security

Total Change 2015 to 2016	-	-	\$15

The Working Capital Fund requests \$13.8 million and 7 FTE for DHS Cross-Cutting Activities in FY 2016. Base adjustments include:

- Increase of \$0.011 million for 2016 pay inflation.
- Increase of \$0.004 million for 2015 annualization of pay raise.

CURRENT SERVICES PROGRAM DESCRIPTION:

Capital Planning And Investment Control (CPIC) – DHS Crosscutting Activity- \$6.9 million

Description of Service: CPIC activity provides services to support the efforts mandated by OMB Circular A-11 and A-130, including automated tools to assist with portfolio analyses, document preparation, and document review and scoring, formal training, informational briefings, and remedial coaching to improve business case quality. It supports the project management offices in preparing decision packages for DHS investment review boards at key acquisition decision points in their projects' life cycle. CPIC is also the central point for the Department's response to OMB initiatives and priorities on investment management, currently focusing on such control phase areas as consolidation, earned value management, and periodic project review.

Managing Office: Office of the Chief Information Officer (OCIO)

Pricing Basis: Pricing is based on operations, maintenance and annual modification support to the software applications that support CPIC reporting; annual licenses for software based on number of users; data center hosting fees for servers; number of FTE's needed to support scoring and work help desk tickets; number of planned training classes for system users.

Cost Allocation Methodology: The Component's cost allocation methodology is the number of Component Major Exhibit 300s divided by the total DHS Exhibit 300s, multiplied by the total cost of the CPIC activity.

Full Time Equivalent (FTE): This activity requires 0 FTE.

Strategic Sourcing – DHS Crosscutting Activity - \$1.9 million

Description of Service: The Strategic Sourcing Program Office (SSPO) is responsible for implementing a Department-wide approach to acquiring goods and services. SSPO provides DHS stakeholders economic and performance benefits through collaboration, rigorous analysis, and enterprise planning for acquisition initiatives. The SSPO collaborates with stakeholders to develop, deploy, and maintain sourcing strategies that enhance mission performance, improve acquisition efficiency, and optimize commodity management.

Managing Office: Office of the Chief Procurement Officer (OCPO)

Pricing Basis: Pricing is based on FTE, salary and benefits (which accounts for 80 percent of total funding requirement), and contractor support costs (which accounts for 20 percent of total funding requirement). Contractor support costs are negotiated through the competitive procurement process conducted by a DHS Contracting Officer.

Cost Allocation Methodology: Assessments are allocated to Components proportional to the average of the following two factors: (1) savings on DHS-wide contract vehicles and (2) procurement spend excluding simplified acquisition spend (less than \$150,000, as defined in Federal Acquisition Regulations Part 2.101). Data from Federal Procurement Data System-Next Generation (FPDS-NG), which is an automated system used to collect and report federal procurement spending, is used to determine spend by Component.

Full Time Equivalent (FTE): This activity requires 7 FTE.

CPO Shared Reporting – DHS Crosscutting Activity - \$5.0 million

Description of Services: The CPO Shared Reporting activity provides the DHS acquisition workforce with eProcurement systems and tools which leverage investment costs and promote competition, transparency, integrity and consistency.

Managing Office: Office of the Chief Procurement Officer (OCPO)

Pricing Basis: Pricing is based on existing contracts; system licensing fees; and necessary system security services, maintenance and operations. Systems include the Enterprise PRISM Instance, Enterprise Reporting Application, Electronic Procurement Information Center, Electronic Contract Filing System, and Acquisition Planning and Forecast System. Contractual support includes licenses, hosting services (production, staging, training, testing and continuity of operations), Information Systems Security Services and systems maintenance and operations.

Full Time Equivalent (FTE): This activity requires 0 FTE.

FY 2016 Current Services	8	8	\$1,336
FY 2016 Program Change	-	-	-
FY 2016 Total Request	8	8	\$1,336
Total Change 2015 to 2016	-	-	\$126

Working Capital Fund requests \$1.3 million and 8 FTE for this activity in FY 2016. Base adjustments include:

- Increase of \$0.008 million for the 2016 pay inflation.
- Increase of \$0.003 million for the 2015 annualization of pay raise.
- Increase of \$0.115 million for Working Capital Fund Operations.

CURRENT SERVICES PROGRAM DESCRIPTION:

Working Capital Fund Operations – WCF Management Activity - \$1.3 million

Description of Service: The Working Capital Fund Operations office manages the WCF budget formulation and execution activities by providing policy and procedures over financial management reporting, analytical and business reviews, data analysis, governance and analytical/data analysis, and customer dispute resolution services. The office provides services to the activity managers as well as customer Components across DHS. The WCF delivers oversight of day to day activities, budget formulation and execution.

These services include the oversight of WCF activity budgets and performance of financial management duties and responsibilities; providing direction and assistance to program managers in the development of operating plans, budgets, and supporting documents related to the use of the WCF. The team coordinates with the Director of Financial Operations and makes recommendations on operating plans, rate structures, and activities to be supported by the fund. The staff facilitates Quarterly WCF Governance Board Meetings to provide oversight, guidance and recommendations for/from DHS senior leaders to customers. The team strives to establish working relationships between the Activity Managers and the Components to provide transparency while improving the efficiency and effectiveness of WCF fiscal operations in accordance with the business and management services.

The WCF provides funds management oversight including cash management support, analysis and reconciliations, data analysis, billing and undelivered inquiries, to ensure accurate and timely use of funding. In addition, the team reviews financial reports for conformance with program and financial plans and inform senior management and program officials of trends and changes.

Managing Office: Office of the Chief Financial Officer (OCFO)

Pricing Basis: Pricing is based on 8 FTE personnel and benefits costs to maintain current service levels for managing the WCF, as well as shared service costs.

Cost Allocation Methodology: The cost allocation methodology for this activity is the pro rata share based on the percentage of each components WCF assessment amount divided by the total WCF assessment multiplied by the total estimated cost of the activity.

Full Time Equivalent (FTE): This activity requires 8 FTE.

IV. Program Justification Changes

Department of Homeland Security
Working Capital Fund
Justification of Program Changes
(Dollars in Thousands)

Program Increase 1: CLAN Operations
PPA: Fee for Service Activity
Program Increase: Positions 0, FTE 0, Dollars \$4,019

Funding Profile

	FY 2014 Revised Enacted			FY 2015 President's Budget			FY 2016 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							2	2	\$18,055
Program Increase							0	0	\$4,019
Total Request	0	0	\$0	2	2	\$18,039	2	2	\$22,074

Description of Item

The CLAN activity serves Top Secret / Secure Compartment Information (TS/SCI) Enterprise users at DHS Headquarters (HQ), select Department Major and Sub-Components and field offices for:

- TS/SCI network and internet/intranet access;
- Management and delivery of desktop computing applications, equipment, email, communications, secure video (VTC), voice (phone) and messaging for TS/SCI networks;
- Communications security and information technology (IT) operations; and
- Data Center, Disaster Recovery planning and mitigation to ensure continuous operations.

Justification

The CLAN Operations requests an increase of \$4.019 million to support operations and maintenance (O&M) for the DHS Enterprise TS/SCI network, to include new service offerings. These enterprise-wide IT services will collectively provide a more responsive, reliable, survivable computing infrastructure platform and framework that supports voice, video, and data communications to conduct TS/SCI activities. The increased funding will support the O&M of basic desktop computing (Desktop Technology Refresh), telephony (Voice over Secure Internet Protocol – VoSIP), and video teleconferencing services (Desktop Secure Video Teleconferencing). The increased funding will also support the O&M for Enterprise Cross Domain Services (ECDS).

Funding will align DHS to Intelligence Community (IC) standards and requirements by supporting High-side Vetting, simplifying the process for file transfer, delivering immediate and automated

support for time-sensitive efforts, addressing new security requirements, reducing long-term O&M costs, providing enhanced voice communications for the DHS Enterprise, allowing direct access to the IC and Department of Defense communication systems, increasing the security posture of DHS for their secure communications, providing in-person teleconferences (without travel) between senior DHS leadership across the national capital region and the country, and by aiding in an enterprise-wide capability for quick decision-making, increased connectivity, virtual presence for meetings that aligns with critical mandates from the White House.

Impact on Performance

These capabilities will help move the Department toward a One DHS” approach for the management of its TS/SCI infrastructure and align to IC standards and requirements. By actively seeking to unify services, programming, and platforms across the TS/SCI infrastructure, the Department stands to realize greater information sharing capabilities, as well as a cost avoidance (e.g. hardware/software licensing costs, system administration costs, etc.) over the lifecycle of the program and greater efficiencies by reducing redundancy.

The predominant need within DHS is for transfer cross domain guards that automatically, or by user initiation (e.g. sending an email), move data between different security domains (e.g. an email from unclassified to classified/SECRET email). Cross domain technology is designed and approved to securely and quickly move data across networks of differing classification levels. These systems are accredited to move data from a lower classification to a higher classification system and from a higher classification to a lower classification system.

Maintaining the Virtual Desktop Image solution for Desktop Technology Refresh will enable a multitude of positive business and operations impacts by extending the life span of PCs, increase in uptime of PCs, increased data security by housing information on server infrastructure, refresh improvements due to refresh being done on server rather than PC, and increased efficiency of deployment of support to a geographically diverse workforce.

Annual O&M costs avoidance will be realized for VoSIP and will increase the security posture of DHS for their secure communications by utilizing communications via the closed classified network. Utilizing SVTC units for senior DHS leadership at Headquarters, on the Homeland Security Intelligence Council (HSIC) and at component locations will help to address the mission critical need to share information necessary for action and manage Intelligence for the Homeland Security Enterprise. In doing so, senior leadership will have the ability to communicate in real-time across secure platforms with each other and key partners.

Department of Homeland Security
Working Capital Fund
Justification of Program Changes
(Dollars in Thousands)

Program Increase 2: HQ Human Capital Services
PPA: Fee for Service Activity
Program Increase: Positions 0, FTE 0, Dollars \$133

Funding Profile

	FY 2014 Revised Enacted			FY 2015 President's Budget			FY 2016 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							81	81	\$13,129
Program Increase							0	0	\$133
Total Request	81	81	\$13,629	81	81	\$13,038	81	81	\$13,262

Description of Item

The HQ Human Capital Services (HCS) activity provides processing of personnel actions, employee labor relations and benefits services to Headquarter (HQ) customers only. Examples of other services provided include: staffing and recruitment; position classification/position management; performance management; payroll and personnel action processing; employee and labor relations support; retirements and benefits support; time and attendance support; delegated examining unit (DEU) administration, audits and quality control services; Employee Assistance Program (EAP) services; and new employee and other leadership/supervisory training to support ongoing initiatives.

Justification

The Department is requesting a \$133,000 increase for the HQ Drug Testing Program to be included in the HQ Human Capital Services Working Capital Fund. DHS HQ is mandated to drug test its personnel that hold Testing Designated Positions per Executive Order 12564.

Impact on Performance

Consistent with departmental policy, it is the policy of DHS HQ to prevent and eliminate illegal use, possession, distribution, or trafficking of controlled substances, among its employees. The DHS HQ Drug Free Workplace Plan (the "Plan") will inform employees about the testing program, the hazards of drug use and the resources available for meaningful assistance to employees and family members experiencing the problems associated with illegal drug use.

The President, in signing Executive Order 12564 on 15 September 1986, required that all federal agencies implement a program to achieve a drug-free workplace. Even without such a requirement,

achieving a drug-free America is one of our nation's highest priorities. In line with that, the Department of Homeland Security received approval from the Department of Health and Human Services (HHS) to implement drug testing in January 2013. We are required to drug test 10 percent of our drug testing designated positions within the workforce annually.

Department of Homeland Security
Working Capital Fund
Justification of Program Changes
(Dollars in Thousands)

Program Increase 3: HCBS USA for Staffing Consolidation
PPA: Fee for Service Activity
Program Increase: Positions 0, FTE 0, Dollars \$2,300

Funding Profile

	FY 2014 Revised Enacted			FY 2015 President's Budget			FY 2016 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							21	21	\$6,906
Program Increase							0	0	\$2,300
Total Request	21	21	\$8,624	21	21	\$8,225	21	21	\$9,206

Description of Item

The mission of the Human Capital Business Systems (HCBS) activity is to maintain and support DHS enterprise-wide human capital business systems and reduce costs by consolidating the number and variety of DHS human capital systems. HCBS reduces costs by consolidating the number and variety of DHS human capital systems maintained. The program develops enterprise acquisition strategies on behalf of all of DHS components, avoiding considerable duplicative costs if DHS components proceed independently. The systems' capabilities meet the requirements specified by the user-community and provide services in a timely and cost-effective manner by avoiding considerable duplicative costs if DHS components proceeded independently.

Justification

USA Staffing is the back-end tool that HR professionals use to create and manage vacancy announcements, assessments, review applications and issue and audit certificates. Currently, the Components provide funding for USA Staffing directly to OPM through Interagency Agreements (IAAs). The Components and OPM have reached out to OCHCO to request that this funding be moved into the existing Working Capital Fund activity Human Capital Business Systems (HCBS).

The requested increase will be used for the USA Staffing Consolidation. This proposal will consolidate eight IAA's to one IAA for USA Staffing licenses beginning in FY 2016 to be centrally managed through the WCF. This requirement will be added to the current HCBS activity, as this activity currently supports the facilitation, maintenance, and support of DHS human capital business systems.

Impact on Performance

The will be no impact on performance as a result of this transfer. HCBS will continue to provide services for ongoing operations including help desk support, liaison and adjudication functions with the NFC, Office of Personnel Management's eOPF and the ability to support reporting requirements (from DHS leadership, OPM, Congress & GAO). The transfer will not impact the program's ability to provide necessary critical enhancements including component specific modifications that require coordination and user acceptance testing.

Department of Homeland Security
Working Capital Fund
Justification of Program Changes
(Dollars in Thousands)

Program Increase 4: Regulatory Services
PPA: Fee for Service Activity
Program Increase: Positions 0, FTE 0, Dollars \$251

Funding Profile

	FY 2014 Revised Enacted			FY 2015 President's Budget			FY 2016 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$0
Program Increase							0	0	\$251
Total Request	0	0	\$0	0	0	\$0	0	0	\$251

Description of Item

The Regulatory Services umbrella consists of the following two activities: operation and maintenance of the Regulatory Affairs Management System (RAMS) and e-Docket Support Services (an existing WCF sub-activity moving from the eRulemaking umbrella to the Regulatory Services umbrella).

RAMS is a DHS-wide, Intranet-based information technology system that serves as a tracking system, a workflow management tool, a collaboration platform, and a reporting solution. RAMS matures and strengthens the homeland security enterprise by improving DHS’s management systems and processes as well as DHS’s programmatic and organizational alignment.

The e-Docket Support Services contract is the mechanism through which DHS and its components obtain docket center support. Docket center staff review, process, and publicly post all docket materials onto www.regulations.gov, the government-wide online docket. Docket materials include proposed and final regulations, public comments, meeting notices, supporting analyses, background materials, and guidance documents. .

Justification

Regulatory Services requests \$251,000 for the review and clearance of all DHS and interagency regulatory actions as well as Docket center support. An effective “one DHS” regulatory program requires organizational and programmatic alignment and collaboration among all DHS components, along with efficient, transparent, integrated management systems and processes.

Impact on Performance

OGC currently collects reimbursement for RAMS services through Interagency Agreements with the participating DHS Components', the move to have it centrally managed through the WCF will positively impact the performance service levels of DHS regulatory programs. Furthermore, the combination of RAMS and e-Docket into Regulatory Services will improve efficiency and oversight.

Department of Homeland Security
Working Capital Fund
Justification of Program Changes
(Dollars in Thousands)

Program Decrease 1: DHS OneNet
PPA: Fee for Service Activity
Program Decrease: Positions 0, FTE 0, Dollars \$(1,655)

Funding Profile

	FY 2014 Revised Enacted			FY 2015 President's Budget			FY 2016 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							17	17	\$66,194
Program Decrease							0	0	(\$1,655)
Total Request	17	17	\$69,600	17	17	\$66,158	17	17	\$64,539

Description of Item

The DHS OneNet activity is the funding source that directly supports investment and investment-related O&M for the OneNet. DHS OneNet implements the DHS Chief Information Officer's (CIO) vision of One Infrastructure which requires an integrated IT infrastructure to serve as the foundation for information sharing and agile responses to cyber security threats against the homeland. This OMB directed initiative strengthens and unifies DHS operations, management, governance and performance by reducing vulnerability and improving security within the DHS IT Enterprise. It implements the DHS CIO's vision of One Infrastructure, by unifying disparate Component information technology networks, platforms and services into a set of enterprise wide IT Services. As part of the process, DHS began to consolidate its Components' existing infrastructures into a single Wide Area Network (WAN), known as OneNet.

Justification

The DHS OneNet provides network segmentation between components to protect the various categories of controlled unclassified and classified information. Although the proposed reduction will impact OneNet, every effort will be made to efficiently use remaining resources to maintain a robust program.

Impact on Performance

Although the proposed reduction will impact OneNet, every effort will be made to efficiently use remaining resources to maintain a robust program.

Department of Homeland Security
Working Capital Fund
Justification of Program Changes
(Dollars in Thousands)

Program Decrease 2: e-Rulemaking
PPA: Government Wide Mandated Service Activity
Program Decrease: Positions 0, FTE 0, Dollars \$(107)

Funding Profile

	FY 2014 Revised Enacted			FY 2015 President's Budget			FY 2016 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$508
Program Decrease							0	0	(\$107)
Total Request	0	0	\$508	0	0	\$508	0	0	\$401

Description of Item

e-Rulemaking is a collaborative, interagency activity designed to consolidate rulemaking systems at the various departments and agencies and is centrally managed through a web-based environment offering functionality such as one-stop access, search capabilities, and public commenting

Justification

In FY2014, the e-Rulemaking activity was expanded to include the e-Docket Support System. The e-Docket Support System allows the public to submit comments on Federal Register Rules, studies and hearing transcripts to an agency by e-mail, fax, U.S. Postal Service, overnight delivery or in person. In FY 2016, e-Docket will be transferred to the new Regulatory Services Activity under the Fee for Service PPA; therefore, reducing the e-Rulemaking activity by \$0.107 million.

Impact on Performance

There is no impact on performance.

V. Exhibits and Other Supporting Material

A. Justification of Proposed Legislative Language

SEC. 504. The Department of Homeland Security Working Capital Fund, established pursuant to section 403 of Public Law 103–356 (31 U.S.C. 501 note), shall continue operations as a permanent working capital fund for fiscal year [2015] 2016¹: Provided, That none of the funds appropriated or otherwise made available to the Department of Homeland Security may be used to make payments to the Working Capital Fund, except for the activities and amounts allowed in the President’s fiscal year [2015] 2016² budget: Provided further, That funds provided to the Working Capital Fund shall be available for obligation until expended to carry out the purposes of the Working Capital Fund: Provided further, That all departmental components shall be charged only for direct usage of each Working Capital Fund service: Provided further, That funds provided to the Working Capital Fund shall be used only for purposes consistent with the contributing component: Provided further, That the Working Capital Fund shall be paid in advance or reimbursed at rates which will return the full cost of each service. Provided further, That the Committees on Appropriations of the Senate and House of Representatives shall be notified of any activity added to or removed from the fund: Provided further, That the Chief Financial Officer of the Department of Homeland Security shall submit a quarterly execution report with activity level detail, not later than 30 days after the end of each quarter.

Fee for Service Activity Mission Statement

DHS WCF activity managers provide or coordinate delivery of a specific service or benefit to DHS Components. The benefit/cost for providing the WCF activity is tangible and is directly linked to a Component's use of services or products. These WCF activities are reimbursed for the provision of services, and have characteristics typical of a business enterprise. The costs for operating the business are reimbursed by billing customers for the provision of goods and services at rates that are briefed and approved by the WCFGB. Each fee for service activity is expected to recover its operational expenses, usually at a much lower cost as the Components benefit from economies of scale. Examples include: GSA rent and real estate services, IT and telecommunication services, human resource services, procurement operations, and financial management services.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
11.1 Full-time Permanent	\$74,959	\$76,093	\$70,430	\$(5,663)
11.3 Other than Full-Time Permanent	\$1,041	\$1,051	\$1,450	\$399
11.5 Other Personnel Compensation	\$479	\$454	\$891	\$437
12.1 Civilian Personnel Benefits	\$16,561	\$16,939	\$22,488	\$5,549
Total, Salaries & Benefits	\$93,040	\$94,537	\$95,259	\$722

The WCF's Fee for Service PPA requests an increase of \$722,362. This increase includes a 1 percent pay inflation for WCF activities with FTE.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
21.0 Travel and Transportation of Persons	\$199	\$186	\$173	(\$13)

The FY2016 request reflects a decrease of \$13,000 for costs related to the transportation of persons, subsistence of travelers, and incidentals.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
22.0 Transportation of Things	\$10	\$0	\$150	\$150

The FY2016 request reflect an increase of \$150,000 for cost related to the HSPD-12 activity for United Parcel Services (UPS) contract cost.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
23.1 Rental Payments to GSA	\$134,958	\$131,990	\$130,205	(\$1,785)

In FY2016, the WCF's Fee for Service PPA requests a net decrease of \$1,785,000. This decrease is due to the reduction of space requirements for CIO and Ops.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
23.3 Communications, Utilities, and Misc. Charges	\$30,149	\$25,932	\$21,446	(\$4,486)

This request reflects a decrease of \$4,486,000. The \$2,500,000 is due to NCRIO's IT Infrastructure services for a new wireless contract and the remaining reduction is a result of realignments for overhead and contribution costs.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
24.0 Printing and Reproduction	\$1,959	\$1,964	\$2,469	\$505

This request reflects an increase of \$505,000 for the printing of the card stock for the HPSD-12 activity.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.1 Advisory and Assistance Services	\$22,812	\$20,765	\$21,437	\$672

The FY 2016 request reflects an increase of \$672,000 due to contractor support for help desk and report writing services for the Procurement Operations Office.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.2 Other Services from Non-Federal Sources	\$74,204	\$67,705	\$68,336	\$631

The FY 2016 request reflects a net increase of \$631,000 which is related to increased security costs at St. Elizabeths, reduction of reserve fees for Flexible Spending Plan, and a reduction in the number of candidates in federal executive Institute slots for the HQ Executive Leadership Development activity.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.3 Other Goods and Services from Federal Sources	\$109,696	\$100,774	\$123,827	\$23,053

The FY 2016 request reflects an increase of \$23,053,000. The increase is the result of a reassessment to sustain current operation for NFC payroll; the addition of cross domain, tech refresh and video for CLAN; the addition of drug testing services contract, and staffing consolidation; and correcting object classes for WCF overhead/contribution cost.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.7 Operation and Maintenance of Equipment	\$311,586	\$205,589	\$243,358	\$37,769

The FY 2016 requests an increase of \$37,769,000. The increase is due to cost related to customer consumption from adding Adobe, Symantec and Oracle licenses.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
26.0 Supplies and Materials	\$2,298	\$2,221	\$2,590	\$369

The FY 2016 requests an increase of \$369,000 for additional support items for full staff as well as laminate and cleaning kits for HSPD-12 activity

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
31.0 Equipment	\$4,466	\$4,242	\$4,474	\$232

The FY 2016 requests an increase of \$232,000 due to equipment for needed storage space to hold working material for NCRIO.

Government Wide Mandated Service Activity Mission Statement

Government-wide Mandated Activities are Administration-sponsored initiatives that are managed by a designated Federal department to improve overall government performance. Customers are assessed for the cost of supporting the activity. The activities should also provide a direct benefit to participating Components. Examples include the government-wide e-Government initiatives and the OMB-sponsored Interagency Councils such as Human Resources Line of Business, Financial Management Line of Business, e-Gov Benefits, and Disaster Management.

Summary Justification and Explanation of Changes

DHS Cross Cutting Activities Mission Statement

The DHS crosscutting activities are Department-wide programs managed by a single office that yield some benefit to all DHS Components, such as Strategic Sourcing. The actual costs of the programs are recouped by redistributing the costs to the Components based on their share of the discretionary budget, staffing or some other fair and equitable pro-rata basis.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change

Working Capital Fund Management Activity Mission Statement

The WCF Management Activity includes funding for the staff that develops WCF policy and procedures, formulates and executes the WCF budget, and facilitates dispute resolution of issues between activity managers and customers.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
11.1 Full-time Permanent	\$916	\$924	\$940	\$16
12.1 Civilian Personnel Benefits	\$221	\$225	\$228	\$3
Total, Salaries & Benefits	\$1,137	\$1,149	\$1,168	\$19

In FY 2016, the WCF Management's PPA requests an increase of \$19,000. This increase is for the 1 percent for pay inflation and to fully staff the activity up to the authorized FTE level of 8 FTE and 8 positions.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
24.0 Printing and Reproduction	\$0	\$53	\$0	(\$53)

The FY 2016 reflects a decrease of \$53,000 to align charges to the appropriate object class.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.3 Other Goods and Services from Federal Sources	\$98	\$7	\$168	\$161

The FY 2016 includes an increase of \$161,000 to correct object class codes, increased charges due to fully staffing the activity, as well as reflecting changes in algorithms for other WCF activities.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
26.0 Supplies and Materials	\$6	\$1	\$0	(\$1)

The FY 2016 reflects a decrease of \$1,000 due to a decline of discretionary products needed to perform daily operations of managing the WCF.

A. Component Overview

The Departmental Management and Operations (DMO) is comprised of the following mission-oriented programs that support achievement of the DHS strategic missions, goals, and objectives.

Mission Support- OSEM: This program provides support DHS-wide through enterprise products or services for, and tailored to, mission and/or operational activities. Key capabilities include supporting law enforcement and first responders, preserving civil rights and civil liberties and managing international and domestic stakeholders.

Management and Administration – OSEM/USM: This program captures activities that provide enterprise leadership, management and/or business administration services and describes the capabilities and activities that support the day-to-day management and back office functions enabling the Department to operate efficiently and effectively. Key capabilities include conducting agency planning and performance management, managing finances, managing agency workforce, providing physical and personnel security, acquiring goods and services, managing information technology, managing agency property and assets, managing agency communications, managing legal affairs, and providing general management and administration.

FY 2016 Budget Request

The table below shows DMO FY 2016 Budget request by its mission-oriented programs.

Program	FY 2016 Request	
	FTE	Dollars (in thousands)
Mission Support- OSEM	133	\$30,058
Management and Administration - OSEM	464	\$104,189
Management and Administration - USM	1,432	\$826,380
Total Budget Request	2,029	\$960,627

B. Component Contributions to Achieving Departmental Missions

The table below shows the alignment of the DMO programs to the DHS Missions and Mature and Strengthen Homeland Security.

Programs	DHS Missions					Mature and Strengthen Homeland Security
	Prevent Terrorism and Enhance Security	Secure and Manage Our Borders	Enforce and Administer Our Immigration Laws	Safeguard and Secure Cyberspace	Strengthen National Preparedness and Resilience	
Mission Support-OSEM			4%			96%
Management and Administration - OSEM						100%
Management and Administration - USM						100%

Mission 3: Enforce and Administer Our Immigration Laws

Resources Requested

DMO resources supporting *Enforce and Administer Our Immigration Laws* are provided in the table below.

\$ in thousands

Program	FY 2014		FY 2015		FY 2016	
	\$	FTE	\$	FTE	\$	FTE
Mission Support-OSEM	\$1,263	7	\$1,275	7	\$1,288	7
Total	\$1,263	7	\$1,275	7	\$1,288	7

Performance Measures

For *Enforce and Administer Our Immigration Laws*, Management Measures are displayed to provide a more thorough context of expected performance results.

Management Measures

Office of the Citizenship and Immigration Services Ombudsman

Measure: Number of outreach activities conducted by the Ombudsman to obtain feedback on the delivery of citizenship and immigration services
Description: This measure reports the number of outreach activities conducted by the Citizenship and Immigration Ombudsman (CISOMB) to capture feedback on the delivery of

citizenship and immigration services by U.S. Citizenship and Immigration Services (USCIS). CISOMB regularly conducts outreach events to identify areas in which individuals and employers encounter problems dealing with USCIS to propose changes in its administrative practices and mitigate identified problems.

Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	N/A	N/A	N/A	50	80	85
Result:	N/A	N/A	N/A	99	N/A	N/A

Measure: Percent of case-related inquiries submitted to the Ombudsman regarding the delivery of citizenship and immigration services where action has been taken to resolve within 90 days of receipt

Description: This measure reports the percent of case-related inquiries submitted to Citizenship and Immigration Services Ombudsman (CISOMB) regarding the delivery of citizenship and immigration services by U.S. Citizenship and Immigration Services (USCIS) where action has been taken by CISOMB to resolve the issue within 90 days of receipt. CISOMB takes action on requests for case assistance by inquiring with the responsible USCIS office to ensure the customer's concern is addressed. CISOMB's mission is to assist individuals and employers when they encounter difficulty with USCIS.

Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	N/A	N/A	N/A	85%	87%	89%
Result:	N/A	N/A	N/A	89%	N/A	N/A

Mature and Strengthen Homeland Security

Resources Requested

DMO resources supporting *Mature and Strengthen Homeland Security* are provided in the table below.

\$ in thousands

Program	FY 2014		FY 2015		FY 2016	
	\$	FTE	\$	FTE	\$	FTE
Mission Support-OSEM	\$24,114	114	\$25,386	116	\$28,770	126

Performance Measures

For *Mature and Strengthen Homeland Security*, Management Measures are displayed to provide a more thorough context of expected performance results

Management Measures

Office of the Chief Financial Officer

Measure: Cost per vendor invoice						
Description: This measure is an indicator of how efficiently the Department pays invoices and is intended to help Chief Financial Officers determine the unit cost for processing invoices. Due to the high number of vendor invoices paid by the Department, small increases in efficiency can impact the results. The elements that are included in the calculation are the total direct cost of the accounts payable function, which is the total cost for providing services to pay vendor invoices, and the number of invoices paid to contractors and service providers.						
Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	N/A	N/A	N/A	N/A	<= 56	<= \$55
Result:	N/A	N/A	N/A	N/A	N/A	N/A

Measure: Interest penalties paid on all invoices (per \$1 million in total payments)						
Description: This measure reflects the amount of interest penalties incurred by the Department of Homeland Security for late payment of invoices submitted by vendors that provided goods and services to the Government. The Prompt Payment Act requires that Federal agencies pay all approved vendor invoices in a timely manner. The Act assesses late interest penalties against agencies that pay vendors after a payment due date. Reducing the amount of interest paid ensures that all Department of Homeland Security vendors are paid in a timely manner without additional cost to the Government.						
Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	<=\$175	<=\$160	<=\$160	<=\$160	<=\$150	<=\$140
Result:	\$88.23	\$27.24	\$68.64	\$113.67	N/A	N/A

Measure: Percent of accounts receivable from the public delinquent over 180 days						
Description: This measure reflects the percent of dollars owed to the Department and its Components from non-federal individuals and organizations that are more than 180 days past the due date. There is a reporting lag of one quarter for the results of this measure.						
Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	<15%	<15%	<15%	<15%	<23%	<22%
Result:	13.5%	22%	22%	24%*	N/A	N/A

*FEMA and the U.S. Coast Guard currently hold the majority of delinquent debt within DHS. FEMA's delinquent debt is the result of improperly awarded funding in the aftermath of Hurricanes Katrina, Rita, and Wilma. The majority of the delinquent debt reported by the U.S. Coast Guard is a result of litigation efforts relating to the Oil Spill Liability Trust Fund from the Deepwater Horizon oil spill in the Gulf of Mexico. This debt is in litigation and cannot be actively recouped at

this time. FEMA’s National Processing Service Center (NPSC) is responsible for determining eligibility for disaster assistance payments and is concentrating efforts on preventing errors in future payments.

Measure: Percent of vendors paid electronically						
Description: This measure reflects the percent of vendors that are paid using Electronic Funds Transfer for payment of invoices. The Debt Collection Improvement Act requires the use of Electronic Funds Transfer for most Federal payments. An Electronic Funds Transfer is any transmission of monies, other than by cash, check, or similar paper, made through an electronic means. The Treasury Department indicates that it costs the Government \$0.98 to issue a payment by check and \$0.10 to issue an Electronic Funds Transfer payment. Payments made electronically reduce the administrative cost to the Government.						
Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	97.5%	98%	98%	98%	98%	98%
Result:	99.6%	98.8%	99.9%	99.8%	N/A	N/A

Measure: Total instances of material weakness conditions identified by the independent auditor in their report on the DHS financial statements						
Description: The number reported is the total instances of material weakness conditions in both the DHS Office of Financial Management and DHS components identified in the integrated financial statement audit by the independent public auditor. A material weakness is a deficiency significant enough to be reported outside the agency.						
Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	<10	<10	<9	<5	<2	<2
Result:	7	4	2	2	N/A	N/A

Office of the Chief Human Capital Officer

Measure: Percent of favorable responses by DHS employees on the annual employee survey						
Description: This measure reflects the average percent of positive responses to the 39 questions which make up the four Human Capital Assessment and Accountability Framework Indices (HCAAF) on the annual employee survey. The U.S. Office of Personnel Management (OPM) has determined the make up of the four HCAAF Indices as: Leadership and Knowledge Management; Results-Oriented Performance Culture; Talent Management; and Job Satisfaction. Employee surveys are conducted annually to gauge employees' perceptions on whether they are effectively led and managed, if they have opportunities to grow professionally and advance in their careers, and if their contributions are valued and recognized. The survey results are used by DHS agency managers to address human capital management issues and improve agency performance in these areas.						
Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	57%	58%	53%	54%	55%	56%
Result:	55%	53%	50%	48%*	N/A	N/A

*The results indicate that leadership, recognition, career advancement and sense of empowerment are among the major concerns contributing to the decline. The Secretary and Deputy Secretary

have made employee engagement a top priority by leading the newly established Employee Engagement Steering Committee to address the challenges identified by the survey results.

Measure: Percent of veteran hires among total DHS hires in each fiscal year						
Description: This measure reflects the percentage of new veteran hires for each fiscal year based on the total number of DHS new hires. As part of the President's Executive Order 13518 (November 9, 2009), on the Employment of Veterans in the Federal Government, the Council on Veterans Employment is required to establish performance goals to assess the effectiveness of the government-wide Veterans Employment Initiative.						
Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	24%	22%	25%	25%	25%	25%
Result:	21.2%	24.9%	24.5%	27.6%	N/A	N/A

Office of the Chief Information Officer

Measure: Cost per help desk ticket						
Description: This measure identifies the relative efficiency of help desk support and evaluate decisions on alternate service providers in support of cost savings and efficiency. In this measure, the total spend for help desk operations is divided by the total count of help desk tickets opened for the period being measured. The result is the average cost per ticket to deliver help desk services to end users, and is the DHS aggregate from all the Components.						
Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	N/A	N/A	N/A	N/A	\$27	\$24
Result:	N/A	N/A	N/A	N/A	N/A	N/A

Measure: DHS enterprise architecture maturity score						
Description: Based on GAO standards, this measure reflects the overall capability of DHS to mature its Enterprise Architecture (EA). The development of the EA's maturity is based on a scale of 1 to 6 representing the stages of maturity in GAO's Framework for Assessing and Improving Enterprise Architecture Management (GAO-10-846G), with 5 being the end target for "fully capable to mature" where the enterprise is expanding and evolving the EA and its use for institutional transformation. Enterprise architecture defines the relationship between an agency's mission, business processes, information, and supporting technologies. It illustrates how the business processes and technology support the mission. Having a clearly documented, mature EA is critical to the organization's success because it describes the technology and information needed to perform the mission, and includes descriptions of how the architecture of the organization should be changed in order to respond to changes in the mission.						
Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	3	4	5	5	4.6	4.7
Result:	2.92	4.20	4.22	4.56	N/A	N/A

Measure: Percent of DHS information technology (IT) assets continuously monitored for security vulnerabilities						
Description: This measure gauges the percent of IT assets, such as workstations, servers, and						

laptops, belonging to DHS Information Systems in which a capability exists for Components to continuously monitor and report their status to the DHS Information Security Office (ISO). To consider an asset as being continuously monitored means that it has visibility when Components conduct their scans of assets for security vulnerabilities. The measurement methodology and performance targets are driven by OMB requirements. This measure reflects a combination of the three components of continuous monitoring reported for the Cross-Agency Priority (CAP) Goal measure. It is also an important measure reported in the Federal Information Security Management Assurance (FISMA) suite of measures. The measure assists in meeting federal regulations and requirements to protect information systems and their associated data.

Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	N/A	N/A	N/A	90%	90%	90%
Result:	N/A	N/A	N/A	95%	N/A	N/A

Measure: Percent of DHS users that are required to use PIV cards for network access

Description: This measure tracks the percent of DHS employees and contractors that are required to use their Personal Identity Verification (PIV) card to access the DHS network.

Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	N/A	N/A	N/A	N/A	90%	95%
Result:	N/A	N/A	N/A	N/A	N/A	N/A

Measure: Percent of information technology segments covered by portfolio governance

Description: This measure represents the total number of information technology segments that are covered by governing bodies. The governing bodies are established to provide oversight and strategic direction for investments as they align to information technology segments. There are a total of 30 information technology segments.

Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	N/A	N/A	50%	67%	83%	100%
Result:	N/A	N/A	50%	70%	N/A	N/A

Office of the Chief Procurement Officer

Measure: Average rating from Small Business Administration (SBA) Small Business Procurement Scorecard

Description: This measure reflects an overall performance assessment rating for the DHS Socio-Economic Contracting Program from SBA on an annual basis. The letter rating is an aggregate assessment for DHS across three program areas: prime contracting achievement, subcontracting achievement, and progress plan towards meeting specific prime and subcontracting goals. The measure is derived from applying a weighted assessment across all three areas, with six potential grade ranges and is converted to a numerical score to the purposes of reporting internally. (A+=5, A=4, B=3, C=2, D=1, F=0).

Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	N/A	4	4	4	4	4
Result:	N/A	4	4	4	N/A	N/A

Measure: Past Performance Information Retrieval System (PIRS) compliance rate						
Description: This measure depicts compliance with the requirement to evaluate and document federal contractor's performance. These evaluations are performed in the Contractor Performance Assessment Reporting System and maintained in the Past Performance Information Retrieval System. The evaluations are used to inform future award decisions to ensure the government contracts with quality companies. This measure assesses component and overall DHS compliance with conducting contractor performance evaluations.						
Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	N/A	N/A	N/A	N/A	83%	85%
Result:	N/A	N/A	N/A	N/A	N/A	N/A

Measure: Percent compliance rate for data in Federal Procurement Data System - Next Generation						
Description: This measure reflects the overall accuracy of data in the Federal Procurement data System (FPDS). The data accuracy is measured based on a statistical review of data elements specified by the Office of Management and Budget. FPDS contains detailed information on DHS contract actions. The accuracy of this data is extremely important because it is the central source of data used by Congress, DHS management, oversight organizations, and the public.						
Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	92%	93%	94%	95%	95%	95%
Result:	N/A	93%	94%	95%	N/A	N/A

Measure: Percent of contracts awarded on the basis of full and open competition						
Description: This measure gauges the percent of contracts issued by DHS that meet agreed upon standards set by the Office of Management and Budget (OMB), Office of Federal Procurement Policy, for competition level. This competition assessment assists in determining agency compliance with the Competition in Contracting Act and provides a qualitative measure for reviewing high risk contracts.						
Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	68%	68%	67%	68%	65%	65%
Result:	N/A	72.3%	70.0%	72.3%	N/A	N/A

Measure: Percent of environmentally preferable and sustainable purchasing actions						
Description: This measures gauges green purchases for sustainable acquisition. Green purchases are those products and services that utilize renewable energy technologies, energy efficiency, including using products containing energy-efficient standby power devices, and products that contain the use of recovered material, biobased products, and other materials that are environmentally preferable, and/or energy- and water-efficient. This measure helps to ensure compliance with the Office of Management and Budget's guidance to meet Presidential priorities for sustainable purchasing, which will promote energy and water efficiency, renewable energy, and foster markets for emerging technologies.						
Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016

Departmental Management and Operations - Strategic Context

Target:	95%	95%	95%	95%	95%	95%
Result:	N/A	98%	99%	97%	N/A	N/A

Office of Civil Rights and Civil Liberties

Measure: Percent of Equal Employment Opportunity complaints timely adjudicated						
Description: This measure tracks CRCL's ability to adjudicate EEO claims in a timely manner. Timeliness is defined by the EEO regulations - CRCL has between 45 and 60 days to issue a Final Agency Decision, depending on the type of case. (See 29 C.F.R. sec. 1614).						
Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	N/A	25%	40%	40%	45%	50%
Result:	N/A	49%	41%	53%	N/A	N/A

Measure: Percent of the Office of Civil Rights and Civil Liberties (CRCL) reports of investigation in which CRCL's recommendations to the DHS components are implemented						
Description: CRCL reports of investigations include recommendations which, if accepted and implemented, will improve the respective program. This measure reflects the percent of recommendations made by CRCL that are accepted and implemented by the Department of Homeland Security (DHS). CRCL tracks the recommendations that are issued until they have been implemented.						
Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	N/A	85%	85%	86%	87%	87%
Result:	N/A	90%	95%	100%	N/A	N/A

Office of the Chief Readiness and Support Officer

Measure: Annual cost savings from the Affordable Readiness Program						
Description: This measure captures the annual cost savings from Affordable Readiness program initiatives that seek to achieve optimum efficiencies/cost savings without harming mission readiness. Affordable Readiness initiatives focus on such DHS administrative operations as real property, personal property, mobile assets, and environmental management. This measure reflects two types of cost savings (reduction and avoidance). Cost reductions are a net reduction in expenditures for products or services procured when compared to expenditures for the prior 12 months or a change to lower cost alternatives. Cost avoidance refers to cost savings that do not lower expenditures for products or services when compared against historical results, but rather minimize or avoid entirely the negative impact to the bottom line that a price increase would have caused.						
Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	N/A	N/A	N/A	\$200,473	\$1,583,721	\$1,617,423
Result:	N/A	N/A	N/A	\$441,156	N/A	N/A

Measure: Percent reduction in scope 1 & 2 greenhouse gas emissions						
Description: The measure captures the percent reduction of greenhouse gas (GHG) emissions across the Department of Homeland Security. This percentage only includes scope 1 & 2 GHG						

emissions. This is an annual DHS measure calculated in Q2 of each year. This is also an OMB sustainability scorecard measure and is used to drive Government-wide reduction of GHG 1 & 2 emissions by Federal agencies. DHS's target is to reduce emissions 25% by 2020 as compared to the 2008 baseline numbers.

Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	2%	3%	4%	5%	7%	11%
Result:	13.59%	5.3%	6.0%	30.1%	N/A	N/A

Measure: Square feet per person

Description: This is an Office of Management and Budget (OMB) real property benchmark measure defined to compare performance across agencies. This measure tracks the square feet per person for agency office space, as defined by the new OMB MAX data center. The objective, over time, is to reduce the square feet per person and the real estate footprint in order to meet the goals of the OMB Presidential Management Agenda. It is anticipated there will be cost savings as square feet per person gradually reduces across the real property inventory. Lower square feet per person will be realized as leases expire, new workspace strategies are deployed and less space is acquired. It is realistic to expect little change in real property measure targets for 5 years (the average lease length) beginning from date of substantial implementation of workplace initiatives such as telework, IT mobility tools, efficient space design, and the principles in the new workplace strategies outlined in the DHS Workspace Standard.

Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	N/A	N/A	N/A	N/A	<=234	<=233
Result:	N/A	N/A	N/A	N/A	N/A	N/A

Office of the Chief Security Officer

Measure: Average number of days to conduct a suitability assessment and authorize employees to be eligible to begin work

Description: All federal and contractor applicants are subject to a suitability / fitness determination based on an investigation of their background. As defined by OPM, suitability is defined as identifiable character traits and conduct sufficient to decide whether an individual is likely or not likely to be able to carry out the duties of a federal job with appropriate integrity, efficiency, and effectiveness. The term fitness is used in exchange for contractor employees. An Entry on Duty (EOD) determination is a preliminary risk management decision either approving or delaying the individual to start work before their full background investigation has been completed. This decision is determined by position requirements and by reviewing the results of preliminary background checks. This measure gauges the processing time from when the Personnel Security Division (PSD) receives the completed paperwork and a suitability/fitness decision is made.

Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	N/A	N/A	N/A	<=12	<=10	<=8
Result:	N/A	N/A	N/A	10	N/A	N/A

Measure: Percent of Security Compliance Reviews (SCR) required actions that are resolved

within 60 days						
Description: This measure tracks the percent of required actions from Security Compliant Reviews that are resolved within 60 days. This measure assesses compliance with the directives, regulations and executive orders that govern the effective management, implementation and oversight of a security program designed to protect classified national security information shared by the Federal government with our state, local, and tribal partners.						
Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	N/A	N/A	N/A	N/A	90%	95%
Result:	N/A	N/A	N/A	N/A	N/A	N/A

Office of Program Accountability and Risk Management

Measure: Percent of Component Acquisition Executives (CAEs) with Component level approved processes/procedures that are aligned to DHS acquisition management directives and policies						
Description: Component Acquisition Executive (CAE) is the senior acquisition official within a component responsible for the implementation, management, and oversight of his or her Component's acquisition processes, and coordinating those processes with the contracting and procurement processes of the Head of Contracting Activity. The CAE is responsible for establishing acquisition processes within the component; overseeing execution of the Component's acquisition portfolio; and serving as the Acquisition Decision Authority for component level acquisition approvals. To that end, this measure represents the level of maturity of the Operational Component CAEs' efforts to develop and implement policies and procedures that are in compliance with MD-102-01. The measure is the relation of Components whose acquisition policies have been reviewed by HQ, and approved by the Component leadership.						
Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016

Result:	N/A	73%	85%	91%	N/A	N/A

Measure: Percent of major acquisition programs with approved core program management documentation for each acquisition life cycle phase						
Description: This measure gauges the percent of major acquisition programs with core program management documentation and that have a complete set of approved documents for a given acquisition life cycle phase. The core documents and set of required documents are defined by Department of Homeland Security (DHS) acquisition guidelines and Federal Acquisition/Procurement policy.						
Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016

BUDGET REQUEST AND SUPPORTING INFORMATION

ANALYSIS AND OPERATIONS

I. Appropriation Overview

A. Mission Statement for Analysis and Operations:

The Analysis and Operations appropriation provides resources supporting the Office of Intelligence and Analysis and the Office of Operations Coordination. Even though these two offices are distinct in their missions, they work together and with other DHS components to support the Department's mission of protecting the Homeland. The mission of the Office of Intelligence and Analysis is to equip the Homeland Security Enterprise (HSE) with the intelligence and information it needs to keep the Homeland safe, secure, and resilient; in support of the Secretary, other government officials, and State, local, and private sector partners. The mission of the Office of Operations Coordination is to provide steady state and crisis action information sharing, situational awareness, and operations coordination to assist the Secretary across the enterprise and during continuity operations; in order to prevent, protect, respond to, and recover from terrorist threats/attacks or threats from other man-made or natural disasters.

B. Budget Activities:

Office of Intelligence and Analysis (I&A) - As a member of the U.S. Intelligence Community (IC), I&A is the nexus between the nation's intelligence apparatus and DHS Components and other State, local, tribal, and territorial (SLTT); and private sector partners. I&A ensures that information is gathered from all relevant DHS field operations and other SLTT and private sector partners and that this information is shared with appropriate stakeholders to produce accurate, timely, and actionable analytical intelligence products and services. The Under Secretary for Intelligence and Analysis (U/SIA) leads I&A, and is also the Department's Chief Intelligence Officer (CINT), responsible for managing the entire DHS Intelligence Enterprise, and the Department's Chief Information Sharing Officer, responsible for implementing the objectives of the Program Manager – Information Sharing Environment (PM-ISE) within DHS.

Office of Operations Coordination (OPS) – OPS's mission is to provide decision support and enable the Secretary's execution of responsibilities across the homeland security enterprise by promoting situational awareness and information sharing, integrating and synchronizing strategic operations and administering the DHS continuity program. OPS plays a pivotal role in DHS's mission to lead the unified national effort to secure America by facilitating the Secretary's responsibilities across the full spectrum of incident management (prevention, protection, response and recovery). OPS provides situational awareness, assessments and operations coordination for the DHS Secretary and facilitates operational information sharing with all DHS Components, as well as for Federal, State, local, tribal, private sector and international partners.

C. Budget Request Summary:

The Analysis and Operations account requests 900 full-time positions (FTP), 834 full-time equivalents (FTE) and \$269,090,000 for FY 2016: Please reference the classified annex for details.

D: Efficiencies: Please reference the classified annex for details.

***Transfers** **(\$40.1 million)**

Balanced Workforce/Cellular/Parking **(\$11.9 million)**

**These adjustments are pursuant to the DHS Secretary's Efficiency Review and Unity of Effort Initiatives.*

BUDGET REQUEST AND SUPPORTING INFORMATION

Departmental Management and Operations Office of Inspector General Audits, Inspections and Investigations

I. Appropriation Overview

A. Mission Statement:

The Department of Homeland Security (DHS) Office of Inspector General (OIG) conducts and supervises independent audits, inspections, and investigations and recommends ways for DHS to carry out its responsibilities in the most effective, efficient, and economical manner possible. The OIG also seeks to deter, identify, and address fraud, abuse, mismanagement, and waste of taxpayer funds invested in homeland security. The OIG provides employees, contractors, and the public with an independent venue to report fraud, waste, and abuse that affects the Department. The OIG reports its findings to the Secretary, the Congress, and the public, when appropriate. Additional information, including the Inspector General's (IG) congressional testimony may be accessed through our website at www.oig.dhs.gov.

B. Budget Activities:

The OIG has a single appropriation for audits, inspections, and investigations; the request of \$166.284 million funds 796 full time equivalents (FTE).

C. Budget Request Summary:

For fiscal year (FY) 2016, the OIG requests \$166.284 million, 867 full-time positions (FTP), and 796 FTE, which includes a transfer from the Federal Emergency Management Agency's (FEMA) Disaster Relief Fund (DRF) of \$24 million. The requested resources are required to sustain ongoing initiatives and maintain the level of oversight required by the scope, complexity, and importance of DHS' mission, which is to secure a safer America, resilient against terrorism and other potential threats.

The FY 2016 OIG request includes \$2.350 million for training and \$0.447 million for supporting the Council of Inspectors General on Integrity and Efficiency (CIGIE). The OIG request reflects adjustments-to-base totaling a decrease of \$0.246 million including increases of \$0.329 million for annualization of the 2015 pay raise, \$1.096 million for the 2016 pay increase, and \$0.871 million for increased retirement contributions. Also, the adjustment includes a mandatory across-the-board \$2.542 million decrease. The OIG requests programmatic increases of \$7.603 million for acquisition management oversight; \$6.110 million for fraud and computer forensics; \$3.110 million for General Services Administration (GSA) build-out; \$1.200 million for implementation of cybersecurity continuous monitoring; \$2.810 million for inspections and special reviews; and \$0.275 million for whistleblower protection. Also, the OIG requests an anticipated programmatic decrease of \$0.035 million by reducing cybersecurity manual

continuous monitoring. The OIG overall change from the FY 2015 President's Budget is a \$20.827 million increase.

D. Congressionally-Mandated Requirements:

Expenditure Plan

The reports accompanying the *Consolidated Appropriations Act, 2014* (P.L. 113-76) mandated the OIG to submit a detailed expenditure plan with its annual budget justification documents for FY 2015 and thereafter. The expenditure plan for FY 2016 is attached as a separate document.

E. Inspector General's Comments:

Senator Tom Coburn, in his final report regarding DHS, wrote that “[t]he tax dollars that Congress invests in the Inspector General’s office are among the most important directed to the Department, since the OIG is the taxpayer’s watchdog within DHS...” In a time of declining budget resources, increasing OIG’s ability to examine DHS programs and operations ultimately saves the taxpayer money.

This year’s budget history is as follows:

- The OIG submitted an initial request to the Department of \$186.84 million including a \$41.93 million transfer from FEMA’s DRF for FY 2016 as part of FY 2016-2020 Resource Allocation Plan.
- The Department’s resource allocation decision required the OIG to reduce its request to \$123.79 million in base resources and \$41.93 million transfer from FEMA’s DRF. The reduction in the OIG’s initial request includes a mandatory across-the-board decrease of \$2.53 million. The OIG utilizes 74 percent of its budget for personnel expenses, and, therefore this reduction creates challenges in identifying offsets from within non-personnel expenses.
- The Office of Management and Budget’s (OMB) passback settlement provided \$166.28 million in resources, an increase of \$20.83 million over the FY 2015 President’s Budget and includes a \$24 million transfer from FEMA’s DRF. This is \$20.56 million less than the initial request, including a disapproved \$17.93 million request for EMO enhancement. OMB also approved the Department’s \$2.53 million in reduction to base.

We made our request after benchmarking our staffing against comparable Offices of Inspector General and assessing our ability to address high risk areas in DHS. This process revealed that we have been historically underfunded and unable to address the risk, particularly in the area of DHS integration and acquisition management.

- Our enacted budget since FY 2010 has been flat, reflecting a less than 1.5 percentage change (excluding DRF transfer) since FY 2010. Because such a high percentage of our

budget is devoted to personnel expenses, this affects us more than other DHS components.

- As a result, we have lost 110 on board positions since October 1, 2012, from 779 to 669 (as of November 29, 2014), which has degraded our ability to address the significant risks facing DHS. The FY 2016 budget request would fund 796 FTE.

Our major focus in the FY 2016 request is acquisition management. We have proven that when we have the resources, intelligent program and financial audits can improve operations and save the Department from costly and embarrassing acquisition management errors. Contract expenditures within DHS run approximately \$25 billion per year, and under FY 2014 resources, we simply cannot address the risk inherent in the DHS acquisition program. The FY 2016 budget request includes an additional 40 FTE to increase staff dedicated to acquisition management oversight. DHS' acquisition management programs are considered high risk by the OIG, OMB and Congress, both because of the nature of the acquisitions and DHS' history of mismanagement, waste, fraud and abuse. Our current FY 2014 strength allows us to dedicate only a single auditor to every \$2.5 billion of acquisitions, far below what is needed to identify and prevent wasteful and embarrassing mismanagement of significant, high-risk acquisition programs.

III. Current Services Program Description by PPA

**Department of Homeland Security
Office of Inspector General
Audits, Inspections and Investigations
Program Performance Justification
(Dollars in Thousands)**

PPA: Audits, Inspections and Investigations

	Perm. Pos.	FTE	Amount
FY 2014 Revised Enacted	681	681	\$139,437
FY 2015 President's Budget	725	725	\$145,457
2016 Adjustments-to-Base	-	-	(\$246)
FY 2016 Current Services	725	725	\$145,211
FY 2016 Program Change	142	71	\$21,073
FY 2016 Total Request	867	796	\$166,284
Total Change 2015 to 2016	142	71	\$20,827

The OIG requests 867 FTP, 796 FTE and \$166.284 million, which includes a transfer from the FEMA DRF of \$24 million. The request includes \$2.350 million for training and \$0.447 million for supporting the CIGIE. The OIG request reflects adjustments-to-base totaling a decrease of \$0.246 million including increases of \$0.329 million for annualization of the 2015 pay raise, \$1.096 million for the 2016 pay increase, and \$0.871 million for increased retirement contributions. Also, the adjustment includes a mandatory across-the-board \$2.542 million decrease. The OIG requests programmatic increases of \$7.603 million for acquisition management oversight; \$6.110 million for fraud and computer forensics; \$3.110 million for GSA build-out; \$1.200 million for implementation of cybersecurity continuous monitoring; \$2.810 million for inspections and special reviews; and \$0.275 million for whistleblower protection. Also, the OIG requests an anticipated programmatic decrease of \$0.035 million by reducing cybersecurity manual continuous monitoring. The OIG overall change from the FY 2015 President’s Budget is a \$20.827 million increase.

CURRENT SERVICES PROGRAM DESCRIPTION:

Specifically, the OIG’s key legislated responsibilities, and the funds requested in FY 2016 are to:

- Promote economy, efficiency, and effectiveness in the management of the Department’s programs and supporting operations;
- Conduct and supervise audits, investigations, and inspections relating to the Department’s programs and support operations;
- Detect and prevent fraud, waste, and abuse;
- Review existing and proposed legislation and regulations and make appropriate recommendations;

- Maintain effective working relationships with other Federal, State, and local governmental agencies, and non-governmental entities regarding the mandated duties of the OIG;
- Inform the Secretary of Homeland Security and the Congress of serious problems and recommend corrective actions and implementation strategies;
- Comply with the audit standards of the Government Accountability Office (GAO) and avoid duplication of GAO activities; and
- Report violations of Federal criminal law to the U.S. Attorney General.

PROCUREMENT ACTIVITIES:

Not applicable.

IV. Program Justification Changes

**Department of Homeland Security
Office of Inspector General
Justification of Program Changes**
(Dollars in Thousands)

Program Increase 1: Acquisition Management Oversight
PPA: Audits, Inspections and Investigations
Program Increase: Positions 80, FTE 40, Dollars \$7,603

Funding Profile

	FY 2014 Revised Enacted			FY 2015 President's Budget			FY 2016 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							80	40	\$7,603
Total Request	-	-	-	-	-	-	80	40	\$7,603

Description

The \$7.60 million requested increase will support salaries and expenses for 80 new positions, which convert to 40 FTE in FY 2016, for increasing Office of Audits' staff dedicated to acquisition management oversight.

Justification

DHS has the third largest acquisition budget in the Federal Government and acquires more than \$25 billion worth of goods and services annually. OIG and GAO audits have found that billions of taxpayer dollars and the Nation's security are highly vulnerable to inefficiency, ineffectiveness, and lack of accountability. Accordingly, the OIG has designated acquisitions management as a major management challenge and high-risk area. While DHS has initiated efforts to improve its acquisition processes, some major acquisition programs have insufficient internal controls to manage risks and measure performance. Increased audit presence can help DHS improve its major acquisition programs and better control costs, meet deployment plans, and deliver capability as promised.

This initiative will help strengthen the Department's ability to ensure acquisition and procurement funds are not being wasted by improper payments and mismanagement. Strong controls, as well as increased oversight by additional OIG staff, will help ensure DHS obtains critical assets and services necessary to meet its missions in a declining budget environment.

Increasing the number of auditors would allow the OIG to perform pre-award, post-award, contract closeout, and acquisition program audits, as well as assist the OIG's Office of Investigations with fraud cases. We currently have no in-house forensic accounting capability, which is a critical skill for acquisition audits. Forensic accounting utilizes accounting, auditing, and investigative skills to

conduct a specialized examination of financial records. Forensic accountants frequently work on fraud cases and are trained to look beyond the numbers and deal with the business reality of a situation.

OIG's audit coverage of acquisitions expenditures has been limited by the availability of staff. Based on current FY 2014 staffing, we have only a single auditor for every \$2.50 billion in expenditures. Increasing the staff by 80 positions (40 FTE each in FY 2016 and 2017) would provide better audit coverage of the Department's acquisitions programs and reduce the expenditure-to-auditor ratio to \$278 million annually.

According to the Association of Certified Fraud Examiners, organizations lose up to five percent of budgeted funds each year due to waste, abuse, and fraud within their acquisition programs. DHS' FY 2014 obligations for the acquisition of assets, contractual services, and supplies totaled nearly \$25.80 billion.

In FY 2014, the OIG identified \$53.20 million in potential cost avoidance on two acquisition audits and completed other work that resulted in significant recommendations to improve the economy and efficiency of the Department's acquisitions. The requested staffing increase would result in greater audit coverage of the Department's acquisitions and contracts.

Impact on Performance (Relationship of Increase to Strategic Goals)

The program increase of \$7.60 million will save the Department money by enhancing the OIG's ability to support the strategic goal of maturing and strengthening DHS. Specifically, this investment would help the Department better manage and optimize financial resources, property/assets, and procurement. The increase would allow the OIG to conduct additional acquisition and contract audits uncovering potential waste, mismanagement, and fraud.

**Department of Homeland Security
Office of Inspector General
Justification of Program Changes**
(Dollars in Thousands)

Program Increase 2: Fraud and Computer Forensics
PPA: Audits, Inspections and Investigations
Program Increase: Positions 26, FTE 13, Dollars \$6,110

Funding Profile

	FY 2014 Revised Enacted			FY 2015 President's Budget			FY 2016 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							26	13	\$6,110
Total Request	-	-	-	-	-	-	26	13	\$6,110

Description

The request incorporates a program increase of \$6.11 million for salaries and expenses, equipment, and training for 26 new positions, which convert to 13 FTE in FY 2016, to significantly augment OIG's acquisition management oversight initiative for investigations and to establish a Computer Forensic Unit.

Justification

DHS has the third largest workforce in the Federal Government and acquires more than \$25 billion worth of goods and services annually. Collectively, the 9 DHS acquisition offices execute approximately 100,000 annual contract actions. OIG and GAO audits have found that billions of taxpayer dollars and the Nation's security are highly vulnerable to corruption, fraud, abuse, and mismanagement. According to the Association of Certified Fraud Examiners, organizations lose up to five percent of budgeted funds each year due to corruption and fraud.

Accordingly, we plan to significantly increase our attention in this area by creating a multi-disciplinary cadre of subject matter experts, capable of helping to counter the wide variety of DHS acquisition integrity risks. Program Increase 1 more fully discusses this initiative.

The program increase for investigative services will support 13 new agents, analysts, and support personnel in FY 2016, who will work closely with other DHS components to leverage existing resources and assets as a force-multiplier. The cadre will target high-risk and high-impact areas within DHS. Once the cadre becomes fully operational, the OIG will realize a significant increase in the number of investigations, resulting in greater deterrence and prevention of future fraudulent activity.

With prevention as the initiative's cornerstone, the cadre will engage DHS acquisition stakeholders across the Department to ensure acquisition oversight, management, and integrity best practices are implemented and followed. The cadre will proactively engage with the Homeland Security

Acquisition Institute to provide effective corruption and fraud awareness training to DHS contracting officers, contracting officer representatives, and program managers. Implementing prevention and deterrence strategies will lead to more reporting of suspected wrongdoing, quicker investigations, and reduced losses.

The proposed Computer Forensics Unit (CFU) initiative will increase OIG's investigative independence, efficiency and capacity. A 2014 internal survey of all OIG investigative field offices revealed that all use computer forensic services. It is rare when a modern investigation does not require computer forensic services. Unlike other comparably-sized OIGs, DHS OIG has no internal capacity to conduct computer forensics for its cases and is dependent on a patchwork of formal and informal agreements with other Federal, state and local law enforcement partners to provide investigative support. This reliance delays our investigations, and can sometimes take a year or longer to process. Additionally, relying on other agencies creates perceptions that our independence is undermined.

Having an internal computer forensics capacity will increase our investigative efficiency. This, in turn, will enable the OIG to increase investigative capacity, investigate complaints in a timely manner, and minimize the Department's risk exposure. The CFU will significantly reduce, and ultimately eliminate, OIG's dependency on other Federal, state, local and tribal police agencies currently providing computer forensic support to the OIG.

Impact on Performance (Relationship of Increase to Strategic Goals)

The program increase of \$6.11 million would enhance the OIG's ability to support the strategic goal of maturing and strengthening DHS. Specifically, it would help the Department manage and optimize resources, property/assets, and procurement. The increase would allow the OIG to more efficiently conduct investigations supporting the overall DHS mission.

**Department of Homeland Security
Office of Inspector General
Justification of Program Changes**
(Dollars in Thousands)

Program Increase 3: GSA Space Build-out
PPA: Audits, Inspections and Investigations
Program Increase: Positions 0, FTE 0, Dollars \$3,110

Funding Profile

	FY 2014 Revised Enacted			FY 2015 President's Budget			FY 2016 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level	-	-	-	-	-	-	-	-	-
Program Increase	-	-	-	-	-	-	-	-	\$3,110
Total Request	-	-	-	-	-	-	-	-	\$3,110

Description

The FY 2016 program increase of \$3.11 million with no increase in positions or FTE supports office consolidation and relocation expenses.

Justification

The original lease for OIG Headquarters, located at 1120 Vermont Avenue, NW, Washington, DC, expired March 31, 2014, and has been extended to 2017. An analysis has shown that relocating while at the same time reducing office space is more cost effective than reducing space utilization at the current location. The original estimation of \$5.76 million was developed in conjunction with the GSA and stated in the prospectus. However, partnering with GSA through its Furniture and Information Technology (FIT) initiative allows the OIG to reduce the need by \$2.65 million.

The one-time program increase of \$3.11 million will fund the build out costs to relocate OIG headquarters and will be allocated to tenant improvements, moving services, physical security, and other contingencies. Using GSA's FIT Initiative, the OIG will be able to absorb furniture and information technology costs necessary to relocate by adding these costs to annual GSA rent.

Impact on Performance (Relationship of Increase to Strategic Goals)

The program increase of \$3.11 million would enhance the OIG's ability to support the strategic goal of maturing and strengthening DHS. The initiative will reduce OIG's carbon footprint by decreasing the amount of space required per employee and decrease space costs. Also, it will allow the OIG to adapt effectively to changes in the size of its workforce, improve employee collaboration and productivity, and enhance organizational performance.

Department of Homeland Security
Office of Inspector General
Justification of Program Changes
(Dollars in Thousands)

Program Increase 4: Implementation of Cybersecurity Continuous Monitoring
PPA: Audits, Inspections and Investigations
Program Increase: Positions 6, FTE 3, Dollars \$1,200

Funding Profile

	FY 2014 Revised Enacted			FY 2015 President's Budget			FY 2016 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							6	3	\$1,200
Total Request	-	-	-	-	-	-	6	3	\$1,200

Description

The FY 2016 program increase of \$1.20 million supports salaries and expenses for 6 new positions, which convert to 3 FTE; specialized training; and information technology (IT) equipment.

Justification

The OIG must protect the integrity of its own network and its sensitive audit and law enforcement data, as well as ensure the security of the portal it presents to the larger DHS network. The OIG has been participating in the DHS Federal Network Resiliency Continuous Diagnostics and Mitigation Program since its inception. This program seeks to provide the OIG with the tools necessary for a proper Information Security Continuous Monitoring Program. These tools will enable the OIG to transition from a manual process to an automated process. In order to leverage these tools and properly gauge risk, OIG will need an additional three FTE.

The request also includes \$0.50 million to upgrade and procure additional computers, servers, and software applications to enhance the OIG's ability to comply with the *Federal Information Security Management Act* (FISMA). The OIG has an annual requirement to assess the operational and cyber security programs of all DHS components for compliance with the law. Part of this assessment includes conducting technical testing of IT systems and assets. The discovery and assessment process requires applications that scan, identify, and rate the severity of cyber vulnerabilities, which in conjunction with visual inspections and interviews of critical personnel, allows the OIG to assign a level of risk to each finding. The OIG also conducts systems privacy testing to obtain information regarding the current security posture, program status, or situational awareness of a component's protection of privacy information. To accomplish these requirements the OIG IT auditors must have the latest technology, both hardware and software, at their disposal to efficiently and effectively assess the security posture of DHS components.

Increased funding is essential for continued support of this high-profile, high-impact work. Our FY 2014 FISMA audit resulted in identification of significant deficiencies in the Department's information security program. For example:

- The United States Secret Service did not provide the Chief Information Security Officer (CISO) with the continuous monitoring data required by OMB during FY 2014. Without this information, the CISO was significantly restricted from performing continuous monitoring on the Department's information systems, managing DHS' information security program, or ensuring compliance with the President's cybersecurity priorities.
- An audit of Dallas/Fort Worth International Airport showed that information technology security controls implemented had deficiencies that, if exploited, could result in the loss of confidentiality, integrity, and availability of data stored, transmitted, and processed on Transportation Security Administration, U.S. Customs and Border Protection (CBP), and U.S. Immigration and Customs Enforcement IT systems.
- An assessment of the Domestic Nuclear Detection Office's insider threat program disclosed potential vulnerabilities posed by portable media ports on controlled IT systems, the need to apply critical security patches to these systems timely, and the potential for unauthorized use of wireless devices on, or connections to, DHS networks. The vulnerabilities identified could create communication disruptions and limit timely notification, analysis, and reporting of detection of radiological and nuclear materials out of regulatory control, reduce or deny access to data needed to analyze and develop situational awareness, and diminish accuracy and completeness of detection event data.

Impact on Performance (Relationship of Increase to Strategic Goals)

The program increase of \$1.20 million would enhance the OIG's ability to support the strategic goal of maturing and strengthening DHS. Specifically, it will provide resources for improving the security of OIG's infrastructure and allow the OIG to implement a formal Risk Management Framework for identifying, assessing, and mitigating risks on a continuous basis. The increase in funding would also provide tools and resources to perform more effective and timely independent evaluations of DHS information security programs and practices, including the requirements mandated by FISMA. The funds will support OIG's implementation of DHS and FISMA policy and new evolving Federal requirements.

Department of Homeland Security
Office of Inspector General
Justification of Program Changes
(Dollars in Thousands)

Program Increase 5: Inspections and Special Reviews
PPA: Audits, Inspections and Investigations
Program Increase: Positions 28, FTE 14, Dollars \$2,810

Funding Profile

	FY 2014 Revised Enacted			FY 2015 President's Budget			FY 2016 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							28	14	\$2,810
Total Request	-	-	-	-	-	-	28	14	\$2,810

Description

The FY 2016 program increase of \$2.81 million supports salaries and expenses for 28 new positions, which convert to 14 FTE, and acquiring contractual services for experts in OIG’s Office of Inspections.

Justification

The additional resources will enable the OIG to better respond to congressional requests and other inquiries of significant concern.

Through the Office of Inspections’ work, the Department and its stakeholders receive independent and objective analysis of the Department’s programs and operations. In addition, Inspections provides the Congress with proactive reports on programs, policies, and public concerns that require immediate attention and accountability. The Office of Inspections also brings critical information to elected representatives for use in future policy-making decisions that impact the daily lives of our citizens.

Since FY 2010, the Office of Inspections issued reports that included 822 recommendations for more effective and efficient operations. The portfolio has included high-profile and controversial topics such as the Influx of Unaccompanied Alien Children; Boston Marathon Bombing; Operation Fast and Furious; Allegations of Misconduct, Discrimination, and Retaliation in the Federal Air Marshal Service; and CBP’s Use of Force Training.

Congressional requests and mandates have risen to consume more than 50 percent of the Office of Inspections’ resources. These are priority assignments, but they have reduced our ability to provide adequate coverage of other high-risk areas, such as intelligence and civil rights and civil liberties. The current staffing level is insufficient to effectively cover all areas of responsibility. In recent years,

budgetary constraints have limited the growth of staff and reduced the Office of Inspections' ability to be as responsive as needed and resulted in deferred, suspended, or cancelled inspection projects.

Increased staffing will enable the Office of Inspections to use risk-based planning to address critical areas susceptible to waste, fraud, and abuse. Additional funding will provide inspectors with enhanced technology and other tools, such as contract subject matter expertise, that will increase the efficiency and effectiveness of reviews. The ultimate result will be more timely reports that contain meaningful and important recommendations on ways that the Department can improve its operations and programs.

Impact on Performance (Relationship of Increase to Strategic Goals)

The program increase of \$2.81 million would enhance the OIG's ability to support the strategic goal of maturing and strengthening DHS. Specifically, it would help the Department better manage and optimize resources. The increase would allow the OIG to conduct additional reviews and evaluations uncovering potential waste, abuse, mismanagement, and violation of civil rights and liberties.

**Department of Homeland Security
Office of Inspector General
Justification of Program Changes**
(Dollars in Thousands)

Program Increase 6: Whistleblower Protection
PPA: Audits, Inspections and Investigations
Program Increase: Positions 2, FTE 1, Dollars \$275

Funding Profile

	FY 2014 Revised Enacted			FY 2015 President's Budget			FY 2016 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Increase							2	1	\$275
Total Request	-	-	-	-	-	-	2	1	\$275

Description

The \$0.275 million requested increase will support salaries and expenses for two new positions, which convert to one FTE in FY 2016, for investigating whistleblower reprisals against members of the United States Coast Guard (USCG).

Justification

Title 10 USC § 1034, the *Military Whistleblower Protection Act* (MWPA), requires DHS OIG to investigate allegations of whistleblower reprisal against uniformed members of the USCG. The USCG has over 41,000 active duty members and 7,000 reservists stationed in the States and abroad. The MWPA mandates the OIG to report the results of its reprisal investigations to the DHS Secretary and to the USCG within 180 days of the receipt of complaints. Such allegations are primarily administrative in nature and do not need to be conducted by a criminal investigator. The OIG seeks to develop a cadre of non-criminal investigators who are trained and assigned to investigate military reprisal claims, rather than using more expensive criminal investigators. The OIG believes increased funding will, similar to the Department of Defense IG experience, free up criminal investigators for other important priorities.

The acquisition of one FTE each in FY 2016 and 2017 will permit the OIG to dedicate and train non-criminal investigators to understand and objectively perform investigations within the tenets of the MWPA and 33 CFR Part 53, USCG's implementing regulations. In addition:

- OIG initiatives will enable DHS to mature and strengthen the Homeland Security Enterprise with greater accountability, efficiency, and transparency through the investigation of whistleblower complaints.

- OIG's efforts to facilitate whistleblower protection will engender greater confidence from taxpayers and the public that DHS employees are able to report wrongdoing without fear of reprisal or retaliation.
- OIG will assist DHS to maintain economy and efficiency through the dedication of investigative resources to protect whistleblowers who report fraud, waste, abuse or mismanagement.

OIG initiatives will ensure lawmakers and American taxpayers that DHS is vigilant in its protection of DHS employees who blow the whistle.

Impact on Performance (Relationship of Increase to Strategic Goals)

The program increase of \$0.275 million would enhance the OIG's ability to support the strategic goal of maturing and strengthening DHS. The investigative staff would ensure appropriate oversight and timely investigation of reprisals against members of the USCG.

**Department of Homeland Security
Office of Inspector General
Justification of Program Changes**
(Dollars in Thousands)

Program Decrease 1: Continuous Monitoring Tools and Capabilities

PPA: Audits, Inspections and Investigations

Program Decrease: Positions 0, FTE 0, Dollars \$(35)

Funding Profile

	FY 2014 Revised Enacted			FY 2015 President's Budget			FY 2016 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	-
Program Decrease							-	-	(\$35)
Total Request	-	-	-	-	-	-	-	-	(\$35)

Description of Item

Reduction of disparate continuous monitoring tools and capabilities.

Justification

In examining its internal cybersecurity, the Department attempted to seek out efficiencies where possible to assist with redirecting potential cost savings toward mitigating vulnerabilities at a more frequent rate, as well as to promote standardization of security products and tools to develop a common security tool knowledge base and common skill sets within DHS Cybersecurity programs. Anticipating the adoption of the Continuous Diagnostics and Mitigation (CDM) program, starting during FY 2015, the Department is applying an offset starting in FY 2016 to reflect a more efficient information security continuous monitoring business model. In future years, as the scope of CDM expands, DHS can further harmonize standardization of security products and tools.

Impact on Performance (Relationship of Increase to Strategic Goals)

The program decrease would enhance the OIG's ability support the strategic goal of maturing and strengthening DHS. The adoption of CDM program will result in \$0.035 million cost avoidance.

V. Exhibits and Other Supporting Material

A. Justification of Proposed Legislative Language

For necessary expenses of the Office of Inspector General in carrying out the provisions of the Inspector General Act of 1978 (5 U.S.C. App.), [\$121,457,000] \$142,284,000 of which not to exceed \$300,000 may be used for certain confidential operational expenses, including the payment of informants, to be expended at the direction of the Inspector General.

Note: Please see Exhibit A in FEMA's Disaster Relief Fund Congressional Justification for Appropriation Language transferring \$24 million to the OIG.

Explanation of Changes:

No substantial changes proposed.

Audits, Inspections and Investigations Mission Statement

The OIG is responsible for conducting and supervising audits, investigations, and inspections relating to the programs and operations of DHS, recommending ways for the Department to carry out its responsibilities in the most effective, efficient, and economical manner possible. The OIG serves as an independent body to deter, identify, and address fraud, abuse, mismanagement, and waste in DHS programs and operations.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
11.1 Full-time Permanent	\$71,748	\$72,733	\$79,742	\$7,009
11.3 Other than Full-Time Permanent	\$2,417	\$2,441	\$2,441	-

FY 2016 Budget Request	1
B. Component Contributions to Achieving Departmental Missions	1
Mature and Strengthen Homeland Security	2
Resources Requested	2
Performance Measures	2

A. Component Overview

The Office of Inspector General (OIG) is comprised of the following mission-oriented programs that support achievement of the DHS strategic missions, goals, and objectives.

Audits, Inspections and Investigations: The Inspector General Act requires the Office of Inspector General to serve as an independent and objective audit, inspection, and investigative body to promote effectiveness, efficiency, and economy in DHS's programs and operations, and to prevent and detect fraud, abuse, mismanagement, and waste in such programs and operations. The criteria used to select programs for audits and inspections include: statutory and regulatory requirements; adequacy of internal control systems; newness; changed conditions; mission criticality; and potential dollar magnitude.

FY 2016 Budget Request

The table below shows OIG's FY 2016 Budget request by its mission-oriented programs.

Program	FY 2016 Request	
	FTE	Dollars (in thousands)
Audits, Inspections and Investigations	796	\$166,284
*Total Budget Request	796	\$166,284

*Includes transfer from FEMA's DRF in the amount of \$24Million

B. Component Contributions to Achieving Departmental Missions

The table below shows the alignment of the OIG programs to the DHS Missions and Mature and Strengthen Homeland Security.

Programs	DHS Missions					Mature and Strengthen Homeland Security
	Prevent Terrorism and Enhance Security	Secure and Manage Our Borders	Enforce and Administer Our Immigration Laws	Safeguard and Secure Cyberspace	Strengthen National Preparedness and Resilience	
Audits, Inspections and Investigations						100%

Mature and Strengthen Homeland Security

Resources Requested

OIG resources supporting *Mature and Strengthen Homeland Security* are provided in the table below.

\$ in thousands

Program	FY 2014		FY 2015		FY 2016	
	\$	FTE	\$	FTE	\$	FTE
Audits, Inspections and Investigations	\$139,437	681	\$145,457	725	\$166,284	796
Total	\$139,437	681	\$145,457	725	\$166,284	796

Performance Measures

For *Mature and Strengthen Homeland Security*, Management Measures are displayed to provide a more thorough context of expected performance results.

Management Measures

Measure: Percent of concurred recommendations implemented (closed) within the timeframe agreed upon by the Office of Inspector General and the Department of Homeland Security						
Description: This measure reflects the percent of recommendations that DHS concurred (agrees) with that were implemented (closed) within the timeframe agreed upon by DHS and OIG. DHS' acceptance of the recommendation and communication of an implementation date implies that the recommendation will be implemented by the given date. The OIG tracks its issued recommendations agreed to by DHS management until the recommendation is implemented or closed. DHS may request and OIG may grant extensions to agreed upon implementation dates when circumstances warrant. An agreed upon extension date becomes the new implementation measurement date. The Inspector General Act requires OIG to conduct and supervise audits, inspections, and investigations of DHS programs and operations to identify and deter fraud, waste, and abuse. The Act also requires OIG to promote economy, efficiency, and effectiveness in DHS programs and operations. OIG reports include recommendations which if implemented will improve operations.						
Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	N/A	N/A	N/A	N/A	75%	75%
Result:	N/A	N/A	N/A	N/A	N/A	N/A

Measure: Percent of Office of Inspector General reports and investigations that focus on high risk and high impact Department activities, and management challenges						
Description: This measure reflects the percent of projects/cases initiated by OIG that address DHS high risk and high impact programs and operations, and management challenges. This measure excludes mandatory audits, investigations, and inspections. The Inspector General Act requires OIG to conduct and supervise audits, inspections, and investigations of DHS programs						

and operations to identify and deter fraud, waste, and abuse. The Act also requires OIG to promote economy, efficiency, and effectiveness in DHS programs and operations. The criteria used to select programs or operations for audit or inspection include: statutory and regulatory requirements; relevance to the Department’s mission and priorities; adequacy of internal control systems; newness; changed conditions; potential dollar magnitude; risk; etc. Where appropriate, OIG reports include recommendations which, if agreed to by DHS and implemented, will improve the respective program or operation.

Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	N/A	N/A	N/A	N/A	75%	75%
Result:	N/A	N/A	N/A	N/A	N/A	N/A

Measure: Percent of reports and administrative investigations completed within planned timeframes

Description: This measure reflects the percent of OIG reports and administrative investigations that are completed within planned timeframes. For OIG reports, OIG executives establish timeframes on a case by case basis based on their professional judgment and report timeliness guidance included in Government Auditing Standards and Quality Standards for Inspection and Evaluation. For administrative investigations, OIG executives establish timeframes on a case by case basis. The criteria used to select programs or operations for audit or inspection include: statutory and regulatory requirements; relevance to the Department’s mission and priorities; adequacy of internal control systems; newness; changed conditions; potential dollar magnitude; risk; etc.

Fiscal Year:	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Target:	N/A	N/A	N/A	N/A	75%	75%
Result:	N/A	N/A	N/A	N/A	N/A	N/A

ii. Status of Congressionally Requested Studies, Reports and Evaluations

Department of Homeland Security
U.S. Customs and Border Protection

Fiscal Year	Due Date	Reference/Citation	Requirement	Status
2006	10/11/2013	Security and Accountability Act of 2006 (P.L. 109-347), Section 232(c)	SAFE Port Act 232 – Full-Scale Implementation of Pilot Scanning System (Update 11) – Every six months, the Secretary shall submit a report describing the status of full-scale deployment under subsection (b) and the cost of deploying the system at each foreign port at which the integrated scanning systems are deployed.	Complete. This report is not required by an Appropriations bill, but it is submitted to the Appropriations Committees (in addition to Authorization Committees).
2008	12/24/2013	FY 2008 Appropriations Act (House Report 110-497). Section 605	Sec. 605 POE Technology Demonstration (FY 2014) – Not later than 1 year after the date of the enactment of this Act, and annually thereafter, the Secretary shall submit a report on the activities carried out at each demonstration site under the technology demonstration program established under this section and include an assessment by the Commissioner of the feasibility of incorporating any demonstrated technology for use throughout U.S. Customs and Border Protection.	Complete
2014	02/01/2014	House Report 113-91, page 32; Explanatory Statement, Division F, page 20	FY 2014 Circumvention of Duties: Imports from China – Consistent with past guidance, the Committee directs CBP to submit a report not later than February 1, 2014, on the extent and frequency of customs fraud, including circumvention of duties and misclassification on entries of imports of goods from China.	Complete
2014	02/15/2014	Senate Report 113-77, page 43	ACE Quarterly Report (FY 2014) -- FY 2014 First Quarter – The Committee expects to continue receiving the ACE quarterly reports.	Complete

2014	02/15/2014	<p>FY14 Approps House Report 113-91 (pg 27)</p> <p>Consolidated Report, Division F (pg 16)</p>	<p>CBP Staffing and Hiring FY 2014: Quarter 1 – CBP must submit quarterly staffing and hiring reports, including the status of hiring for the Northern and Southwest borders.</p>	Complete
2014	02/15/2014	House Report 113-91, page 27	<p>FY 2014 Counter Abuse of Prescription Drugs Report – The Committee supports strongly CBP’s efforts to combat prescription drug smuggling and abuse. CBP and ICE are directed to update the Committee on their activities, resources and challenges, including relevant information regarding the illicit transnational smuggling of generic oxycodone along the U.S.-Canada border. The report shall be submitted no later than February 15, 2014.</p>	Complete
2014	Alongside the FY 2015 Budget Submission	House Report 113-91, page 32; Explanatory Statement, Division F, page 20	<p>Textile Transshipment Enforcement FY 2014 – The Committee includes \$4,750,000, to continue textile transshipment enforcement. The Committee directs CBP to ensure that the activities of the Textile and Apparel Policies and Programs Office, specifically seizures, detention, and special operations, are maintained at least at the level of those activities in prior years. The Committee directs CBP to update annually and submit a report with the budget request on the execution of its five-year strategic plan, consistent with prior year requirements.</p>	Complete

<p style="text-align: center;">2014</p>	<p style="text-align: center;">Alongside the FY 2015 Budget Submission</p>	<p style="text-align: center;">House Report 113-91, page 39; Explanatory Statement, Division F, page 22</p>	<p style="text-align: center;">FY 2014 Real Property Inventory Plan – CBP is directed to submit a real property inventory on an annual basis. As a component of this inventory, CBP is directed to provide an annual plan describing construction and major renovation initiatives and their costs. In addition, CBP is directed to rank LPOEs, including GSA’s, in order of which are most critical to improve border security and facilitate trade and travel into and out of the United States.</p>	<p style="text-align: center;">Complete</p>
<p style="text-align: center;">2014</p>	<p style="text-align: center;">Alongside the FY 2015 Budget Submission</p>	<p style="text-align: center;">Senate Report 113-77, page 48-49; Explanatory Statement, Division F, page 20</p>	<p style="text-align: center;">FY 2014 LPOE Modernization 5-Year Plan (FYs 2015-2019) – The Committee reminds CBP that the fiscal year 2012 Department of Homeland Security Act made permanent the requirement that a 5-year plan for all Federal land border ports of entry shall be submitted annually with the President’s budget request. The Committee directs the Department to continue to work with the GSA on its nationwide strategy to prioritize and address the infrastructure needs at land border POEs and to comply with the requirements of the Public Buildings Act of 1959 (40 U.S.C. 3301) and seek necessary funding.</p>	<p style="text-align: center;">Complete</p>

2014	Alongside the FY 2015 Budget Submission	House Report 113-91, page 35; Explanatory Statement, Division F, Section 551	<p>BSFIT FY 2014-FY 2017 Multi-Year Investment and Management Plan – The Committee recommends \$351,454,000 for BSFIT as requested, \$27,679,000 above the amount provided in fiscal year 2013. With this recommendation, the Committee continues its strong support of border security infrastructure and technology deployment to meet Border Patrol’s needs. Like last year, the Committee reminds CBP that it must submit an updated multi-year investment and management plan annually with its budget request.</p> <p>...</p> <p>In developing the multi-year investment and management plan, the Committee directs CBP to include an assessment of fixed versus mobile and airborne capabilities for border security surveillance, including the short- and long-term costs and benefits of different assets.</p>	Complete
2014	Alongside the FY 2015 Budget Submission	House Report 113-91, page 34; Explanatory Statement, Division F, Section 551	<p>FY 2014-FY 2017 Multi-Year Plan for Information and Technology – IT capability is essential to mission success; however, little visibility has been provided into how this investment is managed. IT costs and requirements must be transparent in order for the Committee to adequately assess the requests. Therefore, statutory language is included requiring CBP to submit a multi-year investment and management for fiscal years 2014–2018.</p>	Complete
2014	Alongside the FY 2015 Budget Submission	House Report 113-91, page 29; Explanatory Statement, Section 551	<p>Inspection and Detection Technology FY 2014-FY 2017 Multi-Year Investment and Management Plan – The Committee continues to require the multi-year investment and management plan required by law for investments and operations of radiation detection equipment and non-intrusive inspection systems to be submitted with the fiscal year 2015 budget request.</p>	Complete

<p style="text-align: center;">2014</p>	<p style="text-align: center;">Alongside the FY 2015 Budget Submission</p>	<p style="text-align: center;">Senate Report 113-77, page 36</p>	<p>WSM / Resource Optimization at the POEs FY 2014 – The Committee remains concerned about CBP officer staffing levels for Northern Border ports of entry. The Committee believes that many of the concerns about Northern Border staffing could be allayed by more complete reporting to Congress about CBP’s Northern Border staffing plans. The Committee directs CBP to submit an updated resource allocation model with the fiscal year 2015 budget detailing specific staffing and funding for, and implementation of, planned Northern Border enforcement initiatives by port of entry.</p>	<p style="text-align: center;">Complete</p>
<p style="text-align: center;">2014</p>	<p style="text-align: center;">Alongside the FY 2015 Budget Submission</p>	<p style="text-align: center;">Explanatory Statement, Division F, page 18</p>	<p>CBPO Staffing Expenditure Plan – To meet the workload created by the increasing volume of trade and travel, the bill provides \$255,715,000 to increase the CBPO workforce by not fewer than 2,000 new officers by the end of fiscal year 2015. Without adversely impacting mission support, the Department is directed to include, within its forthcoming budget proposal, funds sufficient to fully annualize the cost of all new CBPOs to be hired in fiscal year 2014, and to submit a description of the hiring process and timetable for bringing all of the new officers on board. A schedule for conducting background investigations and polygraphs shall be included in the required expenditure plan.</p>	<p style="text-align: center;">Complete</p>

2014	03/18/2014	House Report 113-91, page 33	Short-Term Detention Standards and Oversight (FY 2014) – Additionally, the Committee directs CBP to report to the Committee not later than 60 days after the date of enactment of this Act on the standards governing the conditions of custody and what oversight mechanisms CBP employs to monitor short-term detention conditions and lengths of detention.	Complete
2014	03/18/2014	Senate Report 113-77, page 32	FY 2014 Financial Plan – To help facilitate congressional oversight, CBP is directed to submit to the Committee within 60 days after the date of enactment of this act, a financial plan reflecting a detailed breakout of funding by office for each PPA in the “Salaries and Expenses” appropriation. This financial plan shall include a comparison by office to the prior year plan amount and actual expenditures for fiscal year 2013 and planned expenditures for fiscal year 2014.	Complete
2013	03/26/2014	Consolidated Appropriations Act FY 2013, Senate Report 112-169, Section 555	Reimbursable Fee Agreements, Second Semiannual Submission – CBP shall provide semiannual reports on each request received to enter into reimbursable fee agreements for the provision of CBP services and other related costs, the reasons for its approval or denial, the anticipated and actual revenue received, and the service provided, including number of CBP officers funded.	Complete

2013	04/15/2014	<p>Consolidated Approps FY 2013 SR 112-169 (p 35)</p> <p>NAFTA Implementation Act, Sec 691</p>	<p>ADCVD Enforcement Actions and Compliance Initiatives of FY 2013 – The Commissioner of Customs must work with the Departments of Commerce and Treasury, and the Office of the United States Trade Representative (and all other relevant agencies) to increase collections, and provide a public report on an annual basis on the collection during the preceding fiscal year of duties imposed under the AD/CV duty laws. The report should (1) summarize CBP’s efforts to collect past due amounts and increase overall current collections, particularly with respect to cases involving unfairly traded U.S. imports from China; (2) provide the amount of uncollected duties for each AD/CV duty order; (3) indicate the amount of open, unpaid bills for each such order; and (4) have the Secretary advise as to whether CBP can adjust its bonding requirements to further protect revenue without violating U.S. law or international obligations, and without imposing unreasonable costs upon importers.</p>	Complete
2014	04/15/2014	<p>Senate Report 113-77 (pg 39)</p> <p>Consolidated Report, Division F (pg 20)</p>	<p>AD/CVD Deposits During New Shipper Reviews – In consultation with the Department of Commerce, the Department of Treasury, and the United States Trade Representative, CBP must report on how requiring cash deposits of estimated AD/CVD during new shipper reviews (in statute) would strengthen the administration of the Nation’s AD/CVD laws.</p>	Complete

2006	04/15/2014	Security and Accountability Act of 2006 (P.L. 109-347), Section 232(c)	SAFE Port Act 232 – Full-Scale Implementation of Pilot Scanning System (Update 12) – Every six months, the Secretary shall submit a report describing the status of full-scale deployment under subsection (b) and the cost of deploying the system at each foreign port at which the integrated scanning systems are deployed.	Complete. This report is not required by an Appropriations bill, but it is submitted to the Appropriations Committees (in addition to Authorization Committees).
2009	n/a Congressional Request	Omnibus 110-497 Sec 604; Conference Rpt., Sec 604, Pg 131	Sec. 604 – National Land Border Security Plan (FY 2013) – CBP shall submit a plan that includes a vulnerability, risk, and threat assessment of each port of entry located on the northern border or the southern border. The plan shall also include a description of activities undertaken during the previous year as part of the Secure Border Initiative and actions planned for the coming year as part of the Secure Border Initiative.	Cancelled
2014	03/18/2014	FY14 Approps House Report 113-91 (pg 33) Consolidated Report, Division F (pg 20)	Short-Term Detention Standards and Oversight (FY 2014) – CBP must report on the standards governing the conditions of custody and what oversight mechanisms CBP employs to monitor short-term detention conditions and lengths of detention.	Complete
2014	04/17/2014	FY14 Approps House Report 113-91 (pg 37) Consolidated Bill HR3547 (pg 608)	Strategic Air and Marine Plan FY 2014 – In order to ensure appropriate fiscal control and oversight, CBP is directed again to provide an updated five-year recapitalization plan not later than 90 days after enactment.	Complete

2014	05/15/2014	<p>Border Tunnel Prevention Act P.L. 112-127 (p 2)</p> <p>FY14 Approps Senate Report 113-77 (pg 35-36)</p>	<p>Cross Border Tunnels FY 2014 Quarters 1 and 2 (Report 9) – The semi-annual submission on the number of tunnels discovered, their location and demolition, funding requirements, and the progress made in developing and implementing detection methods used to discover new tunnels.</p>	Complete
2014	06/09/2014	<p>FY14 Approps, House Report 113-91 (pg 27)</p> <p>Consolidated Report, Division F (pg 16)</p>	<p>CBP Staffing and Hiring FY 2014: Quarter 2 – CBP must submit quarterly staffing and hiring reports, including the status of hiring for the Northern and Southwest borders.</p>	Complete
2014	07/16/2014	<p>FY14 Approps Senate Report 113-77 (pg 38)</p> <p>Consolidated Report, Division F (pg 20)</p>	<p>ADCVD Outstanding Collections for FY 2014 – CBP is directed to report to the Committee on collection of the outstanding \$1,000,000,000 in AD/CVD duties, including the number of claims, the value of each claim, the stage of collection for each claim, and the date on which the claim was referred for further action to either the CBP Chief Counsel or Department of Justice; the steps that have been taken to recover funds; and the challenges that prevent collection. CBP shall publish on its Web site a version of this report that provides appropriate privacy and trade sensitivity protections.</p>	Complete

2014	07/16/2014	<p>FY14 Approps Senate Report 113-77 (pg 38-39)</p> <p>Consolidated Report, Division F (pg 20)</p>	<p>AD/CVD Single Entry Bonds – CBP must provide a separate report that includes information concerning each AD/CVD order for which more than \$25 million in assessed AD/CVD duties secured by single entry bonds remains uncollected more than 2 years after the dates of liquidation of the secured entries. For each relevant AD/CVD order, the report shall include: the bond’s identification number, the date of the entry secured by the bond, and the bond’s face value; the liquidation status of each entry, the date of liquidation, the amount of bond principal received by CBP, the amount of interest received by CBP, and the amount of any offer in compromise accepted by CBP; whether CBP has demanded performance on the bond or has withdrawn or abandoned its demand; if applicable, whether CBP’s demand for bond performance was protested, the date on which the protest was filed, whether CBP has issued a decision on the protest, whether a subsequent appeal has been filed by the protesting party, the status of the appeal, the date on which the summons was issued, and the amount of funds being held; and a detailed strategy, including a specific series of actions and corresponding deadlines for completing those actions, to collect under the bond the AD/CVD duties that remain uncollected.</p>	Complete
2014	08/14/2014	<p>FY14 Approps, House Report 113-91 (pg 27)</p> <p>Consolidated Report, Division F (pg 16)</p>	<p>CBP Staffing and Hiring FY 2014: Quarter 3 – CBP must submit quarterly staffing and hiring reports, including the status of hiring for the Northern and Southwest borders.</p>	Complete

2014	08/14/2014	Trade Act of 2002 FY14 Approps, Senate Report 113-77 (pg 43)	ACE Quarterly Report (FY 2014) -- FY 2014 Third Quarter – The Committee directs the Department to submit the ACE quarterly progress reports on time and no later than 45 days after the close of each quarter.	Complete
2014	06/01/2014	FY14 Approps, House Report 113-91 (pg 27) Senate Report 113-77 (pg 34)	User Fee Collections (FY 2014 Quarters 1 and 2) – CBP is directed to report to the Committee biannually on collections, anticipated carryover balances and all uses and activities for which fees are expended, including any duplication of activities for which discretionary funds are appropriated.	Complete
2013	09/26/2014	Consolidated Approps FY 2013, SR 112-169 § 555 (p 140)	Reimbursable Fee Agreements, Third Semiannual Submission – CBP shall provide semiannual reports on each request received to enter into reimbursable fee agreements for the provision of CBP services and other related costs, the reasons for its approval or denial, the anticipated and actual revenue received, and the service provided, including number of CBP officers funded.	OMB Review
2006	10/10/2014	Security and Accountability Act of 2006 (P.L. 109-347), Section 232(c)	SAFE Port Act 232 – Full-Scale Implementation of Pilot Scanning System (Update 14) – Every six months, the Secretary shall submit a report describing the status of full-scale deployment under subsection (b) and the cost of deploying the system at each foreign port at which the integrated scanning systems are deployed.	Complete. This report is not required by an Appropriations bill, but it is submitted to the Appropriations Committees (in addition to Authorization Committees).

Payroll and Workforce Assumptions Included in the FY 2016 Budget

The FY 2016 budget supports the following frontline staffing levels, which make up more than 80 percent of our workforce:

- 21,370 Border Patrol Agents (BPAs);
- 23,871 CBP Officers (CBPOs) (includes 47 additional CBPO canine teams, 9 CBPOs associated with the enhancement to the Electronic Visa Information Update System, and 40 CBPOs for Counter Network operations);
- 2,414 Agriculture Specialists; and
- 1,146 Air and Marine Interdiction Agents.

CBP's FY 2016 budget includes the following additional position assumptions, which CBP may adjust as operational requirements dictate:

- 2,376 Trade and Revenue positions; and
- 150 Polygraph Examiners.

<i>User Fees (Subtotal)</i>	<i>\$1,256,331</i>	<i>\$0</i>	<i>\$304,959</i>	<i>\$0</i>	<i>\$4,005</i>	<i>\$0</i>	<i>\$1,565,295</i>	<i>\$2,159,886</i>
Grand Total	\$3,577,647	\$3,454,936	\$327,603	\$336,375	\$198,419	\$19,067	\$7,914,047	\$13,559,302

Notes:

- This chart does not include positions associated with the proposed user fee increases in COBRA and IUF, which if enacted, would support up to an additional 2,300 CBPOs and association mission support.
- As the staffing requirements of programs funded by user fees and/or via reimbursable authorities are constantly changing and generally growing, the numbers of CBPOs may vary increase depending on demands not anticipated during the formulation process of this budget request.

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Customs and Border Protection Salaries and Expenses

I. Appropriation Overview

A. Mission Statement for Salaries and Expenses

As the frontline border agency in the U.S. Department of Homeland Security (DHS), U.S. Customs and Border Protection (CBP) has the dual mission of preventing suspected terrorists, terrorist weapons, and other contraband from entering the United States, while also facilitating the flow of legitimate trade and travel into and out of the United States. CBP ensures that all persons and cargo enter the United States legally and safely through official checkpoints and ports of entry.

The Salaries and Expenses appropriation funds all operating costs associated with CBP's accomplishment of its dual mission. CBP achieves its mission using a combination of advanced information, risk assessment, appropriate scanning and other technologies, and by partnering with Federal, state, local, tribal, and foreign law enforcement agencies as well as private industry and international partners. CBP's over 60,000 highly-trained employees ensure that the agency performs its mission with vigilance, integrity, and professionalism.

B. Budget Activities:

Headquarters Management and Administration

The activities funded within the Headquarters Management and Administration Program, Project, and Activity (PPA) provide critical policy and operational direction, mission support, including equipment, training, and technical expertise to CBP frontline personnel.

Border Security Inspections and Trade Facilitation at the Ports of Entry (POE)

CBP uses the resources of this PPA to mitigate the threats from terrorists and to prevent contraband from entering the U.S. while facilitating the legal flow of people and trade. CBP achieves this mission by deploying CBP officers (CBPO) to the POEs and by using a combination of technology, intelligence, risk information, targeting, and international cooperation to screen inbound international cargo and travelers and, in targeted border areas, to screen departing export cargo. Additional attention to outbound travel along areas of the southwest border also helps prevent the exit of money and weapons for illegal purposes.

CBP has extended a zone of security beyond U.S. physical borders through the use of bilateral and private-sector partnerships, targeting, and by scrutinizing advance information on people and products coming into this country. CBP is cultivating "smart borders" through the use of technology, has established a layered defense strategy, and created a unified, recognizable

presence at the border to combine and capitalize on the authorities and skills of our diverse workforce.

Several of the inspection activities performed at ports of entry and their associated costs are authorized to be reimbursed by user fee revenues that are remitted to CBP on quarterly or monthly basis. These reimbursements impact the Salaries & Expenses (S&E), Automation Modernization, and Construction and Facilities Management Appropriations.

To manage the funding relationship between S&E and user fees, CBP leverages the S&E appropriation to fund activities related to the performance of customs, immigration and agriculture inspections at ports of entry, and then reimburses S&E to the extent fees are available from the Immigrations, Agriculture Quarantine, and COBRA inspections fees, and other reimbursable programs such as Reimbursable Enhanced Inspection Services.

The Offices of Field Operations and International Trade, as well as various mission support programs, employ the above described approach to fund certain inspection activities, including direct and indirect costs.

Border Security and Control Between the Ports of Entry

This PPA funds the United States Border Patrol (USBP) and the Joint Field Command (JFC). In FY 2016, CBP will continue implementing a USBP operational approach focused on information, integration, and rapid response capabilities in performing the mission of securing America's borders. This new strategy involves USBP moving from a resource-dependent approach to border security to a risk-based approach that enables rapid response to areas of greatest risk in the immediate border area. USBP will deploy its capabilities to align with the threats along the border. This is an ongoing process that will continue to adapt as threats change.

The strategic plan places risk management at the core of Border Patrol's strategic planning. Through enhanced situational awareness and intelligence (information); coordinated operations with Federal, state, local and international partners (integration); and the ability to respond quickly to changing threats (rapid response), USBP will be able to put the greatest capabilities in place to combat the greatest threats.

C. Budget Request Summary:

CBP requests \$9,069,679,000, 48,311 positions, and 47,874 FTEs for Salaries and Expenses in FY 2016. In total, this represents a change of 102 positions, 749 FTE, and \$743,293,000, including an adjustment to base of \$565,266,000, program increases totaling \$188,027,000, and a program decrease of \$10,000,000.

Program Increases:

Unaccompanied Children Contingency Fund: CBP is requesting contingency funding of up to \$134.5 million for costs associated with the apprehension and care of up to 104,000 unaccompanied children (UCs). Based on the anticipated low probability of such a high number

of UCs attempting to enter the United States in FY 2016, the Budget scores the requested increase at \$24.4 million.

Border Patrol Agent Cross Training Initiative: CBP requests \$500,000 to develop a Border Patrol Agent Cross-Training Initiative in FY 2016. This increase would provide initial funding for an agent cross-training initiative to broaden their knowledge base and experience. This Cross-Training Initiative will allow USBP to provide BPAs with the necessary skills to perform additional mission-critical tasks such as Crime Scene Investigation, Evidence Collection, Intelligence Analysis & Targeting, and as Unmanned Aerial Vehicle pilots.

Non-Intrusive Inspection (NII) Equipment Refresh & Recapitalization: CBP is requesting an increase of \$85.3 million for its NII program. The requested increase will fund recapitalization of aging systems, which currently include 314 large scale and 4,930 small scale systems.

Electronic Visa Information Update System: CBP is requesting an increase of \$29.4 million for the Electronic Visa Information Update System (EVIUS). This new program that will allow non-immigrant visa (NIV) holders to provide updated biographic and travel-related information through a public website, and will enable CBP to facilitate admissibility determinations post-visa issuance before passengers initiate travel to the United States.

Establish Counter Network Operations: The requested increase of \$9.924 million and 30 FTEs will be used to establish a counter network capability and augment the existing Automated Targeting System (ATS) to provide enhanced capabilities. These resources will support a collaborative analytic environment with access to the necessary data and tools to conduct advanced counter network analysis of the nation's key transnational organized crime and terrorist targets.

Intelligence & Targeting Operations: An increase of \$3.262 million and 24 FTEs is requested for Intelligence and Targeting Operations to provide hardware, software and network updates to the Automated Targeting System (ATS), expand existing infrastructure, increase bandwidth, upgrade the Data Warehouse and Enterprise Reporting System and allow the strategic build out of an additional three (3) Intelligence Support Teams (IST).

Port of Entry Intrusion Detection: CBP is requesting an increase of \$11.1 million for the Border Security Deployment Program (BSDP). BSDP provides CBP with a comprehensive and expanded secure operational environment through an integrated surveillance and intrusion detection system that delivers critical security, motion detection, remote monitoring, and situational awareness for all Land Ports of Entry (LPOEs).

Canine Enforcement Program: CBP is requesting an increase of \$9.097 million for its Canine Enforcement Program (CEP). The CEP plays a crucial role in anti-terrorism and interdiction efforts. Through the CEP, CBP has established and deployed a world-class detector dog program to augment existing technology while employing cutting edge detection capabilities.

National Geospatial Border Strategy: The requested increase of \$8.4 million will support the expansion of the National Border Geospatial Intelligence Strategy (NBGIS) to the northern

border, equipment refresh for the Law Enforcement Technical Collections (LETC) program in the Caribbean basin, and augmentation of existing Intelligence Support Team (IST) locations participating in joint task forces such as the Department of Homeland Security's Southwest Border and Approaches Campaign Plan.

Standard Supplies for Unaccompanied Children: CBP requests \$4.706 million in funding for implementation of a standardized care plan for mothers and children in CBP custody, to include unaccompanied minor children.

Polygraph Examiners Hiring Initiative: CBP requests \$1.47 million in FY 2016 to hire 40 additional Polygraph Examiners. The current staffing level of 110 polygraph examiners is insufficient to meet current and future hiring demands of Office of Border Patrol (OBP), Office of Field Operations (OFO), the Office of Air & Marine (OAM), and Internal Affairs (IA).

UAS Crew: CBP requests \$420 thousand in Salaries and Expenses for mission support requirements related to the overall requested increase for an additional 15 Unmanned Aircraft System crews included in the Air & Marine appropriation.

Program Decreases:

Delay Vehicle Recapitalization: CBP proposes a reduction to vehicle acquisition funding of \$10 million in FY 2016. Based upon the CBP fleet assessment analysis conducted in FY 2013, CBP identified an approximate 6,227 vehicles for reduction from the fleet. Out of these approximate 6,227 vehicles, 4,166 estimated reductions are scheduled to occur between FY 2014 and FY 2015. The remainder 2,061 vehicles will be reduced in FY 2016.

D: Legislative Initiatives:

CBP's FY 2015 Report to Congress on Resource Optimization at POEs will include the results of the Workload Staffing Model (WSM) – the primary tool used by CBP to inform staffing decisions at POEs. The WSM identified a need for additional workforce capacity at our POEs today, assuming current processes, procedures, technology, facilities, and use of overtime. The 2,000 new CBPOs funded in the FY 2014 Omnibus will help address the current gap in capabilities. Additionally, the WSM projects the need for additional staff in FY 2016 due to expanding facilities, technology deployments, and expected growth in travel and trade. Combined, CBP's total additional requirement through FY 2016 is roughly the equivalent of 2,700 CBPOs.

Through a legislative proposal to the appropriate Congressional Authorizing Committees, transmitted separately, CBP is proposing an increase of \$2.00 to the IUF, bringing the new fee amount to \$9.00. The IUF has not been raised since May 2002. Additionally, under the Immigration and Nationality Act, each sea passenger arriving in the United States is charged a \$7.00 fee if his or her journey originated from a place outside of United States, other than certain exempt regions. CBP proposes lifting the exemption for passengers traveling from those regions, to include the United States and its territories, so that the same fee will be applied to all sea passengers. Together, the additional revenue collected from these increases will fund up to

1,400 new CBPOs, which will reduce wait times at air and sea POEs, especially as cruise volumes continue to grow as projected in future years.

In addition to the IUF increases, a legislative proposal to the appropriate Congressional Authorizing Committees is proposing to increase COBRA fees (statutorily set under the *Consolidated Omnibus Budget Reconciliation Act of 1985*) and the ECCF fee created under the *Trade Act of 2002*. COBRA created a series of user fees for air and sea passengers, commercial trucks, railroad cars, private aircraft and vessels, commercial vessels, dutiable mail packages, broker permits, barges and bulk carriers from Canada and Mexico, cruise vessel passengers, and ferry vessel passengers. This proposal would increase the current commercial aircraft and vessel passenger fee by \$2.00, bringing the new fee amount to \$7.50, and increase other COBRA fees by a proportional amount. The ECCF fee was created to reimburse CBP for inspection costs related to express consignment and the proposal would increase the current fee by \$0.36. The additional revenue raised from these fee increases will allow CBP to recover more costs associated with customs-related inspections, and reduce wait times by supporting the hiring of up to 900 new CBPOs.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Headquarters Management and Administration (HQ M&A), Commissioner PPA funds the organizational body responsible for providing: critical policy, operational direction and mission support to CBP front-line personnel. As part of the overall management of CBP, this office develops long-range management plans for the efficient and effective operation of the organization. The Office of the Commissioner; develops and reviews CBP policy guidance, prescribes rules and regulations, and issues internal instructions to provide guidance to CBP employees that are consistent with regulations, and the authority delegated by the Department of

Homeland Security. The Executive staff supports and develops new policy and plans in alignment with the Commissioner’s priorities, simultaneously ensuring that CBP’s financial and personnel resources are available, and aligned for the development, articulation, and implementation of CBP’s current and future mission priorities and direction.

The Commissioner and senior staff represent CBP in all executive level negotiations and presentations of CBP’s position with other federal agencies, Congress, foreign governments, and non-government associations and groups affected by the administration and enforcement of CBP laws and regulations. Executive level advisors and staff provide advice in planning short-range and long-range strategies, activities, and projects, including proposals for assignment of resources necessary for the completion of projects having national and international impact such as the Trusted Traveler program, Global Entry, and the Automated Commercial Environment (ACE).

Exhibit 2: Commissioner FY 2016 Funding Request by Key Mission Area

Key Mission Area	Key Functions and Capabilities	Funding (Dollars in Thousands)
Immediate Office of the Commissioner	<ul style="list-style-type: none"> The Office of the Commissioner is responsible for the overall management and direction of CBP. 	\$5,262
Executive Secretariat	<ul style="list-style-type: none"> Responsible for documenting and assigning all Executive Correspondence, incoming tasking requests, Congressional Reports, and Questions for the Record (as well as requests for information, and official memoranda addressed to the Commissioner and other CBP and DHS officials) to ensure appropriate and expeditious actions are handled in a timely manner. 	\$1,907

Key Mission Area	Key Functions and Capabilities	Funding (Dollars in Thousands)
Privacy and Diversity	<ul style="list-style-type: none"> • Responsible for ensuring diversity and inclusion, as well as overseeing compliance with applicable civil rights and civil liberties law. • Handles Civil Rights and Civil Liberties (CRCL) informal complaints, formal complaints, and investigations of discrimination. • Responsible for working with multiple agency stakeholders, to develop a national program for the communication, detection, prevention, reduction and punishment of prison rape and related activities in response to the Violence Against Women Reauthorization Act of 2013. • Responsible for carrying out CBP’s functions to ensure compliance with the Freedom of Information Act (FOIA). • Responsible for Privacy Threshold Analysis (PTAs) Privacy Impact Assessments (PIAs) and System of Records Notice (SORNs). <p>*(Please see the tables below for additional information on the above responsibilities.)</p>	\$10,918
Strategic Integration	<ul style="list-style-type: none"> • Assesses enterprise processes, such as program management, property management, acquisition management, financial management, and human capital management through subject-matter experts from all CBP offices, and reviews data on CBP organization and each office’s mission, programmatic responsibilities, budget, staffing levels, and other related information. 	\$360
Program Development	<ul style="list-style-type: none"> • Develops and oversees the Planning, Programming, Budgeting, and Accountability (PPBA) framework for managing resources. 	\$590
Policy and Planning	<ul style="list-style-type: none"> • Provides leadership, direction, and advice regarding CBP’s overall policy development and implementation; and • Informs and supports decision making of the leadership and staff of CBP through deliberate and rapid planning processes and implements CBP’s Strategic Management Framework (SMF) to fully integrate CBP’s investment, resource, and program management. 	\$2,545

Key Mission Area	Key Functions and Capabilities	Funding (Dollars in Thousands)
State, Local, and Tribal Relations	<ul style="list-style-type: none"> Responsible for advising the Commissioner and program offices regarding the impact of CBP policies and initiatives on state, local, and tribal stakeholders. 	\$740
Trade Relations	<ul style="list-style-type: none"> Provides timely information about CBP trade policy to the international community; and Conducts formal outreach efforts by hosting regional and local trade conferences. 	\$1,061
Joint Operations Directorate	<ul style="list-style-type: none"> Implements the Commissioner’s vision for CBP field integration and serves as the mechanism to collaborate and coordinate Headquarters support for all joint/unified field operational efforts; Maintains situational awareness of ongoing and emerging events with the potential to require the coordination and delivery of CBP resources to identify, mobilize, deploy, and manage CBP resources in response to incidents, regardless of cause; Coordinates with, collaborates with, and supports the CBP operational components to promote the transmission of time-sensitive, mission critical information and ensure that the CBP communication strategy is in alignment; Leads the coordination of CBP assets to ensure the effective allocation of resources and provide management oversight and direction of programmatic functions for CBP Headquarters and field components to prepare for and mitigate the effects of catastrophic events, such as a hurricane or a weapon of mass destruction/effect incident; Provides strategic and operational planning support, plan development, and joint operational coordination within CBP; across DHS; with the Department of Defense (DoD); and with Federal, State, local, and tribal partners; Oversees the CBP corporate support to deploy and train personnel, oversees and conducts response operations, develops measures and coordinates and manages support for national level Special Event Assessment Rating (SEER) and National Special Security Events (NSSE) venues, such as the Democratic and Republican national conventions, Presidential Inauguration, G-8/NATO Summit Conference, etc.; 	\$7,567

Key Mission Area	Key Functions and Capabilities	Funding (Dollars in Thousands)
	<ul style="list-style-type: none"> • Develops and facilitates the implementation of the Integrated Federal Operational Plans for CBP, in accordance with PPD-8 (Enhanced National Security and National Resiliency); and • Ensures and facilitates “whole-of-government” participation, within CBP and with Federal, State, local and tribal authorities, for the development and implementation of strategic and operational plans that shape and sustain the continuity of national border security. <p>***A CBP Commissioner’s initiative exists to move responsibility for the Situation Room from OIIL to the JOD in FY 2015. The CBP Commissioner’s Situation Room is the 24 hours a day, 7 days a week law enforcement entity that serves as CBP’s reporting and information coordination center that facilitates communication between CBP Headquarters and the field components. Additionally, it is tasked with a diverse mission in which two of its main priorities are to provide the Commissioner, Deputy Commissioner, and other senior CBP leaders with real-time reporting of significant or emerging incidents, and to act as the main conduit for information flow between the DHS National Operations Center and CBP. In FY 2014, the Commissioner’s Situation Room received 10,460 unique Significant Incident Reports from the field, produced 1,298 Border Patrol emails, 899 OFO emails, and 125 Air and Marine emails to senior leadership. The Commissioner’s Situation Room also produced 253 Department Homeland Security SPOT reports on critically sensitive incidents that warranted the attention of the DHS Secretary.</p>	
Total		\$30,950

Above amounts are estimates of funding to be spent on each function in the Office of The Commissioner.

Description of Select Adjustments to Base

Transfer of Funds to Fully Implement the Movement Freedom of Information Act (FOIA) and Privacy Functions To The Office of the Commissioner: This transfer reflects the last of phase of the movement of the FOIA Division and the Privacy Branch of Regulations & Rulings from the Office of International Trade, funded by the Inspections, Trade, and Travel Facilitation PPA to the Office of the Commissioner (Privacy and Diversity Office), which it is own PPA. Funds will

be transferred to support five and thirteen FTEs to perform FOIA and Privacy activities, respectively. To execute this transfer, \$2,502,000 will be realigned to the Office of the Commissioner PPA from the Inspections, Trade, and Travel Facilitation PPA.

Realignment of Positions to the Office of Policy and Planning: The Office of Training and Development (OTD) is requesting to permanently transfer two positions and \$274,000 to the Office of Policy & Planning within the Commissioner's Office. These positions will support the formulation, implementation, and evaluation of critical policies that will enable CBP to effectively carry its mission of facilitating legitimate trade and travel while protecting our borders.

Increased Retirement Contributions: Due to additional changes to long term demographic assumptions recommended by the Board of Actuaries at its meeting on June 18, 2013, agency contribution rates for all FERS participants are expected to increase again on October 1, 2015. The expected increase of FERS contribution rates affect all federal employees at CBP, with a greater impact on agency contributions on behalf of law enforcement personnel. The adjustment to base pension contribution requirements increases CBP's pay estimates in order to account for the increased FERS contribution requirement costs in FY 2016.

Adjustment to Base Pay Requirements: CBP is managing its workforce to best support our frontline and mission-critical needs. The adjustment to base pay requirements includes salary dollars to maintain staffing in the critical support areas. This adjustment will enable CBP to sustain mission support positions and ensure that CBP's uniformed staff are not reassigned to support activities and remain dedicated to frontline mission priorities-

CURRENT SERVICES PROGRAM DESCRIPTION:

The HQ M&A Chief Counsel PPA funds mission critical legal advice, representation, and counsel to CBP. The Office of Chief Counsel (OCC) handles all legal and ethics issues involving CBP's global operations, both domestic and foreign. The OCC PPA funding is essential to allowing CBP to lawfully execute its critical mission of protecting our homeland, while facilitating legitimate trade, travel, and immigration.

The Chief Counsel is the chief legal officer of CBP and reports to the General Counsel, Department of Homeland Security, through a Deputy General Counsel. The Chief Counsel also serves as the CBP Ethics Officer and is the principal legal advisor to the Commissioner of CBP, CBP's senior executives and managers, and employees in their official capacities. OCC attorneys provide legal services to CBP officials in matters relating to the activities and functions of CBP. OCC's comprehensive legal services to CBP include representing the agency in offensive and defensive litigation in all federal courts, including the Court of International Trade, the Court of Federal Claims, the District Courts and Courts of Appeal, and immigration courts, as well as representing the agency in all third-party administrative hearings, including those before the Merit Systems Protection Board (MSPB), the Equal Employment Opportunity Commission (EEOC), the Federal Labor Relations Authority (FLRA), arbitrators, administrative law judges, and the Government Accountability Office (GAO). OCC also assists with the collection and protection of revenue, provides appropriations and fiscal law advice, reviews contractual, procurement, and real property actions, ensures compliance of proposed agency actions and policies with legal requirements, trains CBP officials in myriad law enforcement, trade, and ethics matters, and prepares and reviews legislative and regulatory proposals.

OCC has three major functional areas: Ethics, Labor, and Employment; Enforcement; and Trade and Finance. Each functional area is supervised by an Associate Chief Counsel (Senior Executive Service or SES) at Headquarters, whose office specializes in that functional area. In the field, Associate (SES) and Assistant Chief Counsels are located in major cities across the United States, providing "one-stop" legal services in all functional areas to CBP field managers in their geographic areas of responsibility. There are 28 offices within OCC, 27 in field locations, employing approximately 345 attorneys and support staff with unique expertise in and knowledge of laws enforced by or impacting CBP.

OCC does not set agency policy or priorities, but supports agency priorities and initiatives as set forth by the Commissioner and senior executive management across the organization, often on tight deadlines and on matters of high visibility and great significance for the agency's mission. The current "in house counsel" model for legal services is one in which the agency pays salaries, benefits and expenses for a set number of attorneys and legal staff, and in return, OCC provides one-stop, all inclusive, comprehensive legal services and ethics advice without additional cost to the agency. Funding provided to OCC is used to support all the resources needed to provide these legal and ethics services.

Exhibit 1: Chief Counsel FY 2016 Funding Request by Key Mission Area

Key Mission Areas¹	Key Functions and Capabilities	Estimated Non-Pay Funding (Dollars in Thousands)
Funding for Salaries and Benefits	Providing salaries and benefits to OCC staff, who collectively provide all legal and ethics advice and review to the Agency.	\$48,419
Headquarters	Legal services at CBP headquarters.	\$261
FLETC	Training offices to include: Glynco, Artesia, and Harpers Ferry.	\$79
Trade and Finance - National Finance Center	Review and provide comprehensive legal services for proposed administrative actions to ensure compliance with legal requirements	\$103
International Trade Litigation (ITL)	Assist with the collection and protection of revenue; representing the agency in administrative and judicial forums, including arbitration	\$36
Chicago	Legal services in all functional areas to CBP field managers in their geographic areas of responsibility to include: Chicago, Detroit, Seattle, and Buffalo.	\$155
Houston	Legal services in all functional areas to CBP field managers in their geographic areas of responsibility to include: Houston, Del Rio, El Paso, Marfa, Laredo, Edinburg, and Tucson.	\$289
Los Angeles	Legal services in all functional areas to CBP field managers in their geographic areas of responsibility to include: Los Angeles, San Francisco, San Diego, and Chula Vista.	\$182
Miami	Legal services in all functional areas to CBP field managers in their geographic areas of responsibility to include: Miami, Tampa, Atlanta, New Orleans, and San Juan.	\$135
New York	Legal services in all functional areas to CBP field managers in their geographic areas of responsibility to include: New York, Boston, and Baltimore.	\$127
Total		\$49,786

Performance

¹For OCC, these are geographic regions with non-pay budgets allocated to them.

FY 2016 Projected Workload Statistics

- At the beginning of FY 2015, OCC had 28 offices and was authorized to employ 345 staff.
- The projected FY 2016 caseload is expected to exceed the FY 2014 caseload, with the Administrative Proceedings, Advice, Training, and Operation Streamline portfolios all expected to increase. Operation Streamline is part of the Border Patrol’s Consequence Delivery System, and is a program in which individuals caught entering the country illegally in certain Border Patrol sectors are sent for prosecution, and face both criminal charges and administrative sanctions.
- In FY 2014, 38,875 new cases were opened. Over 33,000 Operation Streamline cases were also opened, bringing the FY 2014 opened case load to over 71,000 new matters.
- Over the past five years, OCC opened an average of 38,947 non-Operation Streamline new cases per year average.
- OCC has experienced a steady increase in work since FY 2010. See below chart, which does not include Operation Streamline cases.

Exhibit 2: OCC Caseload

	Opened	Closed	TOTAL
FY 2010	35,090	33,980	69,070
FY 2011	38,961	39,972	78,933
FY 2012	39,552	38,695	78,247
FY 2013	42,255	42,153	84,408
FY 2014	38,349	35,291	73,640
FY 2015 (projected)	40,228	36,809	77,037

- In FY 2014, although the overall number of cases handled decreased, the demand for legal services increased as the Agency prioritized and focused resources on the unaccompanied children influx, and the Middle East Respiratory Syndrome (MERS) and Ebola responses. These significant matters were treated as legal portfolios in lieu of individual case files, impacting the number of cases opened in FY 2014. We anticipate Operation Streamline cases and other case matters will increase in both FY 2015 and FY 2016 as the Agency prioritizes existing initiatives, and launches new ones. The projected FY 2015 case numbers are based on the average number of cases opened and closed by OCC over the past ten years.
- The past five Fiscal Years’ data, and our projected FY 2015 determinations, show a sustained and increasing demand for critical legal support in the highly-technical third party proceedings, advice and review aspects of our practice.

- For FY 2016, we anticipate increased legal work to support the Agency’s use of force initiatives and the Congressionally-mandated hiring surge, among other client initiatives. We also anticipate moderate increases in legal services on enforcement matters, including immigration, as well as personnel matters, and trade and commercial matters.

- OCC’s legal training offices have experienced a steadily increasing demand for their services, and we project a twenty percent increased demand in FY 2016 for training. In FY 2014, OCC assumed a greater role in basic training at the academies, including assuming responsibility for delivering immigration authorities’ legal training, which has now become a permanent part of the work OCC performs. As a result, in FY 2014, OCC’s training footprint increased by 211% in Air and Marine basic training, increased 160% at the Border Patrol Agent Basic Training Program, and increased 230% for CBP Officer basic training. Additionally, OCC supported the CBP Officer hiring surge in FY 2014 by increasing legal instruction hours to support greater numbers of personnel needing training.

Significant Recent Legal Work

- **Ebola Response:** In FY 2014 and FY 2015, OCC, both at Headquarters and in various field offices, provided significant legal support to the Ebola pandemic response and federal efforts to prevent and otherwise limit the introduction and spread of the disease to the United States. This has required extensive work with the White House, through the Department of Homeland Security’s Office of General Counsel, along with counsel office counterparts at the Department of Health and Human Services and the Centers for Disease Control, to address fast-developing federal response needs in securing the American public.
- **Anti-Dumping/Countervailing Duty (AD/CVD) Litigation Strategy:** CBP is charged with collecting hundreds of millions of dollars in AD/CVD imposed by the Department of Commerce. OCC actively assists CBP with all aspects of AD/CVD collections, from supporting new client initiatives to litigation. In FY 2014, OCC attorneys recovered \$46.95 million in revenue debts and liquidated damages.

- **Trade and Finance Portfolio:** OCC's trade and finance portfolio continues to grow both in size and variety, including a significant increase in advice on the agency's procurement activities and GAO protests, fiscal law and appropriations issues, public-private partnership efforts arising from recent legislation, facilities, and environmental law issues. This adds to OCC's already heavy involvement advising the agency on trade modernization efforts, broker and other customs licensing and trade law matters, classification disputes, bankruptcy, fee collections, condemnation actions for fence projects, Jones Act issues, and federal tort claims. As part of the agency's trade modernization efforts, OCC continues to provide practical legal advice to support the establishment, implementation and expansion of the agency's Centers for Excellence and Expertise.
- **User fees:** OCC was instrumental in drafting legislation and regulations on user fees issues, and assisting the Agency in addressing user fee related concerns, including those related to Agriculture Quarantine Inspections fees, Consolidated Omnibus Budget Reconciliation Act of 1985 (COBRA) fees, and Immigration User Fees (IUF).
- **International Engagement:** In FY 2014, OCC assisted the Agency with multiple international engagement initiatives, including negotiating four Customs Mutual Assistance Agreements (Morocco, Chile, Uruguay, and Kenya), handling numerous Beyond the Border initiatives with Canada, and assisting with preclearance efforts, including with the United Arab Emirates. The international portfolio continues to be in demand in FY 2015; among other matters, OCC assisted the Agency successfully negotiate and sign Customs Mutual Assistance Agreements with Singapore and Malaysia.
- **Training:** In FY 2014, OCC supported the congressionally mandated CBPO hiring surge through increased legal instruction hours at the FLETC-Glynco location. In FY 2015, OCC increased legal training and legal service deliveries at the supported training academies to meet demand, including delivering immigration authorities' legal training, as well as other legal classes to assist the Agency meet its congressionally mandated hiring targets. Attorneys were also added to the training staffs in Glynco, Georgia, Harpers Ferry, West Virginia and Artesia, New Mexico, to support the expanded use of force training program and provide additional legal instruction at the Agency's basic training programs for law enforcement personnel. Additionally, OCC training offices in Harpers Ferry, West Virginia and Artesia, New Mexico developed new, and refined existing, legal courses to support the Agency's use of force training, canine officer training, and advanced tactical training.

FY 2016 Initiatives

- Continue employing a successful trade litigation strategy that focuses on lead cases to maximize efficiency, aggressively pursuing AD/CVD cases against sureties and viable importers, and pursuing interest in excess of the bond amount to fully compensate the government and deter further non-payment;
- Provide comprehensive legal services, including training and legislative and regulatory support, in furtherance of the Agency's efforts to address employee compensation issues.
- Align OCC personnel and assets to optimize the provision of legal services and representation to operational priorities and regional client structures, such as the South Texas Campaign, and the Joint Field Command in Arizona.
- Increase use of OCC attorneys designated as Special Assistant U.S. Attorneys (SAUSAs) for consequence delivery.

- Assure legal training and personnel are sufficient to meet the Agency's on-going demand for additional legal courses, as well as to provide legal instruction to increased numbers of law enforcement trainees based on the Agency's hiring surge.

Description of Select Adjustments to Base

Increased Retirement Contributions: Due to additional changes to long term demographic assumptions recommended by the Board of Actuaries at its meeting on June 18, 2013, agency contribution rates for all FERS participants are expected to increase again on October 1, 2015. The expected increase of FERS contribution rates affect all federal employees at CBP, with a greater impact on agency contributions on behalf of law enforcement personnel. The adjustment to base pension contribution requirements increases CBP's pay estimates in order to account for the increased FERS contribution requirement costs in FY 2016.

Realignment of Mission Support Funding from CBPO Initiative: In FY 2014, Congress enacted appropriations to fund an additional 2,000 CBPOs and other operational and mission support personnel to enhance CBP's ability to facilitate processing of legitimate travelers and cargo, increase the seizures of unlawful items, and help reduce wait times. Funding for the mission support personnel was enacted centrally within the Administration PPA. However, since enactment, CBP has determined the required mix of mission support personnel to best support the additional 2,000 CBPOs. For FY 2016, the funding for the mission support personnel has been realigned to provide funds within the specific PPAs where mission support personnel has increased to support the additional 2,000 CBPOs.

Adjustment to Base Pay Requirements: CBP is managing its workforce to best support our frontline and mission-critical needs. The adjustment to base pay requirements includes salary dollars to maintain staffing in the critical support areas. This adjustment will enable CBP to sustain mission support positions and ensure that CBP's uniformed staff are not reassigned to support activities and remain dedicated to frontline mission priorities-

Full Cost Recovery AQI Fee Increase: CBP anticipates receiving an additional \$29.19 million in AQI user fees in FY 2016 due to the annualization of the AQI fee increase in FY 2015. This increase of \$29.19 million will be used to recoup additional agriculture inspection costs incurred in CBP's S&E appropriation in 2016.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Office of Congressional Affairs (OCA) is responsible for working with the United States Congress on behalf of CBP. It is OCA's responsibility to ensure that CBP is responsive to Members of Congress and their staff, and to committees and subcommittees having jurisdiction over CBP's mission sets, programs, and activities. OCA is also responsible for educating Members, staff, and committees on programs, initiatives, and authorities through various means of outreach. In addition, OCA advises CBP leadership on congressional activities, implements CBP's legislative agenda, and supports DHS's congressional activities related to CBP.

It is essential for OCA to maintain comprehensive knowledge of all agency programs and activities, and to stay abreast of all routine, special, or urgent congressional interests. OCA collaborates with congressional staff on legislation, casework, and numerous inquiries spanning the broad scope of the agency's operations, including border security, trade, and travel. In

addition, OCA coordinates with Members, staff, and committees to provide reports, briefings, hearings, and visits. In order to fulfill these responsibilities, OCA has dedicated teams focused on the following areas: Budget and Appropriations; Border, Air, and Marine Operations; Trade and Agriculture; Field Operations and Intelligence; Strategic Planning and Outreach; and, Management and Administration.

Congressional Staffer Academies

The CBP Congressional Staffer Academies (CSA) are a semi-annual, congressional outreach program designed to increase Congress' knowledge of the varied responsibilities of CBP by providing an informative field experience for congressional staff. CSAs provide insight into CBP operations and responsibilities with respect to border and national security. Participants gain hands-on, real-life field experiences that mimic the activities of CBP agents and officers. These academies are invaluable in giving staff members a thorough perspective of the many tools and enforcement techniques that CBP personnel use to successfully execute CBP's mission. These CSAs are conducted twice a year and alternate between the southern and northern borders.

Congressional participants are selected from congressional offices and committees that have a direct interest in CBP funding and oversight matters. CSAs are tailored to the audience and specific operational aspects of the featured field locations and include instructors from Offices of Congressional Affairs, Field Operations, Border Patrol, and Air & Marine. This level of collaboration demonstrates the overlapping law enforcement roles of each office and showcases CBP's layered approach to national security. The intangible benefits of CSAs further CBP priorities and enhance congressional understanding of CBP operations and programs. CSAs are critical to ongoing proactive efforts to build close working relationships with congressional authorizers and appropriators.

Description of Select Adjustments to Base

Increased Retirement Contributions: Due to additional changes to long term demographic assumptions recommended by the Board of Actuaries at its meeting on June 18, 2013, agency contribution rates for all FERS participants are expected to increase again on October 1, 2015. CURRENT SERVICES PROGRAM DESCRIPTION:

The HQ M&A Internal Affairs PPA funds the Office of Internal Affairs (IA), which exercises oversight authority for all aspects of CBP security including operational, personnel, and facilities, as well as the CBP counterintelligence (CI) program (including cyber protection). IA's mission is to promote the integrity and security of the CBP workforce. IA performs and manages a wide variety of functions and programs distributed among five divisions: Personnel Security, Investigative Operations, Integrity Programs, Credibility Assessment, and Security Management, as well as the Counterintelligence Operational Liaison Group. The primary responsibilities of each division/group are listed below.

- **Credibility Assessment Division:** Conducts applicant screening polygraph examinations.
- **Personnel Security Division:** Initiates and adjudicates background investigations (BI) on all CBP applicants, employees, and contractors.
- **Investigative Operations Division:** Conducts investigations of alleged criminal and serious, non-criminal misconduct on the part of CBP employees.
- **Security Management Division:** Provides oversight for physical, information, industrial, and operations security programs.
- **Counterintelligence Operational Liaison Group:** Formulates and implements policies, practices and procedures that make the foreign penetration of CBP more difficult to accomplish and easier to detect.
- **Integrity Programs Division:** Serves as the research, analysis, and education component of IA.

IA conducts investigations of alleged criminal and serious non-criminal misconduct on the part of all CBP employees. In September, 2014, the DHS Secretary granted the Commissioner's request for delegated authority to independently investigate criminal misconduct, providing IA investigators Job Series 1811 Criminal Investigator status. Prior to this delegation, U.S. Immigration and Customs Enforcement's (ICE) Office of Professional Responsibility had the primary authority to conduct criminal investigations relating to CBP employees. The office coordinates its internal investigative activity with the Department of Homeland Security's Office of Inspector General, the Federal Bureau of Investigation, and numerous other Federal, state, and local law enforcement authorities. Through these investigative efforts and the overall IA strategy listed below, the office's efforts will serve to enhance the CBP workforce's overall integrity, provide management the information necessary to make timely decisions relating to employee integrity issues, identify and correct integrity related deficiencies, and provide for greater accountability through the identification, documentation, and investigation of integrity related matters.

IA has implemented a strategy, which integrates prevention, detection, and investigation capabilities to deter, disrupt, and respond to corruption and serious misconduct in the CBP workforce. The strategy employs:

- Improved personnel security screening of prospective CBP employees;
- Polygraph examinations of law enforcement candidates as mandated by the *Anti-Border Corruption Act of 2010* (P.L. 111-376);

- Application of behavioral and analytical research tools to identify potential indicators of corruption;
- Intelligence-driven investigative responses to instances of criminal corruption and serious misconduct on the part of CBP employees; and
- Research (data) and analysis (behavior) conducted by the Integrity Programs Division designed to detect corruption, develop data/intelligence to drive the focus of integrity investigations, and apply “Insider Threat” methodologies for advanced detection of possible integrity threats.

A top priority for IA is remaining current with the initiation of all periodic reinvestigations (PR) for all CBP law enforcement personnel and conducting polygraph examinations on 100 percent of all law enforcement applicants before being hired for such positions as mandated by the *Anti-Border Corruption Act of 2010*. As an efficiency measure, the polygraph examinations are placed at the beginning of the applicant screening process, prior to scheduling the full background investigation, to ensure investigative resources are only being expended on viable candidates. Those who do not successfully complete the polygraph examination are no longer considered for employment with CBP, which allows CBP to avoid the costs associated with conducting BIs on unsuitable Law Enforcement Officer (LEO) candidates.

Exhibit 1: Internal Affairs FY 2016 Funding Request by Position (including Non-personnel)

Internal Affairs	FY 2016 Positions	FY 2016 Request (\$000)	% of Total
Polygraph Examiners	150	\$19,067	11.21%
Other Salary	510	\$79,439	46.72%
Non-Salary	0	\$71,518	42.06%
Total	660	170,024	100.00%

Exhibit 2: Internal Affairs FY 2016 Funding Request by Division

Key Mission Areas	Key Functions and Capabilities	Estimated Funding (Dollars in Thousands)
Credibility Assessment	Polygraphs	\$21,330
Personnel Security	Background and Periodic Re-investigations	\$72,035
Investigative Operations	Conduct & Integrity Investigations	\$44,372
IA Management and Other Programs	Analyses, Assessments, Evaluations, and Inspections; Security	\$26,624
Total		\$164,361

Above amounts are estimates of funding to be spent on each function in the Office of Internal Affairs, and do not include funding for the Working Capital Fund.

Performance

Corruption of the CBP workforce is a national security issue. Corruption adversely affects the successful execution of the CBP mission and CBP's ability to secure the borders while facilitating lawful trade and travel. IA is responding to the threat of workforce corruption and misconduct in a variety of ways to more effectively and efficiently deal with the problem.

Between FY 2009 and FY 2014 CBP IA:

- Opened in excess of 156,600 background investigations;
- Administered in excess of 30,800 polygraph examinations; and
- Received and documented in excess of 41,000 allegations of CBP employee misconduct or other reportable matters and completed in excess of 7,900 internal affairs investigations.

Working Capital Fund Activity

CBP's Working Capital Fund (WCF) costs that are paid from the HQ M&A Internal Affairs PPA are provided below. Additional WCF costs are paid from other PPAs, including the HQ M&A Administration and Training and Development PPAs, as well as the Automation Modernization appropriation.

Exhibit 3: Internal Affairs FY 2016 Anticipated Working Capital Fund Charges

CBP Office	Working Capital Fund	FY 2016 Anticipated Charges
IA	HSPD-12	5,662,996
	Sub-Total IA	5,662,996

Description of Select Adjustments to Base:

Realignment of Management Inspections Division: CBP is realigning the Management Inspections Division (MID) from the Office of Internal Affairs (IA) to the Office of Administration (OA) to better align the duties and responsibilities with the appropriate office. Through its programs, MID provides CBP senior leadership with diagnostic tools to measure the overall health of the organization and to identify operational and procedural deficiencies and vulnerabilities. If not corrected, these issues could compromise CBP's critical mission. Where applicable, MID provides recommendations for changes in policies, procedures, or practices to resolve programmatic issues, strengthen internal controls, or address impediments to CBP achieving its mission and goals. It assists to ensure that systemic deficiencies and vulnerabilities identified through inspections, validations, reviews and GAO/OIG audits are corrected thereby proactively helping to ensure the integrity, efficiency, and effectiveness of CBP operations. MID's unique proactive approach allows it to serve the agency as an advance indicator of potential concerns, which enhances CBP's overall operational effectiveness and integrity and serves CBP as a deterrent to fraud, waste, abuse, and mismanagement. IA's adjustment to base decrease of 40 FTE and \$6.355 million corresponds to the increase in OA.

Realignment of Operational Field Testing: CBP is realigning the Operational Field Testing Division (OFTD) from the Office of Internal Affairs (IA) to the Office of Intelligence and Investigative Liaison (OIIL). The realignment will enhance CBP's covert testing program and enable OFTD to leverage OIIL's intelligence analysis capabilities and add risk assessments to develop more robust covert testing protocols. Through its covert testing program, OFTD assesses and evaluates the integrity of CBP's multilayered security systems policies and procedures, technology, and personnel used at the ports of entry, between ports of entry and at international locations. The assessments provide CBP senior leadership with insight into existing enforcement operational processes which are critical in identifying, if any, vulnerabilities, systemic weakness, and best practices. Where applicable, OFTD provides recommendations for changes in policies, procedures, or practices to resolve or enhance CBP frontline operations. The covert testing program serves as a proactive management tool to assist in CBP's primary mission of keeping terrorists and terrorist implements out of the United States. To date, OFTD's testing includes radiation detection; document fraud; canine contraband detection; agriculture and bioterrorism; and testing of CBP's Trusted Traveler Programs. OFTD continues to work and develop new covert testing protocols, as CBP enforcement operations are developed or enhanced. IA's adjustment to base decrease of 13 FTE and \$1.956 million corresponds to the increase in OIIL.

Increased Retirement Contributions: Due to additional changes to long term demographic assumptions recommended by the Board of Actuaries at its meeting on June 18, 2013, agency contribution rates for all FERS participants are expected to increase again on October 1, 2015. The expected increase of FERS contribution rates affect all federal employees at CBP, with a greater impact on agency contributions on behalf of law enforcement personnel. The adjustment to base pension contribution requirements increases CBP's pay estimates in order to account for the increased FERS contribution requirement costs in FY 2016.

Realignment of Mission Support Funding from CBPO Initiative: In FY 2014, Congress enacted appropriations to fund an additional 2,000 CBPOs and other operational and mission support personnel to enhance CBP's ability to facilitate processing of legitimate travelers and cargo, increase the seizures of unlawful items, and help reduce wait times. Funding for the mission support personnel was enacted centrally within the Administration PPA. However, since enactment, CBP has determined the required mix of mission support personnel to best support the additional 2,000 CBPOs. For FY 2016, the funding for the mission support personnel has been realigned to provide funds within the specific PPAs where mission support personnel has increased to support the additional 2,000 CBPOs.

Cybersecurity Professionals Pay Schedule Change: Funds will support departmental efforts to plan for and execute new human capital statutory authority for cybersecurity positions. Specific preparatory activities will include the collection of additional information about existing cybersecurity employees and staffing gaps as well as the creation of human capital guidance, policies, and operating procedures. Funds will cover implementation personnel, including human capital and legal support, and will also be distributed to cybersecurity employees performing mission critical work through changes to compensation, including base pay and incentives.

CURRENT SERVICES PROGRAM DESCRIPTION:

The HQ M&A, Public Affairs PPA funds the Office of Public Affairs (OPA), which is responsible for the coordination, integration and synchronization of public affairs products and platforms that are designed to inform interested internal and external audiences and stakeholders. OPA builds support for and understanding of CBP's mission, roles, operations and its people. OPA primarily accomplishes this work through the efforts of its Major Market Media, Multi-Media Productions, Strategic Outreach Support, CBP Information Center/Business Intelligence Center, and Liaison to Television and Movie Productions divisions.

Exhibit 1: Public Affairs Key Functions and Capabilities by Key Mission Area

Key Mission Areas	Key Functions and Capabilities	Associated Funding
Major-Market Media	<ul style="list-style-type: none"> • Researches and provides requested CBP information, pitches CBP stories, hosts media visits, interviews, coordinates and clears statements, researches and clears press releases, prepares CBP spokespersons and senior leadership, responds to breaking news, and responds to critical incidents. Organizes, develops and implements Communication strategies for organizational initiatives including Zero Tolerance Policy; Use of Force; Transport, Escort, Detention, and Search; Administratively Uncontrollable Overtime; and other organizational initiatives of national/agency wide importance. 	\$3,914
Multi-Media Productions	<ul style="list-style-type: none"> • Captures, processes, distributes and archives more than 10,000 multi-media products, including live broadcasts, satellite media tours, public service announcements, video productions, webcasts, audio recordings, graphics, digital signage slides and photographs in support of the agencies border security and travel/trade facilitation missions; and • Manages the integrated digital signage platform for CBP. • Manages, operates and maintains the CBP Television Studio, Post Production Facilities, Press Room and Portrait Studio for DHS, CBP and other government agency support. • Prepares and creates large format still imagery prints for DHS and CBP. 	\$2,422
Strategic Outreach Support	<ul style="list-style-type: none"> • Manages CBP formal presentations for outward facing events, including participation in conferences, trade symposiums, and targeted emphasis programs; • Manages all CBP internal and external facing web content, web appearance, and web currency; • Manages CBP's history programs; • Manages <i>Frontline</i>, <i>CBP's multimedia magazine</i>; • Creates content for internal news features; and • Prepares speeches and remarks for senior leadership. 	\$2,876
CBP Information Center / Business Intelligence Center	<ul style="list-style-type: none"> • Accepts for action and organizes the response to all requests for information and complaints from CBP clients, customers, and stakeholders in English and Spanish; • Analyzes client/customer intake and provides analysis to CBP offices; 	\$2,728

Key Mission Areas	Key Functions and Capabilities	Associated Funding
	<ul style="list-style-type: none"> • Provides Global Online Entry System (GOES) support for callers and password resets. GOES program and funds transferring to OPA CIC to assume customer support activities for people applying for Trusted Traveler Programs (TTP) through GOES; and • In 2014 OPA created a Spanish/English speaking team to handle general inquiries and complaints. 18,793 complaints received in FY2014 to date. 	
Liaison to Movie and Television Productions	<ul style="list-style-type: none"> • Manages all CBP interaction with commercial television production ventures; pitches story concepts and reviews proposals; coordinates approvals and on-site interaction between production companies and CBP offices. 	\$2,524
Total		14,464

Above amounts are estimates of funding to be spent on each function in the Office of Public Affairs.

News Media Analysis

The Media Division’s role is to inform the public about CBP operations and regulations via traditional and social media channels. Each week, Media Division personnel, positioned throughout the United States, engage hundreds of national, local and foreign news media. The Media Division serves as CBP’s primary mechanism to provide timely, accurate information to the media and the general public about CBP’s values, mission, policies and operations in a manner they can best be informed. Over the past year, the Media Division has responded to numerous crises, including the influx of unaccompanied children in South Texas and CBP’s implementation of procedures in response to the outbreak of Ebola in West Africa. In response to these crises, the Media Division coordinated and implemented plans to keep the American public informed and assured.

The Media Division also plays a critical role in travelers and traders’ informed compliance via news media. Through the use of media releases and social media channels, the Media Division publishes clear and concise information resulting in media coverage for the trade community and travelers. This reduces the amount of questions and potential violations CBP officers deal with on the front lines as stakeholders are already informed about CBP policy and procedures. In addition, the Media Division’s efforts assure the American people and their leaders about CBP’s essential role in national security and border management. By sharing CBP’s successes with the media and the public, the Media Division’s efforts result in increasing morale among CBP front line staff as they receive recognition for outstanding actions in the line of duty.

The Media Division’s efforts also result in the deterrence of potential illegal activity. The Media Division proactively shares successful enforcement efforts and new technologies available to

agents and officers to detect, identify and intercept illegal activity. Communicating deterrent messages is a long-accepted law enforcement practice that OPA directly supports. Communication of CBP success in the detection and disruption of illegal activity at and between our ports of entry enhances CBP's deterrence of illegal activity.

Among the Commissioner's top priorities is transparency and accountability. The Media Division plays a primary role in implementing this priority by serving as the mechanism through which the agency provides that transparency and accountability. Through a series of media briefings, press events, releases and interviews, OPA ensured a marked change in tone and the inclusion of CBP's key messages from the beginning of the fiscal year to the end. This change in tone can be directly attributed to the Media Division's role in contributing to CBP's commitment to transparency.

From press releases and media events to social media engagement, the Media Division uses a variety of tools to tell the CBP story. Last year, media coverage of CBP grew by 22 percent from the previous fiscal year to more than 297,000 stories. Media coverage included online news content, local, network, and cable broadcast news, radio news and print articles (newspapers, magazines). Whether the coverage was positive or negative, all media coverage results from inquiries that are handled by CBP public affairs specialists or public affairs officers. In fact, negatively toned stories often consume more staff hours than positive stories, because the development of responses requires several more layers of review and coordination, compared to less sensitive and more up-front issues. As CBP public affairs specialists and officers, we help ensure our agency is transparent and accountable to the public it serves. In FY 2014, the Media Division published 1,160 news releases. CBP's social media engagement continues to grow with an ending total of more than 72,000 followers and a 144 percent increase in mentions for FY 2014. There are many factors that contribute to the volume of stories, but regardless of their number, all of the media coverage CBP received was directly supported in some way by the Media Division. This direct support often takes the form of on camera, in studio, live, and phone interviews; preparing principals for interviews, pitching stories to the media, and the development of key messages, talking points and public affairs guidance for CBP issues.

Exhibit 2: Media Coverage of CBP

Outreach & Campaigns

The outreach efforts of OPA are directly linked to the operational and organizational priorities of CBP. OPA's effective communication efforts directly support operations that secure our borders and facilitate trade and tourism.

While it is not a separate mission area, another key OPA activity is serving as the coordinating office for DHS's Blue Campaign, the Department-wide effort to combat human trafficking. The CBP effort to combat human trafficking stretches across CBP and includes efforts from USBP and OFO, as well as those of OPA itself. Moreover, CBP works in conjunction with partners such as foreign embassies and the private sector in an effort to raise awareness of this issue and help train personnel to combat human trafficking.

Examples of specific CBP human trafficking public awareness campaigns include:

- *Dangers of the Journey to Cross the Border* – an international unbranded public awareness campaign with the goal of dissuading potential undocumented migrants — particularly 12- to 17-year-olds from El Salvador, Guatemala, and Honduras — from embarking on the dangerous trek north to attempt to enter the U.S. illegally via Mexico. The intended audience includes both the children themselves and their parents or guardians. The campaign originally launched in January 2013 and was recently revised and released the week of June 30th.
- *No Te Engañes* – an international campaign to raise awareness among potential human trafficking victims by depicting the harsh realities of the crime.
- *Blue Lightning Initiative* – provides U.S. commercial airlines and their employees a voluntary mechanism to identify suspected human trafficking victims and notify federal authorities. Working with the cruise lines to accommodate a tip line protocol for the maritime environment.

Strategic Outreach Support – CBP Internal and External Facing Web Content hits:

Part of CBP outreach is the agency’s online presence. OPA is responsible for keeping the content on the home pages of both cbp.gov and cbp.net up-to-date.

Exhibit 3: CBP.GOV Website Statistics

CBP.GOV Website Statistics		
Fiscal Year	Site Visits	Page Views
2013	15,763,477	46,242,704
2014	19,273,436	57,882,975
2015 (thru Jan. 19)	6,821,298	19,487,644
Total	41,858,211	123,613,323

Exhibit 4: CBP.NET Website Statistics

CBPnet Website Statistics		
Fiscal Year	Site Visits	Page Views
2013	27,966,220	288,433,893
2014	29,916,692	711,270,237
2015 (thru Jan. 19)	8,522,143	225,281,026
Total	66,405,055	1,224,985,156

CBP Information Center Graphs & Statistics:

The information center sees heavy traffic online and over the phone. Exhibit 5 depicts an increase in web use by the general public over the course of the last three fiscal years. The number of questions submitted, visits to help.cbp.gov, and general public using the Self Service Q's & A's have all increased.

Exhibit 5: Web Service

While still sizable, the number of phone calls to the info center has declined over the last four fiscal years. Some of the change in inquiry traffic can be attributed to better website content management and phone-tree queues, however, the information center has also reduced the number of available lines to correspond with the staffing currently available to take calls. As vacancies, created by attrition and recruiting challenges, are filled, more specialists become available to take calls and more lines can be opened. Under current levels keeping hold times to a reasonable time limit remains a priority and challenge for the information center.

Exhibit 6: Call Volume

However, this reduction in call volume does not mean that the center is being utilized less overall. Regardless of the mechanism utilized, it is clear that overall number of complaints, compliments, and tips over the last three fiscal years received from the general public has increased. Abandonment rates are high because staffing has not kept up with call volume, creating longer hold times. Callers begin to abandon their calls when hold times are greater than two minutes. At this time, hold times average around five minutes.

In the summer of 2014, CBP began exploring how to establish a Spanish Language capability at the Information center. The CBP information center has had a nascent Spanish language capability at its satellite office in Nogales, AZ, however the two-person staff there does not have the capacity to meet the anticipated demand, and, current IT challenges make expanding the office impractical. CBP anticipates that, once established, the additional capacity to answer calls will further reduce abandonment rates

Description of Select Adjustments to Base:

Increased Retirement Contributions: Due to additional changes to long term demographic assumptions recommended by the Board of Actuaries at its meeting on June 18, 2013, agency contribution rates for all FERS participants are expected to increase again on October 1, 2015. The expected increase of FERS contribution rates affect all federal employees at CBP, with a greater impact on agency contributions on behalf of law enforcement personnel. The adjustment to base pension contribution requirements increases CBP's pay estimates in order to account for the increased FERS contribution requirement costs in FY 2016.

Adjustment to Base Pay Requirements: CBP is managing its workforce to best support our frontline and mission-critical needs. The adjustment to base pay requirements includes salary dollars to maintain staffing in the critical support areas. This adjustment will enable CBP to sustain mission support positions and ensure that CBP's uniformed staff are not reassigned to support activities and remain dedicated to frontline mission priorities.==

Transfer of Public Affairs Employees: The FY 2013 DHS Appropriations Act (P.L. 113-6) transferred Entry-Exit functions from legacy U.S. VISIT (now Office of Biometric Identity Management) to CBP. All transferring personnel were initially placed in Office of Field Operations with the understanding that, as the Entry-Exit functions were fully incorporated, some individuals would be placed elsewhere. Two such individuals were identified as primarily having performed public outreach duties at U.S. VISIT and were, therefore, most appropriately placed within Office of Public Affairs. Accordingly, in FY 2016 CBP is transferring \$270,000 from the Inspections, Trade, and Travel Facilitation PPA to the Public Affairs PPA for these employees' salaries.

CURRENT SERVICES PROGRAM DESCRIPTION:

The HQ M&A, Training & Development PPA funds the Office of Training & Development (OTD), which provides mission critical training for all employees, other than BPAs and CBPOs. The Training at the Ports of Entry and Training Between the Ports of Entry PPAs support the training of CBPOs and BPAs.

The Office of Training and Development is responsible for the centralized leadership and direction of all training programs for the CBP workforce. OTD manages CBP's National Training Plan (NTP), which prepares employees to carry out the core missions of CBP by

providing basic and advanced training based on identified agency and organizational requirements.

OTD establishes and upholds standards for designing, developing, delivering, and evaluating training to ensure the agency’s training programs are transparent, accountable, and legally defensible. OTD also maintains a robust distance learning program (the Virtual Learning Center) that enables CBP to deliver hundreds of training courses to CBP personnel in an efficient and cost effective manner.

In addition, OTD manages and oversees CBP’s use of force policy, training, and equipment. In January 2014, OTD completed a comprehensive revision of the new CBP Use of Force Policy Handbook to address policy-related recommendations from the three use of force reviews, as well as other changes that clarify and improve upon CBP’s existing policy. On May 30, 2014, the Commissioner of CBP issued the new CBP Use of Force Handbook to CBP employees. Also on that date, the Commissioner publicly released the Handbook, as well as the Police Executive Research Forum’s report on its review of CBP’s use of force. Six portions of the Handbook went into effect immediately. The remaining portions of the Handbook went into effect on October 1, 2014, and post-implementation negotiations with the National Border Patrol Council and the National Treasury Employees Union on the remaining portions are underway.

This PPA funds basic, advanced, and supervisory/management/leadership training for a wide range of CBP employees; training course development and maintenance costs; operating costs for CBP’s on-line training, course scheduling, and management systems; and salaries and benefits for OTD’s mission support activities. The exhibits below display the funding by position type, provide a breakdown of funding by key mission areas, and provide the types of training programs funded under this PPA.

Exhibit 1: Training & Development FY 2016 Funding Request by Position (including Non-personnel)

Working Capital Fund Activity

CBP’s Working Capital Fund (WCF) costs that are paid from the HQ M&A Training and Development PPA are provided below. Additional WCF costs are paid from other PPAs including the HQ M&A Administration and Internal Affairs PPAs, as well as the Automation Modernization appropriation.

Exhibit 4: Training & Development FY 2016 Anticipated Working Capital Fund Charges

CBP Office	Working Capital Fund	FY 2016 Anticipated Charges
OTD	e-Training	3,594,102
	WCF-National Defense University	134,249
	DHS EXEC. LEAD. (SES CDP, Sec Conf)	117,467
	Sub-Total OTD	3,845,818

Description of Select Adjustments to Base

Realignment of Positions to the Office of Policy and Planning: The Office of Training and Development (OTD) is requesting to permanently transfer two positions and \$274,000 to the Office of Policy & Planning within the Commissioner’s Office. These positions will support the formulation, implementation, and evaluation of critical policies that will enable CBP to effectively carry its mission of facilitating legitimate trade and travel while protecting our borders.

Increased Retirement Contributions: Due to additional changes to long term demographic assumptions recommended by the Board of Actuaries at its meeting on June 18, 2013, agency contribution rates for all FERS participants are expected to increase again on October 1, 2015. The expected increase of FERS contribution rates affect all federal employees at CBP, with a greater impact on agency contributions on behalf of law enforcement personnel. The adjustment to base pension contribution requirements increases CBP’s pay estimates in order to account for the increased FERS contribution requirement costs in FY 2016.

Realignment of Mission Support Funding from CBPO Initiative: In FY 2014, Congress enacted appropriations to fund an additional 2,000 CBPOs and other operational and mission support personnel to enhance CBP’s ability to facilitate processing of legitimate travelers and cargo, increase the seizures of unlawful items, and help reduce wait times. Funding for the mission support personnel was enacted centrally within the Administration PPA. However, since enactment, CBP has determined the required mix of mission support personnel to best support

the additional 2,000 CBPOs. For FY 2016, the funding for the mission support personnel has been realigned to provide funds within the specific PPAs where mission support personnel has increased to support the additional 2,000 CBPOs.

Full Cost Recovery AQI Fee Increase: CBP anticipates receiving an additional \$29.19 million in AQI user fees in FY 2016 due to the annualization of the AQI fee increase in FY 2015. This increase of \$29.19 million will be used to recoup additional agriculture inspection costs incurred in CBP's S&E appropriation in 2016.

CURRENT SERVICES PROGRAM DESCRIPTION:

The HQ M&A Technology Innovation and Acquisition PPA funds the Office of Technology Innovation & Acquisition (OTIA), which provides a central office for two major functions essential to the future effectiveness of CBP. First, it is charged with ensuring that all border security technology efforts are properly focused on mission outcomes and are well integrated across CBP. Second, it is charged with strengthening CBP's expertise and effectiveness in acquisition and program management of contractor-delivered products and services. The office is responsible for providing the necessary training to its acquisition workforce. OTIA administers policy and acquisition oversight for all CBP program management offices, and will develop a standard requirements coordination process for CBP. The Office is also responsible

for providing management oversight for major acquisition programs, including evaluating success, risk management, identifying redundancies, and quality assurance.

The Assistant Commissioner for OTIA is CBP’s Component Acquisition Executive (CAE). The CAE is the senior acquisition official responsible for implementation of management and oversight of all CBP acquisition processes and programs. The CAE synchronizes these processes with those of the Head of the Contracting Activity (HCA) and those of the CBP Chief Information Officer (CIO). The CAE’s other responsibilities include tracking the extent to which resources and support are provided to Program Managers to ensure successful and effective acquisitions, managing CBP’s acquisition portfolio to ensure consistency with DHS missions and strategic goals, and executing Acquisition Decision Authority responsibilities when delegated. The CAE seeks to develop a capable, mature, efficient, and effective organization for acquisition governance and execution.

Exhibit 1: Technology, Innovation, & Acquisition FY 2016 Funding Request by Position (including Non-personnel)

OTIA Mission Statement

The mission of OTIA is to conduct and facilitate the effective identification, acquisition, and lifecycle support of products and services, while driving innovation to improve CBP’s mission performance in securing the border and facilitating the lawful movement of goods and people.

OTIA Vision Statement

OTIA is a recognized center of expertise and partner of choice for program management, acquisition, and innovation. OTIA recognizes and rewards excellence, provides program-centric services, and consistently delivers innovative products and services that continually improve CBP performance.

OTIA performs this mission by providing the following services and expertise through the following capabilities:

Exhibit 2: Technology, Innovation, & Acquisition Key Functions and Capabilities by Division

OTIA Functional Area	OTIA Key Functions and Capabilities	FY 2016 Funding (Dollars in Thousands)
Assistant Commissioner	<ul style="list-style-type: none"> • Assistant Commissioner (AC) is charged with ensuring that all of CBP’s technology efforts are properly focused on mission and are well integrated across CBP; • AC is responsible for overseeing the strengthening of CBP’s expertise and effectiveness in acquisition and program management of contractor-delivered products and services; • AC serves as the CBP’s Component Acquisition Executive (CAE) and is responsible for implementation of management and oversight of all CBP acquisition processes and programs; synchronizes these processes with the contracting and procurement processes from the Head of Contracting Activity (HCA) and the information technology processes from the CBP Chief Information Officer (CIO); • The Mission Support Division (MSD), led by the Chief of Staff, is committed to serving as a premier, mission-focused, and customer-oriented organization that meets the needs of OTIA employees; and • MSD supports OTIA by providing guidance and offering solutions on a broad range of functions within human capital and technology support. 	\$1,904
Acquisition Policy and Oversight	<ul style="list-style-type: none"> • Assists the AC in developing and promulgating appropriate governance structures, policies, and procedures in furtherance of the overall goals and objectives of OTIA; • Serves as the Executive Secretariat to defined governance structures that support OTIA’s roles in acquisition oversight, resource management, and technology innovation; • Administers and monitors CBP’s acquisition 	\$2,857

OTIA Functional Area	OTIA Key Functions and Capabilities	FY 2016 Funding (Dollars in Thousands)
	<p>certification program in collaboration with DHS for all acquisition functional areas of expertise;</p> <ul style="list-style-type: none"> • Develops human capital strategies to strengthen CBP’s acquisition and technology innovation competencies, including enhancement of the qualifications and capabilities of the acquisition workforce; • Serves as the liaison with DHS on acquisition and program management related councils and working groups; and, • Establishes, implements, and oversees acquisition improvement initiatives; and • Provides formal training for program managers. 	
Acquisition Management	<ul style="list-style-type: none"> • Provides focused support and guidance to CBP program and project offices concerning acquisition and procurement processes, for pre/post-award commodity/services and sustainment contracting activities; • Provides focused support and guidance to CBP program and project offices concerning the formulation of acquisition strategies and acquisition documentation. 	\$2,380
Systems Engineering	<ul style="list-style-type: none"> • Provides systems engineering products for OTIA programs and projects, including all test and evaluation (T&E) activities; environmental impact and systems security analysis/planning; and modeling and simulation analysis support; • Provides guidance and mentoring for the SE processes through participation in Integrated Product Teams (IPTs) and leading Technical Review Teams; • Applies systems engineering with Lead Technical Authority (LTA) for all CBP non-IT program and project Systems Engineering Life Cycle technical reviews; • Develops, manages, and executes industry best practices in technical management and technical processes; • Establishes and coordinates alignment of all 	\$5,396

OTIA Functional Area	OTIA Key Functions and Capabilities	FY 2016 Funding (Dollars in Thousands)
	<p>program and project requirements and technologies to the CBP and DHS Enterprise Architectures through architectural analysis; and,</p> <ul style="list-style-type: none"> • Serves as the principal liaison between DHS Science and Technology Directorate (S&T) and CBP. 	
Program Management	<ul style="list-style-type: none"> • Develops strategic plans and initiatives to meet the current and future acquisition requirements for Level I, II, and III acquisitions; • Serves as a strategic acquisition and program management advisor for mission programs; • Implements, oversees, and ensures that CBP acquisition programs comply with acquisition policies and procedures; • Provides oversight of CBP mission program and project offices; • Works closely with the Office of Integration and Analysis to ensure risk-based and gap analyses and adequate requirements gathering are conducted and analyzed; and, • Provides direct and indirect technical and operational advice and support to Procurement Directorate staff in the Office of Administration for pre-award and post-award activities. • Provides direct oversight of the CBP Transportation Program, which provides an integrated system of detainee transportation and security along the Southwest border. This program significantly reduces the numbers of CBP officers and agents used in securing and transporting illegal detainees, allowing them to focus on their traditional law enforcements operations. 	\$8,252
Business Operations	<ul style="list-style-type: none"> • Provides guidance and oversight on all business and financial management related aspects; • Creates and implements cost estimating tools, processes, and training; • Maintains controls over financial reporting, 	\$3,967

OTIA Functional Area	OTIA Key Functions and Capabilities	FY 2016 Funding (Dollars in Thousands)
	<p>and integrates operational requirements with strategic planning in order to create program targets that align resources to prioritized CBP and DHS strategic goals; and,</p> <ul style="list-style-type: none"> • Composes congressionally mandated reports, including expenditure plans, multi-year investment and management plans, and congressional justifications. 	
Logistics and Sustainment	<ul style="list-style-type: none"> • Performs life cycle management and oversight of OTIA program technology logistics and sustainment following successful government acceptance; • Manages and oversees the OTIA depot operations program used for the repair and supply chain support of border enforcement technology; • Manages and oversees the OTIA in-service engineering activity charged to manage system technical baselines deployed in the field; • Manages and oversees the software support activity charged with the sustainment and management of system software and firmware deployed in the field; • Manages and oversees the OTIA asset management program providing visibility and accountability to fulfill field supply chain needs and financial reporting requirements; and, • Establishes and promulgates policy to ensure logistics and sustainment considerations are included in all acquisition processes and decision making. 	\$2,222

OTIA Functional Area	OTIA Key Functions and Capabilities	FY 2016 Funding (Dollars in Thousands)
Operational Integration & Analysis	<ul style="list-style-type: none"> • Supports end-user organizations with processes, tools, and subject matter expertise so that the end users can properly identify, document, and gain approval for their requirements; • Establishes processes, procedures, and products to assist in the identification, documentation, and validation of operational requirements that cross CBP operational organizations; • Assists the end users in establishing and documenting the intended purpose, use, and concept of operations (CONOPS) for proposed goods and services that would meet an operational requirement; • Provides test and evaluation expertise to ensure project readiness and to assist end users in their determination of a system's worthiness; and, • Coordinates closely with CBP's program management offices to review the progress of CBP programs and projects, ensure end-users are kept informed of status, enable end-user participation and involvement in key program and project management activities, and increase the likelihood that delivered goods and services are consistent. 	\$1,428
Non-Pay	This funding will help provide necessary office supplies, such as paper, toner, laptops, software licenses, and training for all of OTIA.	\$1,251
Total		\$29,658

Above amounts are estimates of funding to be spent on each function in the Office of Technology Innovation and Acquisition.

Description of Select Adjustments to Base

Realigning OTIA funding to S&E: CBP is realigning \$1.0 million in funding from the BSFIT Operations & Maintenance PPA to the S&E Technology Innovation and Acquisition PPA in order to meet non-pay requirements and maintain OTIA operability. The base non-pay funding in the Technology Innovation and Acquisition PPA is significantly less than the amount needed

to support OTIA staffing, and this realignment will help provide necessary office supplies, such as paper, toner, laptops, software licenses, and training.

Increased Retirement Contributions: Due to additional changes to long term demographic assumptions recommended by the Board of Actuaries at its meeting on June 18, 2013, agency contribution rates for all FERS participants are expected to increase again on October 1, 2015. The expected increase of FERS contribution rates affect all federal employees at CBP, with a greater impact on agency contributions on behalf of law enforcement personnel. The adjustment to base pension contribution requirements increases CBP's pay estimates in order to account for the increased FERS contribution requirement costs in FY 2016.

Adjustment to Base Pay Requirements: CBP is managing its workforce to best support our frontline and mission-critical needs. The adjustment to base pay requirements includes salary dollars to maintain staffing in the critical support areas. This adjustment will enable CBP to sustain mission support positions and ensure that CBP's uniformed staff are not reassigned to support activities and remain dedicated to frontline mission priorities.-

MAJOR ACQUISITIONS:

Block 1 Maintenance

The main mission for Block 1 Maintenance is increased situational awareness and persistence surveillance across the Tucson (TUS-1) and Ajo (AJO-1) areas of responsibility within the Tucson Sector. Block 1 technology supports U.S. Customs and Border Protection (CBP) agents and officers to effectively detect, identify, classify and resolve illegal incursions at the border. Block 1 includes a deployment of towers with a suite of integrated day and night cameras, radars, unattended ground sensors and a communications package. Block 1 also includes an initial version of a common operating picture, which is the system that integrates the sensors, and displays the results at a command center. Block 1 deployments in TUS-1 and AJO-1 collectively cover approximately 53 miles of international border in Arizona.

OTIA systems utilize embedded information technology. They do not provide IT as a service, as defined in OMB Cir. A-130. Therefore, these acquisitions are considered mixed non-IT/IT

This project is proposed to be funded out of multiple PPAs in FY 2016, as follows:

- BSFIT Operations & Maintenance \$16.836 million
- Technology Innovation & Acquisition \$0.427 million

Integrated Fixed Towers (IFT)

Integrated Fixed Towers (IFT) provide automated, persistent wide area surveillance for the detection, tracking, identification, and classification of illegal entries. In threat areas where mobile surveillance systems cannot be a viable and/or long term solution, IFTs equipped with

sensor suites and communication equipment, can be deployed to provide automated, persistent wide area surveillance for the detection, tracking, identification, and classification of illegal entries. When multiple IFT units are integrated into a system with a common operating picture (COP), Border Patrol will be able to increase situational awareness and be able to monitor a larger area of interest. With an IFT system, a single COP operator can maintain persistent surveillance over a large area whereas previously, multiple agents exposed to threats were required to provide coverage in the same amount of area.

This project is proposed to be funded out of multiple PPAs in FY 2016, as follows:

- BSFIT Operations & Maintenance \$11.108 million
- Technology Innovation & Acquisition \$1.607 million

Mobile Surveillance Capabilities (MSC)

The purpose of the MSC is to provide area surveillance in rural, remote areas over a range of 8 to 12 kilometers. Capabilities are detection, identification, and tracking of items of interest (IOI's) until successfully culminating in a law enforcement conclusion. Sensory equipment may include electro - optical/infrared (EO/IR) cameras, ground surveillance radars (GSR), laser range finders, laser illuminators, global positioning systems (GPS), and command, control, communication (C3) systems.

Government Ford F-450 trucks are outfitted with an integrated suite of sensor equipment attached to the flat skid cargo bed, with an operator workstation located inside the truck cabin, allowing CBP to adjust the location of its surveillance capabilities to keep pace with the ever changing border threat.

OTIA systems utilize embedded information technology. They do not provide IT as a service, as defined in OMB Cir. A-130. Therefore, these acquisitions are considered mixed non-IT/IT.

This project is proposed to be funded out of multiple PPAs in FY 2016, as follows:

- BSFIT Development & Deployment \$16.000 million
- BSFIT Operations & Maintenance \$8.383 million
- Technology Innovation & Acquisition \$0.282 million

Northern Border Remote Video Surveillance System (NB-RVSS)

The NB-RVSS consist of day night cameras attached to fixed towers, which allows the Border Patrol to monitor border activity through video transmissions to a control room. This program will enhance the capability of providing situational awareness of border activity through persistent surveillance and detection to facilitate proper law enforcement resolution. The NB - RVSS towers have expanded the coverage at the Northern Border where highly trafficked and illegal activities exist.

OTIA systems utilize embedded information technology. They do not provide IT as a service, as defined in OMB Cir. A-130. Therefore, these acquisitions are considered “mixed non-IT/IT.”

This project is proposed to be funded out of multiple PPAs in FY 2016, as follows:

- BSFIT Operations & Maintenance \$8.439 million
- Technology Innovation & Acquisition \$0.427 million

Remote Video Surveillance System (RVSS)

A Remote Video Surveillance System (RVSS) is a remotely controlled system of either daylight or infrared cameras mounted to a permanent structure. The images are transmitted, monitored, and recorded at a central location. This system is deployed to monitor large spans of the international border or Critical Transit Nodes. This program will address technology obsolescence by upgrading selected RVSS sites with new surveillance capability and deploy the upgraded technology at new RVSS Upgrade sites, thus enhancing the capability of providing situational awareness of border activity through persistent surveillance and detection to facilitate proper law enforcement resolution. These additional RVSS towers will expand the coverage of the RVSS system in Arizona in areas that are highly trafficked with illegal activities.

OTIA systems utilize embedded information technology. They do not provide IT as a service, as defined in OMB Cir. A-130. Therefore, these acquisitions are considered mixed non-IT/IT.

This project is proposed to be funded out of multiple PPAs in FY 2016, as follows:

- BSFIT Development & Deployment \$16.421 million
- BSFIT Operations & Maintenance \$5.579 million
- Technology Innovation & Acquisition \$1.603 million

CURRENT SERVICES PROGRAM DESCRIPTION

The HQ M&A, Intelligence and Investigative Liaison PPA funds the Office of Intelligence and Investigative Liaison (OIIL), which administers CBP's intelligence and targeting programs. These programs support a flexible enforcement capability that anticipates and detects potential threats to our security, economy, and public safety. Serving as a powerful partner that connects

law enforcement and intelligence communities, these programs develop, provide, and coordinate capabilities to support CBP's primary mission to secure our borders while facilitating legitimate trade and travel. CBP's intelligence and targeting programs work to:

- Detect threats away from our borders;
- Identify travelers and shipments according to the threat they pose;
- Integrate and coordinate our intelligence and targeting capabilities; and,
- Establish stronger partnerships with domestic and foreign partners.

CBP's strategic approach, both at and between the ports of entry, relies on risk management. Segmenting the flows of people and goods by the risk they pose allows CBP to focus law enforcement efforts on the relatively small fraction of goods and people that pose a threat to public safety and economic prosperity. This strategy depends on reliable and timely intelligence and information for success, from which informed judgments can be made about the risk posed by people and goods that we encounter. Effective intelligence not only involves the identification of known threats and hazards, but also facilitates the identification of unknown dangerous people and goods that, because of their anonymity, often pose a greater threat to the security and safety of our country, citizens, and interests. CBP's intelligence and targeting capabilities are force multipliers and have proven their return on CBP's investment.

OIIL provides CBP front line operators and decision-makers with current, relevant situational awareness and facilitates operational responses for all crimes, threats, and hazards throughout the various CBP areas of responsibility (AOR), by using resources such as the Intelligence Support Teams (IST) in Detroit, Tucson, New Mexico/West Texas, and South Texas, the 24/7 National Intelligence Watch, and OIIL personnel at the El Paso Intelligence Center (EPIC). Through the collection and production of intelligence and analytical products, OIIL provides intelligence and deploys technical, analytical, targeting, and collection management tools in support of front line border operations to all geographic AORs.

CBP has become a leader in innovation and development of methodologies and techniques dedicated towards thwarting any attempts to penetrate our nation's borders and attacking our critical infrastructure. Additionally, CBP continues to develop its layered risk management approach to safeguarding U.S. borders from threat by land, air, and sea. This multi-layered strategy integrates legislative and regulatory initiatives, international and trade-organization partnerships, improved automation support, new detection technologies, enhanced personnel training, and a combination of local and national targeting expertise. CBP recognizes that no single strategy or risk assessment is 100 percent effective and accurate, so it focuses on layering multiple initiatives together to accomplish its mission. CBP works aggressively with government partners, foreign and domestic, to make improvements regarding data timeliness and quality, which augments the abilities of highly trained CBP personnel by providing them the ability to use cutting edge technology for targeting, detecting, and securing terrorists, or implements of terrorism destined to the United States.

Exhibit 3: Key Functions and Capabilities by Division

Key Mission Areas	OIL Key Functions and Capabilities
<p align="center">Targeting</p>	<ul style="list-style-type: none"> • Operates and maintains the Automated Targeting System (ATS). The tables below illustrate ATS’s current capabilities and other agencies it supports; • Creation of the National Targeting Centers (NTC) and National targeting rules that cover all threats/hazards; • Processes 2.1 million air passengers and crew weekly and referring 0.06 percent (1,300 weekly) of these travelers for additional examination; • Identifies over 5,000 Terrorism Watch List matches each year, of which approximately 300 to 350 annually are denied boarding or refused entry into the United States; • Develops and integrates modernized entity resolution capabilities and machine learning targeting rules in land border and cargo environments; • Conducts risk assessments of the large volume of regulatory and commercial data, totaling \$2.48 trillion in imports during FY 2014, representing a 25.0 percent increase over the past 5 years, generated by commercial entities and other government agencies by verifying the identity of businesses that ship goods across our borders; and • Employs the Analytical Framework for Intelligence, a suite of “force multiplication” tools to automate time-consuming tasks that face CBP analysts today regarding data access, query, and information retrieval, analysis, and reporting.
<p align="center">Collections</p>	<ul style="list-style-type: none"> • Leverages CBP and other Intelligence Community (IC) assets to provide Intelligence, Surveillance, and Reconnaissance (ISR) capabilities that synchronize and integrate the planning and operation of sensors, assets, processing, exploitation, and dissemination systems in direct support of current and future operations; • Provides an enhanced common intelligence picture (CIP) to CBP leadership both in the field and at Headquarters levels; and • Deploys cutting-edge technologies and capabilities, including collections; subject matter experts in imagery, signal, and human intelligence disciplines; tracking; tagging and locating; law enforcement technical collection (LETC); synchronizing IC airborne ISR; and Tasking, Collecting, Processing, Exploitation, and Dissemination procedures.

Key Mission Areas	OIL Key Functions and Capabilities
<p>Analysis</p>	<ul style="list-style-type: none"> • Responsible for the all-source analysis, production, and dissemination of classified and unclassified tactical and strategic intelligence products designed to inform both the strategic and operational decision-making processes at all levels of the agency; and • Focuses identification of known/unknown threats, high-risk persons/conveyances/cargo, and the identification of the tactics, techniques, and procedures used by transnational criminal organizations (TCO).
<p>Field Support</p>	<ul style="list-style-type: none"> • Manages and provides oversight of Intelligence Support Teams (IST) at regional field locations (Detroit, Tucson, New Mexico/West Texas, and South Texas) to present a coordinated unity of effort in operational corridors; • Provides a CIP and a Common Operating Picture (COP) to make recommendations to leadership in operational decision making; • Establishes a single venue for increased operations coordination while facilitating the flow of classified and unclassified information to CBP components and their partners, to strengthen communications and relationships, and to establish a unified enforcement posture at and between the ports of entry; and • Coordinates and provides liaison support to facilitate cross-organizational operations, CBP operations involving non-CBP elements from throughout the IC, and international, state, local, and tribal partners and authorities.
<p>Operational Field Testing</p>	<ul style="list-style-type: none"> • Assesses and evaluates the integrity of CBP's multilayered security systems; • Identifies operational vulnerabilities and systems weaknesses through covert testing of CBP capabilities or readiness to detect terrorists and terrorist weapons; • Conducts testing of policies and procedures, technology, and personnel used at the ports of entry, between the ports of entry and at international locations; and • Leverages intelligence analysis capabilities for selecting testing locations based on risk assessments.

Description of Select Adjustments to Base

Full Cost Recovery AQI Fee Increase: CBP anticipates receiving an additional \$29.19 million in AQI user fees in FY 2016 due to the annualization of the AQI fee increase in FY 2015. This increase of \$29.19 million will be used to recoup additional agriculture inspection costs incurred in CBP's S&E appropriation in 2016.

MAJOR ACQUISITIONS:

Analytical Framework for Intelligence (AFI)

The AFI system provides additional capabilities to DHS in the gathering, analysis, information sharing, and reporting of critical intelligence information within DHS and other law enforcement partners. AFI directly supports CBP's strategic goals to secure the nation's borders from the entry of dangerous people and goods, while enabling the flow of legitimate trade and travel. Specifically, AFI provides the technology and tools that allow for the production of timely and actionable intelligence for CBP personnel protecting our borders, enhanced collaboration across CBP intelligence analysts, and more effectively share threat information and intelligence to its Federal partners charged with securing our nation.

	System support and maintenance	24/7/365 Architecture and engineering system support
	Analytic/Intel Capabilities	Data analysis, collaboration, intel production & dissemination

Automated Targeting System (ATS) Maintenance

Automated Targeting System (ATS) is a web-based enforcement and decision support tool that incorporates intelligence information and technologies to target suspect inbound and outbound shipments for examinations and passengers for inspection. It allows CBP officers to focus their efforts on cargo shipments and passengers that most warrant further attention. The ATS systems have allowed the CBP Officers to process large volumes of data efficiently, which was previously a gap within the targeting environment. As volumes of data increase in people, cargo and conveyances, officers require increasingly efficient access to information and more information on which to base critical admission decisions. The systems investments are also intended to address data quality improvements, including entity and name resolution to ensure that efforts are focused on those persons and cargo that truly present a threat to the homeland.

This project is proposed to be funded out of multiple PPAs in FY 2016, as follows:

- Automated Targeting Systems \$118.148 million
- Intelligence/Investigative Liaison \$1.58 million

CURRENT SERVICES PROGRAM DESCRIPTION:

The HQ M&A, Administration PPA provides critical policy and operational direction and mission support to CBP frontline personnel. Administration M&A funding is essential to carrying out CBP's dual mission of securing America's borders against terrorist threats, while facilitating legitimate travel, trade, and immigration. The Offices of Human Resources Management (HRM) and Administration are funded in this PPA. This PPA also funds CBP Workman's Compensation and a portion of the DHS Working Capital Fund. Included in the \$420.238 million request is \$5.12 million that is associated with mission support hiring related to the FY 2014 CBPO Initiative, which has yet to be distributed to a program office.

Office of Human Resources Management

HRM provides centralized human resources support to approximately 60,000 CBP employees, both nationwide and overseas. HRM recognizes that its first priority is to support the CBP mission and is committed to being a strategic and tactical partner in achieving the Agency's mission. HRM provides human resources services that support CBP leadership, addresses the operational requirements of CBP program offices, and meet the needs and expectations of CBP employees.

HRM's operational scope is broad and requires addressing numerous challenges, including: operating in a constrained fiscal environment; competing for talent while maintaining congressionally mandated frontline staffing levels; and delivering quality services under the pressure of growing workloads, balanced with a continuing focus on accountability and results.

HRM strives to deliver timely and efficient customer-centric support, services, and solutions that are responsive to changing mission requirements, operational conditions, and stakeholder needs. HRM provides strategic leadership to effectively meet its customers' human resource requirements by:

- Recruiting, assessing, and hiring candidates to maintain a highly skilled, diverse, and mission-ready workforce;
- Leveraging technology to improve human resources business processes and service delivery;
- Providing medical, benefit, retirement, and work life advisory services;
- Promoting a safe and healthy work environment;
- Facilitating workforce and organizational effectiveness, including Agency integration and reorganization efforts;
- Administering and guiding implementation of human capital policies; and
- Managing CBP’s labor and employee relations programs.

Exhibit 2: HRM Funding Request by Key Mission Area:

Key Mission Areas	Key Functions and Capabilities	Funding (Dollars in Thousands)
Human Resources Executive Policy Formulation	<ul style="list-style-type: none"> • HRM manages a centralized human resources program for all U.S. Customs and Border Protection (CBP) employees nationwide and overseas; • HRM supervises all matters involving human resources, including: organizational structure, staffing, pay administration, benefits, workplace safety, personnel actions, and employee relations. HRM also assists employees by providing recruitment services, retention support, benefits support, and employee assistance programs; • Through human capital planning and utilization, HRM meets its customers' operational needs by providing strategic leadership to ensure the efficient and effective delivery of HR services to CBP; and • This item includes internal HRM processes, such as budget and property administration, communications management, records management, safety and security. 	\$4,500
Staff Acquisition	<ul style="list-style-type: none"> • Develop strategies to attract, assess, and ensure hiring of the best-qualified applicants; and • Continually improve hiring processes and practices that allowed CBP to: <ul style="list-style-type: none"> ○ Reduce hiring costs and the time-to-hire; ○ Leverage technology; and ○ Achieve process efficiencies. 	\$56,687

	initiatives; and <ul style="list-style-type: none"> • HRM is also responsible for establishing and operating systems to collect employee relations program data and for the analysis and reporting of such data. The staff advises on trends and emerging third party decisions that dictate changes in program direction and develops programs and policies accordingly. 	
Workman's Compensation	<ul style="list-style-type: none"> • The CBP workers' compensation program is managed by the Office of Human Resources Management (HRM). • The program assists employees who are injured or become ill because of their employment with CBP as they file claims under the Federal Employees' Compensation Act (FECA), and represents the Agency in providing information related to claims. • HRM works to reduce the impact of work-related injuries and illnesses on employees by ensuring payment of appropriate FECA benefits, manages CBP's workers' compensation claims process, returns employees to duty as quickly as possible and controls program costs. 	\$69,799
Total		\$178,786

Above amounts are estimates of funding to be spent on each function in the Office of Human Resources Management.

Office of Administration

The Office of Administration (OA) serves an integral role as the mission support core for CBP by providing the necessary goods and services required by operational personnel and business partners to fulfill mission goals. This support includes: essential financial management services; budgeting; all asset-related programs, including fleet, uniforms, personal property, and seized and forfeited property; mail; and the CBP printing program. OA also serves as the accountability office for CBP and assesses and evaluates the strategic and programmatic performance to assist leadership in understanding how performance, cost, and risk intersect within CBP.

Exhibit 3: OA FY 2016 Funding Request by Key Mission Area

Key Mission Areas	Key Functions and Capabilities	Funding (Dollars in Thousands)
Fleet Program	<ul style="list-style-type: none"> • Provides the mobile operating platform for detection, interdiction, and law enforcement activities at and between the ports of entry as well as provide mission support throughout the United States of America; • Manages the fleet lifecycle from acquisition to disposal, including on-going public and private sector fleet lifecycle management review to incorporate best practices and improve analysis, reduce operating costs, and increase program effectiveness. Currently the average age of the CBP fleet serves as a general indicator of overall fleet health. As indicated in Exhibit 6: “CBP Vehicle Average Age,” CBP is quickly approaching ideal average age thresholds; • Provides fleet lifecycle management capabilities, including right-sizing, ensuring greatest possible revenue returns for disposal of assets and assuring best value acquisitions; • Provides oversight and cost controls, cost savings and avoidance identification and implementation support for maintenance, repair and operations, as well as analysis to facilitate improved fleet management decision making; • Conducts policy oversight, communications, and centralized reporting for fleet management, the Home-to-Work Program, and parking in the National Capital Region on behalf of CBP; • In FY 2016, projected to acquire 1015 CBP replacement vehicles; and, • In FY 2016, the fuel management initiative implementation phase will oversee the installation and integration of fuel facilities across the Southwest border, allowing CBP, U.S. Immigration and Customs Enforcement, and Federal Law Enforcement Training Centers to obtain fuel at the least expensive total price without negatively impacting operational and mission capabilities. Activities include invoice management and performance measurement of the capability, cost, and savings of the initiative against objectives. 	\$39,194

Key Mission Areas	Key Functions and Capabilities	Funding (Dollars in Thousands)
Uniform Program	<ul style="list-style-type: none"> Provides CBP Uniform Program policy, guidance, supply chain management, acquisition, contract management, uniform allowance account management, and training academy quartermaster oversight and management, all necessary to outfit and equip CBP uniformed personnel with the necessary apparel and equipment for their safety and visibility during the execution of their mission. 	\$41,916
Seized Vehicle Contract	<ul style="list-style-type: none"> Provides policy, guidance, and contract/supply chain management for approximately 12,500 vehicles valued at \$10,000 or less that are seized or forfeited annually along the Southwest border. CBP manages custody and disposition of seized and forfeited vehicles through a contract with services that include towing, entry into the Seized Asset and Case Tracking System database, storage, inventory, and ultimately disposition. 	\$11,798
General Order Merchandise Contract and Financial Management	<ul style="list-style-type: none"> Provides program and contract management for the disposition approximately 1,850 property items abandoned annually at CBP Ports of Entry. Revenue from sales of abandoned property covers all contract and administrative costs of program. 	\$1,620
Personal Property Program Management	<ul style="list-style-type: none"> Responsible for decentralized management and oversight of over 800,000 disbursed personal property assets (valued at over \$7.5 billion) for U.S. Customs and Border Protection to ensure success of CBP's operations in support of the Department's mission. 	\$2,440
Revenue Collections	<ul style="list-style-type: none"> Maintains 30,000 Automated Clearing House accounts to enable the electronic collection of \$35.8 billion from importers and brokers; Collects and apply 300,000 checks, Fed Wire, and Federal agency payments totaling \$2.2 billion; Prepares 16,000 reimbursable bills to collect \$10 million for CBP Ports of Entry; Processes 160,000 Internal Revenue Service excise tax bill collections totaling \$1.5 billion and collect \$400 million in fees for the Army Corps of Engineers; Maintains 500 cash registers and reconciles 10,000 daily deposit differences to support \$1.5 billion in collection activities at the CBP Ports of Entry; Reviews 8,000 certifications annually for the 	\$15,472

	<p><i>Continued Dumping Subsidy Offset Act of 2000</i> and issues 1,100 disbursements to harmed domestic producers (see Exhibit 5);</p> <ul style="list-style-type: none"> • Maintains over 190,000 continuous bonds securing revenue totaling over \$16.2 billion in 2014; • Initiates debt collection on 60,000 accounts receivables and 3,300 dishonored payments totaling \$191 million in collections annually; • Reconciles over 12.5 million credit card transactions totaling \$312 million that support fees collected from the traveling public; • Issues and renew 170,000 transponders annually collecting over \$30 million; and • Coordinates with and provides Subject Matter Expertise to the Office of International Trade and the Office of Field Operations in order to deploy new business processes and electronic billing and collection capabilities that are immediately transferable to CBP’s Revenue Modernization efforts. Specifically, the automation of the Single Transaction Bonds process, the establishment of more efficient revenue collection methods for User Fee Facilities, and implementation of an electronic environment for billing and collections. 	
<p>Financial Management</p>	<ul style="list-style-type: none"> • Provides and supports the CBP core financial mixed systems including systems operations and maintenance, upgrades, and user support; • Provides financial management services as required by OMB Circular A-11, including budgeting, accounting, and investment analysis; • Provides effective and efficient payroll services for the unique pay circumstances encountered by CBP; • Operates and maintains CBP’s Enterprise Resource Planning (ERP) system for integrated financial, procurement, and property management thereby eliminating many paper processes and improving efficiencies in several business areas while allowing CBP to continue its outstanding financial performance with unqualified audit opinions since 2004; • Provides stewardship of over \$10 billion in appropriated resources and \$40 billion in collections by overseeing CBP’s internal controls over financial 	<p>\$33,346</p>

Key Mission Areas	Key Functions and Capabilities	Funding (Dollars in Thousands)
	<p>reporting as required by OMB Circular A-123, the <i>Federal Managers Financial Integrity Act of 1982</i> (P.L. 97-255; FMFIA), and <i>Federal Financial Management Improvement Act of 1996</i> (P.L. 104-208; FFMIA); and</p> <ul style="list-style-type: none"> Coordinates and oversees the annual audit of CBP's financial statements and the annual consolidated audit of DHS' financial statements and internal controls, as well as coordinates the DHS Office of Inspector General (OIG) and the Government Accountability Office (GAO) audit activity within the Office of Administration. 	
Procurement	<ul style="list-style-type: none"> Acquires the goods, services and equipment needed in support of the various CBP operations and missions. Executed and/or oversaw the completion of approximately 9,200 actions in FY 2014 totaling \$2.5 million in contracts and other business agreements; Oversees internal and external audits and reviews on the CBP procurement function; Manages reverse auctions; Manages strategic sourcing; Provides knowledge management systems; Manages Contracting Officer's Representative (COR) Program; Manages contracting career field training and certification program; and Manages the CBP Purchase Card Program. 	\$23,067
Socioeconomic and Special Programs	<ul style="list-style-type: none"> Interfaces with partners in industry; Manages CBP's unsolicited proposal program; Forecasts acquisition opportunities; and Represents CBP as the Task and Delivery Order Ombudsman. 	\$887
Budget and Program Analysis	<ul style="list-style-type: none"> Formulates and executes CBP's Budget including various aspects of the PPBA process; Provides budgetary guidance and assistance to all CBP offices regarding development and execution of funding; and Provides analysis of CBP fiscal activities as well as investment analysis on operational activities. 	\$7,976
OA Executive Leadership	<ul style="list-style-type: none"> Contains the OA Assistant Commissioner and Deputy Assistant Commissioner (CBP's CFO) and 	\$6,445

Key Mission Areas	Key Functions and Capabilities	Funding (Dollars in Thousands)
	<p>Staff, Front Office Support Staff, Administration and Planning Support Staff, Strategic Improvement and Business Information Staff;</p> <ul style="list-style-type: none"> • Provides Executive Leadership for OA and financial guidance to CBP on financial activities and actions; • Analyzes CBP's business activities and distributes key information through CBP Business Plan; and • Develops and disseminates policies related to financial, facility, and administrative functions. 	
Management Inspections	<ul style="list-style-type: none"> • Provides CBP senior leadership with diagnostic tools to measure the overall health of the organization and to identify operational and procedural deficiencies and vulnerabilities; • Issues recommendations for changes in policies, procedures, or practices to resolve programmatic issues, strengthen internal controls, or address impediments to CBP achieving its mission and goals; • Assists to ensure that systemic deficiencies and vulnerabilities identified through inspections, validations, reviews and GAO/OIG audits are corrected thereby proactively helping to ensure the integrity, efficiency, and effectiveness of CBP operations; and • Serves the agency as an advance indicator of potential concerns, which enhances CBP's overall operational effectiveness and integrity and serves CBP as a deterrent to fraud, waste, abuse, and mismanagement. 	\$6,355
Business Support Operations	<ul style="list-style-type: none"> • In addition to the key mission areas listed above, OA's funding also supports the Office of Administration's Financial Operations, and Administrative and Asset Management- mission support activities, as well as the day to day administrative operations in support of CBP's mission; • Provides print and print related services for CBP and other DHS components to ensure the most economical and lowest competitive price; some of which include signage, forms, critical DHS and CBP financial presentations to Congress and OMB, other congressional presentations, and branded items; • Establishes forms policies and procedures, conducts periodic reviews of forms to determine compliance 	\$22,758

Key Mission Areas	Key Functions and Capabilities	Funding (Dollars in Thousands)
	<p>with applicable authorities, provides uniformity in forms design, and ensures public forms are accessible by persons with disabilities;</p> <ul style="list-style-type: none"> • Provides policy and guidance for creating and preserving adequate and proper documentation of agency records in compliance with DHS, OMB, and National Archives and Records Administration (NARA); and • Establishes national mail policy, guidance and procedures, conducts periodic reviews to determine operational compliance with established practices and procedures. 	
Total		\$213,274

Above amounts are estimates of funding to be spent on each function in the Office of Administration.

**The real property programs managed by the Office of Administration are funded by the Rent PPA and the Construction and Facilities Management appropriation.*

Revenue

The Office of Administration processes all CBP-collected revenue. The collection of all revenue is significant in ensuring the efficient flow of legitimate trade and travel. The graph below reflects the historical and projected growth of CBP revenue collections over the given 5 year period. This growth is due to many factors, including an increase in collection types (duties, taxes, user fees), new collection programs legislated by Congress, and increases in imports and inspections.

Exhibit 4: Revenue Collections

FY 2014 data inflated by an anomalous \$3.8B seizure not included in FY 2015 and FY 2016 projections.

Exhibit 5: Continued Dumping Subsidy Offset Act (CDSOA) Disbursements

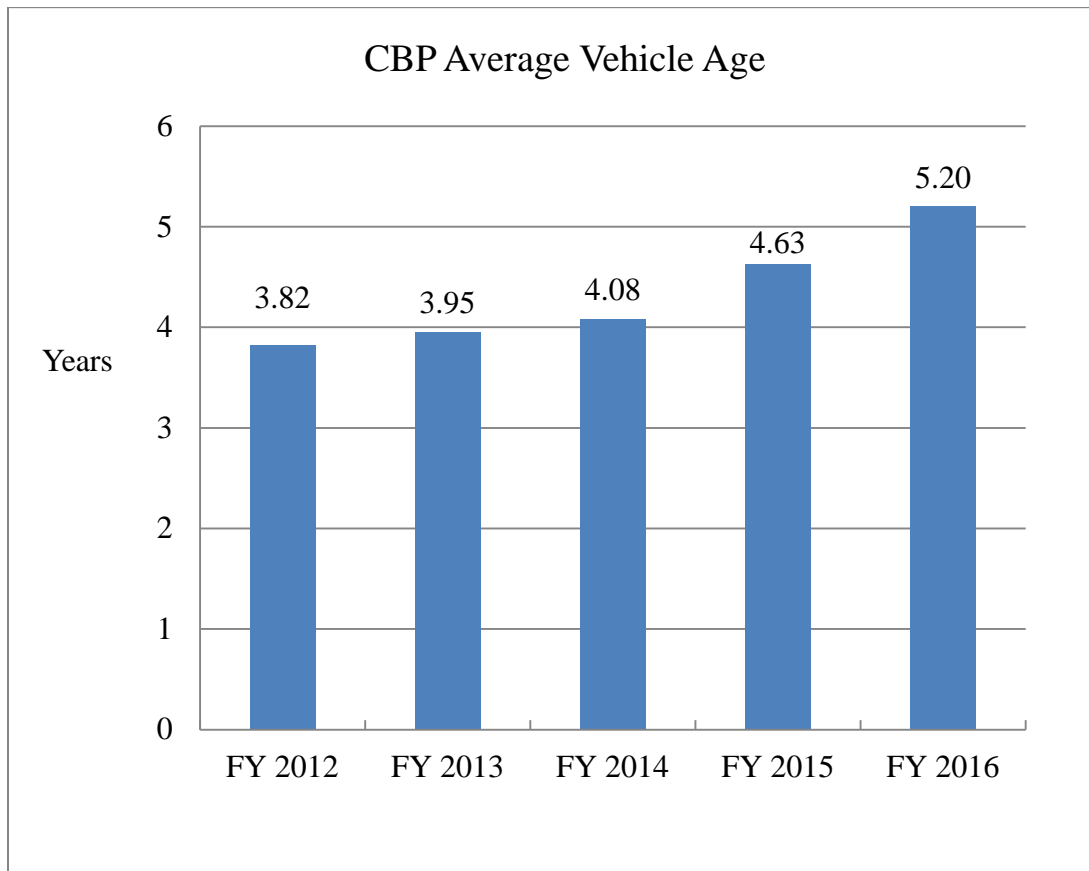

FY 2015-2016 figures are projected based upon historical data and forecast models.

Vehicle Fleet

The average vehicle age performance measure is a composite view of the CBP fleet. This measure is used to provide a general health indicator of the motor vehicle fleet. The target average age is 3 to 6 years, dependent upon vehicle type and mission. CBP vehicles have a life expectancy range from 6 to 10 years.

Exhibit 6: CBP Vehicle Average Age

Description of Select Adjustments to Base

Realignment of Management Inspections Division: CBP is realigning the Management Inspections Division (MID) from the Office of Internal Affairs (IA) to the Office of Administration (OA) to better align the duties and responsibilities with the appropriate office. Through its programs, MID provides CBP senior leadership with diagnostic tools to measure the overall health of the organization and to identify operational and procedural deficiencies and vulnerabilities. If not corrected, these issues could compromise CBP’s critical mission. Where applicable, MID provides recommendations for changes in policies, procedures, or practices to resolve programmatic issues, strengthen internal controls, or address impediments to CBP achieving its mission and goals. It assists to ensure that systemic deficiencies and vulnerabilities identified through inspections, validations, reviews and GAO/OIG audits are corrected thereby proactively helping to ensure the integrity, efficiency, and effectiveness of CBP operations. MID’s unique proactive approach allows it to serve the agency as an advance indicator of potential concerns, which enhances CBP’s overall operational effectiveness and integrity and serves CBP as a deterrent to fraud, waste, abuse, and mismanagement. OA’s adjustment to base increase of 40 FTE and \$6.355 million corresponds to the decrease in IA.

Frontline Hiring Requirements for Human Resources: Additional funding of \$15.9 million for frontline hiring will be used to fund multiple human resource requirements, including: job opportunity announcements issued by the U.S. Office of Personnel Management for BPAs, CBPOs, Air and Marine Interdiction Agents, and other frontline positions; qualifications testing of those candidates passing the initial screening; medical drug testing of qualifying applicants; and physical fitness testing of qualifying applicants. Additional resources for these requirements have been unfunded in recent years, in deference to other Human Resources requirements required by statute or in compliance with legally binding requirements of other federal Agencies.

Restore unrealized FY 2014 VERA/VSIP Savings: CBP’s FY 2014 enacted appropriation included a workforce reduction through VERA and VSIP to generate a savings of \$15.455 million, which was designed to ensure that resources could be focused on maintaining frontline operations. Due to staffing losses sustained through a mission support hiring freeze from 2012-2014, and careful management of frontline overtime usage, CBP was able to reprogram funds in FY 2014 to prevent the need for VERA and VSIP programs. However, the FY 2014 VERA/VSIP savings were carried forward into the submission base for FY 2015 and FY 2016. For FY 2016, CBP proposes to adjust base funding to restore these unrealized VERA and VSIP savings.

Increased Retirement Contributions: Due to additional changes to long term demographic assumptions recommended by the Board of Actuaries at its meeting on June 18, 2013, agency contribution rates for all FERS participants are expected to increase again on October 1, 2015. The expected increase of FERS contribution rates affect all federal employees at CBP, with a greater impact on agency contributions on behalf of law enforcement personnel. The adjustment to base pension contribution requirements increases CBP's pay estimates in order to account for the increased FERS contribution requirement costs in FY 2016.

Realignment of Mission Support Funding from CBPO Initiative: In FY 2014, Congress enacted appropriations to fund an additional 2,000 CBPOs and other operational and mission support personnel to enhance CBP's ability to facilitate processing of legitimate travelers and cargo, increase the seizures of unlawful items, and help reduce wait times. Funding for the mission support personnel was enacted centrally within the Administration PPA. However, since enactment, CBP has determined the required mix of mission support personnel to best support the additional 2,000 CBPOs. For FY 2016, the funding for the mission support personnel has been realigned to provide funds within the specific PPAs where mission support personnel has increased to support the additional 2,000 CBPOs.

Adjustment to Base Pay Requirements: CBP is managing its workforce to best support our frontline and mission-critical needs. The adjustment to base pay requirements includes salary dollars to maintain staffing in the critical support areas. This adjustment will enable CBP to sustain mission support positions and ensure that CBP's uniformed staff are not reassigned to support activities and remain dedicated to frontline mission priorities.-

Full Cost Recovery AQI Fee Increase: CBP anticipates receiving an additional \$29.19 million in AQI user fees in FY 2016 due to the annualization of the AQI fee increase in FY 2015. This increase of \$29.19 million will be used to recoup additional agriculture inspection costs incurred in CBP's S&E appropriation in 2016.

MAJOR ACQUISITIONS:

Systems Applications and Products (SAP)

The Systems Applications and Products (SAP) system provides for accurate and timely processing of financial, property, and procurement transactions occurring on a daily basis that enable CBP to accomplish its mission. SAP is an integrated enterprise-wide resource planning (ERP) system that replaced ten stove-piped, outdated, and underperforming mainframe systems that CBP deemed insufficient and no longer suited to meeting data processing and reporting needs. SAP permits CBP to accomplish its mission with more efficiency than ever before as well as reduce functional gaps by closing material weaknesses identified during past audits of CBP Financial Statements required by the Federal Managers Financial Integrity Act.

Note: See CASR for full description.

This project is proposed to be funded out of multiple PPAs in FY 2016, as follows:

- IUF \$2 million
- Administration \$12.565 million

CURRENT SERVICES PROGRAM DESCRIPTION:

The HQ M&A, Rent PPA provides the required resources to assure that CBP's leased portfolio supports our mission of securing America's borders, while facilitating legitimate travel, trade, and immigration. The Rent PPA supports the rent and rent-related costs at these leased facilities, which includes recurring rent expenses, security services provided by the Federal Protective Service (FPS), and approved changes to support the overall mission effectiveness of the facilities.

CBP currently leases 20 million square feet of space across 1,500 facilities. As shown in Exhibit 1, this reflects an increase of almost 10 percent in square footage since FY 2012. The increases reflect the additional square footage required to meet expanding and evolving mission needs.

Exhibit 1: CBP's Leased Portfolio Square Footage²

CBP leases a diverse array of operational and mission support facilities that support all of CBP's real property portfolios, including Air and Marine Facilities, Border Patrol Facilities, Field Operations Facilities and Mission Support Facilities. Facilities within the leased portfolio include: Marine Units, National Marine Training Centers, Unmanned Aerial Systems (UAS) hangars, and Air Branches and Units supporting the Office of Air and Marine (OAM); Sector Headquarters facilities, Border Patrol Stations, Forward Operating Bases, and checkpoints supporting the Office of Border Patrol (OBP); field offices and POEs supporting the Office of Field Operations (OFO); and mission support facilities (MSF) comprised of administrative office space and laboratories belonging to mission support offices. The Rent PPA also provides resources for the rent costs associated with over 800 Tactical Communications (TACCOM) towers and 348 Remote Video Surveillance System (RVSS) towers at the Northern and Southern borders and throughout the United States, which facilitate communications and house critical surveillance equipment.

The planned allocation of FY 2016 Rent PPA funds is shown in Exhibit 2 (on the next page).

² In FY 2015 and FY 2016 square footage is based on projections attributed to facilities that are currently underway and scheduled for completion in each of the respective years.

Exhibit 2: Rent PPA FY 2016 Spend Plan
(\$ in Thousands)

Lease Type	OAM	OBP	OFO	MSF	Total	Percent of Total
GSA-Owned Lease	129	11,032	300,229	50,145	361,535	57%
GSA-Leased Lease	2,581	45,010	47,992	91,248	186,831	30%
Direct Leases	11,185	12,415	775	542	24,917	4%
FPS Security Costs	2,932	1,135	24,641	27,055	55,763	9%
Total Rent PPA	16,827	69,592	373,637	168,990	629,046	
Percent of Total	3%	11%	59%	27%		

The core rent activities within each of these lease types include:

- GSA Rent --\$548.4 million (87 percent), representing the majority of CBP’s rent budget, will fund leases that have been negotiated through the General Services Administration for GSA-owned and GSA-leased facilities nationwide. This will also fund anticipated costs for overtime utilities and maintenance activities at GSA-owned and GSA-leased facilities. These charges typically support 24-hour facilities, such as Border Patrol Stations;
- Direct Leases – \$24.9 million (4 percent) will fund leases that CBP enters into directly with commercial lessors, most of which support OAM and OBP; and
- Security Charges (Federal Protective Service) – \$55.8 million (9 percent) will fund rent-related costs for building security services provided by FPS.

To fully fund core rent activities at the required levels, CBP is actively pursuing efficiencies in the leased space footprint through several innovative initiatives to reduce overall rent costs. CBP is also driving efforts to improve service delivery and performance at GSA Land Ports of Entry (LPOEs) along the Nation’s borders. These initiatives will help CBP meet all obligations and ensure mission readiness.

- Implementation and Expansion of the Mobile Workforce Initiative – In April 2011, CBP initiated a Mobile Workforce Initiative pilot program at the Field Operations Facilities Washington, DC-based office. Upon implementation in July 2012, CBP realized a 36 percent reduction in office space with a one hundred percent return on investment after approximately 18 months and annual rent and operating cost savings of \$290 thousand, representing an annual net decrease of approximately 41 percent at the pilot location. There were also additional metrics captured that identified increased employee engagement and cross-functional communication. CBP has begun rolling out its Mobile Workforce Initiative, using lessons learned from the pilot, to other offices within the National Capital Region (NCR), specifically those offices supporting the Office of Administration, and plans future roll-outs at mission support offices in Indianapolis, Indiana, Laguna Niguel, California, and Eules, Texas.
- Space Utilization and Efficiencies – In alignment with federal government-wide initiatives to maintain the existing mission support portfolio size, including the Office of Management and Budget’s (OMB) “Freeze the Footprint” policy and the June 2010 Presidential Directive “Disposal of Unneeded Federal Real Estate,” CBP is leveraging information technology and

workplace transformation initiatives to realize operational efficiencies, which are anticipated to ultimately improve CBP's space utilization. By improving space utilization in both the owned and leased real property portfolios, cost savings will be realized across CBP. As space efficiency opportunities are finalized cost savings amounts will be confirmed. CBP has already made significant progress to identify locations for increasing space utilization with a current focus on mission support office space and warehouses.

- **Rent Requirements Governance** – In an effort to align governance policies with the needs of the leased portfolio, a rent governance process has been implemented to review space requirements, identify efficiencies within the Rent PPA, and assure all space needs align with overarching governance and policy. The *CBP Rent Control Policy* aims to target out-year savings and identify measures to improve rent space utilization. By identifying delayed starts, new lease adjustments, facility closures, and updated program requirements, CBP reduced the overall rent requirements by \$44 million in FY 2013 and \$2 million in FY 2014, and expects an additional \$13 million reduction in FY 2015.
- **LPOE Service Level Agreements** – CBP is working with GSA to implement new service level agreements (SLA) as a means to improve building operations, maintenance, and repair (BOMR) service delivery at the GSA-owned LPOEs. The evaluation framework for the LPOE SLA initiative will utilize existing data and data collection methods, where possible, to measure performance efficiently and without adding further resource constraints. CBP and GSA are on track to implement SLAs at approximately 10 ports in FY 2015. Additional sites will be considered after the outcome of the initial roll-out has been analyzed.

Description of Select Adjustments to Base

Realignment for rent payments of GSA LPOEs: This adjustment realigns \$219.2 million from the Construction and Facilities Management (C&FM) Appropriation to the Salaries and Expenses Appropriation, Rent PPA, to fund GSA-owned LPOE rent costs. Funding for the GSA LPOEs was realigned from the Rent PPA to C&FM in FY 2014 to support facilities services and rent costs associated with the LPOE delegation of authority. Since the delegation will no longer occur and CBP will continue rental payments to GSA, the resources in the C&FM account supporting the GSA LPOE rent must be transferred back to the Rent PPA. In lieu of the delegation, CBP is pursuing Service Level Agreements as a way to improve service delivery at GSA LPOEs, as described above.

National Targeting Center (NTC) Consolidation: In FY 2015, CBP requested a total of \$18 million in construction funds to execute Phase II of the NTC Consolidation project. When completed, this consolidation project will result in an improved space that better meets the mission needs of the organization and its people and will improve the NTC's mission effectiveness. In FY 2016, \$4.8 million is required in the Rent PPA to support additional annual rent obligations incurred by the consolidated NTC facility.

Rent Consolidation: Exhibit 3 identifies the permanent transfers into the Rent PPA from the Office of Technology Innovation and Acquisition (OTIA). In FY 2016, a total of \$44,000 will transfer into the Rent PPA to fund rent-related activities.

Full Cost Recovery AQI Fee Increase: CBP anticipates receiving an additional \$29.19 million in AQI user fees in FY 2016 due to the annualization of the AQI fee increase in FY 2015. This increase of \$29.19 million will be used to recoup additional agriculture inspection costs incurred in CBP's S&E appropriation in 2016.

CURRENT SERVICES PROGRAM DESCRIPTION:

Structure of Current Services Program Description

The Inspections, Trade and Travel Facilitation (ITTF) PPA is the primary funding source of CBP's activities to protect the people and economy of the United States by preventing the entry of terrorists and instruments of terror; enforce immigration, agriculture, and trade laws and regulations; facilitate the movement of legitimate people and goods through our borders. Therefore, to facilitate the development of current services descriptions, the PPA groups, functions, and programs are classified in five categories: 1) An overview of the Office of Field Operations (OFO), including descriptions of key functions and operational outputs; 2) description of travel programs; 3) description of the trade program; 4) overview of Office of International Trade and its policy, regulatory, and support functions related to the trade program, and 5) description of select CBP acquisitions that support travel and trade activities.

The ITTF PPA request will enable OFO and OT to meet the mission requirement, as stated in the previous paragraph. More specifically, ITTF will support three sets of critical positions at levels legislatively established or set by policy decisions. In the case of Customs and Border Protection Officers (CBPOs), CBP Agriculture Specialists, and Customs Revenue positions, as defined by the *Homeland Security Act of 2002*, Section 412³, the portion of the requested PPA total for OFO is \$2,941.862 million with 19,580 FTE; the portion of the requested PPA total for OT is \$135.706 million with 877 FTE.

Exhibit 1: Inspections, Trade and Travel Facilitation FY 2016 Funding Request Breakout

Inspections, trade, and travel facilitation at the ports of entry	FY 2016 Positions	FY 2016 Request (\$000)	% of Total
CBP Officer	15,760	\$2,236,065	72.66%
Agriculture Specialist	164	\$22,645	0.74%
Trade and Revenue Positions	2,371	\$335,700	10.91%
Other Salary	2,361	\$211,239	6.86%
Non-Salary	0	\$271,920	8.84%
Total	20,656	3,077,568	100.00%

³ These positions include Import (including National) Specialists, Entry Specialists, Drawback Specialists, International Trade Specialists, Financial Systems Specialists; Fines, Penalties, and Forfeitures Specialists, Customs Auditors and Attorneys (Office of Trade, Regulations and Rulings).

*Office of Field Operations*⁴

OFO is the law enforcement component within CBP responsible for carrying out CBP's complex and demanding border security mission at all POEs. OFO manages the lawful access to our Nation and economy by securing and expediting international trade and travel. OFO operates 328 POEs and 16 Preclearance POEs in Canada, the Caribbean, Ireland, and the United Arab Emirates (Abu Dhabi). CBPO's protect the people and economy of the United States by preventing the entry of terrorists and instruments of terror, while welcoming travelers and facilitating the flow of goods essential to our economy 24 hours a day, 7 days a week, 365 days a year. OFO personnel are the face at the border for all cargo and visitors entering the United States. At POEs, CBP supports the anti-terrorism mission, enforces import and export laws and regulations of the U.S. federal government, and implements immigration policy and programs. CBP Agriculture Specialists also perform agricultural quarantine inspections (AQI) to protect the U.S. from foreign animal and plant pests or diseases and invasive species that could cause serious damage to U.S. crops, livestock, pets, and the environment. CBP at each of the nation's POEs provide statutorily⁵ required immigration, customs, and agricultural inspection services that are imperative to enforcing our laws and expediting legitimate trade and travel. Each day, more than 1 million people arrive at U.S. POEs by land, sea, and air. The portion of resources from this PPA assigned to OFO is \$2,941.862 million with 19,580 FTE.

⁴ OFO's operational programs also include the following PPAs: International Cargo Screening; Customs-Trade Partnership Against Terrorism (C-TPAT); Inspection and Detection Technology; National Targeting Center; and Trusted Traveler Programs.

⁵ 19 U.S.C. § 482 - *Search of Vehicles and Persons* provides CBPOs with the authority to stop, search, and examine any vehicle, beast, or person entering the United States.

Exhibit 2: CBP Office of Field Operations - Field Offices and Service Ports

Since CBP was established in 2003, OFO’s mission requirements have expanded to meet changing security objectives and accommodate fluctuations in global trade and international travel. Since 2008 there have been significant increases in inbound travel and trade volumes. CBP processed nearly 375 million passengers in the land, sea, and air environments in FY 2014, up from 362 million in FY 2013. International air passenger volume increased by over 17 percent between FY 2009 and FY 2014 and is currently at a record level. CBP estimates more

than 115 million international air passenger arrivals in FY 2016 (comprised of 43 percent U.S. citizens and 57 percent foreign nationals). In FY 2014, \$2.46 trillion worth of goods were processed through the POEs. Inbound trade volume grew by more than 24 percent between FY 2010 (\$1.99B) and FY 2014 and is expected to exceed previous records in the air, land, and sea environments in FY 2016. See Exhibits 4 and 5 below. Per the United States Department of Agriculture (USDA) regulations and policies, most agriculture goods require inspection as a condition of entry. With the rapid growth of trade, CBP Agriculture Specialists are faced with the challenge of inspecting agriculture shipments without causing delays to the movement of perishable goods and travelers.

Exhibit 4: Travel Volumes at POEs -Actuals Through FY 2014
 (*Land includes pedestrian, car, bus, rail and truck)

Exhibit 5: Trade Volumes at POEs -Actuals Through FY 2014

To meet these higher demands, OFO has been in the forefront of transforming its travel and trade processes. In April 2013, in coordination with the President’s Fiscal Year 2014 Budget Request, CBP released the first *Resource Optimization at Ports of Entry Report to Congress*. The report introduced CBP’s robust, integrated long-term strategy for improving POE operations. The Resource Optimization Strategy (ROS) has three components: optimize current business processes; utilize the Workload Staffing Model (WSM) to identify staffing requirements; and implement alternative funding strategies to increase revenue sources to support increased staffing as well as improve the adequacy of user fees to more effectively support operations. CBP has made significant progress in the first prong: optimizing our business practices.

As a result of OFO’s ROS, today, over 99 percent of inbound vehicle traffic is processed by 2nd generation License Plate Readers (LPRs), Radio Frequency Identification (RFID) readers, and improved primary processing applications. Over 23 million travelers have obtained RFID-enabled documents to take advantage of the new technologies. In FY 2014, CBP expanded the deployment of a variety of mobile, fixed, and tactical LPR to southwest border crossings and U.S. Border Patrol checkpoints. CBP also expanded the use of kiosks, which automate document queries for land pedestrians to five major crossings, and delivered long overdue technology upgrades to the pedestrian processing environment. For international air travelers, CBP joined in partnership with the private sector to introduce expediting pre-processing kiosks called Automated Passport Control (APC). The APCs also eliminated an additional paper entry form and international travelers continue to embrace CBP trusted traveler programs with

increased membership and usage reducing overall resource requirements. The quantifiable results from these savings are demonstrated throughout this document.

The second prong of the resource optimization strategy is to accurately identify CBP staffing requirements. The President and Congress recognized CBP's staffing needs and provided funding for 2,000 additional CBPOs through FY 2015 in the FY 2014 budget. This was a significant recognition of CBP's critical role in the Nation's economy and security. The first classes of new CBPOs are beginning to deploy (531 CBPOs on-boarded through the end of FY 2014). The 2,000 CBPOs will go a long way towards addressing the current challenges and supporting additional requests for services. However, in accordance with the WSM CBP continues to have a significant gap in meeting required staffing levels for both CBP Officers and Agriculture Specialists.

The third prong of CBP's resource optimization strategy is to implement alternative funding strategies to increase revenue sources to support increased staffing. In FY 2013, the CBP Reimbursable Services Agreement (RSA) program was established under the authorities provided in Section 560 of the *Consolidated and Further Continuing Appropriations Act, 2013*, which authorized the Commissioner to enter into a maximum of five reimbursable services fee agreements for CBP enhanced inspectional services by December 31, 2013. The authority granted by Section 560 complements OFO's larger ROS, as it identifies alternative funding sources to support the rise in requests for additional inspection services at U.S. ports of entry. RSAs are an example of public-private partnerships, which are designed to address the increased demands on CBP's existing resources and enhance services to stakeholders in all of CBP's operational environments. Over the past several years, CBP has realized record increases in passenger and cargo volumes, which have quickly outpaced CBP's ability to sufficiently staff ports of entry.

To determine which locations would be selected for agreements, CBP reviewed applications submitted by private sector and government entities and selected the following stakeholders to participate in the program:

- Dallas/Fort Worth International Airport;
- The City of El Paso, Texas;
- South Texas Assets Consortium;
- Houston Airport System; and
- Miami-Dade County.

Under Section 560 authority, these agreements were to be used to provide new CBP services at new or existing locations; however, in already existing CBP-serviced air facilities, the agreements only provide for overtime services. In addition, Section 560 defined "services" to include only customs and immigration inspection-related processing.

In the program's first 10 months, CBP provided over 15,000 CBP officer assignments and opened primary lanes and booths for an additional 44,000 hours at the request of 560 partners, increasing border processing at the participating air and land ports of entry.

In FY 2014, Congress expanded public-private partnership authorities for CBP in Section 559 of the *Consolidated Appropriations Act of 2014*, allowing CBP to enter into additional RSAs. Although there are no limitations on the number of agreements for the land and sea environments, CBP is limited to five per year over 5 years in the air environment. While Congress continued to limit reimbursement for overtime services only in the air environment, the new authority expanded applicable “services” to include agricultural processing and border security services.

CBP received 25 RSA applications in 2014, of which 16 were selected for new partnerships. These include (by environment):

Air

- Los Angeles World Airports;
- San Francisco International Airport;
- Greater Orlando Aviation Authority;
- McCarran International Airport – Las Vegas; and
- Denver International Airport.

Sea

- Penn Terminals, Inc.;
- Independent Container Line, Ltd.;
- Network Shipping Ltd.;
- Greenwich Terminals LLC;
- Gloucester Terminals LLC;
- Turbana Corporation;
- Interoceanica Agency, Inc.;
- Diamond State Port Corporation (Port of Wilmington, DE);
- Port of Houston Authority; and
- Broward County (Port Everglades).

Land

- South Texas Assets Consortium (STAC)⁶.

CBP is also authorized under Section 559 of the *Consolidated Appropriations Act, 2014*, P.L. 113-76, in collaboration with the U.S. General Services Administration (GSA), to conduct a 5-year pilot program to enter into partnerships with private sector and government entities at ports of entry and to accept certain donations. Since enactment in January 2014, CBP and GSA have worked closely to establish the framework that will be used to implement subsection (f) of Section 559, referred to as the Donation Acceptance Authority.

Pursuant to the Section 559 Donation Acceptance Authority, CBP and GSA are authorized to accept donations of real property, personal property (including monetary donations), and non-personal services from private sector and government entities. Accepted donations may be used

⁶ Converting from 560 Program.

for activities related to the construction, alteration, operations, and maintenance at CBP or GSA-owned U.S. ports of entry. These activities may include, but are not limited to land acquisition, design, and the deployment of equipment and technologies. Partnerships entered into during the pilot program may extend beyond the initial 5-year timeframe.

CBP worked closely with GSA to develop a comprehensive framework for receiving, reviewing, evaluating and scoring, and making final selections of donations proposals submitted by interested parties. The *Section 559 Donation Acceptance Authority Proposal Evaluation Procedures and Criteria Framework* was published on October 1, 2014.

Other alternative sources of funding strategies include seeking the appropriate Congressional Authorizing Committee support for legislative proposals to increase current immigration and customs user fees to recover more of the costs associated with providing services.

The economic data and recent studies demonstrate a clear return on investment from adding staffing resources to POEs. The legislative proposals summarized below would increase CBP staffing resources and could be implemented immediately by Congress to facilitate and secure the international trade and travel that is the lifeblood of our economy. The long-term strategy seeks to expand upon our public-private partnership included by Congress in the FY 2014 Omnibus to fund enhanced CBP services and implement new funding streams from current programs.

User fees are paid by the trade community and traveling public in exchange for CBP inspectional services such as the costs of inspecting passengers, conveyances, and goods for air, land, and sea environments.

User fee revenue can only be used to reimburse certain eligible costs. These costs primarily include the costs of performing CBP inspections and the associated administrative overhead to support those inspections or, in the case of the *Consolidated Omnibus Budget and Reconciliation Act (COBRA)*, inspectional overtime, salaries, benefits, preclearance, and other support costs. Under the current fee structure, the revenue collected from CBP's customs and immigration inspection user fees (COBRA and Immigration User Fee (IUF)) does not fully recover the costs associated with these inspections. Therefore, CBP must rely upon its annual appropriation to fund the portion of the expenses not supported by user fees.

As these fees are set by statute and have not been adjusted in several years, they do not fully recover the costs associated with customs and immigration inspections and each year the "buying power" of these fees diminish. Therefore, without regular fee adjustments, full recovery of costs through fees is not attainable as the costs to maintain staff growth each year. Along with the FY 2016 President's Budget Request release, CBP is proposing legislation for the appropriate Congressional Authorizing Committees to raise the IUF and COBRA fee to generate funds to decrease the shortfall between the costs of CBP's reimbursable customs and immigration inspection activities and reimbursements received. This will allow CBP to hire additional CBPOs, which will result in improved customs and immigration inspection services provided to those who pay this fee when traveling to the United States.

COBRA and Express Consignment Courier Facilities fees

The legislation includes a proposal to the appropriate Congressional Authorizing Committee to increase COBRA fees (statutorily set under the Consolidated Omnibus Budget Reconciliation Act of 1985) and the Express Consignment Courier Facilities (ECCF) fee created under the Trade Act of 2002. COBRA created a series of user fees for air and sea passengers, commercial trucks, railroad cars, private aircraft and vessels, commercial vessels, dutiable mail packages, broker permits, barges and bulk carriers from Canada and Mexico, cruise vessel passengers, and ferry vessel passengers. This proposal would increase the customs inspection fee by \$2 and increase other COBRA fees by a proportional amount. The ECCF fee was created to reimburse CBP for inspection costs related to express consignment and the proposal would increase the fee by \$0.36. The additional revenue raised from these fee increases will allow CBP to recover more costs associated with customs related inspections, and reduce waiting times by supporting the hiring of 900 new CBP officers. The legislation will also include authority to increase fees annually, as needed, to adjust for inflation.

Immigration inspection user fee (IUF) increase and lifting of IUF fee limitation.

Legislation is also proposed to the appropriate Congressional Authorizing Committees to increase the immigration inspection user fee by \$2. The current fees are \$7 for air and commercial vessel passengers and \$3 for partially exempted commercial vessel passengers whose trips originate in Canada, Mexico, the U.S. Territories and adjacent Islands. This fee is paid by passengers and is used to recover some of the costs related to determining the admissibility of passengers entering the US. Specifically, the fees collected support immigration inspections, personnel, the maintenance and updating of systems to track criminal and illegal aliens in areas with high apprehensions, asylum hearings, and the repair and maintenance of equipment.

Also included is a proposal to lift the exemption for passengers traveling from those partially-exempt regions so that the same fee will be applied to all sea passengers. As noted, each sea passenger arriving in the United States is currently charged a \$7 fee if his or her journey originated from a place outside of the United States except for certain regions. Lifting this fee limitation will bring collections more in line with the cost of conducting sea passenger inspections as well as help modernize and create more efficient and effective business processes and systems in the cruise environment. Together, the additional receipts collected from these increases would fund 1,400 new CBP officers, which will reduce wait times at air and sea ports of entry, especially as cruise volumes continue to grow as projected in future years. The legislation will also include authority to increase fees annually, as needed, to adjust for inflation.

	Funding Level Increase (FY 2017)	Number of CBPOs
COBRA		
COBRA Fees	\$ 180,363	850
ECCF	\$ 11,328	50
	\$ 191,691	900
IUF		
Commercial Air/Sea	\$ 224,416	1060
Sea Pax Exemption	\$ 71,410	340
	\$ 295,826	1,400

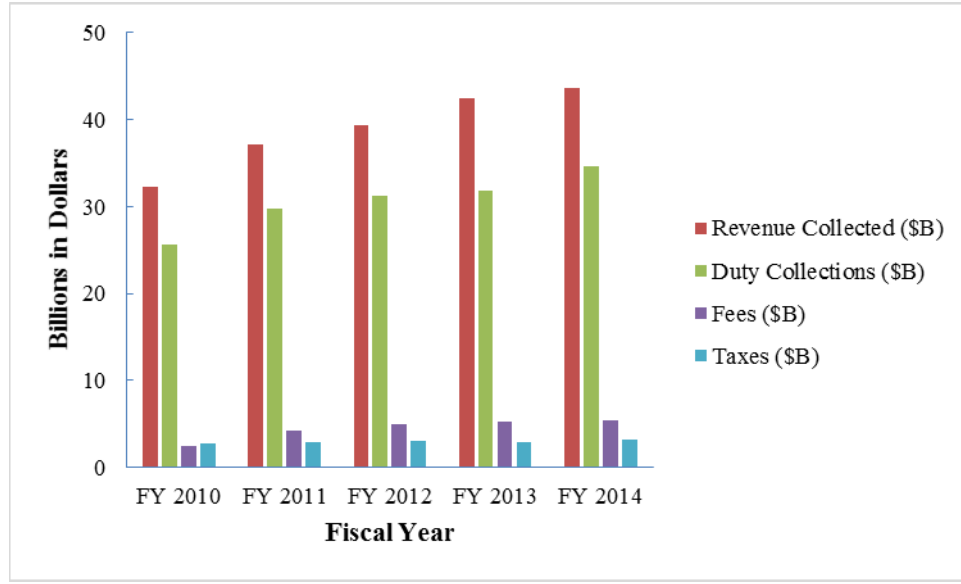

CBP's progress and outstanding requirements are outlined in the *Resource Optimization at Ports of Entry Report to Congress* issued in March 2014. The report indicates the WSM results continue to show a need for additional capability, assuming current process, procedures, technology, and facilities to meet the standards set by statutes, regulation, and CBP policies. Given the current fiscal landscape and challenges with funding additional officers and agriculture specialists, OFO must continue to enhance and expand its current workforce multiplier programs in order to expedite trade and travel more efficiently while ensuring our enforcement mission is secure. As part of the process to optimize resources at POEs, OFO will continue to maximize our current workforce's productivity through the implementation of transformation initiatives. An update to the report is scheduled to be released to Congress with the release of the FY 2016 President's Budget request.

In FY 2016, OFO seeks to preserve frontline staffing, continue passenger process reengineering, sustain and enhance workforce multiplier programs, and continue to implement business transformation initiatives while identifying alternative sources of funding. The travel and trade workload at the POEs is increasing and could introduce additional potential threats that must be mitigated to protect and ensure the United States' security and economic competitiveness.

Economic Implications

CBP is one of the largest revenue sources to the federal government. CBP collected more than \$43 billion in revenue during FY 2014, an increase of 47.8 percent since FY 2009.

Exhibit 6: Revenue Measures

International travel and trade is vital to the U.S. economy. It is one of the largest exports for the United States and generated a travel trade surplus of \$78.1 billion in 2013. International visitors infuse the U.S. economy with funds by purchasing U.S. goods and services. In 2013, international visitors spent \$214.8 billion on U.S. travel and tourism-related services⁷. All of those purchases are considered U.S. exports that ultimately support America's trade balance. From January to June 2014, international visitors spent \$112.8 billion on U.S. travel and tourism-related services, an increase of 6.2 percent over the same period in 2013⁸.

Intellectual property industries account for \$5.06 trillion in value added (increases to GDP), or 34.8 percent of U.S. GDP. Intellectual property rights violations cause financial losses for rights holders and legitimate businesses around the world.

The agriculture industry is the largest employing sector in the U.S. with more than \$1 trillion in economic activity annually. The greatest risks to the success of this industry are exotic plant pests and foreign animal diseases. Currently, invasive species cause an estimated \$136 billion in economic and environmental losses annually. This includes domestic losses in production and quality as well as loss of global export markets and jobs for America's agriculture industry. These pests and diseases could be introduced into the United States through commodities such as meats, animals, animal products, fruits, vegetables, plants, soil, seeds, and plant-based handicrafts. It only takes one vial of potentially deadly, infectious virus, or pathogenic organism to destroy the U.S. forestry, grain and animal (cattle, swine, and poultry) industries with consequential billions of dollars of loss in economic revenues; not to mention, length of time to

⁷ "Key Facts about International Travel and Tourism to the United States", December 2014, U.S. Department of Commerce, International Trade Administration, Industry & Analysis, National Travel and Tourism Office.

recover from such catastrophe. CBP Agriculture Specialists have specialized training needed to perform CBP’s AQI operations and pest exclusion activities to ensure compliance with plant and animal health regulations, and are currently stationed at 174 of our 328 POEs. Additionally, CBPOs are trained to identify agriculture risk and can contact an agriculture program manager at the field office should guidance be needed to mitigate agriculture risk.

Economic Impact of Wait Times at POEs

Airport wait times decreased by 13 percent from FY 2013 to FY 2014 (based on the national average wait time) after experiencing more than a 5 percent increase from FY 2012 to FY 2013. Passenger vehicle wait times continued to decline, from a 1.27 percent decrease from FY 2012 to FY 2013 to a nearly 2 percent decrease from FY 2013 to FY 2014. In addition, the wait times for pedestrians decreased significantly by almost 11 percent from FY 2013 to FY 2014, after an increase of nearly 5 percent from FY 2012 to FY 2013. Conversely, the wait times for commercial vehicles increased 10 percent from FY 2013 to FY 2014 after a decrease of approximately 2 percent from FY 2012 to FY 2013. See Exhibits 7 and 8 below.

Exhibit 7. Airport Wait Time Average (Minutes)

FY 2011	FY 2012	Percent Change	FY 2013	Percent Change	FY 2014	Percent Change
20.43	22.52	10.23%	23.69	5.19%	20.61	-13.00%
% Change from FY 11				15.95%		0.88%

Exhibit 8. Land Border Wait Times Average (Minutes)

	FY 2011	FY 2012	Percent Change	FY 2013	Percent Change	FY 2014	Percent Change
Commercial Vehicle	4.49	4.43	-1.40%	4.34	-1.95%	4.79	10.33%
Pedestrian	8.55	9.26	8.34%	9.71	4.81%	8.65	-10.89%
Personal Vehicle	12.47	12.79	2.59%	12.63	-1.27%	12.39	-1.87%
Commercial Vehicle Percent Change from FY 11					-3.32%		6.67%
Pedestrian Percent Change from FY 11					13.55%		1.18%
Personal Vehicle Percent Change from FY 11					1.29%		-0.60%

Recent research shows that there is a clear economic impact from reducing wait times at POEs. Long wait times at the POEs can cause delays and travel time uncertainty for automobiles, trucks, pedestrians, and air passengers. The delays can add to supply chain and transportation costs for commercial companies and also serve as a deterrent to trade and cross border travel. As a result, wait time reductions can be a significant economic stimulus for trade and travel.

The extent to which wait times affect the local and national economy was most recently studied by the National Center for Risk and Economic Analysis of Terrorism Events (CREATE), a DHS

Center of Excellence. CREATE issued a report in February 2013 titled “The Impact on the U.S. Economy of Changes in Wait Times at Ports of Entry.”⁹ Their analysis found that an increase or decrease in staffing at the POEs has an impact on wait times and, therefore, on the U.S. economy. The impacts begin with changes in tourist and business travel expenditures and with changes in freight costs. These changes, in turn, translate into ripple or multiplier effects in port regions and the overall U.S. economy.

In summary, CREATE found that the impacts on the U.S. economy of adding 33 CBPOs (their baseline) and the resulting reduction to wait times result in a \$65.8 million increase in Gross Domestic Product (GDP), \$21.2 million in opportunity cost savings, and 1,094 annual jobs added.

CREATE supplemented this analysis with their most recent report entitled “Analysis of Primary Inspection Wait Times at U.S. Ports of Entry” published on March 9, 2014. This study found the impacts on the U.S. economy of adding 14 CBP officers (one each at 14 major airport terminals) are a potential \$11.8 million increase in GDP and 82 annual jobs added. The value of wait time saved to existing passengers could be as much as \$9 million.

Securing and Expediting Travel

⁹ “The Impact on the U.S. Economy of Changes in Wait Times at Ports of Entry,” National Center for Risk and Economic Analysis of Terrorism Events (CREATE), University of Southern California, released April 4, 2013.

CBP recognizes our key role in ensuring the growth of our economy and the implications of our complex and challenging mission to balance enforcement priorities with travel and trade facilitation. CBP is equally as cognizant of the economic impact of wait times and the opportunities to improve this area of CBP processing. Therefore, one of CBP's key initiatives for Securing and Expediting Travel in FY 2016, is the support of the President's efforts to increase travel and tourism in the United States – helping local businesses and growing the economy for everyone. The President announced the National Travel and Tourism Strategy in 2012 and set an ambitious goal of attracting and welcoming 100 million international visitors annually by the end of 2021. In May 2014, the President outlined new steps to improve the entry process and welcome new international travelers. CBP plays a key role in this strategy and has positioned the agency to achieve the President's primary objectives. CBP will achieve these objectives while simultaneously ensuring the safety and security of the United States and international traveler. The President's key objectives are:

1. Improve and streamline the entry process, and
2. Increase service levels for stakeholders, which includes a reduction in wait times.

Improve and Streamline the Entry Process

The President's objective to improve and streamline the entry process and CBP's Resource Optimization Strategy to optimize business processes is CBP's first key objective for FY 2016.

First and foremost, while CBP supports the objectives of the National Travel and Tourism Strategy and CBP's own Resource Optimization Strategy, CBP is always mindful of our primary mission to prevent the entry of those travelers who wish to harm the United States and enforce the import and export laws of the United States.

The Multi-Layered Approach

CBP's "multi-layered approach" to security means that security screening and enforcement occur at multiple points in the entry process, beginning before people and goods arrive at POEs and continuing after people and goods have been admitted into the United States. CBP attempts to target high-risk flows as early as possible in the process but maintains our ability to conduct enforcement activities at different stages of the entry process, allowing multiple opportunities for CBPOs to interdict those goods and people seeking to disrupt the flow of legitimate trade and travel. This multi-layered approach provides for greater security in avoiding a potential single point of failure.

Exhibit 9: Key Programs Supporting the National Travel and Tourism Strategy and Resource Optimization Strategy

SECURING AND EXPEDITING TRAVEL	
Pre-Arrival Initiatives	
National Targeting Center	Completes vetting of passengers and cargo prior to arrival in the United States.
Immigration Advisory Program (IAP)	Identify national security risk entries and issues no board recommendations to airline carriers abroad.
Preclearance	Inspect U.S. bound travelers in overseas locations relieving congestion at U.S. gateway airports and extending U.S. borders outward.
Entry Processing Initiatives	
Trusted Traveler Programs	Enrollment and advanced vetting in a program that authorizes low-risk travelers expedited services (kiosks and expedited lanes). This includes Global Entry, SENTRI, NEXUS, and FAST.
Automated Passport Control (APC) Program	This program leverages stakeholder partnerships to implement the use of a kiosk for travelers to provide arrival data thus significantly decreasing their inspection time.
Forms Automation	The initiatives include the automation of government forms to improve the accuracy of CBP data, reduce administrative costs and the burden on CBP resources and the traveling public.
Entry/Exit Transformation Office	Enhance integrity of the immigration system by providing assurance of identity on departure matched with arrival.
Arrival and Departure Information System (ADIS)	Contains biographic data on foreign nationals traveling to the U.S., and primarily supports the missions of Entry/Exit reconciliation and admissibility associated with visa/non-visa overstays.
CBP Mobile Program	An enterprise focused program with the strategic vision to add mobility to mission critical CBP operations and processes through the deployment of appropriate real-time technology
Land Border Integration Initiatives	These initiatives include the Western Hemisphere Travel Initiative (WHTI), increase use of RFID documents to enable vehicular and pedestrian Ready Lanes and Active Lane Management

SECURING AND EXPEDITING TRAVEL	
	techniques to expedite travel and minimize the use of CBP resources.

Improving and Streamlining the Entry Process by Managing Risk Prior to Arrival

The National Targeting Center

The National Targeting Center (NTC), in particular, screens relevant traveler and cargo information prior to their departure. This approach is a key part of CBP’s layered security strategy to protect the homeland by extending U.S. borders outward to identify and mitigate threats, interdict possible terrorists, other *mala fide* travelers, and suspect cargo before they can board or be laden on a conveyance destined for the United States. To learn more about the NTC’s pre-departure screen process, please review the section entitled “National Targeting Center.”

Immigration Advisory Program/Joint Security Program

The Immigration Advisory Program (IAP) was created by CBP in 2004 to prevent terrorists and high-risk or improperly-documented travelers from boarding commercial aircraft destined to the United States.

Building upon the IAP concept, CBP launched the Joint Security Program (JSP) in 2009, partnering with host country law enforcement to identify air passengers linked to terrorism, narcotics, weapons, undocumented currency, and human smuggling. Both the IAP and JSP coordinate closely with air carriers, other U. S. government agencies, and foreign partners.

The IAP focuses upon the screening of U.S.-bound passengers, coordinating with air carriers to issue no-board recommendations for high-risk or improperly-documented travelers.

JSP officers work in tandem with host government law enforcement to jointly engage targeted travelers arriving into and departing from the host country (U.S.-bound and foreign-to-foreign commercial flights).

Exhibit 10: IAP and JSP Operational Locations

With advance support from the National Targeting Center-Passenger (NTC-P), IAP and JSP officers are uniquely positioned to identify watch listed travelers and to assess the potential risk of non-watch listed individuals detected through roving, scenario- and intelligence-based targeting.

Since initiating operations in 2004, IAP and JSP officers have issued 23,793 no-board recommendations for high-risk and improperly-documented travelers. Each no-board recommendation saves CBP expenses associated with the additional processing required for improperly documented or inadmissible passengers at a U.S. POE and in many cases prevents a person who may be a risk to national security from boarding a U.S. bound flight. The categories of JSP successes show disruption to the flow of high-risk passengers and contraband likely headed to the U.S. and the interception of the proceeds of illicit activity and organized crime.

Exhibit 11: IAP/JSP Successes¹⁰

IAP/JSP Successes		
Action	FY 2015 YTD	FY 2004 - FY 2014
U.S. Bound No-Boards	5,764	23,217
Improper Traveler Documentation	195	15,753
Fraudulent Documents	3	436
Potential High-Risk Traveler Interviews	365	6,324
Alien Smugglers	2	41
Terrorist Screening Database Matches	11	586
TSA No-Fly Matches	0	77

Exhibit 12: JSP Successes from September 2009 through FY 2015 YTD¹¹

	JSP Mexico		JSP Panama	
	FY 2015 YTD	FY 2009 - FY 2014	FY 2015 YTD	FY 2011 - FY 2014
Fraudulent Documents (U.S.-bound)	0	25	0	20
Fraudulent Documents (non-U.S.-bound)	6	279	19	426
Fugitives Intercepted	5	293	4	347
Narcotics Violations	0	12	5	66
Illicit Currency	5	4	0	46

Cost Avoidance/Efficiencies/Workforce Multiplier Impact

The cost avoidance associated with IAP and JSP no-board recommendations versus adverse action processing costs at the POEs is approximately \$2,500 per admissibility action. As of November 26, 2014, IAP/JSP no-board recommendations have enabled airlines to avoid \$39.25 million in potential fines (calculated at \$1,650 per passenger). These recommendations have

¹⁰ Exhibit includes combined IAP/JSP statistics for U.S. bound flights. The FY 2015 data is current as of November 26, 2014.

¹¹ Exhibit includes statistics for JSP Mexico and Panama (joint engagement with host country) on non U.S. bound flights.

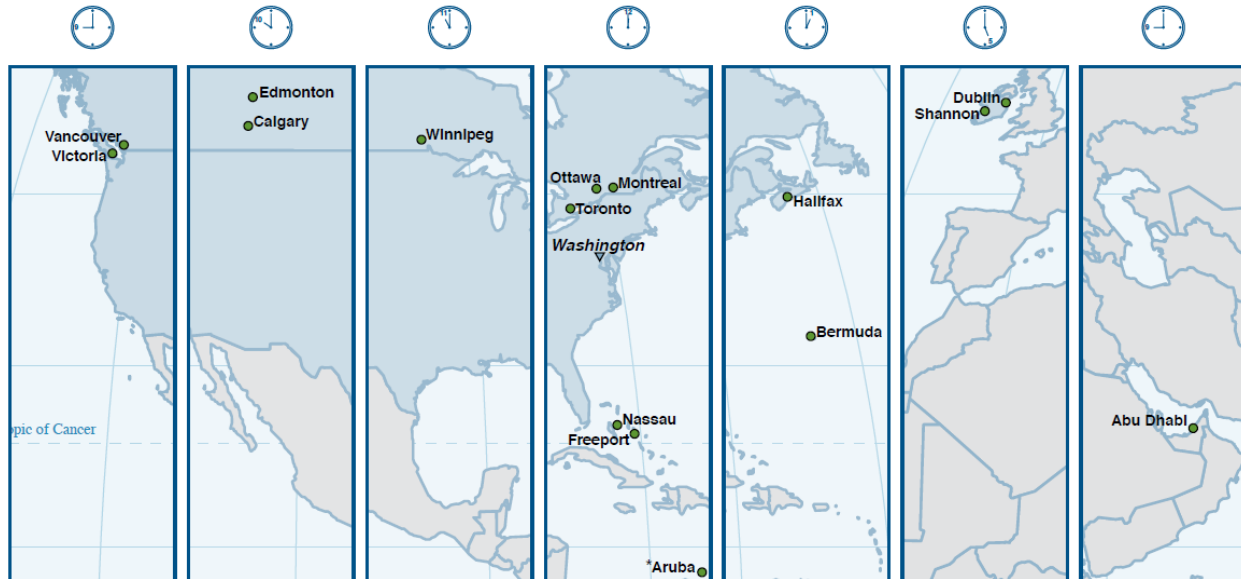

resulted in estimated cost avoidance to CBP of \$46.05 million in costs associated with the detention and removal of inadmissible passengers (calculated at \$2,499.34 per passenger). Combined cost avoidance to carriers and CBP in FY 2014 exceeded \$6.1 million.

Preclearance

Preclearance relieves congestion at U.S. “gateway” airports, reduces airline delays, and offers a ‘domestic-style arrival’ at U.S. airports which provides a more efficient transfer for travelers. Preclearance improves CBP’s ability to protect the American homeland by extending our borders and preventing terrorists, terrorist instruments, and other national security threats from gaining access to the United States. Additionally, Preclearance protects U.S. agricultural infrastructure from foreign pests, disease, and global outbreaks; fosters cooperation with foreign (host) authorities in diplomatic, law enforcement, and international security issues; and supports economic interests by improving travel and commerce with the United States.

Preclearance currently provides for the inspection and clearance of commercial air passengers prior to departure from sixteen locations in six foreign countries and seven time zones in support of CBP’s extended border strategy. Preclearance locations include Aruba; Bermuda; Freeport and Nassau, Bahamas; Calgary, Edmonton, Halifax, Montreal, Ottawa, Toronto, Victoria (pre-inspection only), Vancouver, and Winnipeg, Canada; and Dublin and Shannon, Ireland. Preclearance began operations in Abu Dhabi, United Arab Emirates, on January 24, 2014. This is the first expansion of preclearance since 2006.

Exhibit 13: FY 2014 International Footprint – Preclearance

*Aruba does not observe Daylight Savings Time. From the last Sunday in October to the first Sunday in April, Aruba is 1 hour ahead of Washington, D.C.

Inspections conducted in preclearance locations are the legal equivalent to those conducted domestically per 8 CFR 235.5(b). Travelers inspected and cleared overseas do not have to undergo a second CBP inspection upon arrival in the U.S. All mission requirements are completed at the Preclearance POE prior to departure, including customs, immigration, and agriculture inspections. In FY 2014, Preclearance processed 17.43 million travelers at international Preclearance locations.

Exhibit 14: Preclearance Travelers Processed FY 2011 – FY 2014 (in millions)¹²

Cost Avoidance/Efficiencies/Workforce Multiplier Effect

Preclearance locations do not assign resources for cargo, trade, or outbound enforcement responsibilities. Because CBPOs at preclearance locations are dedicated primarily to air passenger processing only, they process, proportionately speaking, approximately 60 percent more passengers than their stateside counterparts. In addition, the average cost to inspect and clear a passenger prior to entering the U.S. is approximately 30 percent less than the cost to perform the same inspection at domestic airports.

Preclearance locations add to CBP's layered enforcement posture while reducing operational costs. Overall, Preclearance locations produce a higher annual average rate of inadmissible interceptions than U.S. POEs. These passenger interceptions result in cost avoidance for the U.S. government in terms of detention, processing, and repatriation, as well as support costs generally associated with domestic apprehensions. The U.S. government avoided approximately \$26.7 million in detention costs that would have been incurred based on 10,674 interceptions of persons inadmissible under U.S. immigration laws that were made at Preclearance locations in FY 2014.

¹² The count includes airline, ferry, pleasure boat, bus, truck and personal vehicle passengers as well as pedestrians.

Preclearance locations serve an integral part in CBP's overall mission by supporting programs which facilitate the entry of legitimate travelers. Preclearance currently staffs Global Entry Enrollment centers in: Calgary, Edmonton, Halifax, Montreal, Ottawa, Toronto, Winnipeg, and Vancouver (two locations).

Preclearance locations are also in the forefront of CBP's business optimization efforts to utilize technology for travel facilitation. The first Automated Passport Control Kiosk (APC) was piloted in Vancouver Preclearance on April 17, 2013. The program has since been expanded to include Abu Dhabi, Aruba, Dublin, Edmonton, Montreal, Nassau, and Toronto, and is expected to be implemented in the majority of its sixteen locations by the end of 2015.

The Department of Homeland Security and CBP assert that the calculated expansion of preclearance operations in strategic locations will further strengthen our ability to identify terrorists, criminals, and other national security threats prior to encountering them on U.S. soil. CBP has identified the Middle East, Europe, and Asia as three key geographic regions and targeted specific locations where CBP believes the expansion of preclearance will effectively confront the evolving aviation security threats while enhancing passenger facilitation. These decisive steps serve to further national security objectives, foster foreign relations, and enrich global economic benefits from overall increased efficiency.

On September 22, 2014, CBP announced a process to evaluate and prioritize potential new preclearance locations. The FY 2015 Preclearance Expansion Guidance document outlines the minimum requirements to assess the feasibility of establishing preclearance at a new location. The primary factors for consideration in determining future locations are: national security, trade facilitation, likelihood of executing a reimbursable agreement for services, the presence of U.S. carriers, ability to meet and sustain Transportation Security Administration (TSA) aviation security standards, and the appropriate support staff at designated locations. Based on these criteria, CBP is targeting future expansion efforts to key locations in Asia, Europe, and the Middle East. During December 2014 through January 2015, DHS technical teams conducted site visits and evaluations of applicant airports to prioritize what locations are more readily suited for operations. Following identification of locations within the FY 2015 preclearance expansion time period, formal negotiations will occur between the United States and the host government(s). CBP intends to commence operations at each respective locations identified for preclearance within 24-36 months following formalized negotiations and agreement with host countries.

Building upon the success of existing preclearance operations and the strategic path of expansion, CBP has a goal of pre-clearing thirty-three percent (33 percent) of all U.S.-bound air travelers by 2024. This goal is based on current expectations of foreign airports' interest in and suitability for preclearance expansion, and expectations of CBP management capability to stand up several new preclearance locations annually over the next decade.

CBP Preclearance Operations expect to experience growth in passenger volumes consistent with industry annual growth of 3-4 percent.

Pre-Travel Authorization – Electronic System for Travel Authorization (ESTA)

ESTA is a program that allows DHS to pre-authorize travelers to the United States who are eligible to travel under the Visa Waiver Program. Nationals of 38 eligible countries complete an online application seeking authorization to travel to the United States. This increases security and reduces wait times resulting in significant cost avoidance and reduced data entry. The Electronic System for Travel Authorization (ESTA) Program also realized continued savings in CBPO resources in FY 2014. A total of 50,926 ESTA applications were denied in FY 2014, which is an increase of 22 percent (9,233) from FY 2013 (41,693). As a result, CBP avoided the costs associated with conducting lengthy secondary inspections or process refusals of admission for these individuals. The increased denials resulted in the marginal increase of 18,500 inspectional hours from FY 2013, which is equivalent to an additional 15 CBPOs and \$2.0 million in salaries and expenses in FY 2014. In FY 2015, as part of DHS' ongoing efforts and commitment to protecting the U.S. from threats to the safety and security of the U.S., ESTA made enhancements to the program. New data elements and updated eligibility questions to ESTA bolster CBP's ability to identify potential security threats along with clarify elements of the application process. For additional information on the ESTA Program, please review the section entitled, "Electronic System for Travel Authorization Fee."

Improving and Streamlining the Entry Process through Transformation at the Ports of Entry Expansion of Benefits and Locations of Trusted Traveler/Trade Programs

These programs facilitate the entry process for low risk travelers, while helping CBP redirect resources to screening other high risk, unknown travelers and enforcement. These Trusted Traveler Programs include NEXUS, Secure Electronic Network for Traveler's Rapid Inspection (SENTRI), and Global Entry (GE). The NEXUS and SENTRI programs process travelers in vehicles 2 – 3 times faster than vehicles in general lanes and GE members are removed from general queuing lanes altogether. In FY 2014, the Trusted Traveler Programs saved the equivalent of 20 CBPOs (aggregate to the equivalent savings of 211 CBPOs in FY 2012 and FY 2013). This is a cost avoidance of \$2.4 million in salaries and benefits.

Automated Passport Control

One of CBP's key transformative initiatives in the airport environment for FY 2014 was the APC kiosks. It also highlights an innovative and creative partnership with industry as the kiosks are purchased and deployed by airports in consultation with CBP. The goal of the self-service kiosks in a CBP environment is to allow a traveler or family group to voluntarily pre-position their biographic information prior to speaking with a CBP officer. The CBP officer is then able to focus more on identity verification, admissibility, and questioning to determine purpose and intent of travel. This process will ultimately reduce the traveler's time spent with the CBP officer and reduce processing times while maintaining and even improving security and enforcement by allowing the officer to focus on the interview rather than administrative tasks.

In FY 2014, more than 19 million travelers at 22 different international airports (Atlanta, Austin, Boston, Charlotte, Chicago O'Hare, Chicago Midway, Dallas, Detroit, Fort Lauderdale, Houston, New York JFK, Los Angeles, Miami, Minneapolis, Montreal, Newark, Orlando, Philadelphia, Seattle, Tampa, Toronto, and Vancouver) used the APC kiosks of which 80 percent were confirmed and received facilitated processing. CBP has determined that APCs have reduced CBP officer inspection time by approximately half and the users' wait has been reduced to under 10 minutes in most cases. The wait time for the travelers in the general queue has also been decreased by up to 40 percent at some airports. Based on this analysis and feedback from stakeholders, the APC pilot has been permanently implemented and aggressively expanded. The accelerated implementation of APC at the international airports eliminated 130,000 inspectional hours of CBPOs processing the administrative portions of the passenger inspection (e.g., systems queries, fingerprints, and pictures). This savings resulted in the realignment of 110 CBPOs to conduct primary processing of travelers in the general queue.

CBP is not only expanding the locations where travelers can access the kiosks, CBP is expanding the number of travelers eligible to use the kiosks. In Phase I and II, the APCs were only available to US Citizens and Canadian visitors. In January 2014, CBP implemented Phase III, which extended the availability of APCs for visa waiver passengers. The following airports have extended APCs to visa waiver passengers: Atlanta, Boston, Charlotte, Chicago O'Hare, Dallas Fort Worth, Detroit, Fort Lauderdale, Los Angeles, Miami, New York JFK (Terminal 1 and 4), Orlando, Phoenix, Seattle, Tampa and Vancouver International Airport.

CBP is currently developing Phase IV which extends availability to international visitors who are traveling on pleasure or business visas. This capability is expected to be tested in 2015. Dallas Fort Worth and Vancouver are currently testing additional functionality to accommodate U.S. Lawful Permanent Residents. Although not implemented, 10 additional airports are actively working with vendors for implementation in FY 2015 (Abu Dhabi, Aruba, Denver, Dublin, Edmonton, Las Vegas, New York JFK (Terminal 5 and 8), San Diego, San Francisco and Washington Dulles are currently working with vendors and CBP to complete APC implementation.)

Forms Automation

This automation improves the accuracy of data entry while creating a substantial cost avoidance and increasing efficiencies (e.g. I-94, General Declaration, Customs Declaration, I-418). In September 2013, the AWT Real Time system began hosting the Paperless General Declaration (Gen Dec) system, which allows participating carriers to be exempt from the requirement to submit a paper CF-7507 (Aircraft General Declaration) and form I-92 upon arrival at US POEs. In January 2014, the program was expanded to include all international departures. This BTI has automated 70 percent of all commercial airline arrivals and departures, resulting in significant time savings for both CBP and participating carriers. It takes an average of 90 seconds for a CBPO to process a paper general declaration which is required for each arrival and departure, and less than 5 seconds to process an arrival or departure in the Paperless Gen Dec system. In 2014, CBP processed an average of 2,400 paperless general declarations each day through the Airport Management Console- Paperless Gen Dec program. This program saved over 20,000 inspection hours with an equivalent savings of 17 CBPOs and \$2,044,522.

CBP continues to reduce the burden of paperwork on the traveling public by eliminating an additional paper form, Form I-94 in the air passenger environment, at the end of FY 2013. Although this form was automated in the sea passenger environment in FY 2012, it continued to be required upon entry into international airports for non-immigrant visitors not traveling from a Visa Waiver country until system modification were complete in FY 2013. The data collected from the Form I-94s have been used for longer than 20 years as a key source of information regarding immigration status. The automation of the Form I-94 at the airports has significantly improved the accuracy and timeliness of the data because the I-94 is created in real time using the same information the officer uses for the primary inspection. The elimination of the paper form I-94 at airports decreased the time spent processing visitors from non-visa waiver countries arriving on commercial airlines by an average of 8.5 seconds when comparing the same time frame in calendar year 2013. The overall savings is the equivalent of 73 CBPOs which is an incremental savings of 56 CBPOs in FY 2014. In addition to the CBPO savings, CBP avoids an annual cost of \$12 million – \$15 million in data entry costs to process the forms.

Finally, CBP has now fully automated the I-418 which is a paper passenger and crew manifest or list for commercial vessels. CBP successfully created a geospatial view of all commercial vessels worldwide, to include high-risk vessels, via the use of Google Earth mapping tools through the Vessel Risk List and Tracker project which enables this forms automation. The development of the project is a collaborative effort involving the NTC, U.S. Coast Guard, Agriculture Programs and Trade Liaison (APTL), Cargo and Conveyance Security (CCS), Admissibility and Passenger Programs (APP) and the CBP Information and Technology, Targeting & Analysis Systems Program Directorate. This project has supported the automation of the I-418 and allows CBP officers to efficiently record passenger/crew inspection and admissibility results without having to process and store actual paperwork. It is projected that the electronic I-418 functionality will save CBP approximately 140,000 inspectional hours which is the equivalent to 118 CBPOs in FY 2014 which is the first full year of implementation. OFO will continue efforts to automate other forms in FY 2015 and in FY 2016.

Entry/Exit Transformation Office (EXT)

The CBP entry/exit transformation office was established as part of the *Department of Defense, Military Construction and Veterans Affairs, and Full-Year Continuing Appropriations Act, 2013* (includes the *DHS 2013 Appropriations Act*), which transferred funding and personnel from the Office of Biometric Identity Management (OBIM) to CBP. The congressional intent of this transfer was to centralize the entry/exit mission at one location rather than being dispersed among various components. The Act provided \$12,284,000 to the Office of Field Operations to support salaries and expenses associated with entry/exit policy and operations.

The mission of EXT is to enhance the integrity of the immigration system by providing assurance of identity on foreign nationals arriving and departing the United States. The program goals are to:

1. Enhance the existing biographic entry/exit system by increasing and improving the availability of exit data for decision-makers and for matching to entry data;
2. Identify and implement operational solutions of biometric technologies to support a biometric entry/exit program in the air and sea environments; and
3. In partnership with other DHS components, identify and sanction those who violate immigration laws, including overstaying in the United States.

Enhanced screening through improved biographic information (Arrival and Departure Information System (ADIS))

In FY 2014, operational control of the ADIS program was transferred from the Office of Biometric Identity Management (OBIM) to CBP¹³. ADIS was initially deployed October 1, 2002, to implement a fully automated entry and exit control system for every alien arriving or departing the United States by air or sea under the Visa Waiver Program (VWP). ADIS contains biographic data on foreign nationals traveling to the U.S. and primarily supports the missions of Entry/Exit reconciliation and admissibility associated with visa/non-visa overstays. This system processes over 2.6 million transactions per day to create person-centric records that consolidate travel history and alterations to immigration status associated with admissibility. ADIS is the only federal government system that provides a comprehensive record of non-U.S. citizens' immigration status, including information identifying those that stayed longer than their allotted time or left the country after staying longer than their allotted time. Visa overstay leads are referred to U.S. Immigration and Customs Enforcement (ICE) for action. In addition to serving CBP and ICE, ADIS shares data with U.S. Citizenship and Immigration Services (USCIS), the Transportation Security Agency (TSA), the Department of State, and various Intelligence Community agencies.

Significant improvements are planned for the ADIS system during FY 2016. This includes making system improvements to the ADIS interface with ICE used for processing visa overstay leads, with the effect that the current 14-17 day lead processing cycle would shorten to an anticipated 1-3 days. Other improvements are expected to include improving interfaces for

¹³ As per the *2014 Consolidated Appropriations Act*.

sharing data with TSA's Alien Flight School Program (AFSP), USCIS' Computer Linked Adjudication Information Management System (CLAIMS 3), and ICE's Student Entry Visa Information System (SEVIS). Further changes are expected to include implementing improved ADIS matching algorithms based on findings from ADIS matching studies performed by Lawrence Livermore National Laboratory.

Further accomplishments expected to be initiated but not completed in 2016 include the creation of a reporting environment outside of the ADIS production system to facilitate more expedited and efficient report creation, improved connectivity means for information sharing between ADIS and the Intelligence Community, and further improvements to the ADIS matching engine resulting in an even more accurate ability to match ADIS data.

Cost Avoidance/Efficiencies/Workforce Multiplier Impact

EXT enables DHS and CBP to automate manual processes associated with entry and exit operations, as well as enhance screening through transformative biometrics.

1. Automate manual processes: DHS spends significant funding each year manually matching entry and exit records on instances in which biographic information either does not match or there is no exit data available, resulting in an apparent overstay. As EXT moves ahead with its programs to increase the exit data available and improve the data's accuracy, manual activities will be significantly reduced. Each instance of an apparent overstay costs \$40 to manually review. Based on Phase 1 of the US/Canada land border entry/exit program, approximately 200,000 apparent overstays would be eliminated providing an estimated cost avoidance of \$8 million annually. Document Validation is expected to have a similar effect in terms of matching entry and exit records in an automated fashion that previously required manual review.
2. Enhanced screening through transformative biometrics: Emerging biometric technologies deployed for biometric exit could have a transformative impact on the entry process by facilitating travelers that are known to CBP without compromising security. Emerging technologies such as facial recognition and iris scans are significantly faster than fingerprint technology and provide flexibility in implementation options. While CBP would not replace fingerprint collection entirely due to the security benefits provided, using additional biometrics for subsequent verification of travelers could save significant time. CBP is working with the DHS Science and Technology Directorate through FY 2015 to test emerging biometric technologies in a closed environment. Additionally, CBP will field test at select ports of entry a biometric exit capability for the pedestrian land environment and a mobile biometric exit capability for the air environment.

CBP Mobile

The CBP Mobile Program is an enterprise focused program with the strategic vision to add "mobility" to mission critical CBP operations and processes through the deployment of appropriate real-time technology, removing the constraints of time and location facing all CBP front-line personnel in the performance of their duties and the execution of CBP's

mission. During FY 2014, the CBP Mobile program procured 4,269 devices (2,769 more than the level identified in the 2014 budget). During FY 2014, 1,250 devices were provided to the CBP Field Operations Academy and the remaining devices will be deployed during FY 2015. In FY 2014, the current Enforcement Link Mobile Operations (ELMO) program resulted in savings equivalent to 18 CBPOs and over 16,000 inspectional hours. After these devices have been deployed for a sufficient length of time that allows the users to integrate the devices into their daily work routine, the program will employ an independent evaluator to review the impact of the mobile devices on CBP operations, quantify any benefits realized, and identify areas for improvement.

Moving forward, OFO will continue to lead the CBP Mobile Program with the goal to provide mobile capabilities to all Officers, Agents, and Specialists that is a simple “point and click” or “holster-reach” away. The following objectives will support efforts to establish a mobile workforce:

- Transform the processing of travelers, cargo and conveyances entering or exiting the United States as well as at overseas locations and roving operations at transportation nodes in the interior.
- Support the comprehensive land, air and sea border integration strategy, linking inbound, checkpoint and outbound operations.
- Support biographic and biometric capture and queries in real-time and record results.
- Incorporate the advancements in mobile technologies to support the full range of work locations and processing environments utilizing innovative mobile technologies.
- Identify and eliminate emerging operational threats arriving and departing the United States via air, land and sea.
- Rapidly provide the necessary law enforcement information to front-line personnel for informed decision-making wherever required.

The ELMO software suite consists of device agnostic applications deployed on the appropriate devices which enable the successful accomplishment of OFO, Office of Border Patrol (OBP) and Office of Air and Marine (OAM) mission critical operational scenarios. The table below provides the current and planned mobile capability deployments.

Exhibit 15: Notable Improvements to CBP Operations from CBP Mobile

ELMO Software Suite	2014	2015	2016
Land			
ELMOp Border	- Provided 4 mobile jumpkits and 9 ELMOp for clearance of rail passengers and crew in Seattle, Washington.	- Upgrade smart phone capability - Develop Android platform	- Continue to enhance ELMO mobile application suite
ELMOrf	- Deployed to 35 northern border locations	- Pilot capability, 20 devices, with Border Patrol - Expand northern border capability, 144 devices - Upgrade smart phone capability - Develop Android platform	- Maintain 2015 capability - Expand capability to more locations
Land Border Mobile Client	- Deployed to 9 northern border locations - Deployed to 2 ferry locations - Expanded wireless infrastructure to the 3 largest land ports - Deployed enhanced application functionality	- Continue northern border expansion - Integrate mobile capability with fixed technology where applicable - Evaluate processes and technologies which create efficiencies in operations	- Maintain 2015 deployment capability - Assess authentication performance - Assess applicability in additional operational environments - Explore biometric capabilities
E3	- Performed Windows security upgrade - Deployed wireless, mobile, biometric capability to 6 Border Patrol sectors	- Continue to expand E3 application - Plan for additional biometric modalities - Deploy 5 devices - Evaluate deployed capabilities and devices	- Maintain 2015 capability - Continue to expand E3 application capabilities - Pilot additional biometric modalities
ELMOp Mobile Primary	- Deployed enhanced ELMOp Mobile Primary Processing to enable traveler processing in remote locations where a fixed CBP processing terminal is not available or feasible	- Deploy 100 devices and evaluate Mobile Primary application in additional operational environments - Develop Android platform	- Maintain 2015 capability - Deploy to additional locations
Air			
ELMOrf	- Identified requirements for capability	- Pilot capability in airport passenger environment	Based on results: - Enhance application functionality - Expand to additional airports
Biometric Exit Mobile (BE-Mobile)	- Procured smart phone and biometric scanning capability to support application deployment	- Implement BE Mobile air experiment, 25 devices - Evaluate capability for further deployment	Based on results: - Enhance application functionality - Expand to additional

ELMO Software Suite	2014	2015	2016
			airports
Ebola Screening Support		- Deploy mobile capability to designated Ebola screening airports - Deployed 20 devices in October 2014	- Expand to additional airports as operationally necessary
Airport Wireless Capability	- Awarded contract for wireless infrastructure for 4 preclearance airports, 19 international arrival airports, and 3 land border locations	- Deploy wireless infrastructure	- Continue to expand wireless infrastructure to support mobile capability
ELMOp	- Procured mobile capability for 16 Preclearance locations	- Deploy mobile capability, 74 devices	- Maintain 2015 capability - Transition to Android platform
ELMOp IAP	-Piloted Android smartphone capability	- Deploy 55 smartphones	- Maintain 2015 capability - Expand to additional airports - Enhance application functionality
Sea			
ELMOp	- Deployed mobile jumpkits, tablets and ELMOp for cruise ship processing - Procured handheld mobile inspection processing capability via a ruggedized tablet	- Continue to expand capability	- Maintain 2015 deployment capability
CERTS Mobile	- Procured mobile devices to support APTL operations	- Deploy mobile capability 1:1 for 2,500 agriculture specialists	- Maintain 2015 deployment capability
Automated Targeting Systems (ATS)-N	- Procured mobile devices to support electronic crewmember verification	- Deploy mobile capability, 33 devices, to support electronic crewmember verification	- Maintain 2015 capability - Continue expansion of capability

Land Border Integration (LBI)

CBP's Land Border Integration (LBI) is the successor to the Western Hemisphere Travel Initiative (WHTI). WHTI, which remains a component within the LBI portfolio, is the joint DOS and DHS initiative that implemented a key 9/11 Commission recommendation and the statutory mandates of the *Intelligence Reform and Terrorism Prevention Act of 2004* (P.L. 108-458). WHTI established document requirements for travelers entering the United States who were previously exempt, including citizens of the United States and Canada. The WHTI requirements for air travelers went into effect in January 2007 and compliance continues to be high -- over 99 percent for U.S. and Canadian citizens. WHTI secure document requirements were successfully implemented on June 1, 2009, at all of the Nation's POEs.

Since the implementation of the statutory initiative, the WHTI program remains vital to CBP’s efforts to achieve a 100 percent query rate against the national security and law enforcement watch lists for all travelers. These queries add a layer of security by providing CBP the ability to perform

FY 2014 WHTI Query Rates (9/30/14)	
Northern Border	98.6%
Southern Border	91.6%
National Average	95.2%

criminal wants/warrants (NCIC) checks, including additions to the terrorist watch list, and identifying travelers who may be a threat to national security. Today, over 99 percent of all inbound traffic is processed by 2nd generation license plate readers (LPRs), Radio Frequency Identification (RFID) readers, and improved processing applications. WHTI technology combined with the increase of RFID enabled documents automated most law enforcement queries – simultaneously reducing inspection time and adding a layer of security through authentication. Today, CBP performs law enforcement queries for 95 percent of travelers at the land border, compared to only 5 percent in 2005. The use of RFID-enabled travel documents has rapidly increased – 51 percent of all law enforcement queries during FY 2014 were initiated from RFID-enabled documents and in the San Diego Field Office the rate of queries increased to 72 percent. As of September 30, 2014, more than 28.9 million RFID-enabled travel documents have been issued to travelers, an increase from 22.8 million on September 30, 2013 and two-thirds of all southern border crossings are now made with an RFID document.

CBP has capitalized on the initial success of WHTI and technical capability through the continued implementation of the “Triangle Strategy.” This strategy implements and expands innovative technologies and processes at the land border through the integration of inbound, outbound, and Border Patrol checkpoint processing by sharing information between core operations to improve targeting capabilities. The Triangle Strategy is being achieved via an integrated approach that includes:

- Active Lane Management (ALM) – efficiently allocates available officers and booths by re-designating primary vehicle lanes as either Ready Lanes or Dedicated Commuter Lanes (DCL) based on current traffic conditions and infrastructure limitations. The growth in RFID saturation has enabled the rapid expansion of Ready Lanes; 25 crossings now offer a Ready Lane. Ready Lanes more efficiently process vehicles (12-18 seconds faster per vehicle) and in conjunction with Active Lane Management can reduce participant wait times up to 50 percent.
- Pedestrian Reengineering – applies a hybrid WHTI solution, which includes traveler kiosks to improve pedestrian queuing and automates travel document queries in advance of the traveler’s arrival. The first pedestrian Ready Lane opened in December 2011. Results at the pedestrian sites where kiosks have been deployed:
 - Rapidly growing traffic share: The new kiosks now process 46 percent of all southwest border pedestrian traffic and over 56 percent of the traffic at the ten deployed locations. Pedestrian volume has increased 3 percent since 2013.
 - 28 percent faster processing: The Ready Lane kiosks expedite pedestrian processing an average of 28 percent (28 seconds for kiosk pre-processing compared to 36 seconds for general processing).

- Shorter border waits: At the ten locations with the new kiosks, Ready Lane pedestrian travelers wait an average of 13 minutes compared to general lane pedestrians who wait an average of 25 minutes in the passenger queue.
- Outbound Automation – deploys a variety of mobile, fixed, and tactical LPR solutions that support pulse and surge outbound operations through advanced information. The current fixed and mobile technologies that automate license plate and document law enforcement queries have been deployed to 42 southwest border locations. These solutions have provided real time information which has led to the following enforcement actions in FY 2014:
 - \$15.2 million in currency seizures,
 - 72 firearms and 35,756 rounds of ammunition, and
 - 602 arrests of wanted fugitives or violators of export laws.
 In addition, during FY 2014, mobile technology deployment was expanded to include nine locations on the northern border as well as one Border Patrol location and one ferry location in Puerto Rico.
- Border Patrol Checkpoint automation – an integrated extension of WHTI technology (fixed and tactical license plate readers and mobile devices to automate document and license plate queries) have been deployed to 27 Border Patrol checkpoints. From October 1, 2013, to September 30, 2014, two tactical deployments were completed. These capabilities ensure that border-centric information is available in real time as tactically required across all mission areas.

Cost Avoidance/Efficiencies/Workforce Multiplier Impact

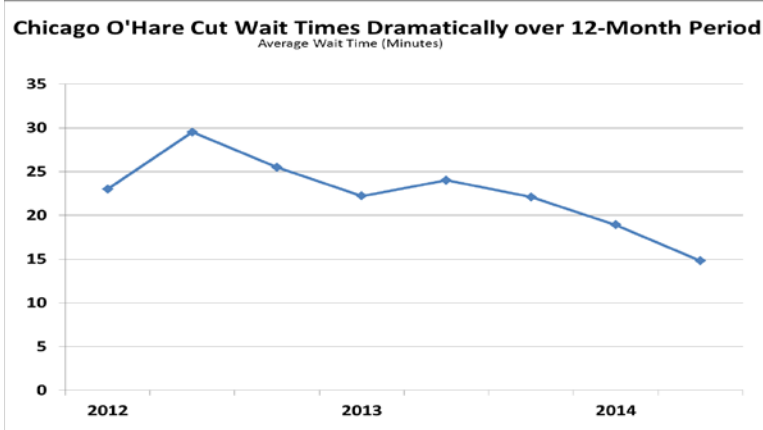

The enhanced transformative efforts at the land border equates to \$6.10 savings in opportunity costs for every traveler (wait time savings) when \$1.00 is spent for the Land Border Integration Team. This represents an increase of \$1 over the FY 2013 calculated savings. This increase can be attributed to the increased volume of travelers, the greater number of RFID-enabled travel documents, and the time value of travelers adjusted for inflation. For instance, a Ready Lane is a primary vehicle lane dedicated to travelers who possess RFID-enabled documents. ALM is the approach of monitoring incoming traffic and making adjustments to lane designations as needed. ALM is analogous to management of toll booths on a highway. Trusted Traveler Lanes are similar to EZ Pass lanes; Ready Lanes to exact change lanes; and general lanes would be similar to full service lanes.

The successful deployment of vehicle Ready Lanes has resulted in a decrease of processing time, improved vehicle throughput, and reduced border wait time. Ready Lanes efficiently process inbound vehicles 12 - 18 seconds faster than general lanes, increase vehicle throughput by up to 25 percent, and reduce overall wait times by 50 percent when compared to general lanes. The increase in efficiency also resulted in additional CBPO savings in FY 2014 equivalent to 15 CBPOs and a cost avoidance of \$1.8 million (total 57 CBPOs savings in FY 2014 vs. 42 CBPO savings in FY 2013).

Increase service levels for stakeholders, which includes a reduction in wait times

CBP is actively engaged with the Department of Commerce and stakeholders to develop strategies at the top 17 airports to improve the entry process and reduce wait times for

international travelers to the United States. The goal is to achieve progress consistent with those achieved at Dallas Fort Worth and Chicago O’Hare airports where, through a combination of streamlining processes and upgrading technologies, wait times were reduced significantly.

Chicago O’Hare International Airport has seen passenger growth of 7 percent this year—the second fastest growth of any top 10 airport—and has partnered with CBP on improved queuing, signage, passenger flow, promoting Global Entry, and, critically, Automated Passport Control kiosks. The results have been dramatic.

At Dallas-Ft. Worth International Airport, international arrivals have grown 16 percent over the past year and 39 percent over the last 4 years, the most of any top 20 airport during that stretch. The airport partnered with CBP not only on queuing, signage, passenger flow, promoting Global Entry, and Automated Passport Control kiosks, but also on a reimbursable agreement for enhanced CBP services. As in Chicago, the results have been tremendous.

At Dallas-Ft. Worth International

The strategies at the top 17 airports will be finalized and submitted to the Administration and Congress in FY 2015. The airport strategies will contain multi-year objectives and will need to be sustained in the long term.

Exhibit 16: Other Facilitation Programs

	<p>Express Connect</p> <ul style="list-style-type: none"> Empowers airlines to identify travelers who have a very short connection and place them in a priority processing status, resulting in fewer missed connections and significant cost savings to airlines.
	<p>One-stop</p> <ul style="list-style-type: none"> Allows travelers with no checked baggage to use separate processing lanes and an alternate exit, shortening the time travelers spend in line.

	<p>Radio Frequency Identification</p> <ul style="list-style-type: none"> • Changes the way CBP does business by introduction of the RFID-enabled Passport Card and Border Crossing Card that can be used for expeditious entry at U.S. land and sea ports of entry serving Canada and Mexico; and • Retrieves traveler data and speeds conducting a variety of queries from secure Government databases during entry process.
	<p>License Plate Reader (LPR)</p> <ul style="list-style-type: none"> • Enables accurate automated real-time queries of license plate information to TECS. Where deployed, the LPR ensures that all passenger vehicles crossing the U.S. land borders have their license plates automatically queried against TECS and a number of other law enforcement databases.
	<p>Ready Lanes</p> <ul style="list-style-type: none"> • A Ready Lane is a primary vehicle lane that only accepts passengers with RFID-enabled travel documents. These documents include a U.S. Passport Card, Enhanced Driver’s License or Tribal Card, a Trusted Traveler document (NEXUS, SENTRI and FAST), and an RFID-enabled Border Crossing Card or Permanent Resident Card.
	<p>Dedicated Commuter Lanes</p> <ul style="list-style-type: none"> • Decreases wait time in conventional land-border vehicle crossing lanes by providing dedicated lanes for low-risk, pre-screened, enrolled travelers in CBP’s Trusted Traveler Programs, NEXUS, SENTRI, and Global Entry. • Using RFID technologies, database checks automatically conducted on vehicle and passenger are ready for the CBPO when the driver arrives at the booth.
	<p>Active Lane Management</p> <ul style="list-style-type: none"> • Re-deploying available lanes at POEs to respond to ever changing conditions. • Most often through use of LED signage.

Professionalism

- CBP, OFO has recently launched an initiative entitled “Professionalism in Action – Leading by Example” which is designed to reinvigorate employees’ focus on their Core Values, in particular professionalism, in all aspects of their work, from how they interact with each other, to how they treat the traveling public.
- The initiative is designed to focus on upholding the values that are instilled in new recruits at the Field Operations Academy and create a cultural DNA that supports professionalism in all aspects of the employees’ daily interactions – including, and especially, with their managers.

Mission Turbulence

OFO has developed a strong ability to respond to anticipated and unanticipated national and regional events such as National Security Special Events; customs, immigration and agriculture surges, and natural disasters. These events do not halt OFO’s primary mission to protect the people and economy of the United States by preventing the entry of terrorists and instruments of terror while expediting legitimate travel and trade; however, they do add resource challenges. It is inevitable, that CBP OFO will experience mission turbulence from some event or events in FY 2016 and beyond and we will respond appropriately and timely to whatever eventuality arises. One of the most significant tools at our service in responding to mission turbulence are our Special Response Teams. In FY 2014, OFO responded to national events such as the surge in Unaccompanied Children and Ebola.

Special Response Teams (SRT)

The Office of Field Operations (OFO) Special Response Team (SRT) combats all threats to the nation’s physical and economic security through specialized capabilities and advanced integration across DHS and the broader federal law enforcement community, while providing technical expertise and timely counsel to CBP leadership. SRT was developed to respond to National Security incidents, threats to CBP POEs, and other significant border security threats.

The primary purpose of SRT is to provide a systematic approach to saving lives and increase the likelihood of safely resolving critical incidents at the POEs so CBPOs can remain focused on their mission of enforcing border security while facilitating legitimate trade and travel. SRT operators are selected, trained, and equipped to work as a coordinated team to resolve critical incidents that are so hazardous, complex, or unusual that they exceed the capabilities of CBPOs. Examples include Chemical, Biological, Radiological, Nuclear, and Explosive (CBRNE) tactical response, mobile field force / civil unrest response, active shooter response, Tactical Combat Casualty Care (TCCC), vehicle pursuit, vehicle assaults, surveillance, motorcade operations, dignitary protection, National Security Special Events (NSSE), and natural disaster response.

SRT also enhances CBP's efforts to expand the United States border internationally by providing advanced training to foreign border enforcement agencies as well as conducting site surveys and threat assessments for CBP facilities located on foreign soil. Before the inception of SRT, OFO relied heavily on other federal, state, and local assets to provide a response to significant incidents relating to border security. In 2010, SRT assumed the security function for transfer and destruction of seized property operations nationally from the Immigration and Customs Enforcement (ICE) Special Response Team (SRT).

In FY 2014, SRT conducted 718 operations, averaging 60 operations per month. Based on the current operational tempo and growth of SRT, the number of operations is expected to continue to increase.

Unaccompanied Children (UC) Response

OFO encounters Unaccompanied Children (UC) at POEs during inspection and enforcement activities; OFO has consistently encountered approximately 8 percent of the total UC population encountered by CBP. Once a potential UC is identified, a CBPO will take appropriate action to refer the individual.

As of March 23, 2009, CBP may only reunify UC with parents or legal guardians who are in possession of supporting documentation and are within the United States. If such an individual is not available to take custody of the child, OFO must detain the UC until they are transferred to another federal agency, usually the Department of Health and Human Services (HHS), Office of Refugee Resettlement (ORR). HHS/ORR is responsible for the determination that any other proposed guardian, including a family member who lacks documentation of guardianship, is capable of providing care and physical custody.

A significant difference between OFO and OBP procedures when encountering UC is transportation. Due to existing POE holding facilities, OFO does not typically have requirements associated with transporting UC to a separate location for processing. There may be the occasional need to transport a UC from one POE to another for detention purposes, but this is rare. However, aside from transportation, OFO has the same responsibilities related to the detention of UC including providing food, other supplies, and adequate shelter. With the increase in the number of UC encounters and the need to hold the child prior to transfer to HHS there is an unexpected burden on POE holding facilities.

Ebola Response

Ensuring the safety of the American public is of paramount concern. When the threat of an Ebola outbreak grew at the end of FY 2014, OFO took action. CBP is engaged, on a daily basis, with its internal and external agency partners for a whole-of-government approach for response and preparedness. This includes issuing no-board letters to high-risk individuals; utilizing CBP systems to identify at-risk travelers prior to their arrival in the United States; enhanced screening procedures implemented at the ports of entry, and engaging with our partners, such as CDC, to conduct medical screenings of passengers. CBP's approach is to ensure there are varying points at which an infected individual can be identified and systematically employ a number of measures to minimize the risk of Ebola Hemorrhagic Fever (EHF) being introduced to the United States.

CBP's first line of defense was to inhibit the spread of EHF from the closest point to the source of infection. Through its authorities under the jurisdiction of DHS, CBP issued no-board letters to passengers bound for the U.S. who had been identified by the Centers for Disease Control and Prevention (CDC) or other appropriate medical authority, and determined to present a threat to public health. CBP routinely uses this authority in public health cases and currently use this authority to prevent the spread of Ebola.

CBP leverages advance passenger data to identify travelers destined to the U.S. that are traveling from or through Ebola affected countries, have recently traveled to the Ebola affected countries, or are traveling on a passport issued by one of the Ebola affected countries. Such travelers are identified for additional questioning upon arrival in the United States and referral for enhanced screening, as appropriate.

At Secretary Johnson's direction, CBP instituted enhanced screening measures at the five designated U.S. international airports—John F. Kennedy, Newark Liberty, Chicago O'Hare, Washington Dulles, and Hartsfield-Jackson Atlanta—that take in 94 percent of air passengers from the affected countries.

Additional measures were put into place to ensure that air passengers identified as having a travel nexus to one of the Ebola-affected countries within the previous 21 days are routed to make first entry into the United States at one of the five designated airports for screening. This ensures that the remaining six percent of travelers flying to the United States from the affected countries are also screened with these enhanced measures.

At present, there are no direct commercial flights from the affected countries to the United States. If an air traveler wants to fly to the United States from Liberia, Sierra Leone, or Guinea, the airlines will not permit the passenger to fly on a connecting flight to any U.S. airport other than one of the five with the enhanced screening. This is an appropriate part of our layered approach to security and the protection of the American people. This requirement has also been expanded to General Aviation.

A fourth layer is CBP's passenger inspection process. As a standard part of every inspection, CBP officers observe all passengers as they arrive in the United States for overt signs of illness, and question travelers, as appropriate, at all U.S. ports of entry. In addition, upon arrival in the United States, CBP is providing CDC's Ebola Travel Health Alert Notice to travelers from the three affected countries: Liberia, Sierra Leone, and Guinea. These notices advise passengers to monitor their health for the next 21 days and includes pertinent information for their doctor, should they seek medical attention during the monitoring period.

Any traveler identified as being at risk for the spread of infection, either through advanced information sharing, or through CBP's inspection process, is referred for enhanced screening.

CBP also works with the Coast Guard, CDC, and other federal, state and local port partners to ensure the safe and secure arrival of passengers and crews into U.S. ports, including those aboard cruise ships. All U.S. Ports of Entry, including all seaports, have protocols in place with respect

to handling passengers and crew who may present with a contagious illness. CBP officers coordinate possible isolation and response with local public health officials.

Securing and Expediting Trade

Office of Field Operations

The international trade process involves many stakeholders working together to develop trade policy, set priorities, operate daily import and export procedures at home and abroad, address security and safety concerns, and deliver and use imported goods.

CBP controls trade through the POEs as goods arrive at the border. CBP maximizes trade processing by applying a mix of frontline staffing, technology, and programs that maximize the staffing and technology resources. Experienced CBPOs; CBP Agriculture Specialists; Import Specialists; National Import Specialists; Entry Specialists; Drawback Specialists; and Fines, Penalties, and Forfeitures Specialists use their expertise to target, examine cargo, review entry documentation, collect duties, and interact with the importing community to enforce and ensure compliance with U.S. trade laws.

Exhibit 17: Key Programs Securing and Expediting the Trade Process

SECURING AND EXPEDITING TRADE	
Radiation Portal Monitor (RPM) Optimization	Near-term, low-cost approach to make RPM operations more effective and efficient by modifying the parameter settings to deployed RPMS which significantly reduces false alarms.
PRIDE 2.0	Proof of concept for a focused screening/scanning method, which will allow CBP cargo officers to remotely view and evaluate Radiation Detection Equipment scans and Non-Intrusive Inspection images
Container Security Initiative (CSI)	Actively protect global trade lanes and systems between overseas points of origin and the United States.
Customs-Trade Partnership Against Terrorism (C-TPAT)	Customs-business partnership program safeguarding the world’s trade industry from terrorists and weapons of mass effect and maintaining the economic health of the U.S. and its neighbors.
Centers for Excellence and Expertise (CEEs)	Centralized processing for the Trade community using a team of industry-focused CBP experts.
Non-Intrusive Inspection (NII) Program	NII Systems allow for passive radiation scanning and X-ray/gamma-ray imaging of cargo and conveyances.

SECURING AND EXPEDITING TRADE	
National Targeting Center	Screens cargo and conveyances prior to departure for U.S.

As in the passenger and travel environment, CBP has been looking at a number of Business Transformation Initiatives to apply in the trade environment that provide a smarter use of available resources in response to growing challenges. Below are transformation initiatives that are being considered and/or implemented to mitigate some of the challenges:

Radiation Portal Monitor (RPM) Optimization

As a Business Transformation Initiative, CBP and Pacific Northwest National Laboratory, in coordination with the Domestic Nuclear Detection Office (DNDO), developed a near-term, low-cost approach to make RPM operations more effective and efficient while maintaining the capability to detect appropriate threats. The recalibration should result in a reduction of alarm responses to those benign radiological materials by 70-90 percent.

In FY 2014, the RPM Revised Operational Settings initiative was deployed to 17 ports of entry comprising 90 percent of inbound maritime container volume and 93 percent of historical seaport RPM alarms have been recalibrated [Baltimore seaport, Boston Seaport, Charleston Seaport, Detroit – Fort Street Land POE, Fort Lauderdale (Port Everglades) Seaport, Houston (including Galveston) Seaport, Jacksonville Seaport, Los Angeles Seaport, Long Beach Seaport, Miami Seaport, New York/New Jersey Seaport, Norfolk Seaport, Oakland Seaport, Portland (Oregon) Seaport, Savannah Seaport, Seattle Seaport and West Palm Beach Seaport] with deployments to Tacoma, Philadelphia and Wilmington DE and NC underway. To date, nuisance alarm rates have decreased at these seaports by 79 percent (a projected 95,000 alarms over a one-year period). Projecting for these 17 ports of entry for a whole year is a reduction of about 146,000 alarms. Each nuisance alarm takes an average of 15 minutes to adjudicate with two officers. At locations with high alarm rates, CBP must staff these seaport locations full time with two or more officers. Reducing nuisance alarms not only reduces actual delay times to adjudicate but also frees up officers for other inspection duties at the seaports, enhancing security with the same manpower levels. The implementation of this initiative supported the realignment of 35 CBPOs in FY 2014 and CBP estimates up to another 65 CBPOs through FY 2016 to other enforcement missions and will support a long-term reduction in secondary RPMs, thus avoiding future acquisition and maintenance costs of up to \$44 million over 10 years. RPM optimization will be deployed to land borders in FY 2015.

PRIDE 2.0

CBP developed a Proof-of-Concept (PoC) for a focused screening/scanning method, which will allow CBP officers to remotely view and evaluate RDE scans and NII images. This concept is referred to as PRIDE 2.0 PoC. PRIDE 2.0 PoC integrates data with ATS-4, Cargo Enforcement Reporting and Tracking System (CERTS), RAD/NUC scanning technology, NII imaging systems, and OCR cameras into a single user interface from any platform including a Tablet that

improves communication, streamlines data entry and processing, and provides a holistic examination profile.

PRIDE 2.0 PoC tests were successfully completed at Pier T Cargo Terminal in Los Angeles/Long Beach in September 2013, by integrating and transmitting data between Radiation Portal Monitor (RPM), NII imaging system (Rapiscan Eagle Mobile 60) and various RPM ancillary equipment. PRIDE 2.0 PoC also explored use of technicians for non-LEO functions by conducting the ground guiding duties.

Based on the Proof of Concept, the project has progressed to a PRIDE 2.0 Technology Demonstration. The PRIDE 2.0 Technology Demonstration will be conducted in Detroit, MI to (1) test the functionality/ interoperability within the Land vector settings, (2) measure against the cost benefit analysis (CBA) study, and (3) gather additional inputs and lessons-learned to prepare for the national deployment. The Detroit Technology Demonstration is not anticipated to yield significant savings in CBPOs in FY 2015 (estimated to save approximately 1,100 inspection hours). However, if the Technology Demonstration yields positive results, CBP expects to expand this initiative to 166 locations through FY 2016. Once this expansion is complete, this initiative is expected to save over 27,000 inspection hours which will support the realignment of up to 23 CBPOs.

Container Security Initiative (CSI)

The Container Security Initiative (CSI) inspection activities protect global trade lanes and systems between overseas points of origin and the United States. The process enables greater security through collaboration. As a result, CBP has strengthened its multi-layered security measures, more effectively securing and facilitating the large volume of goods arriving in the United States each year. The International Cargo Screening PPA contains more information on this program.

Customs-Trade Partnership Against Terrorism (C-TPAT)

As a key component of CBP's layered cargo enforcement strategy, the C-TPAT program establishes clear supply chain security criteria for members to meet and in return provides incentives and benefits like expedited processing. C-TPAT continues to apply tangible trade facilitation to C-TPAT partners in light of their demonstrated commitment to adopt stronger security practices throughout their international supply chains. In a 2010 C-TPAT Cost and Savings Survey (available on the CBP website), respondents noted that the value of C-TPAT membership goes beyond dollars and cents; it includes risk avoidance, a communal approach to a safer supply chain, being able to compete for contracts that require C-TPAT membership, and taking advantage of the credibility that C-TPAT membership brings.

C-TPAT efforts safeguard the world's trade industry from terrorists and weapons of mass effect, and maintaining the economic health of the U.S. and its neighbors. Partnerships include importers, U.S./Canada highway carriers, U.S./Mexico highway carriers, rail and sea carriers, licensed U.S. customs brokers, U.S. marine port authority terminal operators, freight

consolidators, ocean transportation intermediaries, Mexican and Canadian manufacturers, and Mexican long-haul carriers.

The C-TPAT PPA contains more information on this program.

Centers for Excellence and Expertise (CEE): Innovation in Trade Enforcement

CBP has successfully implemented this initiative by opening all 10 planned Centers and assumed all trade processing for the Trusted Trader importers within each industry sector. With these Centers established, CBP has covered the full range of products imported into the United States, as shown below in Exhibit 14.

Exhibit 18: Centers for Excellence and Expertise by Industry

CBP is transforming trade processing to find efficiencies for both CBP and the international trade community. Leading the way in these efforts are CBP's Centers that provide centralized processing for the Trade community using a team of industry-focused CBP experts located virtually nationwide. The CBP employees at the Center at the Ports of Entry protect the U.S. economy by identifying risks, preventing harmful products from entering into U.S. commerce, and by recovering lost revenue due to unfair or illegal trading practices.

By having a dedicated industry Center, the international trade community now has one office responsible for processing importations for a particular industry. This enhances uniformity of decisions. The small/medium-sized businesses can contact the Center with importing questions. The Centers also collaborate with other government agency partners to resolve issues.

The Centers are operating under a Test Notice invoking 19 CFR 101.9 which provides for a waiver of regulatory authority in order to test operational efficiencies. The Test Notice requires

importers to volunteer as participating accounts. The growth of the volume of importers electing for their trade transactions to be centralized and processed by a Center is illustrated in Exhibit 19 below. In the test environment, the Centers are growing in a measured approach and at different rates due to the unique differences in the business processes of the industry sectors. As the Centers grow the appropriate number of CBP trade staff are being transitioned to the Centers to support the volume of work. Since the inception of the Centers in 2012, the number of accounts has doubled each year totaling over 1,200 importers engaged in centralized processing of their import transactions.

Exhibit 19: Centers of Excellence and Expertise Growth Rate of Participating Accounts

The number of importers that are currently participating as accounts with the Centers represent different volumes of trade value and transactions. As such, the Centers growth rates differ depending on various factors, such as associated trade risks, number of entry lines and value, which contribute to decisions on existing capacity for expansion. The current volume of trade in terms of import value and entry line count that the Centers are processing is illustrated in Exhibit 20 below. Currently, the Centers are processing over \$538 billion in import value representing over 22 million entry lines.

Exhibit 20: Centers of Excellence and Expertise Import Value and Line Value of Trade¹⁴

The Centers will be assuming all trade functionality nationwide and will centralize processing on an account basis thereby providing uniformity in trade decisions, improving the efficient movement of cargo and enhancing enforcement measures through increased knowledge of trade risks within the industry sectors. CBP will continue transitioning trade functions in the test environment while pursuing permanent Center authority through formal regulatory updates. Additionally, CBP will accelerate Center growth through a legal Delegation Order of regulatory trade responsibilities to the Center Directors which will provide the means to transition trade activity more rapidly while maintaining a measured, logical approach.

Non-Intrusive Inspection Conveyance Inspections

Since examinations with NII equipment are much faster than manual inspections, NII conveyance searches (which include large-scale x-ray and gamma ray imaging systems, radiation detection equipment, small-scale baggage x-ray systems, and portable and hand-held devices) are important tools that help CBPOs fulfill their mission. Without NII equipment, CBPOs would be dependent on labor intensive and time consuming manual inspections. The NII equipment inventory is funded by the Inspection and Detection Technology PPA. The Inspections, Trade,

¹⁴ IMM – Industrial & Manufacturing Materials; BM – Base Metals; APP – Agriculture & Prepared Products; Mach – Machinery; CPMM – Consumer Products and Mass Merchandising; AFT – Apparel, Footwear & Textiles; PHC – Pharmaceuticals, Health and Chemicals; Elec – Electronics; AA – Automotive and Aerospace; PNGM – Petroleum, Natural Gas & Minerals.

and Travel Facilitation PPA primarily represents salary and benefits costs associated with the NII Conveyance Inspections activities at the POEs.

Cost Avoidance/Efficiencies/Workforce Multiplier Impact

NII Technology exams require a fraction of the time required by a manual CBPO exam, which creates a workforce multiplier effect. A typical manual cargo inspection requires three people working a minimum of 2 hours on average to complete. A typical large-scale NII examination requires three personnel an average of 8 minutes to complete, saving approximately 112 minutes per inspection.

In FY 2014, CBP used large-scale (LS) NII systems to conduct more than 7.23 million examinations in the land, air, and sea environments, which resulted in over 209,300 seizures, including over 249,000 pounds of narcotics, 118 stowaways, and over \$6.3 million in currency. Of these examinations, over 2.3 million inspections were for cargo truck and seaport containers using imaging technology. If NII technology had not been used to conduct these exams, the same workload would have required approximately 7,000 CBPOs as opposed to only 500 CBPOs utilizing NII technology. Starting in FY 2013, the NII utilization policy shifted from volume-based scanning to threat-based scanning that aligns with risk reduction. Results for comparable months (Oct – May) in FY 2013 and FY 2014 consistently demonstrated a 6 percent decrease in examinations but a 29 percent increase in NII-related seizures.

Other Enforcement Programs

As previously discussed, OFO has a complex and varied mission. Following are some of the other programs and initiatives that OFO has to protect the nation from terrorists and terrorist weapons, while facilitating lawful trade and travel.

Exhibit 21: Other OFO Enforcement Programs

	<p>Anti-Terrorism Contraband Enforcement Teams</p> <ul style="list-style-type: none"> • The primary mission of A-TCET teams is anti-terrorism; however, their activities encompass all types of contraband, including narcotics, currency, weapons, and counterfeit goods.
	<p>Counter Terrorism Response Team</p> <ul style="list-style-type: none"> • Conduct examinations, searches, and seizures that result in after action reports that are used by CBP as well as other law enforcement and intelligence agencies.

	<p>Advanced Targeting Units</p> <ul style="list-style-type: none"> Identify shipments that pose a possible threat to national security or violate federal laws such as smuggling of narcotics and other contraband.
	<p>Passenger Analytical Units</p> <ul style="list-style-type: none"> Identify and coordinate the examination of high risk travelers arriving at or departing from a U.S. port of entry (POE).
	<p>Outbound Program</p> <ul style="list-style-type: none"> Risk-based strategy, pulse and surge conducted at LPOEs, airports, international mail and express courier facilities, and seaports.
	<p>Canine Enforcement Program</p> <ul style="list-style-type: none"> Detects and deters the entry of terrorist weapons, narcotics, currency, agricultural products and other prohibited items.
	<p>Fraudulent Document Analysis Unit</p> <ul style="list-style-type: none"> Remove fraudulent travel documents from circulation and prevent the use of fraudulent documents by mala fide travelers attempting to enter the United States.
	<p>Advance Passenger Information System (APIS)</p> <ul style="list-style-type: none"> A database system that permits research on passengers on inbound and outbound international flights before their arrival in or departure from the United States. APIS collects biographical information from international air passengers, allowing the data to be checked against the Treasury Enforcement Communications Systems (TECS) before the passengers arrive.

	<p>Admissibility Review Office (ARO)</p> <ul style="list-style-type: none"> The ARO makes determinations on all temporary and permanent nonimmigrant waiver applications within the jurisdiction of CBP.
	<p>Quarantine Material Intercepted (QMI)</p> <ul style="list-style-type: none"> QMIs are prohibited agriculture commodities that require disposal and handling by approved method, such as destruction by incineration (shown in picture to the left), autoclaves, and garbage disposals which must empty into an approved sewage system. CBP Agriculture Specialists examine the QMI for pest and diseases; thereafter, QMI are disposed of via one of the approved methods.
	<p>Fines, Penalties & Forfeitures</p> <ul style="list-style-type: none"> FP&F makes decisions concerning seizure, penalty, and liquidated damages cases involving violations of immigration, agriculture and customs laws that are referred for review. FP&F is also responsible for oversight and policy implementation of all aspects of the seized property process to ensure proper management, control, and accountability of all property seized by law enforcement officers of the Office of Field Operations and ICE.

CBP's Agriculture Program

Agriculture Programs and Trade Liaison (APTL), OFO, provides leadership, expertise, and innovation to defend the U.S. from the threats of agricultural and biological terrorism (or Ag/bio-terrorism). APTL is also responsible for the CBP agriculture mission of safeguarding and protecting American agriculture from the risks associated with the entry, establishment, or spread of plant pests and pathogens, noxious weeds, and foreign animal diseases.

The agriculture program is funded both through Animal and Plant Health Inspection Service (APHIS) user fees and the salaries and expenses portion of ITTF. The Agricultural Quarantine and Inspection (AQI) program plays a critical role in facilitating the safe trade of agricultural commodities while protecting U.S. agriculture and the environment from invasive plant and animal pests and diseases – those sometimes microscopic agricultural terrorists. As volumes of international trade and travel both increase, so do the risks that foreign animal and plant pests and diseases can enter and establish themselves in the United States.

USDA is authorized to collect user fees to protect American agriculture¹⁵. CBP is allocated a portion of these user fees to conduct agricultural inspection duties at the POEs. The *Food, Agriculture, Conservation and Trade Act of 1990* established the fees with a clear intent that the fees should fully fund the actual costs of running the AQI program and be borne by those using the services. However, revenue from fees has been insufficient to cover all costs and CBP only recovered approximately 77 percent of their costs from the AQI fees in FY 2013. Cost recovery for FY 2014 was 73 percent. USDA proposed an increase to AQI user fees in April 2014. The Notice of Proposed Rulemaking closed its open comment period in July 2014 after a 30-day extension period. Those results are now under review and the final rule is scheduled to become effective in FY 2015. If the rule goes into effect, as planned, CBP is projecting that it will recover approximately 99 percent of its costs in FY 2016.

For a more extensive discussion of the Agriculture program at CBP, please refer to the APHIS User Fee submission.

Office of International Trade (OT)

The CBP Office of International Trade (OT) leads and manages the development of enforcement mechanisms that support key elements of U.S. trade policies and that are implemented through the development of programs, guidance, regulations, and rulings, and other compliance mechanisms executed by OFO at POEs. The portion of resources from this PPA assigned to OT totals \$135.706 million with 877 FTE.

The Security and Accountability For Every (SAFE) Port Act of 2006 established OT and requires OT to bi-annually report on CBP assumptions regarding U.S. international trade, trade policies, and trade enforcement to Congress. To accurately complete this report, OT uses a Resource Optimization Model (ROM). Since the creation of the ROM in 2007 the US national security and international trade environments have changed significantly, altering the impact of the assumptions upon which the ROM was developed. OT is now in the process of revising its ROM to reflect the current distribution of staff to workload and to more effectively support CBP international trade mission.

OT FTE includes four of the CBP Trade & Revenue (T&R) positions (Attorney-Adviser, Customs Auditor, International Trade Specialist, and National Import Specialist) mandated by the *Homeland Security Act of 2002* (HSA). As in Exhibit 22 below, CBP anticipates forty percent of all personnel holding these positions to be eligible for retirement by 2020 as compared to the minimum staffing number required by HSA. OT will manage and maintain the appropriate levels of specialized staffing through its proactive hiring strategy. OT closely monitors retirement eligibility and departures of existing staff. Meanwhile, a comprehensive trade expertise initiative cultivates qualified applicants. This hiring pool is used to ensure that five percent of the appropriate staffing level is available through the hiring pipeline.

¹⁵ Section 2509, Food, Agriculture, Conservation, and Trade Act of 1990, also known as the FACT Act.

Exhibit 22: OT T&R Staff Eligible for Retirement

Position	HSA Minimum	FY 2014	FY 2020	Eligible for Retirement
Attorney-Adviser	90	18	39	43%
Customs Auditor	364	70	129	35%
International Trade Specialist	138	28	51	53%
National Import Specialist	97	30	50	52%
Total	689	146	269	39%

OT is staffed in five operational directorates and one mission support division to fulfill its mission in the most efficient and effective manner. The operational directorates perform key functions that produce commercial benefits below. Please note that the table is limited to operational directorates and excludes mission support:

Exhibit 23: OT Operational Directorates*

Directorate	Key Functions	Commercial Benefits
Commercial Targeting and Enforcement (CTE)	<ul style="list-style-type: none"> • Uses large scale analytical support to assist in the detection and disruption of fraudulent activities; • Formalizes strategic case development processes to enhance more meaningful enforcement actions; • Provides semiannual customs broker examination opportunities, and issues licenses and permits to qualified broker applicants; and • Provides strategic trade performance measures and trade related information and analysis that develops models and reporting systems in support of trade transformation initiatives. 	<ul style="list-style-type: none"> • Improved analytical support, data collection and correlation, analysis, risk management techniques; • Development and reporting systems that will reduce the number of nonproductive examinations; • Utilize analytical techniques on a large scale basis rather than an individual entry approach; and • Semiannual broker examination opportunities increases the number of licensed customs brokers to assist members of the importing community.
Regulations and Rulings (R&R)	<ul style="list-style-type: none"> • Technical legal support, advice, and guidance for CBP trade and border operations; • Uniform interpretation and application standards for trade laws, including tariffs; • Final decisions on trade compliance; and • All regulatory documents and Federal Register notices for CBP. 	<ul style="list-style-type: none"> • Uniform and impartial application of trade laws and facilitation of the flow of legitimate trade; and • Increase transparency in CBP rules and procedures relating border security, trade compliance for the benefit of the trade community, CBP personnel and other government agencies.

Directorate	Key Functions	Commercial Benefits
Regulatory Audit (RA)	<ul style="list-style-type: none"> • Examines the records, accounts and internal control of entities to ascertain the accuracy and potential liability for duties, fees and/or taxes due to the Federal government; • Supports CBP initiatives and works collaboratively with Partner Government Agencies, foreign governments and the trade to better assess risk; and • Provides other professional services as needed. 	<ul style="list-style-type: none"> • Protects government revenue; • Ensures compliance with trade laws; • Facilitates legitimate trade; • Supports expansion of Centers of Excellence and Expertise operations; • Protects the security and safety of American businesses and citizens from harmful goods; and • Supports trade fraud/commercial fraud investigations and enforcement efforts with ICE/HSI.
Trade and Policy Programs (TPP)	<ul style="list-style-type: none"> • Develops CBP trade policy; • Conducts national operations on multiple source countries, commodities, and threats; coordinates with industry and other agencies to develop national operations; and • Collaborates with Participating Government Agencies to integrate their trade enforcement and compliance issues and operations into CBP's operations. 	<ul style="list-style-type: none"> • Defines priority trade issues in IPR, Antidumping and Countervailing Duties (AD/CVD), Textiles, Trade Agreements, Import Safety • Centers for Excellence and Expertise (CEEs); and • Coordinates responses to trade enforcement and compliance concerns across U.S. Government Agencies to increase the efficient and effective clearance of trade across our borders.
Automated Commercial Environment (ACE) Business Office (ABO) ¹⁶	<ul style="list-style-type: none"> • Makes all business decisions concerning ACE, including requirements collection, prioritization, and communications. 	<ul style="list-style-type: none"> • Ensures all stakeholders from the trade community and government are actively involved in planning, development, deployment, and maintenance of ACE; • Please refer to the Automation and Modernization section for a further description of the ACE program.

*Excludes Resource Management Division, which provides human resources and administrative support.

Revenue

Among the different directorates in OT, Regulatory Audit (RA) conducts post-entry compliance audits of large, multinational companies and audits of various entities active in importing merchandise into the United States. RA efforts and recommendations have contributed to the

¹⁶ The ACE Business Office is funded with Salaries and Expenses appropriation and not with funding authorized in the Automation Modernization appropriation.

collection of duties, fees, interest, and penalties to the Federal government; however, RA is not responsible for the collection of revenue.

Exhibit 24A: RA Results & Recommendations in Prior Years

Total	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Assignments Completed	345	379	384	374	424	428
Recommended Recoveries (\$ millions)	\$51.6	\$51.8	\$81.6	\$52.9	\$132.9	\$52.7
Collections* (Current and Prior Year Audits) (\$ millions)	\$27.6	\$37.2	\$43.5	\$39.0	\$88.5	\$56.2
Penalties (\$ millions)**	\$1.6	\$4.3	\$3.8	\$1.1	\$0.9	\$6.9
Work in Progress	233	267	308	263	266	306

Exhibit 24B: RA Results & Recommendations in Current and Future Years
(dollars in millions)

Total	FY 2013	FY 2014	FY 2015†	FY2016†
Assignments Completed	424	428	450	475
Recommended Recoveries	\$132.9	\$52.7	\$60.0	\$65.0
Collections* (Current and Prior Year Audits)	\$88.5	\$56.2	\$60.0	\$65.0
Penalties**	\$0.9	\$6.9	\$10.0	\$10.0
Work in Progress	266	306	300	300

*RA audit efforts contribute to CBP's collection of duties, fees, taxes, and interest owed to the Federal government. RA is not responsible for the collection of revenue.

**Although RA does not recommend penalties, CBPOs are able to consider penalties as a result of audit findings and recommendations.

†Projected.

In FY 2014, RA completed over 400 assignments that involved AD/CVD, Safeguard/Tires, Intellectual Property Rights, Textiles, Trade Agreements, ICE/HSI assistance, User Fees, and Offsetting. These assignments resulted in recommended recoveries of over \$52.7 million, plus \$57.8 million in disclosures, penalties and interest, and collections of \$56.2 million (for current and prior year assignments), plus penalties of \$6.9 million. RA also worked with the Department of Justice to validate False Claims Act allegations which resulted in collections of \$11.1 million in unpaid dumping duties. During FY 2014, RA also completed 42 Ability-to-Pay petition claims for relief from certain penalties assessed for the violation of CBP regulations and identified \$15.3 million in importer assets which could be used to pay CBP penalties.

Priority Trade Issues (PTI)

OT is responsible for critically important programs that have been segmented into five PTIs, each highlighted below: Intellectual Property Rights (IPR), Textiles and Apparel, Antidumping and Countervailing Duties (AD/CVD), Import Safety, and Trade Agreements.

Intellectual Property Rights

The trade in counterfeit and pirated goods threatens America's innovation economy, the competitiveness of our businesses, the livelihoods of U.S. workers, and, in some cases, national security and the health and safety of consumers. The trade in these illegitimate goods is associated with smuggling and other criminal activities, and often funds criminal enterprises. CBP protects businesses and consumers every day through an aggressive Intellectual Property Rights (IPR) enforcement program.

CBP's strategy to enforce IPR is based on the pillars of facilitation, enforcement, and deterrence. In implementing this strategy, CBP has deployed new tools that have enabled officers to more quickly determine the authenticity of suspected counterfeit goods, and is partnering with the

private sector in an effort to transform IPR risk assessment by allowing IPR owners to assist CBP in identifying low-risk shipments. In FY 2014, CBP conducted 81 IPR Field Training sessions primarily for CBPOs and Imports Specialists. CBP Regulatory Auditors, FP&F Specialists and Paralegals, ICE/HSI Special Agents, and other DHS personnel also attend, though in smaller numbers. To better equip its officers to enforce IPR, CBP is launching a revised Integrated IPR Field Training program in FY 2015 and is planning 32 sessions to train approximately 600 additional personnel. CBP has conducted numerous special IPR enforcement operations, including international operations with foreign customs authorities, to increase IPR seizures.

In collaboration with OFO and U.S. Immigration and Customs Enforcement/Homeland Security Investigations (ICE/HSI) OT has successfully implemented the IPR Strike Unit (ISU) concept. The ISU is designed to enable early targeting and action soon after infringing goods are identified at the Ports. The ISU focuses on real time enforcement and informed compliance to build better cases against IPR violators and improve future compliance. In FY 2014, twenty ISU investigations were conducted in Boston, Long Beach and San Francisco resulting in multiple controlled deliveries and search warrants and over \$19.8 million in seizures. In addition, CBP is a founding partner in the National IPR Coordination Center and its largest source of criminal investigative leads.

As illustrated in the chart below, CBP's IPR strategy has resulted in a 14 percent increase in seizures from 2010 through 2014.¹⁷

¹⁷ CBP experienced a slight increase in seizures in FY 2013 due to special IPR enforcement operations.

Exhibit 25: IPR-Related Seizures

Antidumping and Countervailing Duties (AD/CVD)

To protect U.S. commerce against imported merchandise that is sold at an unfairly low or subsidized price and to facilitate the legitimate flow of imports, CBP is conducting a 5-year strategic plan (FY 2013 - FY 2017) that maximizes our resources on detection and evasion enforcement through advanced targeting and analysis and streamlines our administrative process. OT enforces AD/CVD through automated identification of high risk transactions; verification of evasion followed by swift penalty actions; and development of new methods to share information with our trade partners.

In addition, CBP created a Re-Engineering Dumping Team to combat AD/CVD evasions and to discuss the import process, identify threats and vulnerabilities, and to determine how to enhance targeting and enforcement for entries subject to AD/CVD. OT has also collaborated with OFO and ICE/HSI to develop and implement an AD/CVD survey process to address potential AD/CVD risk at an early stage for multiple companies grouped by industry or commodity. The AD/CVD surveys target companies at high risk for evasion activities, trade allegations, and/or congressional interest. Teams comprised of OT Auditors, International Trade Specialists and OFO Import Specialists focus on new or recent AD/CVD orders, industries of interest, or known high risk importers. In FY 2014, OT completed four such AD/CVD surveys. In addition, as part of the enforcement strategy, OT RA completed 78 assignments involving AD/CVD with recommended recoveries of over \$14.5 million, plus \$10 million in disclosures, penalties and

interest. OT worked on solar, polyethylene retail carrier bags, glycine, and Petroleum Free Trade Agreement surveys.

Total	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Assignments Completed	42	36	50	52	77	55
Recommended Recoveries	\$1,626,946	\$6,820,920	\$41,275,632	\$12,192,756	\$62,058,660	\$14,457,548

Textiles and Apparel

Textile and apparel imports account for more than \$117 billion annually. These commodities are subject to high duty rates and account for 41 percent of all duties collected. CBP has developed an enforcement strategy to identify and address various forms of fraud, including false trade preference program claims for duty free treatment, false invoicing, false marking, false claims of origin, misclassification, mis-description, undervaluation of products, and smuggling.

The table below documents TPVT Program activity for the last five years, including the number of factories visited and the discrepancy rates. Included in the discrepancy rates are instances where CBP was either unable to substantiate production or compliance with a trade preference program, or found clear violations of a trade preference program rules. The continued success of the TPVT program relies on experienced personnel to target factories and travel abroad to conduct these detailed factory visits and recordkeeping reviews.

Exhibit 26: Textiles-Related Recovered Revenue

Fiscal Year	Number of Factories Visited	Trade Preference Discrepancy Rate
2014	132	32%
2013	143	35.7%
2012	174	39.15
2011	165	27.3%
2010	234	30.3%

CBP’s Textile Production Verification Team (TPVT) program is one of the most effective tools for executing CBP’s enforcement strategy. In general, CBP conducts factory site-visits abroad to seven to ten countries each fiscal year, based on risk assessment and under the terms of the various trade preference programs. These teams conduct factory visits to verify the origin of imported textile and apparel goods and compliance with trade preference programs, which provide duty free treatment to eligible goods. Below is a chart of the TPVT Program activity for the last five years, including the number of factories visited and the discrepancy rates. Included in the discrepancy rates are instances where CBP was either unable to substantiate production or compliance with a trade preference program, or found clear violations of a trade preference program rules. The continued success of the TPVT program relies on experienced personnel to target and conduct these detailed factory visits and recordkeeping reviews abroad.

Exhibit 27: Textile Production Verification Team (TPVT) Results

Fiscal Year	Number of Factories Visited	Trade Preference Discrepancy Rate
2014	132	32%
2013	143	35.7%
2012	174	39.15
2011	165	27.3%
2010	234	30.3%

In the fiscal years ahead, CBP envisions that the need for the TPVT program will continue, as the high average duty rate of 16 percent on textiles and apparel creates an incentive for circumvention of textile tariff and trade laws. Currently, approximately 20 percent of imported textiles claim preferential duty treatment under one of the trade preference programs. This equates to over \$3 billion in duties. Therefore, the need for continued enforcement is crucial. Additionally, potential new free trade agreements such as the Trans-Pacific Partnership and the Trans-Atlantic Trade and Investment Partnership would ostensibly increase the desire to subvert the terms of these agreements by parties not members of the agreements. As part of the CBP enforcement strategy, OT completed 55 textile-related audits in FY 2014 with recommended recoveries of \$14.5 million, in addition to \$11.2 million in disclosures, penalties and interest.

Total	2009	2010	2011	2012	2013	2014
Assignments Completed	54	41	42	41	47	55
Recommended Recoveries	\$4,956,453	\$4,784,916	\$6,846,268	\$1,467,015	\$7,184,964	\$14,456,179

In addition, OT has established a textile working group that is an inter-disciplinary panel of CBP specialists coordinated through OT headquarters, to identify targets and develop enforcement strategies for textile and apparel importations and issues. OT is also responsible for providing technical advice to U.S Trade Representative (USTR) and other agencies as requested on CBP policy and procedures related to implementing and enforcing trade laws that affect textiles. OT participates in the negotiating rounds of new trade agreements, provides input into formulating the text that pertains to textiles, and ensures that CBP's authority is properly represented in the agreements with respect to textile imports. OT prepares responses to Congressional requests for reports on textile and apparel issues, conducts training, and provides guidance to internal and external stakeholders to ensure uniformity in applying statutory and regulatory requirements relating to trade preference programs.

Import Safety

Today, CBP helps to implement nearly 500 laws and regulations on behalf of 47 federal agencies at the border to ensure the health and safety of American consumers. Since 2008, OT and the Consumer Product Safety Commission (CPSC) have conducted joint product safety audits and inspections to look at an importer's controls over product safety destruction orders and penalty proceedings. While CBP continues to combat import safety risk on a daily basis, FY 2015 will be a critical year for CBP's enforcement efforts to address import safety issues, and CBP will do more in FY 2016 to promote import safety by.

- Leading the implementation of One U.S. Government at the Border and developing efficient and effective processes in concert with CPSC and other partner government agencies involved import safety. CBP is helping lead these efforts through the Border Interagency Executive Council (BIEC), which is also supporting the development of the International Trade Data System (ITDS) single window system;
- Enabling lawful trade and strengthening comprehensive enforcement by integrating capabilities across the Federal enterprise through active, tactical participation of partner government agencies in CBP's Commercial Targeting and Analysis Center (CTAC) and expanding the membership to include additional agencies with critical import safety regulatory authorities. In 2014, the CTAC added the Fish and Wildlife Service, National Marine and Fisheries Service, and the Food and Drug Administration to the CTAC, bringing the total of number of participating government agencies to eleven; and CBP will be working to develop tactical targeting operations with these new agencies in FY 2015.
- Reducing cost and administrative burdens to the trade community by refining partnerships and to create new processes for the regulatory framework.

As illustrated by the following chart, CBP has increased import safety seizures by 23 percent over the past five years.¹⁸

¹⁸ In Fiscal Year 2013, U.S. Customs and Border Protection's import safety seizures declined from the previous year. More than half of the decline can be attributed to a high number of seizures of High Intensity Discharge (HID) automotive headlamps in 2012 (over 1,500) and only 250 seizures of the headlamps in 2013 and an apparent increase in compliance. Another contributing factor to the decline was CBP's change in the definition of "Import Safety" for compiling seizure statistics. In 2012 and prior years, CBP used key words to filter the type of products that were seized and might pose an import safety risk to a consumer. The import safety seizure counts in 2013 reflect a new definition whereby seizures are counted based on specific regulatory statutes directly related to import safety and does not include seizures related to the statutes of other agencies such as APHIS and FSIS. CBP continues to refine this definition to more accurately report import safety seizures. While these two factors contribute significantly to the decline in import seizures, the decline still reflects a notable decrease and CBP will evaluate the decrease against the use of limited resources in meeting competing priorities.

Exhibit 28: Import Safety Seizures¹⁹

Trade Agreements

OT is responsible for providing subject matter expertise to the Office of the United States Trade Representative (USTR) as well as implementing and administering all free trade agreements and other unilateral preference programs, including the development of policy guidance for CBP field offices. USTR is responsible for developing and coordinating U.S. international trade, commodity, and direct investment policy, and overseeing negotiations with other countries. The head of USTR is the U.S. Trade Representative, a Cabinet member who serves as the president's principal trade advisor, negotiator, and spokesperson on trade issues. In FY 2014, Trade Preference Program (including FTA) claims amounted to almost \$657 billion, representing just over 30 percent of all imports for FY 2014. FY 2015 Trade Preference Program (including FTA) claims are projected to be approximately \$700 billion.

The United States currently has free trade agreements with 20 countries and is currently negotiating the Trans-Pacific Partnership Agreement with 11 other countries: Australia, Brunei, Chile, Malaysia, New Zealand, Peru, Singapore, Vietnam, Canada, Mexico, and Japan. In addition, the United States commenced free trade agreement negotiations with the European Union in July 2013 as part of the Transatlantic Trade and Investment Partnership (T-TIIP). As new agreements are negotiated and finalized, it will be paramount to address their complexities in order to minimize any potential loss of revenue.

¹⁹ Estimated figures are used for the future fiscal years.

Description of Select Adjustments to Base:

The Transfer of Funds to Fully Implement the Movement of the Freedom of Information Act (FOIA) and Privacy Functions: This transfer reflects the last of phase of the movement of the FOIA Division of Commercial Targeting and Enforcement as well as the Privacy Branch of Regulations & Rulings, funded by the Inspections, Trade, and Travel Facilitation PPA, from the Office of International to the Office of the Commissioner of CBP (Privacy and Diversity Office), which it is own PPA. Funds will be transferred to support five and thirteen FTEs to perform FOIA and Privacy activities, respectively. To execute this transfer, \$2,502,000 will be realigned from the Inspections, Trade, and Travel Facilitation PPA, to the Office of the Commissioner PPA.

Transfer of Public Affairs Employees: The FY 2013 DHS Appropriations Act (P.L. 113-6) transferred Entry-Exit functions from legacy U.S. VISIT (now Office of Biometric Identity Management) to CBP. All transferring personnel were initially placed in Office of Field Operations with the understanding that, as the Entry-Exit functions were fully incorporated, some individuals would be placed elsewhere. Two such individuals were identified as primarily having performed public outreach duties at U.S. VISIT and were, therefore, most appropriately placed within Office of Public Affairs. Accordingly, in FY2 016 CBP is transferring \$270,000 from the Inspections, Trade, and Travel Facilitation PPA to the Public Affairs PPA for these employees' salaries.

Increased Retirement Contributions: Due to additional changes to long term demographic assumptions recommended by the Board of Actuaries at its meeting on June 18, 2013, agency contribution rates for all FERS participants are expected to increase again on October 1, 2015. The expected increase of FERS contribution rates affect all federal employees at CBP, with a greater impact on agency contributions on behalf of law enforcement personnel. The adjustment to base pension contribution requirements increases CBP's pay estimates in order to account for the increased FERS contribution requirement costs in FY 2016.

Realignment of Mission Support Funding from CBPO Initiative: In FY 2014, Congress enacted appropriations to fund an additional 2,000 CBPOs and other operational and mission support personnel to enhance CBP's ability to facilitate processing of legitimate travelers and cargo, increase the seizures of unlawful items, and help reduce wait times. Funding for the mission support personnel was enacted centrally within the Administration PPA. However, since enactment, CBP has determined the required mix of mission support personnel to best support the additional 2,000 CBPOs. For FY 2016, the funding for the mission support personnel has been realigned to provide funds within the specific PPAs where mission support personnel has increased to support the additional 2,000 CBPOs.

Full Cost Recovery AQI Fee Increase: CBP anticipates receiving an additional \$29.19 million in AQI user fees in FY 2016 due to the annualization of the AQI fee increase in FY 2015. This increase of \$29.19 million will be used to recoup additional agriculture inspection costs incurred in CBP's S&E appropriation in 2016.

MAJOR ACQUISITIONS:

Arrival and Departure Identification Services (ADIS)

Operate and maintain CBP's automated arrival and departure identification services currently provided by the Arrival and Departure Information System (ADIS) at the levels of performance negotiated in the Service Level Agreements.

This project is proposed to be funded out of multiple PPAs in FY 2016, as follows:

- COPPS \$2.122million
- Inspections, Trade, and Travel Facilitation \$26.883 million

FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Funding (\$\$\$ thousands)	FY 2016 Activity Request (\$\$\$ thousands)
17,641	28,966	29,005

FY 2016 Funding Breakout:

Program Area (Funding in \$\$\$ thousands)	Sub-Program	Mission Need
Operations & Maintenance (29,005)	Program/Project Management	Supports the business and administrative planning, organizing, directing, coordination, controlling, and approval actions designated to accomplish overall program objectives.
	Systems Engineering (or Systems Analysis)	Supports technical and management efforts of directing and controlling a totally integrated engineering effort.
	Business Process Re-engineering (BPR) / Change Management	Supports the analysis and re-design of workflows and processes to improve efficiency and reduce cost. Encompasses costs that are not accounted for in program management or systems engineering cost elements.
	Help Desk / Service Desk Support	Includes all personnel costs incurred in order to provide independent user assistance to troubleshoot technical issues, responding to duty officer/customer calls from the field, processing trouble tickets, and completing initial diagnosis of trouble ticket for resolution. Additionally, multiple personnel utilized to meet the required enterprise wide knowledge of datacenter components.
	Central Data Center Operating Support	Supports services received from a data center in support of the systems operations. It includes any data services such as software as a service (SaaS) or migration to a cloud.
	Technology Refresh / Upgrade	Includes the cost of enhancements to the IT system throughout the life cycle. Equipment wear and technological obsolescence results in turnover of equipment every five to ten years. In many cases when hardware changes are made, software is also upgraded to take maximum advantage of the increased hardware capability.
	System Maintenance	Includes cost incurred in providing maintenance and repair for the system hardware and software. This includes costs

		associated with engineering change orders/proposals (ECO/ECP) and related testing incurred after FOC.
	System Documentation & Related Data	Supports the capture of post-FOC costs associated with various system documentation and data requirements, including technical publications, engineering data, management data and support data.
	System Data Maintenance	Includes maintenance costs to keep new system data current. Additionally, includes labor expense to accomplish data maintenance as well as specific supplies consumed during the maintenance of the mission application and standard data.
	Site Operations	Includes personnel costs, as well as, fuel and power requirements, training, communications, facilities maintenance, etc.

	Increased Retirement Contributions	0	0	233
FY 2016 Request		234	224	69,851

CURRENT SERVICES PROGRAM DESCRIPTION:

The International Cargo Screening (ICS) PPA primarily supports OFO and secondarily the Office of International Affairs (INA). ICS enables the implementation of a key part of CBP's layered cargo security strategy by deploying teams of Customs and Border Protection Officers (CBPOs) to foreign seaports. These teams target and examine high-risk cargo before it is laden on vessels bound for the United States. The Container Security Initiative (CSI) inspection activities protect global trade lanes and systems between overseas points of origin and the United States as well as securing the global supply chain. The process enables greater security through collaboration.

The CSI incorporates a hybrid of operational concepts to targeting and inspecting high-risk cargo before reaching a U.S. port. This allows CBP to optimize its resources and efforts to

synchronize, streamline, and advance operations and technology in a more efficient manner with limited resources. The portion of the requested PPA total for OFO is \$62.938 million with 197 FTE; the portion of the requested PPA total for INA is \$6.913 million with 27 FTE.

Exhibit 1: International Cargo Screening FY 2016 Funding Request Breakout

Non-Salary	0	\$33,269	47.63%
Total	234	69,851	100.00%

Office of Field Operations

Container Security Initiative

The CSI program was established in January 2002, and has been part of the government’s layered enforcement strategy to secure the nation from the potential terrorist threat of using maritime cargo containers. CBP has focused substantial attention and resources over the last several years on securing goods being transported within maritime containers. As a result, CBP has strengthened its multi-layered security measures, more effectively securing and facilitating the large volume of goods arriving in the United States each year. Security risks are reduced by leveraging programs such as CSI for the integrated scanning of high-risk cargo, the Customs-Trade Partnership Against Terrorism (C-TPAT), and the Importer Security Filing (often called "10+2") for the advance collection of manifest and import data to enhance targeting. CBP’s layered and risk-based approach provides that, at a minimum, 100 percent of high risk cargo is examined through a number of measures, including screening, scanning, physical inspection, or resolution by foreign authorities. In addition, CBP has strengthened automated targeting systems and enhanced the quality and timeliness of the commercial data upon which those systems rely.

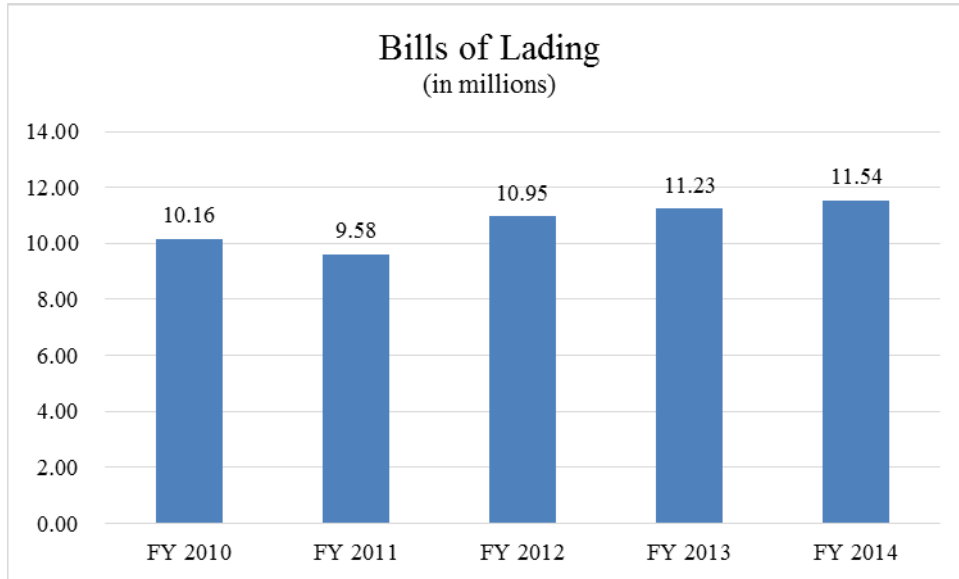

The CSI program continues to foster partnerships with other countries and trading partners to inspect high-risk shipments before they are loaded on vessels bound for the U.S. CBP, through CSI, ensures effective coordination with host countries by conducting periodic risk evaluations of ports to assess the level of staffing and other resource needs. CBP encourages interagency cooperation by developing a capacity to collect and share information and trade data gathered from CSI ports.

Exhibit 2: CSI Ports as of November 2014

Country	City	Country	City	Country	City
Argentina	Buenos Aires	Israel	Ashdod	Panama	Balboa
Australia			Haifa		Colón
Bahamas	Freeport	Italy	Cagliari		Portugal
Belgium	Antwerp		Genoa	Singapore	Sines
	Zeebrugge		Gioia Tauro	South Africa	Singapore

Germany	Bremerhaven		Tanjung Pelepas	United Kingdom	Felixstowe
	Hamburg	New Zealand	Southampton		
Honduras	Port of Cortes	Oman	Port Salalah		Tilbury
Hong Kong	Hong Kong	Pakistan	Qasim		

Using technology to scan high-risk cargo, CSI ensures rapid scanning without impeding the flow of trade. CSI technology includes large-scale X-ray, gamma ray machines, and radiation detection devices.

Exhibit 3: CSI Workload

Cost Avoidance/Workforce Multiplier Impact

The CSI program encourages other governments and provides technical assistance and training to increase their security strategy and awareness. Although the CSI program has been operational for over 10 years, there has never been an instance where a WME/WMD has been detected in a container that has arrived in the U.S. from a CSI port. There are other successes that cannot be directly measured such as cooperation with foreign governments and deterrence. Due to the cooperative implementation of the security strategy, CSI is more efficient and cost effective. By utilizing a variety of CSI models (reciprocal arrangements, remote technology,

Customs Mutual Assistance Agreements, etc.)²⁰ and reorganizing or reducing staff overseas, further cost savings have been achieved while continuing to enhance cooperation with foreign governments.

CSI is a critical component of the overall layered security strategy. In an effort to secure the global supply chain, CBP relies on large scale NII and Radiation Detection Equipment to mitigate high risk cargo and ensure cargo destined for or arriving in the U.S. is safe and secure. CBP examines high-risk cargo from vessels destined for the United States in a foreign port prior to lading. The cost for performing these exams domestically would be approximately \$234 million. Cargo exams conducted in the U.S. can potentially cost from \$2,500 to \$3,000 per exam. Frequently, the U.S. charges a higher rate to perform exams domestically as compared to the charge for the same exams performed at foreign locations, despite the additional costs incurred from CBPOs being stationed at foreign ports. For example, some Asian ports do not pass on the costs for exams to the shipper/importer, while others charge approximately \$1,000 per exam and the examination cost is passed on to the shipper/importer. This cost avoidance by the importer with the same security helps benefit the shipper and expands the security zone abroad.

CSI Operational Models

To maintain a more cost effective screening process, in FY 2016, CSI will continue to evaluate each foreign port and implement a hybrid of different operational models designed around the unique characteristics of each foreign port. Operational models will include traditional inspectional staffing with CBP personnel at foreign ports, remote targeting utilizing hubs in foreign locations, and remote targeting from the National Targeting Center (NTC) with no foreign personnel, reciprocal arrangements, and 100 percent scanning conducted in Pakistan.

In addition, the implementation of hybrid operational models has produced efficiencies that will enable CBP to expand CSI to additional countries and ports of strategic interests within the confines of the budget requested for the International Cargo Inspection PPA.

The following three conditions have and will be used to determine the composition and/or combination of operational models to be deployed at current and future CSI locations:

- Monitor overseas deployments and ensure that the proper numbers of personnel are stationed at each foreign port where the traditional inspectional model is utilized;

²⁰ CBP uses reciprocal arrangements to establish a framework with a CSI host country to exchange information in a way that is beneficial to both parties. CBP has also effectively managed remote technology to maximize program efficiencies while controlling costs. In addition, CBP has used CMAAs to provide the legal framework for the exchange of information and evidence to assist countries in the prevention, detection, and investigation of customs offenses and crimes associated with goods crossing international borders. In FY 2013, CBP combined the statistics of CSI and the Secure Freight Initiative (SFI) into one report and included the 100 percent scanning efforts in Pakistan as another operational model under CSI rather than report separately under the former SFI program.

- Maintain optimum staffing levels at the NTC to augment targeting at foreign ports to ensure 100 percent review of all shipments prior to lading on a vessel destined to the U.S.; and
- Expand targeting beyond the traditional weapons of mass effect to include other violations that fund terrorism or trans-national criminal activity such as trade violations, narcotic, pre-cursor chemicals, dual use technology, and money laundering.

Secure Freight Initiative

SFI was established to test the feasibility of scanning 100 percent of all containers destined for the United States using RPMs and NII scanners as well as implement the Importer Security Filing (10+2). Currently Qasim, Pakistan, is the only port conducting 100 percent scanning and the Importer Security Filing initiative has been moved to Cargo Control within OFO's Cargo and Conveyance Security. Currently 100 percent scanning is considered one of the operational models of CSI and statistics are included under CSI.

Office of International Affairs

Overseas Program

This PPA includes the portion of the Overseas Program that specifically supports CSI and SFI. Attachés provide support to multiple overseas programs, including, but not limited to, CSI and SFI.

CBP Attachés perform the following duties in support of international cargo screening:

- Serve as liaisons to other U.S. government agencies and host government authorities on cargo security matters of interest for CBP; and
- Provide support for all CBP personnel and programs in foreign locations, including CSI, SFI, and capacity building efforts.

CBP Attachés provided international engagement services that facilitated CBP achieving 75% of its FY 2014 FYSHP "Securing America's Borders" Government Performance Results Act (GPRA) measures by the end of FY 2014.

The partnerships with foreign governments/agencies, international organizations, and U.S. agencies supported by CBP Attachés enhance CBP's ability to mitigate and avoid risks related to cargo security, and trade enforcement. More concretely, the Attachés foment strong relationships with CSI and SFI host government officials and allow CBP to facilitate customs reform and modernization through training and technical assistance. These partnerships also facilitate information-sharing with a focus on areas of mutual interest to both CBP and its foreign counterparts, such as preventing, detecting, and interdicting illegal shipments.

Description of Select Adjustments to Base

Increased Retirement Contributions: Due to additional changes to long term demographic assumptions recommended by the Board of Actuaries at its meeting on June 18, 2013, agency contribution rates for all FERS participants are expected to increase again on October 1, 2015. The expected increase of FERS contribution rates affect all federal employees at CBP, with a greater impact on agency contributions on behalf of law enforcement personnel. The adjustment to base pension contribution requirements increases CBP's pay estimates in order to account for the increased FERS contribution requirement costs in FY 2016.

FY 2016 Request		123	118	24,935

CURRENT SERVICES PROGRAM DESCRIPTION:

The Other International Programs PPA supports CBP's international mission of securing the global supply chain and the global travel network. These efforts require that CBP coordinate its efforts with the private sector, foreign governments, and other federal agencies. Establishing relationships and building capacity at the international level allows CBP to identify, intercept, and neutralize threats to the United States before they reach U.S. borders. CBP implements these international programs through the Office of International Affairs (INA), which leads the CBP's overseas efforts through its two operations, International Partnership Programs and the Overseas Program.

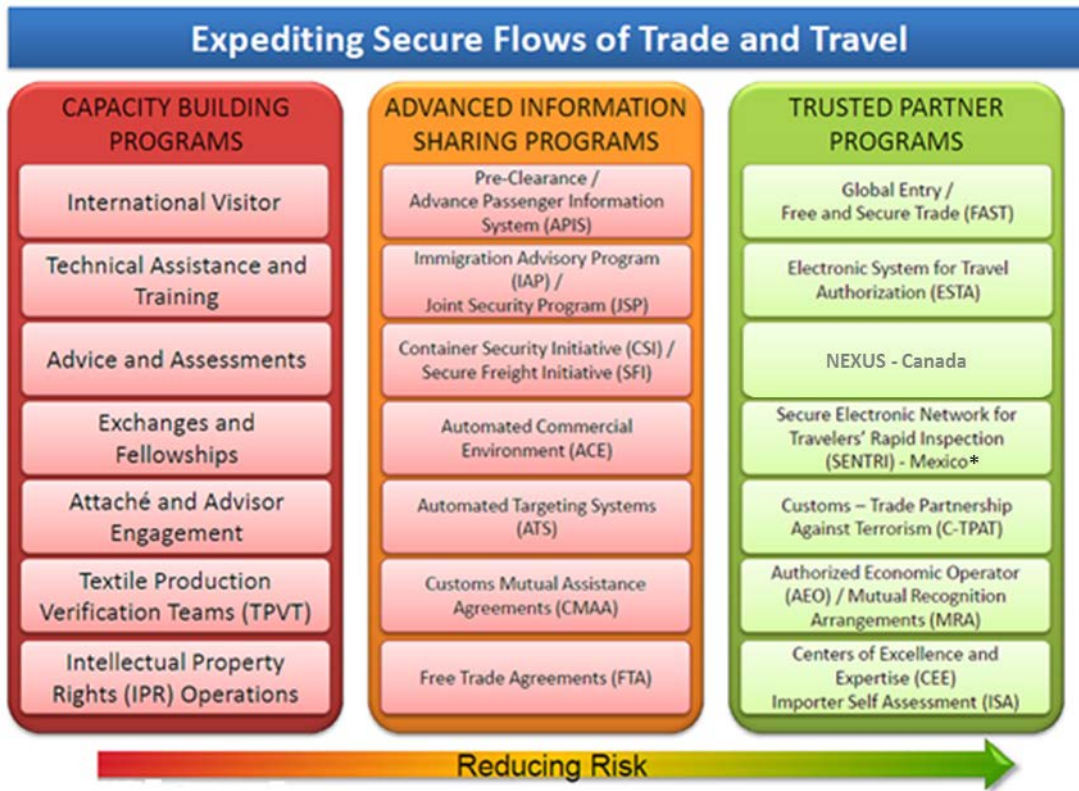

Exhibit 1: Other International Programs FY 2016 Funding Request Breakout

Other International Programs	FY 2016 Positions	FY 2016 Request (\$000)	% of Total
CBP Officer	15	\$2,757	11.06%
Border Patrol Agent	10	\$1,838	7.37%
Other Salary	98	\$17,451	69.99%
Non-Salary	0	\$2,889	11.59%
Total	123	24,935	100.00%

*FY 2016 Salary & Benefits costs for Locally-Employed Staff (LES) at overseas locations is \$1.650 million.

The following flow chart illustrates how CBP, through its international programs, creates, and fosters these relationships, which provide for the secure flow of people and cargo across U.S. borders. CBP international programs are critical to the success of these efforts by building and maintaining the relationships with these entities that make possible crucial CBP programs, such as the Electronic System for Travel Authorization (ESTA), Global Entry, the Automated Commercial Environment (ACE), the Immigration Advisory Program (IAP), and the Customs – Trade Partnership Against Terrorism (C-TPAT), as well as White House priorities, such as free trade agreements and operations related to intellectual property rights.

Exhibit 2: INA Trade & Travel Facilitation

*Though SENTRI is a unilateral program, it is an element of enhanced cooperative efforts with the Government of Mexico which INA facilitates.

CBP focuses on building a foundation with capacity building and target-training programs in countries where we perceive there is a high risk due to limited detection and targeting infrastructure. Once these efforts have been completed and a given country has established satisfactory security infrastructure, CBP will engage in more advanced information sharing programs with that particular nation. In countries that have completed these programs, or that already have a long-standing relationship with the United States, CBP focuses on implementing Trusted Partner Programs.

International Partnership Programs

Multilateral Engagement

On behalf of CBP, INA participates in a number of international fora, including, but not limited to, the Asia-Pacific Economic Cooperation, the Five Country Conference, the World Customs Organization and the Proliferation Security Initiative. The key CBP objectives for this engagement include developing, promoting, and implementing CBP's international strategy; advancing CBP's international policy initiatives in international forums; and developing and maintaining strategic international relationships.

The Asia-Pacific Economic Cooperation (APEC) is an intergovernmental grouping of 21 member economies which seeks to develop and strengthen trade, increase prosperity, and promote sustainable economic growth in the Asia-Pacific region. While the Department of State is the USG lead to APEC, CBP is the USG lead for two sub-fora, the Sub-Committee on Customs Procedures (SCCP) and the Business Mobility Group (BMG). The SCCP is the primary arena in which customs matters are discussed. Of key interest to CBP are (1) supply chain security (2) single window development (3) implementation of the Trade Facilitation Agreement (4) continued leadership on Trade Recovery initiatives and (5) AEO. Additionally, the U.S. facilitates a Virtual Work Group with the private sector to encourage transparency and a mechanism for private sector input into the SCCP priorities. The BMG focuses on facilitating the secure travel of business people in the APEC region. CBP/INA is the USG lead representative to the BMG sub-fora. INA is leading work on travel facilitation items (trusted traveler and advance passenger information) as well as representing U.S. interests with regard to the APEC Business Travel Card (ABTC). CBP implemented the requirements of the *United States Asian Pacific Economic Cooperation Business Travel Card (US ABTC) Act* of 2011 and is issuing US ABTCs to eligible persons. CBP/INA ensures that BMG decisions on the international ABTC program are in-line with CBP and U.S. policies.

The Five Country Conference is a multilateral forum including Australia, Canada, New Zealand, the United Kingdom, and the United States. It was designed to discuss and advance immigration issues of mutual interest. CBP is involved in the travel facilitation discussions.

The World Customs Organization (WCO) is an independent intergovernmental body whose mission is to enhance the effectiveness and efficiency of Customs administrations. The WCO has 179 Members who account for 98 percent of global trade. The WCO is governed by a Council with representation by the Directors General of the Member Customs Administrations. Through the CBP Commissioner's participation in the Council Session, and the work of INA staff in WCO committee meetings throughout the year, CBP maintains a strong footprint and strong influence in the organization. This engagement allows CBP to promote its own supply chain security and trade facilitation best practices as global practices. In the coming years, focus will continue on Single Window development, partnership with stakeholders (including the private sector, other government agencies, and other international organizations), data harmonization, capacity building and enforcement issues.

The Proliferation Security Initiative (PSI) is a global initiative to combat the threat of weapons of mass destruction, their delivery systems, and related materials to and from state and non-state actors of proliferation concern. CBP partners with other USG agencies and over 100 PSI-endorsing countries around the globe to ensure that Customs authorities remain engaged in counter-proliferation activities such as the identification, inspection, seizure and disposition of illicit WMD-related materials and meaningful transshipment controls.

Bilateral Engagement

Preclearance airport operations are currently present in 16 locations in Canada, the Caribbean, Ireland, UAE, and Abu Dhabi. Based upon security, operational, and economic benefits for

international partners, air carriers, and the United States, expansion of preclearance to new locations is an overall sound strategy. Expansion of preclearance assists DHS and CBP by “pushing out its border” while also being a facilitation of legitimate travel and tourism from host countries to the United States.

CBP Attaches support the CBP mission worldwide, and foreign governments benefit by having in-country expertise to bring about improved international supply chain security, expanded cargo security awareness and expediting the legitimate flow of passengers and cargo between countries. In Canada for example, the CBP Attaché Office contributed significantly to the two following programs from the President’s Beyond the Border Initiative:

- Trusted trader program: CBP and Canada Border Service Agency (CBSA) now have a harmonized process that allows a new highway carrier applicant applying to one program Customs Trade Partnership Against Terrorism (C-TPAT) or CBSA’s Partners in Protection (PIP) to join the other program without having to fill out an additional application. A harmonized process for selected PIP or C-TPAT participants went into effect June 2013 where members now enjoy a seamless, single application and easy enrollment into the program they are not currently in.
- Cargo pre-inspection: Customs and Border Protection (CBP) has operated Phase II of the Cargo Pre-Inspection Pilot since February 18, 2014. The stated objective of Phase II is to test the feasibility of reducing wait times and border congestion to facilitate legitimate trade by conducting United States primary inspection of cargo in Canada. In the first four months, CBP processed 27,842 eligible trucks which represents 35 percent of the traffic during operational hours (Monday – Thursday, 8am – 4pm) and has tested all operational facets of the pilot.
 - Due to a number of factors, including the removal of cash collections from primary operations, improved network connectivity via fiber optic lines, and reduced post primary congestion, pre-inspected trucks are being processed 29 seconds faster per truck than in a domestic lane. If applied to current CBP operations in the United States, these factors, which are not limited or attributed to Pre-Inspection itself, would result in increased throughput and reduced wait times at all CBP land border ports of entry.
 - The collaboration between CBP, CBSA, and the Niagara Regional Police Service has been positive with no issues to report.
 - No complaints have been received from stakeholders regarding the pilot.

The NEXUS program helps facilitate travel while promoting security. The NEXUS program enhances the security of the United States and Canada based on the fact the enrolled members submit their information in advance of applying for entry. Therefore, border security agencies are able to make informed decisions on the level of risk posed by potential applicants. In return for providing information, and submitting to vetting in advance, NEXUS members are afforded expedited clearance at the border, through use of special lanes and reduced questioning.

Only trusted traders participating in CBP’s Free and Secure Trade (FAST) program will be eligible to use the dedicated CBP pre-inspection commercial primary booth located on the Canadian side of the border. Participation is not mandatory. Pre-inspection in Canada will

include radiation screening and basic primary processing. Secondary inspections, when required, will continue in the POE.

Additionally, CBP works closely with the Departments of State and Defense in our capacity building efforts. CBP/INA identifies, develops, implements, and coordinates specialized training and developmental assistance programs for foreign customs and other law enforcement officials and organizations. INA further provides in-country training and advisory support teams for broad-based customs reform and modernization of the customs services provided by the host country which ensures CBP, and thus the United States, are represented at overseas posts and can influence and enforce trade and travel policies throughout the world.

As an example, in Central America, CBP partners with the Department of State to coordinate the placement of Advisors and deliver trainings:

- Placement of CBP Advisors in Honduras to facilitate mobile interdiction checkpoint efforts. Advisors work with USG and foreign government counterparts to develop initiatives aimed at stemming the flow of unaccompanied children (UCs);
- Placement of long-term CBP presence in Costa Rica to assist with further development of Costa Rica Border Police's (CRBP) border management capabilities;
- Training courses in Panama planned for FY 2016:
 - Basic Immigration Enforcement Officer Academy;
 - Customs Mobile Enforcement Team Training;
 - Airport Interdiction Course;
 - Basic Customs Course;
 - Search and Rescue (SAR) Course; and
 - Border Tactical Police.
- CBP also anticipates conducting commercial trade training focusing on customs procedures and trade facilitation, coordinated border management, automation, and specific trade agreement issues, as well as more traditional subjects such as risk analysis and targeting, customs valuation, importer audit, and classification; and
- CBP also conducts commercial training and assistance needs assessments of foreign customs administrations and provides advisory services as well as training where there is a significant need for commercial-based technical assistance.

Finally, CBP develops international agreements and arrangements with foreign partners as the first step in any exchange of information.

	Mexico	October 17, 2014

In addition to their utility with regard to trusted trader programs, MRAs serve to implement a larger National Strategy for Global Supply Chain Security put forward by President Obama in 2012. Part of that strategy focuses on trade resilience in the event of a disruption in trade due to a natural or man-made event. In line with the strategy, CBP has developed trade recovery guidelines that have been adopted by ICAO, the WCO, and APEC. In addition, CBP is now in discussions to create the first trade recovery arrangement (TRA). These arrangements would allow CBP and other customs administrations to resume trade as seamlessly and efficiently as possible after an event that disrupts trade.

Many foreign governments begin with establishing capacity building programs with the United States before entering into an agreement with CBP, such as a Customs Mutual Assistance

Agreement (CMAA). CMAAs provide the legal framework for the exchange of information and evidence to assist countries in the prevention, detection, and investigation of customs offenses and crimes associated with goods crossing international borders, including duty evasion, trafficking, proliferation, money laundering, and terrorism-related activities. CMAAs also serve as foundational documents for subsequent information sharing arrangements, including the sharing of customs administration best practices, embedding of personnel internationally, training and capacity building, and mutual recognition arrangements on authorized economic operator programs.

The CMAA is one of the key foundational milestones that further initiatives can be built upon, such as CBP “trusted partner” programs and other advanced programs. The United States has seventy-one (71) CMAAs with partner customs administrations across the world, and seeks to achieve additional international CMAA partners.

As the chart below illustrates, INA completed eleven international agreements and arrangements in FY 2014, and plans to further increase international agreements and arrangements in the coming fiscal years with eleven in FY 2015 and eleven in FY 2016.

Exhibit 5: Completed International Agreements and Arrangement

Fiscal Year	Completed International Agreements and Arrangements
2013	6
2014	11
2015	11 (expected)
2016	11 (expected)

Overseas Program

The Overseas Program operates CBP programs and activities overseas that secure U.S. interests abroad, while also facilitating lawful trade, travel, and immigration. To meet these goals, CBP Attachés:

- Serve as the primary representatives of the CBP Commissioner in-country, informing the U.S. ambassador or consular officer at post about CBP programs and capabilities;
- Serve as liaisons to other U.S. government agencies and host government authorities on any and all matters of interest to CBP;
- Provide support CBP personnel and programs in-country, including the IAP, C-TPAT, and capacity building efforts; and
- Handle inquiries and requests for CBP assistance from the trade industry and the traveling public, including on issues such as intellectual property rights, transportation letters, mala fide intercepts, and fraudulent documents.

Exhibit 5 and Exhibit 6 capture the daily operational workload and outreach activities performed by the CBP Attaches from FY 12 through FY 14. Exhibit 7 represents a more comprehensive view of operational workload and activities performed by the CBP Attaches.

Exhibit 6: CBP Attaché Workload

The CBP Overseas Program is composed of Attaché offices located in U.S. Embassies and Consulates in 22 countries and Hong Kong. Office locations are selected to *concentrate on countries and regions of high geo-political and commercial value to the United States* (see the following map).

Exhibit 9: FY 2016 CBP Attaché Office Locations

Canberra	Australia	Hong Kong	China	Nairobi	Kenya	Johannesburg	South Africa
Brussels	Belgium (EU)	Santo Domingo	Dominican Republic	Seoul	Korea	Bangkok	Thailand
Brasilia	Brazil	Cairo	Egypt	Mexico City	Mexico	Ankara	Turkey
Nassau	Bahamas	Frankfurt	Germany	The Hague	Netherlands	London	United Kingdom
Ottawa	Canada	Rome	Italy	Panama City	Panama	Abu Dhabi	UAE
Beijing	China	Tokyo	Japan	Singapore City	Singapore		

A regional strategy allows CBP to better leverage relationships in the region, cultivate regional expertise in headquarters, and realize efficiencies and savings through a more coordinated regional capacity building, targeting centers, and trade transformation efforts. The regional approach better aligns with CBP’s goals by focusing on activities that build foreign relationships, enhance commercial opportunities, secure more opportunities to exchange information, and increase CBP capacity to detect and interdict threats from abroad.

INA’s regional engagement is divided into 6 regions: Europe, Africa, Asia Pacific, the Middle East, North America and the Latin America/Caribbean. INA will support CBP goals for each

region by focusing on activities in FY 2016 that will build foreign relationships, enhance commercial opportunities, secure more opportunities to exchange information, and increase CBP capacity to detect and interdict threats from abroad.

Africa

Africa, particularly the regions of North Africa, the Sahel, East Africa, West Africa, and Southern Africa are critical parts of the CBP international strategy due to the emerging threats of international terrorism and transnational criminal organizations operating on the continent. In addition, Africa's energy resources and strategic commodities are critical to U.S. economic security. The greatest threat to the United States from border security perspective stems from terrorism including:

- Al-Qaeda and its affiliates
- proliferation of weapons such as MANPADS and IED components

A secondary concern involves the threat of transnational criminal organizations, which seek to exploit vulnerabilities in government institutions. These include:

- Cocaine from the Western Hemisphere trafficked to Europe transiting Africa
- Bulk cash smuggling flows between Western Hemisphere-Africa-Europe and Western Hemisphere-Africa-Asia
- Heroin smuggling from Asia transiting Africa to the Western Hemisphere

Asia

Asia, particularly the regions of Northeast Asia, South Asia, Southeast Asia, and Oceania are critical parts of the CBP international strategy based on their widely varied ability to ensure the safe movement of people, cargo, and services in a global economy dependent on facilitation of safe and secure trade. Some of the most significant challenges in the Asia Pacific region include low-level, yet persistent terrorist threats, illegal immigration and human smuggling, transnational organized crime, violent extremists, smuggling of illicit goods, corruption that adversely subverts the rule of law, natural disasters, and cyber security. Therefore, CBP must build partnerships and information sharing agreements to foster international cooperation, promote the adoption of compatible standards and approaches to homeland security issues, and reinforce security measures that thwart fraud, counterfeiting, and illegal trafficking of persons, goods, financial instruments, weapons, narcotics, and other contraband. The critical dilemma continues to be to protect against cross-border threats to health, food agriculture, and the environment, while ensuring that the U.S. remains welcoming to legitimate international trade, travelers, and migrants.

Europe

Europe, particularly the regions (or countries) of Western Europe, Central Europe, Southeastern Europe, the Balkans, Turkey, the Caucasus, and Russia present salient border security threats to the United States and opportunities for further collaboration between CBP and law enforcement partners in host countries. Major threats to the United States from Europe includes terrorism,

and most importantly the transit of foreign fighters to the conflict in Syria. This is compounded as the European Foreign fighters have access to the U.S. visa waiver process. American and European foreign fighters are the greatest threat to U.S. security for the foreseeable future. The situation is made even more difficult because of European data protection laws and the backlash from the Snowden case. These threats directly relate to issues with transnational criminal organizations, illegal migration, drug trafficking, and intellectual property rights (IPR) violations in both regions. Europe provides links to a large amount of CBP's established foreign partners while being a source of terrorist, law enforcement, trade, and immigration risks. The ease of travel for persons possessing European residence and travel documents due to the visa-free travel privileges make the documents prize possessions among terrorists, organized criminals, and illegal migrants. CBP thus seeks to expand and strengthen partnerships while improving strategic global situational awareness to respond to emerging threats.

North America

The North America region, which focuses on Mexico and Canada, is a special focus for CBP given the proximate location to the U.S. border. CBP works with Canada and Mexico to collaboratively assess and respond to common threats that, if allowed to enter North America, could easily cross our mutual land borders. In addition, CBP works with our North American partners to target transnational criminal or terrorist organizations, reduce illegal immigration, smuggling, and trafficking, address potential mass migration issues and other hemispheric threats, and re-invent our mutual land borders to both improve security and facilitate the lawful movement of cross-border travel and commerce.

Middle East

The Middle East region is a critical part of the CBP international strategy in the face of continuing volatility along with the emerging threats of international terrorism and transnational criminal organizations operating the region. With the Middle East energy resources and its strategic location, it is critical to U.S. national and economic security. CBP's regional breakdown consists of three sections: the Arabian Peninsula, the Levant, and Reconstruction programs. The INA goals in the region are directly aligned with the CBP/ DHS goals to identify threats to the United States before they reach our shores. The primary threat to the United States in the Middle East from a border security perspective is terrorism. Sponsoring of terrorism and the presence of Al-Qaida is a major threat to the region. Al-Qaida has taken part in attacks in many of the countries and continues with the intent of spreading its radical ideology in neighboring countries. Transnational crime and trade violations are secondary concerns.

Latin America and Caribbean

The Latin American and Caribbean regions are critical when it comes to CBP's international strategy. Significant drug trafficking occurs through this area and illegal immigration has increased dramatically. There is rising concern that Special Interest Aliens and perilous cargo may flow through the constantly evolving pathways in this area for drugs and illegal immigration to the United States. Often, there are insufficient customs and border security in this region, and

many countries lack the resources to effectively secure their borders. Many lack the infrastructure and political will to effectively apply resources to these problems. The primary threat to the United States in the Western Hemisphere from a border security perspective is transnational crime, including:

- Illegal drug trafficking;
- Transit of aliens from Special Interest Countries; and
- Human trafficking.

A secondary concern involves commercial and trade-related fraud that could cause harm to the region's economic environment. These include: Non-compliance with Free Trade Agreements (FTA), specifically in the textile industry.

Description of Select Adjustments to Base

Increased Retirement Contributions: Due to additional changes to long term demographic assumptions recommended by the Board of Actuaries at its meeting on June 18, 2013, agency contribution rates for all FERS participants are expected to increase again on October 1, 2015. The expected increase of FERS contribution rates affect all federal employees at CBP, with a greater impact on agency contributions on behalf of law enforcement personnel. The adjustment to base pension contribution requirements increases CBP's pay estimates in order to account for the increased FERS contribution requirement costs in FY 2016.

Adjustment to Base Pay Requirements: CBP is managing its workforce to best support our frontline and mission-critical needs. The adjustment to base pay requirements includes salary dollars to maintain staffing in the critical support areas. This adjustment will enable CBP to sustain mission support positions and ensure that CBP's uniformed staff are not reassigned to support activities and remain dedicated to frontline mission priorities.=-

Full Cost Recovery AQI Fee Increase: CBP anticipates receiving an additional \$29.19 million in AQI user fees in FY 2016 due to the annualization of the AQI fee increase in FY 2015. This increase of \$29.19 million will be used to recoup additional agriculture inspection costs incurred in CBP's S&E appropriation in 2016.

	Increased Retirement Contributions	0	0	205
FY 2016 Request		127	123	41,420

CURRENT SERVICES PROGRAM DESCRIPTION:

C-TPAT is CBP's flagship customs-business partnership program safeguarding the world's trade industry from terrorists and weapons of mass effect and maintaining the economic health of the U.S. and its neighbors. Started in November 2001 with just seven major importers, as of November 1, 2014, C-TPAT boasted over 10,854 members, which include importers, U.S./Canada highway carriers, U.S./Mexico highway carriers, rail and sea carriers, licensed U.S. customs brokers, U.S. marine port authority terminal operators, freight consolidators, ocean transportation intermediaries, Mexican and Canadian manufacturers, and Mexican long-haul carriers.

C-TPAT is part of CBP's layered security approach. By extending the U.S. zone of security to the point of origin, the customs-trade partnership allows for better risk assessment and targeting, resulting in allocation of inspectional resources to more questionable high risk shipments. C-TPAT continues to afford tangible trade facilitation benefits to C-TPAT members in light of their

demonstrated commitment to adopt stronger security practices throughout their international supply chains.

The C-TPAT program has indicated since its inception that C-TPAT importers are four to six times less likely to incur a security or compliance examination. To understand the scope of this benefit it is important to understand the extent to which CBP examination rates have increased since 2001. In 2014, our most trusted partners, C-TPAT importers at the Tier III level²¹, were nine times less likely to undergo a security examination than non-C-TPAT members. In 2009, CBP asked the Center for Survey Research at the University of Virginia to conduct a cost-benefit survey of C-TPAT partners. Overall, 42.1 percent of businesses reported that the benefits of C-TPAT participation outweighed the costs, and 25 percent said the costs and benefits were about the same.

The greatest tangible benefits of C-TPAT include improvements in the field of workforce security, decreased time to release cargo by CBP, reduced time in CBP inspection lines, and increased predictability in moving goods. Importers also identified a decrease in disruptions to the supply chain. For highway carriers, the major impact has been a decline in their wait times at the borders, as C-TPAT highway carriers are eligible to use the FAST lanes.

The C-TPAT program completed a Cost and Savings Survey in 2010 which found that the value of C-TPAT membership goes beyond dollars and cents. It includes risk avoidance, a communal approach to a safer supply chain, being able to compete for contracts that require C-TPAT membership, and taking advantage of the credibility that C-TPAT membership brings.

CBP worked closely with logistics and trade security experts to create the C-TPAT minimum-security criteria (MSC). The MSC are a set of security procedures designed to harden a member's supply chain that is documented, transparent, secure, and optimized to prevent a supply chain breach. The criteria are flexible, allowing for different business sizes/models to participate in the program. Supply Chain Security Specialist (SCSS) and C-TPAT participants jointly validate security measures and procedures documented in the Supply Chain Security Profile. In exchange for meeting the established security criteria, members receive incentives and benefits such as expedited processing, lower risk scores, and use of the FAST lanes. Exhibit 1 shows the FY 2016 funding request breakout and Exhibit 2 shows the flow of cargo through the C-TPAT supply chain conveyance process.

²¹ Importers participating in C-TPAT receive benefits on a three-tiered basis, depending on validation of their security practices. Tier I importers have been certified to be part of C-TPAT but their security practices have not been verified yet. Tier II and III importers have met and exceeded C-TPAT security criteria, respectively

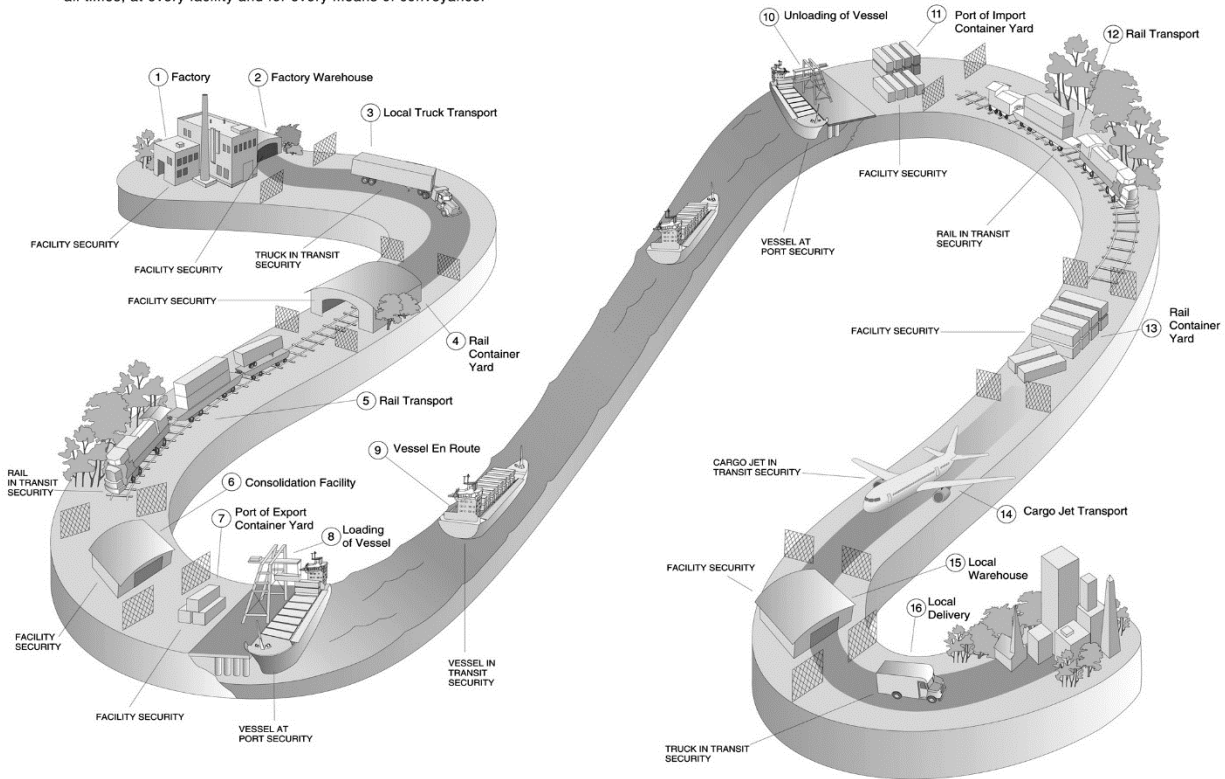

Exhibit 1: C-TPAT FY 2016 Funding Request Breakout

Customs-Trade Partnership Against Terrorism (C-TPAT)	FY 2016 Positions	FY 2016 Request (\$000)	% of Total
CBP Officer	3	\$478	1.15%
Other Salary	124	\$30,165	72.83%
Non-Salary	0	\$10,777	26.02%
Total	127	41,420	100.00%

Exhibit 2: C-TPAT Cargo Supply Chain Conveyance Process

SECURITY AND THE SUPPLY CHAIN

Securing the supply chain means providing appropriate security at all times, at every facility and for every means of conveyance.

In 2005 the World Customs Organization adopted a security framework pillar from the C-TPAT MSC. Other international Customs organizations are now adopting this framework as part of their Authorized Economic Operator (AEO) program. Customs organizations must have a security component, based upon MSC, to enter into a Mutual Recognition Arrangement (MRA) with the U.S. The C-TPAT Program coordinates and provides training to foreign programs during regular foreign validation schedules and capacity building training missions upon request.

In FY 2014, C-TPAT, with the support and agreement of the Advisory Committee on Commercial Operations (COAC), initiated the Exporter entity for C-TPAT in support of the President’s National Strategy for Global Supply Chain Security and the President’s National Export Initiative. The launch of this new entity will lead to an increase in domestic validation visits for the C-TPAT program. This initiative will provide additional benefits to U.S. exporters when exporting goods from the U.S. and at foreign locations through expedited clearance in countries where CBP has achieved MRA.

In FY 2014, C-TPAT completed over 2,200 validations and conducted 2,337 on-site visits (1,747 foreign and 546 domestic). Exhibit 3 shows the FY 2008 to FY 2014 C-TPAT membership. The number of C-TPAT members has increased by over 17 percent. C-TPAT has completed over 26,000 validations worldwide (12,687 initial and 13,559 revalidations). C-TPAT revalidations are now eclipsing initial validations which demonstrates a strong commitment to membership in the program.

Exhibit 3: C-TPAT Membership from FY 2004 - FY 2014

CBP is harmonizing existing trusted trader programs (C-TPAT/supply chain security and Importer Self-Assessment/trade compliance). This approach will increase efficiencies for CBP, partner agencies, trade, and foreign partners, while further aligning with the World Customs Organization Framework of Standards to Secure and Facilitate Global Trade.

Cost Savings/Efficiencies/ Workforce Multiplier Effect

The C-TPAT program covers over 50 percent of the value and volume of cargo entering the U.S. commerce via supply chains. Since C-TPAT importers are four to six times less likely to undergo security related examinations, CBP can redirect resources to high risk cargo. Additionally, containers inspected from trusted partners who participate in this trade-focused initiative are seven times less likely to undergo resource-intensive secondary examinations and benefit from reduced transaction costs. Without C-TPAT, there would be a negative ripple effect in the layered enforcement strategy resulting in increased workloads for the other components, consequently requiring additional spending for staff and/or overtime to manage the increased number of non-certified supply chains.

C-TPAT complements other efforts such as NII and CSI. To continue the current success rate of the C-TPAT program and maintain secure facilitation of the flow of goods into the United States, CBP will:

- Ensure that existing and new C-TPAT partners fulfill their commitments by verifying that agreed upon security measures have been implemented²²;
- Work with C-TPAT partners and COAC to finalize minimum applicable supply chain security criteria and security best practices;
- Send C-TPAT teams around the globe to visit partners, their vendors, and vendors' plants to validate that supply chain security meets C-TPAT minimum security criteria. The teams also ensure that best practices and procedures used are reliable, accurate, effective, and meet the agreed upon security standards; and
- Provide tools and create incentives for the private sector to join C-TPAT, which is a prerequisite for the FAST program, other CBP expedited processing programs, and partner government agency programs such as the FDA Pharmaceuticals Secure Supply Chain Pilot.

As a result of C-TPAT's approach to global supply chain and in conjunction with the WCO, several countries have established their own customs-business partnership programs known as Authorized Economic Operator (AEO) programs.

CBP has signed nine²³ MRAs. The essential concept of mutual recognition is that C-TPAT and the foreign program have established a standard set of security requirements which allows one business partnership security program to recognize the validation findings of the other program. This leads to a series of benefits to both customs administrations and to the private sector participants. An additional benefit will be that a foreign site visit will not be required by C-TPAT and CBP will be able to allocate those resources towards higher risk areas.

²² The *Security and Accountability for Every Port Act of 2006 (P.L. 109-347)* provides the statutory framework for the C-TPAT program and imposes strict oversight requirements.

²³ The first MRA was signed with New Zealand in 2007. The others were signed as follows: Canada (2008), Jordan (2008), Japan (2009), Korea (2010), EU (2012), Taiwan (2012), Israel (2014), and Mexico (2014).

Exhibit 4: C-TPAT Site Visits

Additionally, C-TPAT has been working with other government agencies to streamline trusted trader programs and to identify overlaps in efforts, which could produce potential efficiencies for all departments. Specifically, during the past year C-TPAT conducted a joint pilot with the Transportation Security Administration’s Office of Global Strategies. C-TPAT has also consulted with the Department of Commerce, U.S. Coast Guard, the Food and Drug Administration, and the U.S. Department of Agriculture to further streamline trusted trader programs. Similar to the MRA, streamlining trusted trader programs will provide additional benefit to the trade community as fewer validation visits are required and government agencies will be able to allocate resources to areas with higher risk.

Description of Select Adjustments to Base

Increased Retirement Contributions: Due to additional changes to long term demographic assumptions recommended by the Board of Actuaries at its meeting on June 18, 2013, agency contribution rates for all FERS participants are expected to increase again on October 1, 2015. The expected increase of FERS contribution rates affect all federal employees at CBP, with a greater impact on agency contributions on behalf of law enforcement personnel. The adjustment to base pension contribution requirements increases CBP’s pay estimates in order to account for the increased FERS contribution requirement costs in FY 2016.

CBP requests \$5.811 million in FY 2016 for the Trusted Traveler Programs (TTP) PPA.

Trusted Traveler Programs (TTP)		Positions	FTE	Budget (\$ in Thousands)
Base	FY 2015 President's Budget	0	0	\$5,811
FY 2016 Request		0	0	5,811

CURRENT SERVICES PROGRAM DESCRIPTION:

The Trusted Traveler Programs PPA supports the operations and maintenance of critical Pre-Arrival Processing activities. These activities are comprised of the following programs: NEXUS, SENTRI, FAST, and Global Entry (GE). The TTP are funded with a combination of Salaries and Expenses and user fees. For more information on the GE program, please refer to user fee justifications. The TTPs allow pre-vetted, low-risk designated travelers to use expedited entry processes such as kiosks and special lanes, which in turn allows CBPO to focus more effort on targeting, screening, and apprehension of high-risk international travelers, thereby preventing terrorist attacks and criminal activity, while expediting processing of legitimate travelers.

Trusted Traveler Programs are predicated on the thorough vetting of travelers who have voluntarily applied for membership, paid an enrollment/application fee, and provided personal data (including biographic information, photos, and fingerprints) to CBP, who then performs rigorous background checks. Individuals joining Global Entry through a CBP arrangement with their country of citizenship must successfully pass vetting conducted by their home government based on a mutually identified vetting standard.

Trusted Traveler Programs

TTP help to identify low-risk, vetted travelers by the voluntary submission of an application and subsequent vetting using automated name and fingerprint-based checks of law enforcement databases and an interview with a uniformed officer. The TTP continue to expand in FY 2014. As of September 30, 2014, Trusted Traveler Programs had a total of 3,250,201 members. Currently, TTP are comprised of four programs NEXUS, SENTRI, FAST, and GE that are discussed below.

Exhibit 1: Trusted Traveler Program Enrollments FY 2013 - FY 2016

	FY 2013	FY 2014	FY 2015 Projected Membership	FY 2016 Projected Membership
NEXUS	900,499	1,079,361	1,200,000	1,300,000
SENTRI	357,731	397,756	420,000	435,000
FAST	77,484	80,183	81,000	82,000
GE	981,213	1,692,901	2,200,000	2,500,000
Totals	2,316,927	3,250,201	3,901,000	4,317,000

Trusted Traveler Programs membership has significantly increased for the NEXUS, SENTRI, and GE programs. The NEXUS membership increase is due to the Beyond the Border initiatives involving increased outreach and its blitz operations (Enrollment Center blitzes and mobile enrollment blitzes) resulting in a 20 percent membership expansion in FY 2014. The SENTRI program has seen an 11.2 percent membership expansion in FY 2014. The GE membership increased 81 percent in FY 2014.

NEXUS

NEXUS, a joint U.S./Canada enrollment program at northern border land POEs and at all Canadian preclearance ports, identifies low-risk travelers through a complete biographic check, an interview with a CBPO and a Canada Border Services Agency (CBSA) officer, and a fingerprint check. Once applicants are identified as low-risk they are enrolled in the NEXUS program and given a Radio Frequency Identification (RFID)-enabled card that is unique to the traveler. The RFID-enabled card allows the traveler to use specified primary lanes at land border POEs that are reserved for NEXUS use. At the Canadian preclearance airports, passengers use kiosks instead of dedicated lanes and iris scans are utilized to identify low-risk travelers rather than RFID-enabled cards. At the time of enrollment, travelers qualify for trusted traveler status in all modes of travel (air, sea, and land). The introduction of WHTI lane technology has provided local managers with the flexibility to add and subtract dedicated lanes to fit traffic demand.

Cost Avoidance/Workforce Multiplier Effect

In FY 2014, the average NEXUS program lane processing time, 23 seconds, was 2 times faster than vehicles processed at general lanes crossing the northern border (general lane times along the northern border with NEXUS lanes average 48 seconds per vehicle). Although the per vehicle inspection time savings decreased in FY 2014 by 5 seconds (25 seconds), the additional 12 percent increase in crossings in NEXUS lanes sustained the same CBPO savings achieved in FY 2013. Therefore, there are no incremental CBPO savings in FY 2014. However, the increased use of expedited NEXUS lanes by over 25 percent in the last 2 years continues to increase the throughput of all lanes of traffic on the Northern Border and CBP expect a savings of 7 CBPOs through FY 2016. Continued membership growth for this program will result in further efficiency.

Secure Electronic Network for Traveler's Rapid Inspection (SENTRI)

On the southwest border, SENTRI provides expedited CBP processing for pre-approved, low-risk travelers. Applicants must voluntarily undergo: a thorough biographical background check against criminal, law enforcement, customs, immigration, and terrorist indices; a 10-fingerprint law enforcement check; and a personal interview with a CBPO. The RFID-enabled card allows the traveler to use specified primary lanes at land border POEs that are reserved for SENTRI use.

Since 1995, the SENTRI program has grown to include a total of 19 lanes at the ten largest southern border POEs along the U.S./Mexico border. SENTRI members currently account for 19 percent of all cross southwest border traffic.

Cost Avoidance/Workforce Multiplier Effect

In FY 2014, the average SENTRI lane processing time, 18 seconds, was almost 3 times faster than vehicles processed at general lanes crossing the southern border (general lane times along the southern border averaged 57 seconds per vehicle). This is an increase of 4 seconds, or 18.1 percent, savings per SENTRI crossing in FY 2014 (22 seconds in FY 2013 to 18 seconds in FY 2014). There was also a 10 percent increase (1,261,212) in the number of crossings in the SENTRI lane. The increase in volume and time savings resulted in additional inspection time savings equivalent to 9 CBPOs from FY 2013 (a cost avoidance value of approximately \$1.08 million in salaries and benefits).

Free and Secure Trade (FAST)

FAST is the cargo equivalent of the SENTRI and NEXUS facilitative programs in the passenger environment. Through FAST, importers, commercial carriers, truck drivers, and manufacturers who enroll in the program and meet agreed upon security criteria, including participation in the C-TPAT program, are granted expedited clearance at a POE. Using electronic data transmission and transponder technology, CBP expedites clearance of approved trade participants. The FAST program supports a more secure supply chain and enables CBP to focus security efforts and inspections on high-risk commerce, where the attention is most needed.

Global Entry (GE)

CBP designed GE to allow for expedited clearance of pre-approved low-risk air travelers into the U.S. Through the use of automated kiosks placed in the Federal Inspection Services area of each identified airport, enrolled travelers are able to bypass queues and process through Passport Control without having to see a CBPO. This program facilitates entry into the United States and is especially beneficial to frequent international flyers. Please refer to the Global Entry budget request for more information on the Global Entry user fee.

Cost Avoidance/Workforce Multiplier Effect

CBP continues to promote the expansion of trusted traveler programs to allow CBP officers to focus their efforts on areas of greatest risk. CBP expanded Global Entry participation to nine new airports in FY 2014. The airports include: Anchorage, Austin, Chicago Midway, Cincinnati, Cleveland, Milwaukee, Pittsburg, San Jose, and Abu Dhabi Preclearance. CBP has already expanded to Aruba Preclearance in FY 2015. Global Entry kiosks are now in 42 U.S. airports and 12 Preclearance airports. In FY 2014, there were over 1.4 million additional uses of Global Entry and NEXUS Air kiosks, representing a 42 percent increase in usage over FY 2013 (4.7 million uses vs 3.3 million). The increased use of these kiosks by travelers arriving into the United States resulted in savings equivalent to 71 CBPOs which is a marginal increase of 11 CBPOs from FY 2013.

	FY 2016 Pay Raise	0	0	74
	Increased Retirement Contributions	0	0	14
Program Changes	NII Equipment Refresh & Recapitalization	0	0	85,300
FY 2016 Request		55	55	209,273

CURRENT SERVICES PROGRAM DESCRIPTION:

The Inspection and Detection Technology PPA funds CBP NII technology that supports CBP's goals of enforcement and facilitation of legitimate trade and travel. CBP uses these funds to acquire, deploy, maintain, refurbish, and replace its large and small scale NII technologies and to deploy, operate, and maintain radiation detection equipment (RDE) that DNDO acquires for CBP. This PPA enables CBP to meet the requirements of CBPOs and BPAs for safe, effective, and reliable RDE and X-ray/gamma-ray imaging systems at approximately 350 Ports of Entry (POE) and Border Patrol checkpoints. At end of FY 2014, CBP had 314 large-scale imaging systems deployed at and between our POEs. CBP had also deployed a total of 467 small-scale NII systems, 4,056 hand held devices, 1,386 RPS, 2,833 Radiation Isotope Identification Devices (RIIDS), and 30,067 Personal Radiation Detectors (PRDs).

In FY 2014, CBP used large-scale (LS) NII systems to conduct more than 7.23 million examinations in the land, air, and sea environments, which resulted in over 209,300 seizures, including over 249,000 pounds of narcotics, 118 stowaways, and over \$6.3 million in U.S. currency. Of these examinations, over 2.3 million inspections were for cargo truck and seaport containers using imaging technology. Relying solely on physical inspections would add approximately 4.9 million hours in delays and require more than 6,200 additional officers to maintain the same exam rate. Performing these 2.3 million exams with NII avoids over \$2.1B in negative economic impacts to CBP and trade. When compared to a NII exam, a physical inspection requires an average of 112 additional minutes by three CBPOs. The estimated cost avoidance per NII exam is approximately \$922 per exam which is a combination of CBP labor, port movement costs, and increased cost of goods due to delays.

In FY 2016, CBP intends to breakout its Inspection and Detection Technology funding as outlined in Exhibit 1.

Exhibit 1: Inspection & Detection Technology FY 2016 Funding Request Breakout

Inspection and detection technology investments	FY 2016 Positions	FY 2016 Request (\$000)	% of Total
Other Salary	55	\$4,917	2.35%
Non-Salary	0	\$204,356	97.65%
Total	55	209,273	100.00%

The FY 2016 current services funding only includes a minimal amount of funding for replacing CBP’s aging NII technology. CBP analysis shows most of its imaging equipment will be functional past the vendor’s estimated 10-year life cycle. To ensure it will have an adequate amount of NII technologies in FY 2016, CBP has been and will continue to take the following action: Use threat and requirements-based deployment and reassign underused technologies. This approach results in the ability to sustain specific capabilities in the precise locations. The strategies for accomplishing this are: 1) re-validate minimum NII/ RDE requirements in the field; 2) reallocate available technology resources to address the highest risk gaps; 3) decommission unneeded/unused and un-repairable equipment from inventory; and 4) strengthen the integration of inspection and detection technologies into CBP’s layered enforcement strategy.

This equipment is used to facilitate trade, while maintaining security with over 7 million NII examinations of cargo containers and POVs and over 80 million RDE scans per year of cargo and passenger conveyances.

Description of Select Adjustments to Base

Increased Retirement Contributions: Due to additional changes to long term demographic assumptions recommended by the Board of Actuaries at its meeting on June 18, 2013, agency contribution rates for all FERS participants are expected to increase again on October 1, 2015. The expected increase of FERS contribution rates affect all federal employees at CBP, with a greater impact on agency contributions on behalf of law enforcement personnel. The adjustment

to base pension contribution requirements increases CBP's pay estimates in order to account for the increased FERS contribution requirement costs in FY 2016.

MAJOR ACQUISITIONS:

Non-Intrusive Inspection (NII) Systems

The Non-Intrusive Inspection (NII) Systems Program (large scale and small scale) supports the CBP mission to ensure that our borders are secure. It specifically supports that part of the mission that is focused on preventing terrorists and terrorist weapons from entering the United States and interdicting potentially dangerous or illegal cargo from being smuggled into the country while facilitating the flow of legitimate trade and travel. The NII Systems Program supports CBPs interdiction and security efforts by providing technologies that help CBP officers and agents examine a large volume of traffic safely, quickly and effectively to detect a wide range of contraband that is imported using a variety of conveyances. The program is vital to the CBP layered enforcement strategy.

FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Funding (\$\$\$ thousands)	FY 2016 Activity Request (\$\$\$ thousands)

CURRENT SERVICES PROGRAM DESCRIPTION:

The National Targeting Center (NTC) supports CBP's goal to employ an enhanced targeting strategy that effectively and efficiently segments cargo and travelers according to the potential threat they pose. The NTC integrates the Agency's diverse intelligence capabilities into a cohesive data enterprise enabling CBP to serve the Nation as a premier intelligence-driven border law enforcement agency. The NTC provides advanced targeting, research, and coordination between numerous domestic and international law enforcement and intelligence agencies in support of the CBP anti-terrorism mission. The NTC provides around the clock tactical targeting and analytical research in both the passenger and cargo arenas. Additionally, the NTC manages the Analytical Management Systems Control Office (AMSCO), which uses automated systems and targeting strategies to examine large amounts of crossing, referral, and results data to develop methodologies for identifying anomalies that may be indicative of

integrity, procedural, performance, or training issues. NTC has national program management responsibility for the Passenger Analytical Units (PAU), Advance Targeting Units (ATU), and Counter Terrorism Response (CTR) functions, and CBP officer assignments to the Federal Bureau of Investigation, Joint Terrorism Task Forces, which includes supporting these field entities by leading efforts to ensure consistent methodology and focus, streamline and improve targeting capabilities, as well as enhance communications and interconnectivity..

The mission of the NTC is to prevent dangerous and unlawful travelers and goods from entering and exiting the country by effectively screening, reviewing, identifying, and segmenting low and high-risk passengers and cargo across all international modes of transportation, inbound and outbound, in order to carefully identify, target, and coordinate examination of the small percentage of shipments and travelers that may be connected to terrorism or other transnational crimes, such as narcotics smuggling, human trafficking, merchandise counterfeiting, and money laundering.

Total	398	79,514	100.00%

Passenger Targeting

In order to make risk-based operational decisions before a passenger boards an aircraft, and continuing until the traveler enters the United States, CBP leverages all available advance information on in-bound passengers. Throughout the travel process – (1) application to travel, (2) making the reservation, (3) check-in, and (4) boarding at a foreign point of origin; CBP devotes its resources to identifying the highest threats, including those who may not have been exposed by the intelligence community. As a result of advance travel information, CBP can assess passenger risk days before a traveler boards a plane. Concurrently, the visa process administered by the Department of State is also a source of information. For travelers under the Visa Waiver Program, CBP has the opportunity to evaluate their risk via the Electronic System for Travel Authorization (ESTA). CBP performs a traveler risk assessment when tickets are purchased, reservations confirmed and during flight check-in. Currently, in all cases before an international flight departs for the United States from a foreign point of origin, the airline transmits passenger and crew manifest information to CBP. CBP’s NTC then reviews traveler information to identify travelers who could be determined inadmissible upon arrival. Exhibit 2 depicts the international passenger travel process and the NTC travel-related programs in place to effectively screen, review, identify, and segment low and high-risk passengers.

Exhibit 2: NTC's Passenger Targeting Processes

Conduct Pre-Departure Screening

The NTC screens relevant traveler and cargo information prior to their departure. This approach is a key part of CBP's layered security strategy to protect the homeland by extending U.S. borders outward to identify and mitigate threats, interdict possible terrorists, other *mala fide* travelers, and suspect cargo before they can board or be laden on a conveyance destined for the United States.

The NTC leverages all available advance passenger data including Passenger Name Record (PNR) and Advance Passenger Information System (APIS) data, records of previous travel, intelligence, and law enforcement information, as well as open source information in its efforts to identify high-risk travelers. This information is also matched against targeting rules developed by subject matter experts based on actionable intelligence derived from current intelligence reporting and other law enforcement information. Exhibit 3 identifies core NTC programs designed to screen, review, identify, and prevent high-risk and inadmissible passengers from boarding U.S. bound aircraft.

Exhibit 3: Core NTC Passenger Related Activities

Program	Description
Pre-Departure Targeting	Prevents high-risk and inadmissible travelers from boarding U.S. bound aircraft through various targeting methods and by working with carriers and U.S. government representatives overseas.
Immigration Advisory Program	IAP officers stationed at overseas airports work jointly with the host governments to conduct interviews of potential targets identified by NTC and make admissibility decisions for passengers attempting to travel to the United States.
Visa Re-Vetting and ICE/DOS Pre-application vetting	NTC continuously checks U.S. issued visas against derogatory information and records pertaining to terrorism and inadmissibility. NTC also works jointly with ICE and DOS to check visa applications against derogatory information at the time of submission to DOS and prior to issuance of the visa.
Office of Alien Smuggling Interdiction	Deters, detects, and disrupts illegal migration to the United States by analyzing smuggling routes and working with domestic and foreign partners to identify and prosecute smugglers.
Regional Carrier Liaison Group (RCLG)	Assists NTC in denying boarding to high risk and inadmissible travelers at non-IAP locations by working directly with the carriers to resolve questions/concerns regarding a traveler's admissibility.
Electronic System for Travel Authorization	Requires all aliens who plan to travel to the United States under the Visa Waiver Program (VWP) to obtain an electronic travel authorization prior to boarding a U.S.-bound commercial flight or cruise ship. The NTC conducts continuous re-vetting of all approved ESTAs, screening them against derogatory information and records pertaining to terrorism and inadmissibility.
United Kingdom / National Border Targeting Centre/ International Targeting Center/Canada/Australia	Enhances border security for all involved countries by exchanging critical passenger information in order to disrupt the movement of criminals and terrorists, deter alien and contraband smugglers, and identify those using fraudulent or stolen travel documents.
Biometric Watch List	NTC serves as the encounter management center regarding biometric matches to Department of Defense derogatory information for internal and external DHS stakeholders. NTC identifies individuals based on biometric matches to derogatory information related to terrorism, criminality, or other grounds of inadmissibility.
Pre-Verify Hot List	The Pre-Verify Hot List matches biographic data from the APIS flight manifest against the Automated Biometric Identification System (IDENT) to identify DHS Biometric Watchlist matches prior to arrival in the United States. NTC-P reviews the criminal history and/or derogatory information linked to the traveler via biometrics. Thorough research is conducted and a determination of admissibility is made, allowing for the offload of an inadmissible passenger or the biometric demotion of those admissible, if applicable. This effort saves time and money by avoiding unnecessary secondary inspections

	at designated ports of entry along with the facilitation of travel for legitimate passengers.
Primary Lookout Override (PLOR)	In an attempt to reduce passengers referred for a CBP inspection and to reduce NTC-P Hot List numbers, the Auto PLOR functionality was created. When a traveler populating on a NTC Hot List is determined to be a false match to a TECS lookout, a PLOR is automatically generated between the passenger and the associated lookouts. This prevents the passenger from being referred for inspection at the POE based on the records that have already been adjudicated by the NTC-P.

Exhibit 4 identifies key statistics related to passenger travel targeting activities. Passengers denied boarding, visa applications revoked/not approved, and biometric denials are key outcomes related to passenger targeting.

Cost Avoidance/Workforce Multiplier Impact:

Pre-Departure Targeting continues to produce security and efficiency dividends. In FY 2014, National Targeting Center and the Immigration Advisory Program were responsible for identifying 11,494 passengers who would be inadmissible upon arrival to the United States and were denied boarding at foreign departure locations. This is a 2 percent increase over FY 2013 (11,225). The 11,494 denials resulted in an estimated cost avoidance of \$28.74 million to CBP in adverse action processing and removal costs associated with inadmissible travelers arriving at U.S. ports of entry. This targeting work alleviated field operational requirements equivalent to the work of 19 CBPOs, sustaining the CBPO savings from FY 2013 into FY 2014.

Cargo Targeting

NTC's cargo targeting Area of Responsibility (AOR) is international in scope. NTC leverages classified, law enforcement, commercial, and open source information to proactively target and coordinate examinations of high-risk cargo in all modes of transportation. NTC Cargo directly supports international aviation security by screening air cargo manifest data and adjudicating threats under the Air Cargo Advance Screening (ACAS) initiative. NTC cargo targeting activities also include providing high-quality research, support, and remote targeting operations to 58 international Container Security Initiative (CSI) ports and one Secure Freight Initiative (SFI) port, domestic units, and other government agencies. NTC has established partnerships and liaisons with numerous federal agencies in order to gain information to identify and examine cargo shipments that may pose a threat to the United States. Furthermore, NTC cargo activities support the assistance of other countries in developing systems to manage anti-terrorism and security threats by hosting foreign Customs officials under the International Fellowship Program.

In addition to supporting CBP's primary mission, NTC cargo targeting is responsible for conducting strategic and operational analysis in a continual effort to identify and counter narcotics smuggling, agricultural threats, money laundering, trafficking in illicit weapons, and other threats to the physical and economic security of the United States. Exhibit 5 below depicts NTC's cargo targeting processes against which it applies its core activities and programs to proactively target and coordinate examinations of all high-risk cargo.

Exhibit 5: NTC's Cargo Targeting Processes

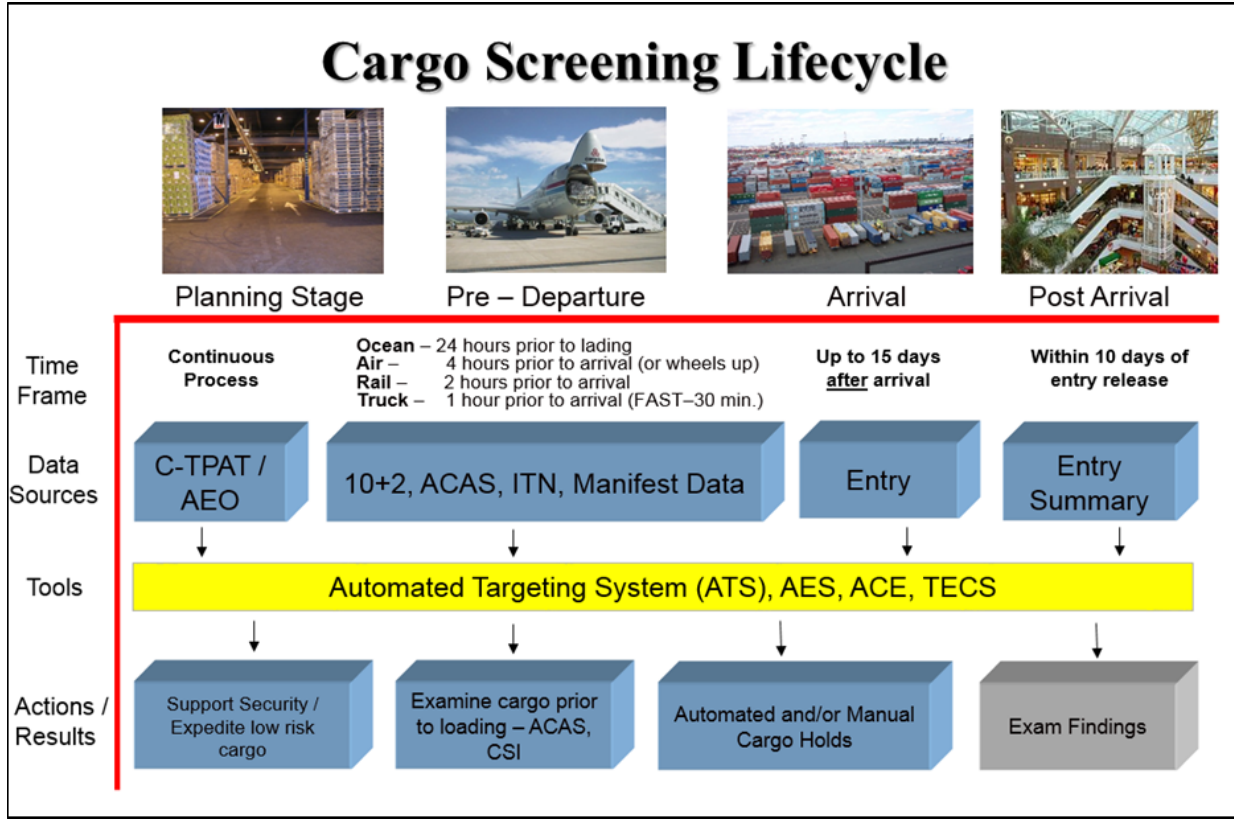

Exhibit 6 describes the NTC core cargo-related anti-terrorism activities and programs relating to cargo movements in all modes of transportation, both inbound and outbound.

Exhibit 6: NTC Core Cargo Related Activities

Program	Description
Export Targeting	Conducts daily export and in-transit cargo reviews to identify shipments destined to high risk or in-transit countries suspected to be involved in the smuggling of weapons, export controlled items, and military goods as well as strategic equipment used in the production of Weapons of Mass Effect (WME).
Pre-Departure Screening of Cargo	Provides in-depth cargo research and analysis of positive Terrorist Screening Database passengers, provides targeting analysis and support to CBP domestic and Container Security Initiative (CSI) ports, and provides targeting assistance to active federal investigations in collaboration with liaisons stationed at NTC.
Air Cargo Advance Screening (ACAS)	Targets and mitigates high risk air cargo prior to lading on commercial aircraft. Participation includes the express couriers UPS, FedEx, DHL, TNT; passenger carriers Delta Airlines, Lufthansa, Air Canada, as well as freight forwarder DHL Global Forwarding.
Agriculture/Bioterrorism Cargo Screening	Supports tactical targeting, research, follow-up, reporting, analysis, coordination, and automated risk management, including targeting and researching trade activities related to agriculture and bioterrorism.
National Initiative for Illicit Trade Enforcement (NIITE)	NIITE is a joint ICE Homeland Security Investigations (HSI) and CBP initiative to target shipments for counter-proliferation, narcotics, currency smuggling, and other concerns by tracking suspect shipments using carrier websites. It utilizes new automated tools to conduct digital surveillance and target suspect shipments.
Container Security Initiative (CSI)/Secure Freight Initiative (SFI)	NTC CSI serves as a targeting and communication center on behalf of all foreign CSI Ports. NTC CSI coordinates overseas examination requests in collaboration with the CBP Port of intended arrival in the U.S. NTC CSI also assumes bill review and targeting responsibilities at CSI foreign locations where resources are not deployed (Australia; New Zealand; Haifa and Ashdod, Israel; Halifax, Montreal, and Vancouver, Canada; and Piraeus, Greece). NTC CSI is also responsible for all daily operations in SFI Port Qasim, Pakistan, which is monitored via closed-circuit television from NTC.
International Cargo Targeting Fellowship Program (ICTFP)	The ICTFP is established to exchange information, share and refine targeting techniques, and increase each country's capability to target and eliminate criminal trade activity on a global scale. The collaboration with international partners is accomplished by hosting foreign customs officials and Officer Exchange Programs.
Field Support Unit (FSU)	The FSU is the primary point of contact for ports of entry providing 24x7 intake services to handle special research requests, targeting of high risk cargos, and screening of businesses and individuals involved in the shipment of goods that may have connections to terrorism.

Program	Description
Tactical Trade Targeting Unit (T3U)	The T3U coordinates CBP's tactical trade targeting assets and closely collaborates with ICE/HSI to rapidly support investigations and increase interdictions domestically and abroad through sustained, coordinated actions that focus on CBP's Priority Trade Issues (PTI).

Exhibit 7 identifies key statistics related to cargo targeting activities specifically displaying the sizable volume of manifests reviewed on a daily basis and the results of conducting those assessments.

Targeting Integrity Related Activities

Analytical Management Systems Control Office (AMSCO)

The Analytical Management Systems Control Office (AMSCO) develops innovative techniques to identify potential misconduct issues among frontline CBP personnel. The AMSCO team applies sophisticated analytical techniques to sort through massive amounts of CBP transactional data for anomalies and patterns indicative of potentially corrupt behavior. AMSCO scans and analyzes the anomalies in CBP transactional data in order to identify potential integrity issues. If outliers start to appear, based upon the evaluation of the data and further research, AMSCO will provide these findings to the proper investigative entity for further action. In addition, AMSCO has developed and deployed the Enforcement Link Mobile Operation red flag (ELMOrf) to the POEs within the San Diego (excluding San Ysidro), Tucson, El Paso, and Laredo Field Offices. ELMOrf is a data-driven technological tool utilized to monitor and improve adherence to CBP policy among frontline staff and supervisors. ELMOrf provides OFO frontline supervisors real time visibility into the processing transactions being conducted by CBPOs working primary operations at the POEs. AMSCO has developed many key indicators that tend to be predictive of corrupt behavior. Utilizing these indicators as sensors against historic crossing data allows AMSCO to identify actions of potentially corrupt personnel.

Description of Select Adjustments to Base

Increased Retirement Contributions: Due to additional changes to long term demographic assumptions recommended by the Board of Actuaries at its meeting on June 18, 2013, agency contribution rates for all FERS participants are expected to increase again on October 1, 2015. The expected increase of FERS contribution rates affect all federal employees at CBP, with a greater impact on agency contributions on behalf of law enforcement personnel. The adjustment to base pension contribution requirements increases CBP’s pay estimates in order to account for the increased FERS contribution requirement costs in FY 2016.

CURRENT SERVICES PROGRAM DESCRIPTION:

OTD is responsible for the Training at the Ports of Entry PPA, which supports basic, advanced, and supervisory/management/leadership training for new and incumbent CBPOs, Agriculture Specialists, Import Specialists, and Entry Specialists assigned to the ports of entry. The training provided establishes and sustains the proficiency of those directly responsible for the front line

mission of CBP The exhibits below provide an funding breakout and the types of training programs funded under this PPA.

Exhibit 1: Training at the Ports of Entry FY 2016 Funding Request Breakout

CURRENT SERVICES PROGRAM DESCRIPTION:

The Border Security Control PPA provides funding for the United States Border Patrol (USBP) and the Joint Field Command (JFC).

United States Border Patrol

Since its creation in 1924, USBP has been responsible for patrolling along U.S. borders and has grown to a force of over 21,000 agents. The recent surge in the number of Border Patrol Agents (BPAs) began with the *Illegal Immigration Reform and Immigrant Responsibility Act of 1996* (P.L. 104-208, *IIRIRA*), which required an expansion of the existing force of 5,942 BPAs by 1,000 agents per year through 2001. By September 11, 2001 over 9,800 BPAs were on duty.

The terrorist attacks of September 11, 2001 resulted in the passage of the *USA Patriot Act* (P.L. 107-56), which mandated a tripling of the number of BPAs along the northern border and enhancements in border security. In March 2003, USBP was transferred from the Immigration and Naturalization Service to the Department of Homeland Security, and consolidated into a newly created agency, Customs and Border Protection (CBP).

The Intelligence Reform and Terrorism Prevention Act of 2004 (P.L. 108-458) authorized a dramatic increase in the number of BPAs from approximately 10,000 in 2004 to over 20,000 agents by 2011. The *Emergency Supplemental Border Security Appropriations Act, 2010* (P.L. 111-230) and the *Consolidated Appropriations Act, 2012* (P.L. 112-74) have established 21,370 agents as the staffing floor for USBP.

USBP Mission

The mission of USBP is to secure America's borders. This is accomplished by preventing terrorists and terrorist weapons, people, and contraband from entering the United States illegally between the ports of entry, and by disrupting and degrading the activities of transnational criminal organizations. USBP coordinates and integrates its activities with the Office of Field Operations (OFO) (which patrols the ports of entry) and the Office of Air and Marine (OAM) (patrols air/sea at and between ports of entry) within CBP.

USBP Strategy

In FY 2016, CBP will continue the implementation of a new USBP approach focused on information, integration, and rapid response capabilities in performing the mission of securing America's borders. This strategy involves USBP moving from a resource-dependent approach to border security to a risk-based approach that enables rapid response to areas of greatest risk in the immediate border area. USBP will deploy its capabilities to align with the threats along the border. This is an ongoing process that will continue to adapt as threats change.

The FY 2012 - FY 2016 strategic plan places risk management at the core of USBP's strategic planning. Through enhanced awareness and intelligence (information); coordinated operations

with Federal, state, local, and international partners (integration); and the ability to respond quickly to changing threats (rapid response), USBP is putting the greatest capabilities in place to combat the greatest threats. Field commanders use risk-management as a core planning principle. All sectors identify their greatest risk and employ sector-specific plans for mitigating risk, using information, developing integration, and providing rapid response.

In areas characterized as low risk, Geospatial Intelligence (GEOINT) resources are being used to enhance and maintain situational awareness along the U.S. border. GEOINT can be described as gathering and analyzing imagery and geospatial information for the purpose of detecting change within specific geographical areas of the border environment. This allows the Border Patrol to focus most of its energies on high-risk areas while ensuring that all geographic areas of the border are patrolled. Any threat can be quickly identified through GEOINT to rapidly minimize any new risk. GEOINT products (provided to USBP from the Office of Air and Marine and the Office of Intelligence and Investigative Liaison) are a key tool for gaining and maintaining situational awareness along the U.S. border; they are also finite. The Border Patrol must be prepared to rely upon traditional tactics, techniques, and procedures that directly involve personnel to facilitate situational awareness in remote, low-risk areas. These techniques include (but are not limited to) periodic reconnaissance patrols, sign-cutting operations, and the deployment of mobile detection, monitoring, and surveillance resources.

As part of this strategic approach to securing the borders, the Border Patrol will advance its international engagement with our foreign partners to assist field commanders close operational and strategic gaps by promoting joint collaborative efforts through the development of interagency processes such as those required in the execution of law enforcement and security efforts within bilateral initiatives as well as in improving the integration and effectiveness of established programs. Additionally, the USBP will continue to use the Consequence Delivery System (CDS) – a targeted enforcement initiative – to reduce recidivism. A recidivism rate of 17 percent or less is targeted for 2016. CDS will be further addressed later in this document, but essentially it is an analytical approach to determining the correct consequence to apply to individual illegal immigrants that are detained.

The Border Patrol uses a risk-based decision making process in its Operational Planning mission analysis. The methodology tracks and assesses threats, vulnerabilities, consequences, and capabilities of the USBP and its adversaries. This process will be used by all sectors and, over time, will enable decision makers to gain a better understanding of how capabilities directly contribute to the Border Patrol's ability to mitigate risk in specific areas and affect employment of resources in those areas. This mission analysis will also help determine whether USBP can transfer manpower and technology from low-risk areas to high-risk areas without adverse effects.

The risk-based mission analysis also enables the Border Patrol to accurately identify operational requirements and make sound resource investments. This process will ultimately make the Border Patrol more flexible in its ability to reduce capabilities from secured areas of the border and reposition them to areas of greater risk without creating vulnerabilities to other border areas.

In response to the DHS Secretary's focus on unity of effort, the Border Patrol is engaged, along with CBP partners and other DHS component partners, in a DHS-wide effort to establish a

comprehensive strategy for the securing the Southern Borders and Approaches. Initial framework planning began in April 2014, and work on campaign plans derived from the framework began in June 2014. Final campaign plans, including measureable outcomes, have been developed and are scheduled to be briefed to the Secretary early 2015 for approval. The Border Patrol will work closely with its partners – including CBP Office of Air and Marine, the Immigration and Customs Enforcement (ICE), and the US Coast Guard – to carry out the campaign plans and measure joint performance in support of the strategy.

Budget Activities

The Border Security Control PPA is broken into three cost areas: Border Patrol Agent Salary and Benefits; Mission Support Salary and Benefits; and Non-Salary costs. The FY 2016 request is depicted below.

Exhibit 1: Border Security and Control FY 2016 Funding Request Breakout

Border Security and Control	FY 2016 Positions	FY 2016 Request (\$000)	% of Total
CBP Officer	7	\$1,212	0.03%
Border Patrol Agent	21,153	\$3,421,911	86.72%
Other Salary	1,892	\$218,607	5.54%
Non-Salary	0	\$304,073	7.71%
Total	23,052	3,945,802	100.00%

Border Patrol Agent Salary and Benefits represent the largest portion of the Border Security Control PPA. This percentage has increased significantly over the past few years, starting at 86 percent in FY 2010 to approximately 93 percent in FY 2014, due to several reasons: 1.) a significant increase in agent end-strength during the period of FY 2007 through FY 2011, 2.) a maturation of that agent workforce—many are now achieving journeyman status with its commensurate pay, 3.) the FY 2010 upgrade of BPAs to their full performance level from GS-11 to GS-12, 4.) overtime and premium pay that is required to support a 24x7 mission, 5.) within grade increases, 6.) payment of law enforcement salaries and benefits that are higher than regular GS workers, 7.) low attrition rates. The time of greatest increase in cost for USBP is during the first five years of an agent’s employment, so the large hiring of agents during FY 2007 through FY 2011 is still being felt. The Border Patrol Agent Pay Reform Act of 2014 was passed by the 113th Congress, P.L.113-277. It is expected that implementation will begin with the start of FY 2017. The Pay Reform Act will revise Border Patrol Agent pay, eliminating Administratively Uncontrollable Overtime (AUO) and replace with a system that provides with a more predictable overtime model and maintains the necessary flexibility required for Border Patrol operations.

Mission Support Personnel Salary and Benefits cover 1,890 non-uniformed personnel within USBP. These workers provide support in the areas of finance/budget, workforce management, property accountability and acquisition, and numerous other support functions. Mission Support

workers perform essential duties that allow agents to focus on front-line duties requiring law enforcement expertise. The majority of the Mission Support personnel serve in the field at USBP Sectors and stations, and a small number (approximately 5 percent) serve at the USBP headquarters to provide agency-level support. As shown in Exhibit 3, Mission Support end-strength is significantly below requested levels. As a result, critical Mission Support work must now be temporarily done by BPAs. While USBP has been able to accomplish its mission, it does so at a higher cost than if the positions were filled with non-uniformed personnel because the cost per grade level of an agent is more than that of a Mission Support worker (due to law enforcement pay and benefits).

Non-Salary Costs in the table shown below include fuel and maintenance of USBP vehicles; USBP enforcement systems which provide critical C3I (Command, Control, Communications and Intelligence) capabilities; relocation expenses related to permanent change of station for agents; the CBP Transportation Program; USBP horse patrol and canine unit costs; office supplies expenses; and contracted support activities. All of these are essential in enabling USBP agents to accomplish their missions. In FY 2010, funding for Non-Salary Costs was approximately 14 percent of the USBP budget. In FY 2016, these same costs are projected to be 7.2 percent of the USBP budget.

Exhibit 2: USBP Financial plan comparison FY 2010 to FY 2016

CBP Intra-agency Relationships

USBP relies heavily upon other offices within CBP to provide essential support. The Office of Air and Marine (OAM) provides air and sea surveillance/reconnaissance, airlift, medical-evacuation, and other important services to USBP operations. The Office of Administration (OA) procures vehicles and other major end-items for USBP, and also leases and maintains facilities. The Office of Information Technology (OTIA) provides the information management backbone upon which USBP law enforcement databases and systems operate. OTIA procures and maintains information technology equipment for USBP, including tactical infrastructure and ground-based surveillance equipment that assists USBP in securing the border.

Overview of Organization

Manpower/Personnel

USBP will maintain a staffing level of 21,370 BPAs by the end of FY 2016, the current Congressionally-mandated floors. The currently authorized Mission Support Personnel (MSP) level is 1,890 the actual FY 2014 end-strength was 1,703 which is a decline of 442 workers since FY 2011.

Exhibit 3: USBP Agents and Operational Support

	<u>2011</u>	<u>2012</u>	<u>2013</u>	<u>2014</u>	<u>2015</u>	<u>2016</u>
BPAs	20,558	21,444	21,391	21,369	21,370	21,370
MSP	2,145	1,911	1,772	1,703	1,890	1,890

(Note: FY 2011-2014 represents actual end-strength at close of fiscal year. FY 2015-2016 represents requested end-strength.)

Although technology enhances detection capability and serves as a force multiplier, BPAs on the ground are essential for executing actions against identified targets. For every detection and identification resulting from technology, there must be an accompanying action from an agent to resolve illegal activities. The increasing use of technology increases CBP’s detection capabilities and its success, and it may also require a re-balancing of the number and placement of agents in the future.

In compliance with Congressional guidance, USBP began developing in FY 2013 a Manpower Requirement Determination (MRD) process that collects and analyzes the human capital needed to perform USBP missions. The MRD process will establish a methodology to develop human capital requirements that is verifiable, repeatable, and defensible. The initial goal of the MRD process is to standardize operational forces within USBP and provide senior managers with the information required to make decisions regarding human capital requirements. USBP began development of the MRD process in FY 2013; plans to complete the data-collection and its analysis in FY 15; and begin implementation of the results in FY 2016.

USBP HQ Organization

USBP is led by the Office of the Chief who oversees three divisions: Operations Division; Strategic Planning, Policy, and Analysis Division; and Mission Support Division. The Chief also oversees Special Operations, and Enforcement Systems.

- The Operations Division is responsible for providing direction and support to USBP sectors nationwide; it maintains continuous communications with sectors to obtain a national perspective on operations; responds to emerging threats by deploying resources in a timely and appropriate fashion; and manages nation-wide programs to ensure standardization throughout the USBP.
- The Strategic Planning, Policy and Analysis Division is responsible for developing polices and standard operating procedures, conducting strategic planning, developing performance measures, and reviewing statistical data.
- The Mission Support Division is responsible for working the business operations that are necessary for USBP to function. Areas of responsibility include agent support, programming, budgeting, and financial analysis; human resources/workforce management; logistics; and training.

Each division directs numerous programs in support of the 20 Border Patrol Sectors responsible for all enforcement efforts.

USBP Sectors

The 20 Border Patrol Sectors serve as the primary regional command structure. There are 19 within the continental United States, and one in Puerto Rico. Each is headed by a Sector Chief Patrol Agent and designated staff. Similar to USBP headquarters, the sector staff is responsible for programs in support of the numerous Border Patrol stations within their sector. Nationwide, there are 138 Border Patrol stations that report to their respective sectors. The Border Patrol station is the basic geographic command structure within a sector and is the primary operational element of the Border Patrol. It is from Border Patrol stations that the men and women of the Border Patrol deploy to 15 Forward Operating Bases, operate 35 checkpoints, and conduct the various other duties to protect America 24 hours a day 7 days a week.

Special Operations Group (SOG)

The Special Operations Group is a specially trained and equipped team that provides critical support to DHS, CBP, and USBP. SOG can rapidly respond to emergent and/or unusual law enforcement situations that require special tactics and techniques, including search, rescue, and medical response via land, air, and sea. SOG is comprised of three components: Border Patrol Search, Rescue, and Trauma Team (BORSTAR); Border Patrol Tactical Team (BORTAC); and the Mobile Response Team (MRT). The command and support staffs for the teams are located at the Special Operations Group in El Paso, Texas. The SOG is described in greater detail later in this document.

Operations

In FY 2014, USBP national operations seized approximately 1,922,545 pounds of marijuana, a 20 percent decrease from FY 2013 and apprehended 486,651 illegal aliens, a 15 percent increase from FY 2013.

The Rio Grande Valley Sector became the most active sector in FY 2014, apprehending 256,393 illegal aliens and seizing 654,962 pounds of marijuana in that year. This represents 52 percent of all OBP apprehensions and 34 percent of the marijuana seized nationwide for FY 2014. In FY 2013, the Rio Grande Valley Sector apprehended 154,453 illegal aliens and seized 797,249 pounds of marijuana. The FY 2014 data represent an increase of 66% in apprehensions over FY 2013 levels and a decrease of approximately 18% in marijuana seizures from FY 2013 levels.

The Tucson Sector is the second most active Border Patrol Sector regarding apprehensions but remains the most active in marijuana seizures. In FY 2014, Tucson Sector apprehended 87,915 illegal aliens, which represents 18% of all apprehensions nationwide; and seized over 971,000 pounds of marijuana, which represents slightly more than 50% of all marijuana seizures nationwide. In FY 2013, Tucson Sector seized more than 1,193,000 pounds of marijuana and apprehended more than 120,900 illegal aliens.

The increase in apprehensions in Rio Grande Valley Sector along with increase in the Big Bend and the Del Rio Sectors reflects the change in illegal alien flows from the Arizona border to the south Texas border. This shift in flows reinforces the USBP strategy of re-aligning resources to areas of greatest risk.

A comprehensive set of USBP statistics for Fiscal Year 2014 are provided below:

Exhibit 6: FY 2014 U.S. Border Patrol Statistics
Apprehension Data includes Deportable Aliens Only
 Data Source: EID as of 9/30/14

	Southwest Border	Northern Border	Coastal Border	Nationwide Total
Total Apprehensions	479,371	3,338	3,942	486,651
Mexicans	226,771	1,665	742	229,178
OTMs	252,600	1,673	3,200	257,473
Total Drug Pounds Seized	1,929,428	1,190	1,347	1,931,966
Marijuana Pounds	1,920,411	902	1,232	1,922,545
Cocaine Pounds	4,443	92	19	4,554
Heroin Ounces	9,205	486	0	9,691
Methamphetamine Pounds	3,771	159	0	3,930
Ecstasy Pounds	1	0	19	20
Other Drugs* Pounds	227	6	76	310
Total Drug Seizures	15,540	346	66	15,952

Cocaine Seizures	360	35	8	403
Heroin Seizures	145	37	0	182
Methamphetamine Seizures	724	27	3	754
Ecstasy Seizures	62	1	12	75
Other Drugs* Seizures	843	65	19	927
Conveyances	8,687	73	95	8,855
Firearms	475	33	9	517
Ammunition Rounds	63,493	189	19	63,701
Currency Value	\$7,351,640	\$606,700	\$33,045	\$7,991,385

Note: Apprehension Data includes Deportable Aliens Only Data Source: EID as of 10/07/14

*Other Drugs include all OBP drug seizures excluding Marijuana, Cocaine, Heroin, Methamphetamine, & Ecstasy.

Standard Operations

Patrol Border

Patrolling the border (also known as Line Watch) is the most basic operation that USBP agents perform. It is done by foot, vehicle (SUVs, all-terrain vehicles, truck/utility vehicles, snowmobiles, dirt bikes, and personal watercraft), and horse. Agents track illegal entrants and then intercept and apprehend them. In areas with high levels of activity, agents may use advanced technology to assist in their surveillance, such as Mobile Video Surveillance Systems (MVSS) or Remote Video Surveillance Systems (RVSS). During periods of limited visibility, agents may use Night-vision Goggles (NVG) or Infra-red (IR) cameras to assist in detecting illegal entrants.

Processing/Detention/Transportation

Border Patrol Agents intercept, detain, process, and transport illegal entrants. Agents also seize illegal items, including drugs, vehicles, and currency. These items are properly accounted for and secured.

Forward Operating Bases (FOB)

USBP's 15 FOBs are strategically-placed permanent or semi-permanent facilities in forward or remote locations and are used to sustain tactical operations. These FOBs provide housing to agents on a 24-hour basis. The use of FOBs directly supports USBP's mission of gaining, maintaining, and expanding effective control of the Nation's borders. FOBs are strategically located to allow USBP agents to rapidly respond to cross-border traffic and counter shifts in traffic. They are a cost-effective and secure staging facility that allows agents to be forwardly deployed in remote and difficult-to-access areas. FOBs are now used wherever USBP has a need to extend its reach. Their presence has been successful in lowering response times and disrupting smuggling activity thereby raising USBP effectiveness and efficiency levels.

Traffic Checkpoints

USBP continues to use multi-tiered enforcement capabilities to increase the certainty of arrest of those who pose a threat to the U.S. This includes the use of traffic checkpoints along the major routes of egress from our Nation's borders. USBP uses permanent and tactical checkpoints. Permanent checkpoints include established structures along major thoroughfares. Tactical checkpoints are mobile assets that are moved throughout a sector on an as-needed basis.

Currently, there are 35 permanent traffic checkpoints strategically located on routes of egress leading away from our Nation's borders. Each checkpoint is operationally integrated with other enforcement efforts to increase the USBP's detection and interdiction capabilities. In traffic checkpoint locations, Transnational Criminal Organizations (TCO) must use other tactics, such as secondary staging areas and circumvention routes, which disrupt and degrade their operations. This also gives the USBP additional time and distance to detect, deter, and interdict them.

In FY 2014, USBP checkpoints seized approximately 156,000 pounds of marijuana and made 9,348 apprehensions. Checkpoint operations account for approximately 8 percent of USBP national marijuana seizures and approximately 2 percent of USBP national apprehensions.

National Campaigns

CBP also uses the Arizona Alliance to Combat Transnational Threats (AZ ACTT), New Mexico/West Texas Alliance to Combat Transnational Threats (NM/WTX ACTT), South Texas Campaign (STC), and Surge Operations to secure the border. These are described below.

Arizona Alliance to Combat Transnational Threats

The AZ ACTT is an enforcement approach that leverages partnerships, capabilities, and resources between DHS Components, federal agencies, state and local actors, and tribal governments. This operation increases the certainty of arrest of those who enter illegally at and

between the POEs, in order to reduce smuggling and crimes associated with smuggling in Arizona. The mission of the AZ ACTT:

DHS along with international, Federal, state, local and tribal interagency partners will implement intelligence driven operations in the Arizona – Sonora Area of Operation to deny, degrade, disrupt, and dismantle the illegal activities of transnational criminal organizations in order to establish a secure and safe border environment and improve the quality of life of affected communities throughout the state of Arizona.

AZ ACTT operations have targeted the Sonora border area to deny criminal organizations from operating along approximately 80 miles of the Arizona border. The enforcement strategy of the AZ ACTT is a five-faceted approach based on collaboration, intelligence coordination, unity of effort, prioritized focus, and sustained efforts.

New Mexico/West Texas Alliance to Combat Transnational Threats (NM\WTX ACTT)

The NM/WTX ACTT was established along the entire state of New Mexico and 17 counties in West Texas, to include the Big Bend Sector. The mission of the NM/WTX ACTT:

The New Mexico/West Texas Alliance to Combat Transnational Threats Unified Command will conduct coordinated law enforcement/ intelligence activities and information sharing with partner agencies and the Government of Mexico in order to increase border security and support their efforts to reduce levels of violence.

The six strategic goals identified as priorities to facilitate the success of the NM/WTX ACTT mission are:

- Identify and detain cartel “trigger men” and facilitators;
- Deny safe haven to Transnational Criminal Organizations (TCO) members and their associates;
- Ramp-up crime prevention and deterrence efforts;
- Enable more prosecutions;
- Establish accepted intelligence protocols; and
- Enhance efforts with our strategic partners in the NM/WTX Area of Responsibility (AOR).

This multi-agency collaborative initiative leverages a myriad of law enforcement resources via intelligence driven operations (IDO) in order to deny, disrupt, degrade, and dismantle TCOs operating in the NM/WTX AOR. The NM/WTX ACTT is comprised of 11 different U.S. agencies and has been instrumental in developing and formalizing a mechanism for sharing information with the Government of Mexico (GoM), as it increased coordinated law enforcement/intelligence efforts for a unified response against TCOs. Through established agency liaison groups between ICE’s Homeland Security Investigations Assistant Attaché Ciudad Juarez and the El Paso Sector International Liaison Unit, bi-national border security-related information is shared in multiple forums. In addition to information sharing, bi-national operations have increased in participation and frequency. Coordinated bi-national efforts include

operations at the POEs, parallel border boundary patrols, bi-national functional exercises and large-scale events, such as the Annual El Paso Sun Bowl game.

NM/WTX ACTT operations such as Operation No Refuge, has denied safe haven to TCO members and associates in the U.S. As of September 2012, approximately 2,031 targets of interest have been identified under Operation No Refuge. During FY 2014, 5 of these identified targets had their Non-Immigrant Visas revoked, fostering safer communities within the NM/WTX AOR.

Beginning in FY 2013, data reporting for ACTT activities changed and is only available nationwide. During FY 2014, NM/WTX ACTT efforts resulted in 1,125 apprehensions and the seizure of 4,857 pounds of marijuana, 2.9 pounds of methamphetamines, 4 pounds of cocaine, 14 firearms, and \$1,306,502 in US currency. Investigations efforts also led to the identification of 25 stash houses that were being used to harbor undocumented aliens.

South Texas Campaign (STC)

In August 2011, USBP initiated the STC in the South Texas Corridor (Del Rio, Laredo, and Rio Grande Valley Border Patrol Sectors, and Houston and Laredo Field Offices). The STC seeks to mitigate risk by establishing a secure environment through operational integration of bi-national efforts to deprive TCOs of the ability to exploit the South Texas Corridor. The current focus of STC is on the establishment of joint interagency, integrated targeting teams (JTT) within the South Texas Corridor. The objective of JTTs is to provide oversight for the STC Unified Command targeting of TCOs. The purpose of the STC is to ensure that the unified effort in the South Texas Corridor employs targeted and focused enforcement based on risk, a Consequence Delivery System, Operational discipline, coordination, and integration of intelligence, interdiction, and investigation against prioritized targets.

The intended outcomes of the STC include, (i) diminishing the capacity of TCOs to use major smuggling routes and commercial conveyances and force a displacement in their smuggling and transportation methods; (ii) depriving TCOs of resources and forcing them into a more costly/vulnerable continuous state of reorganization; (iii) diminishing the presence/influence of TCOs throughout the South Texas Corridor; and (iv) achieving and maintaining the operational initiative.

Due to the work of the STC, RGV continues to be the predominant area of activity with 256,393 apprehensions in FY 2014, or almost 80 percent of all USBP apprehensions in the South Texas Corridor. This is also an increase of 60% more apprehensions than in FY 2013 and is 2.8 times higher than FY 2012. [FY 2014 apprehensions are the following: RGV had 256,393, LRT had 44,049, and DRT had 24,255. FY 2013 apprehensions were the following: RGV had 154,453, LRT had 50,749, and DRT had 23,510.] While overall apprehensions in the South Texas Corridor have increased in FY 2014 from FY 2013, recidivism rates had gone down 2 percent, from 16 percent to 14 percent. Specifically, RGV, LRT, and DRT have recidivism rates of 12, 12, and 5 percent respectively.

**Exhibit 7: FY 2014 South Texas
Coordidor Apprehensions**

Exhibit 8: RGV Apprehensions
2.8 times higher than FY 2012

**Exhibit 9: FY 2014 RGV OTM
Apprehensions**

Exhibit 10: FY 2014 Recidivism

Sector	Recidivism Rate (vs. FY 2013)
Southwest Border	14% (-2%)
RGV	12%
LRT	12%
DRT	5% (-2%)

Surge Operations

USBP’s strategy for implementing surge operations across the southwest border is based on threats, risks, vulnerabilities, and the resources of partner agencies. Surge operations proactively address intelligence, seasonal migration, and smuggling trends. Unlike ACTT operations, which encompass a large area and are sustained indefinitely, surge operations, typically, are short term and address small areas. They involve short-term deployments of additional resources and technology to target areas that require, or may potentially require, a heightened presence based upon risk assessment. These operations increase the probability of preventing terrorists and their weapons from illegally entering the U.S. between the POEs and assists in the reducing of crime in border communities.

An exception to the typical surge operation which is short term and covers a small geographic area is the surge operations currently being conducted in RGV sector in conjunction with the surge of UCs. For FY 2014, RGV experienced a 174 percent increase in UC apprehensions compared to the same period in FY 2013. The most significant increase in UC has been OTMs (+241 percent).

In response to UC surge, CBP temporarily reassigned over 600 agents to RGV. These additional agents were deployed accordingly to assist RGV with the influx of UC apprehensions. Some of these additional agents relieved current RGV agents in processing/detention of UCs, thus allowing RGV’s organic personnel to be redeployed to critical border operations. Additionally, the extra personnel augmented STC’s targeting enforcement operations against smuggling organizations operating in RGV.

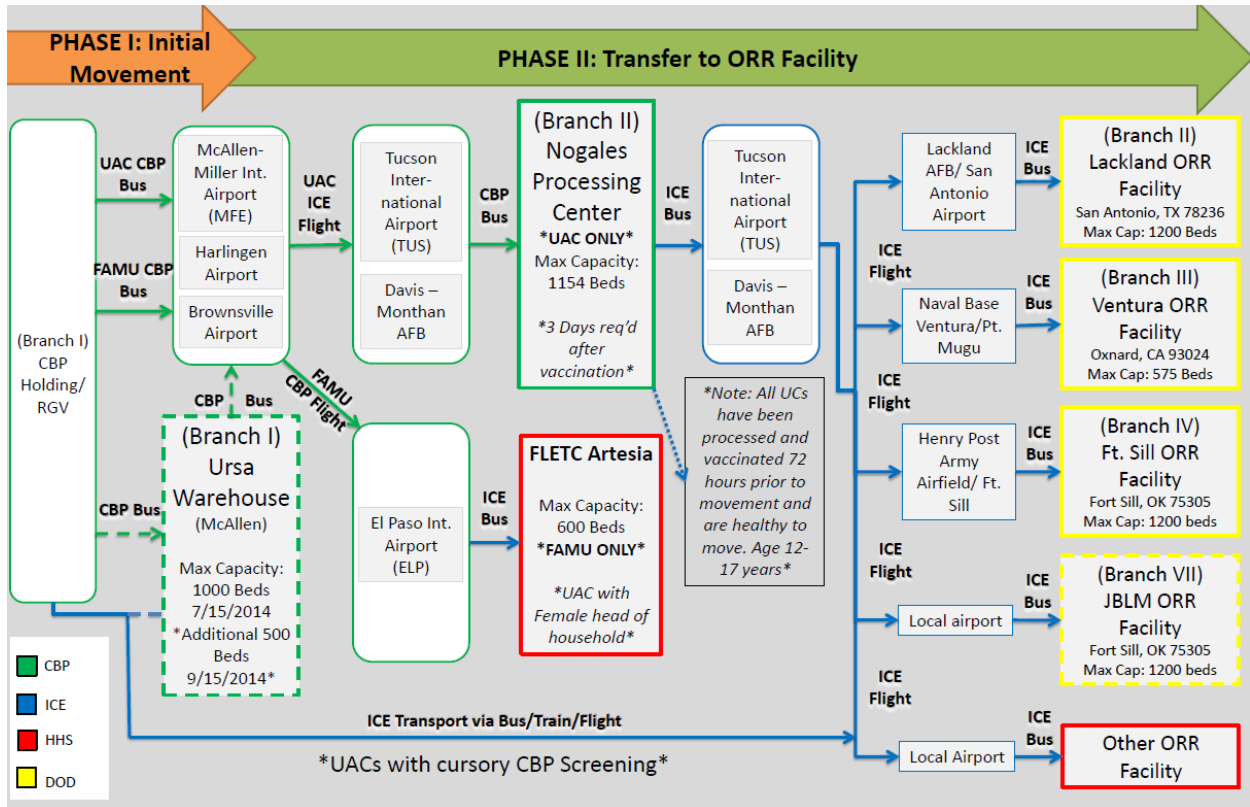

Unaccompanied Children in RGV

UCs began crossing the Southwestern Border in the Rio Grande Valley sector in unprecedented numbers in early 2014. The flow continued through the spring and into the summer of 2014. The Secretary of Homeland Security declared a Level 4 emergency on 14 May 2014. The surge peaked in June, with over 10,000 unaccompanied children apprehended by USBP along the southwest border. The Department of Health and Human Services (HHS), Office of Refugee Resettlement (ORR) was unable to handle the influx of UCs and place the UCs in safe domains in a timely manner. As a result, a backlog of UCs waiting for referrals developed and the UCs remained in USBP custody much longer than the 72 hour statutory requirement. At its peak,

USBP had over three thousand UCs in its custody awaiting transfer by Immigration and Customs Enforcement (ICE), who conduct the majority of UC transportations, to ORR. USBP took extraordinary measures to care for the health, welfare and safety of the UCs. Provisions were made for daily hot meals, showers, laundry facilities, medical care, clothing and other necessities for these children. In early May 2014, when it became apparent that HHS would not be able to receive UCs in a timely manner and would remain in USBP stations for many days, USBP was forced to dedicate several facilities throughout the Rio Grande Valley and re-open the Nogales Processing Center, located in Nogales, Arizona to provide space for the extended care for the children. All the immediate care resources and services were procured and in place upon opening the Nogales Processing Center. From 31 May 2014 through 11 July 2014, more than 3,700 UC were relocated from RGV to Nogales via U.S. Coast Guard and contracted charter flights.

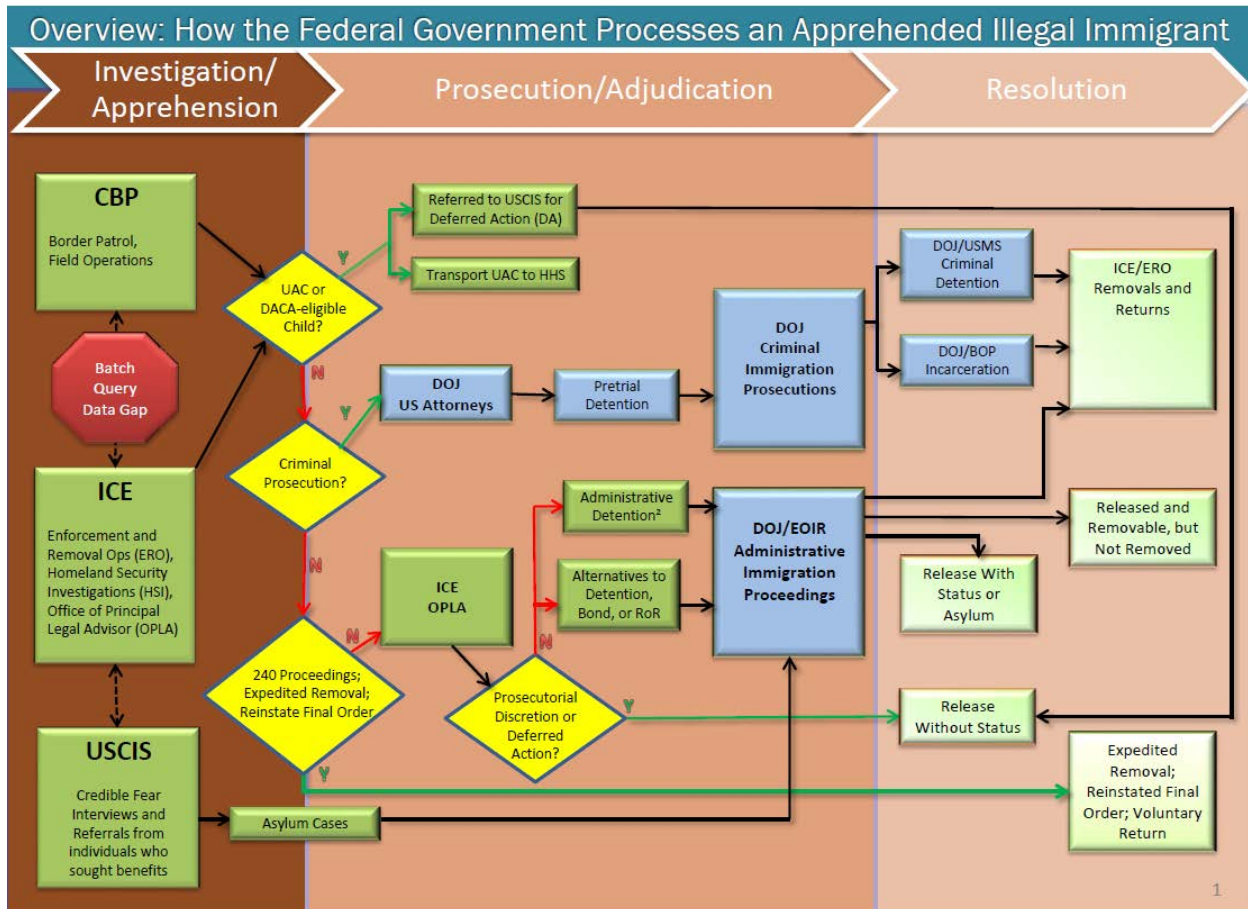

Due to government-wide efforts to stem the flow of unaccompanied children, the number of UCs currently entering the country is significantly lower than this time last year. However, it is prudent to plan for another possible surge. As part of the 2016 Budget, OBP is preparing for a continued influx of UCs; the Budget submission includes base funding to handle up to 58,000 UCs, the same level as 2014, and also requests contingency funding to accommodate up to 104,000 UCs, should the number exceed anticipated levels. The services provided to UCs will include medical screening and care, food services, showers and laundry services, child care providers/monitors. These efforts will be similar to what was provided to the UCs in FY 2014 but the contracts will be designed to accommodate increased flows and provide a more cost effective solution to the problem.

The chart below shows the typical flow of a UC through the CBP, ICE and ORR custody. It is a very complex process and a bottleneck anywhere along the chain of processes can cause significant blockages in the flow of UCs through the custody chain.

Processing of Illegal Detainees

The chart below shows the various stages in processing a detained illegal immigrant through to the final disposition. It is again a very complex process and relies on numerous federal agencies smoothly working together to complete the process in a timely fashion.

Operation Stonegarden (OPSG) Grant Program

The intent of this \$60 million program is to enhance coordination among local, state and federal law enforcement agencies to secure the borders with Mexico, Canada, and international waters. Those eligible for OPSG funding are local units of government at the county level and federally recognized tribal governments in the states bordering Canada, Mexico or those with international water borders. Allocations of funds, received from the Homeland Security Appropriations Act, 2010 (Public Law 110-83), are based on a risk-based prioritization by CBP's sector-specific border risk methodology, and are used to increase operational capabilities, promoting a multilateral "whole community approach."

Key USBP Programs and Capabilities

Following are programs managed by USBP.

Horse Patrol

The Horse Patrol has been an integral element of USBP since its inception in 1924. USBP currently maintains a herd of approximately 374 horses along the southwest and northern borders, along with 281 active certified riders. The Horse Patrols allow access to areas lacking the necessary infrastructure for road-borne transportation or areas where access by vehicles is environmentally prohibited. Many private land-owners are restricting vehicular access by USBP due to noise and environmental impacts, making horses the only viable patrol alternative.

Over the past few years, USBP has taken steps to significantly reduce costs associated with the Horse Patrol. USBP has an agreement with the Bureau of Land Management (BLM) to acquire wild mustangs captured on federal lands thereby reducing acquisition costs. Currently, there are 234 mustangs throughout the USBP Horse Patrol. Federally owned facilities are being constructed or acquired to reduce boarding costs with private contractors.

In FY 2013, a standardized Instructor and Basic Rider training program was implemented. Additionally, a standardized reporting system was established to ensure consistent and applicable metrics are captured moving into FY 2014.

The projected budget for the USBP Horse Patrol in FY 2016 is \$2.5 million. Apprehension and seizure data for FY 2014 are the following:

Exhibit 11: FY 2014 Horse Patrol Statistics

USBP Horse Patrol	Amount FY 2014 (vs. FY 2013)
Apprehensions	23,968 (19,404)
Marijuana Seized (lbs.)	69,231 (58,701)

Off-Road Vehicles

USBP has been utilizing Off-Road Vehicles (ORV) for patrolling for many years. These vehicles include all-terrain vehicles, utility vehicles, snowmobiles, dirt bikes, and personal watercraft. Prior to FY 2013, procurement and training were decentralized to the sector level with a resulting mix of non-standardized vehicles and personal protective equipment. This has made maintenance inefficient due to lack of commonality of repair parts and has hindered USBP's ability to re-allocate equipment between sectors, again due to the lack of commonality.

In FY 2013, USBP established a national-level program office to centrally manage the USBP ORV programs. This program office worked with subject matter experts and the Office of Training and Development to develop a standardized ATV Instructor and Basic Rider course available for export to sectors and import at the Border Patrol Academy. Additionally, the program established a National ORV Policy to standardize safety requirements and procedures for all USBP Off-Road Vehicles. The policy is currently pending negotiations with the NBPC prior to implementation. In FY 2015, all Off-Road Vehicles will be purchased, retrofitted, and distributed through a national contract with Federal Prison Industries (UNICOR). The projected budget for the USBP Off-Road Vehicle program in FY 2016 is \$2.5 million.

Exhibit 12: Off-Road Vehicles*

ORV Types	Number
All-Terrain Vehicles	1,651
Utility Vehicles	205
Snowmobiles	169
Dirt Bikes	90
Personal Watercraft	50

*As of September 30, 2014

Canine Program

The USBP Canine program began in 1986 with the acquisition of four canines to assist agents in what were then the McAllen and Laredo sectors. Canines are used to detect concealed humans and narcotics in vehicles, primarily at traffic checkpoints. Rescue canines are used to perform large area searches and tracking operations to assist agents with rescue and apprehension missions in areas with hostile operating environments. These canines not only have the ability to track forward but possess the training and skill to backtrack to locate persons or contraband left behind. The Border Patrol has added Patrol Canine Teams that are used in tactical and high-risk operations along the border. Human Remains Detection (HRD) Canines have also been added as a means to assist in investigations and recover persons that have gone missing. The HRD Canines can locate evidence not only above ground, but buried or submerged in water. The importance of USBP canines has increased over the last several years with the addition of permanent and tactical checkpoints. USBP had 858 canines (FY 2013 was 877 canines) deployed at 20 Sectors and the Special Operations Group at the end of FY 2014. In FY 2014, the canine-assisted seizures for many different types of drugs that had narcotic appraisal value accounted for over \$711 million (FY 2013 was \$977 million).

Exhibit 13: Canine Program

Canine Locations	Number
Southwest Border	779
Northern Border	72
Coastal	7
Total	858

*As of November 18, 2014

Exhibit 14: FY 2014 Border Patrol Narcotic Seizures with Canine Assistance

Canine Assistance	
Drug Type	Quantity (2013 in parentheses)
Marijuana	540,272 (934,026) (lbs.)
Cocaine	3,283 (3,980) (lbs.)
Heroin	430 (lbs.) vs. (9,471) (ounces)
Methamphetamine	3,466 lbs. vs. (343) (lbs.)
Currency Value	\$5,276,182 vs. (\$7,266,986)
Total Narcotic Appraisal Value	\$711,740,982 vs. (\$977,532,497)

In some sectors along the northern border, USBP canine assets are the only CBP canine assets available; therefore the Office of Field Operations must rely on USBP assets.

Technology and the U.S. Border Patrol

The US Border Patrol uses significant amounts of technological assets to assist it in accomplishing its mission. These assets fall into two primary categories: assets intended to deter or deny access to American soil, and surveillance assets intended to detect and track illegal aliens once they have crossed the United States' border. These assets are procured and maintained by the Office of Technology, Innovation and Acquisition (OTIA); however, USBP has operational control of the assets and determines where they will be located and used in day-to-day operations.

Deterrence assets include Primary, Secondary, and Tertiary Fencing; Vehicular Fencing; All-Weather Roads, and Border Lighting:

Exhibit 15: Tactical Infrastructure (Data as of 30 September 2014)

Description	# of Miles	# of Sectors in which located
Primary Fencing	353	9
Secondary Fencing	36	4
Tertiary Fencing	14	3
Vehicle Fencing	300	6
All-Weather Roads	156	5
Border Lighting	70	6

- Primary fencing is intended to impede illegal pedestrian and vehicular traffic using steel bollards or pickets, normally 18 feet tall. This fencing is designed with features to resist climbing and vehicular impact.
- Secondary fencing uses a fence fabric to impede illegal pedestrian traffic. Its normal height is 15 feet, and it is also designed with features to resist climbing.

- Tertiary fencing uses an open fabric to delineate property limits and/or the limits of the Tactical Infrastructure corridor.
- Vehicle Fencing uses steel bollards to resist illegal vehicular traffic but does not impede pedestrian traffic. Vehicle Fencing is normally used in rural or isolated locations with low occurrences of illegal pedestrian traffic.
- All-weather roads generally run parallel with the border and are used by US Border Patrol to patrol the border and respond to incursions.
- Border Lighting enhances the ability of US Border Patrol agents to monitor activities along the border during periods of darkness. A well-lit border helps to deter illegal incursions and is used in conjunction with other surveillance assets to create a layered border zone.

Primary Fencing

Vehicle Fencing

Surveillance assets included fixed and mobile surveillance systems, portable surveillance systems, ground sensors and night visions and thermal devices:

Exhibit 16: Surveillance Assets (Data as of 30 September 2014)

Description	# of Units	# of Sectors in which units are located
Integrated Fixed Towers (IFT)	15	1
Remote Video Surveillance Systems (RVSS)	344	14
Agent Portable Surveillance Systems	12	1
Mobile Surveillance Capability (MSC)	49	1
Mobile Surveillance System (MSS)	40	6
Mobile Vehicle Surveillance Systems (MVSS)	187	19
Unattended Ground Sensors (UGS)	13,548	20
Imaging Unattended Ground Sensors (I-UGS)	312	20
Recon III Thermal Imaging Device	260	20
Recon Lite/Recon IV Ultra Lite	594	18
TAM-14	855	20
Night Vision Goggles	8,915	20

Below are some examples of the surveillance assets currently used by the US Border Patrol.

Integrated Fixed Towers (IFT) are deployed to the Tucson and Ajo sectors. They provide long-range persistent surveillance; detect and track without operator intervention, and enable control room personnel to identify and classify targets using video feed.

Remote Video Surveillance Systems (RVSS) provide short, medium, and long-range persistent surveillance. They are located in all sectors along the Southwest Border and in selected sectors along the Northern Border. They enable an operator to detect targets and have a limited capacity to track, identify and classify targets using a video feed. RVSS use cameras, radio and microwave transmitters to send video signals to a control room for remote viewing. They are mounted on stand-alone towers or on other structures if available.

Mobile Surveillance Systems (MSS) provide long-range mobile surveillance and consist of a suite of sensors (radar and camera) mounted on USBP vehicles. An agent deploys with the vehicle to operate the system. The systems automatically detect and track Items of Interest (IoIs) without operator intervention. Each system/vehicle is equipped with an operating picture of the area under surveillance, and provides the agent/operator with data and video of observed items of interest.

Mobile Surveillance Capability (MSC) is the next generation of the MSS unit and provides long-range mobile surveillance. It consists of a suite of sensors (radar and camera) mounted on USBP vehicles. An agent deploys with the vehicle to operate the system. Again, the systems automatically detect and track Items of Interest without operator intervention. Each system/vehicle is equipped with an operating picture of the area under surveillance, and provides the agent/operator with data and video of observed items of interest.

Mobile Video Surveillance System (MVSS) provide short and medium-range mobile surveillance and consist of a suite of camera sensors mounted on USBP vehicles. An agent deploys with the system. MVSS enable an operator deployed with the system to detect and, to a limited extent, track, identify, and classify functions using the video feed. The MVSS sensors are mounted on telescoping poles and feature remote control equipment. The current MVSS technology integrates color cameras and infrared imagers into a closed-circuit television (CCTV) system with pan-tilt-zoom (PTZ) control contained within the vehicle.

Unattended Ground Sensors (UGS) provide short-range persistent and mobile surveillance. These sensors support the need to detect and, to a limited extent, track and identify tasks. Sensor capabilities include seismic, passive infrared, acoustic, contact closure and magnetic, although these capabilities are not necessarily available in all deployed UGS.

When a ground sensor is activated, an alarm is communicated to a data decoder that translates the sensor's activation data to the ICAD system. The data is then displayed on the eGIS map viewer and in ICAD. Operations Center personnel notify agents/officers of the detection and they are sent to investigate. Their detection ability ranges from 10 to 15 meters, so they are used primarily along trails and key ingress/egress points depending upon traffic patterns and intelligence.

Imaging Unattended Ground Sensors (I-UGS) are a specific type of unattended ground sensor with an integrated camera and the ability to transmit images or video back to the operations center. As with UGS, I-UGS are monitored in ICAD and on the map in eGIS. Images are viewed in ICAD's I4Live web-based monitoring system. USBP is primarily using hunting cameras that were devised to detect and track the game. Hunting cameras are relatively inexpensive, and can be mounted in trees, on poles, or be partially buried.

USBP currently employs agent-centric support equipment for mobile surveillance; this category of equipment is man-portable, or transportable in a vehicle. The equipment includes long, mid and short-range thermal imaging devices (Recon III's and Recon Lites). This equipment provides agents with an enhanced ability to detect illegal activity and track intrusions when conducting surveillance operations or can support tracking and response activities. This equipment is particularly essential during night operations where unaided vision is very limited.

Recon Lite

Recon IV Ultra Lite

Night Vision devices are small, lightweight, handheld devices designed for use in starlight and moonlight. They are used for general observation, tracking, and reading, and can be mounted to weapons for hands-free use, or nighttime still or video photography. Night Vision optics are multifunctional and there are various versions which are easily adaptable for use with a variety of accessories; all aid in night time and low-light operations.

PVS-14

PVS-6

The technology used by the US Border Patrol assists agents in detecting, tracking, and identifying illegal entry into the United States. However, the technology cannot pursue, apprehend or arrest illegal entrants into the United States; only a Border Patrol agent is able to perform those tasks. Technology is a force enhancer but is not a substitute for personnel on the ground.

Special Operations Group (SOG)—Mission Statement

The Special Operations Group mission is to train, organize, equip, resource, and deploy specially trained Tier One tactical and emergency response personnel worldwide in order to protect America.

Our vision is to be the Department of Homeland Security's premier Tier One special operations rapid response to terrorist and Transnational Criminal Organizations (TCO) threats. We will improve our readiness posture by increasing our number of trained special operations personnel

and transportation solutions, conducting realistic training, and implementing an improved mission tasking process.

SOG is based in El Paso, Texas and is comprised of command and staff that plans, coordinates and executes national, regional and international level operations; and supports Sector based Special Operations Detachments* (SOD) through equipping, training and standardization. SOG is made up of command & staff from Border Patrol Search and Rescue Unit (BORSTAR), Border Patrol Tactical, (BORTAC), SOG Intelligence Unit, (SIU) and Mobile Response Team (MRT). In support of the USBP National Strategy, the SOG provides day-to-day emergency support functions (ESFs) for DHS, CBP, and USBP and responds to national level incidents, as outlined in the National Response Framework.

The Chief of the Border Patrol can move special operations personnel at his discretion to address high threat or rescue operations within or outside the Continental U.S. (CONUS/OCONUS). When Special Operations personnel are detailed outside their respective sectors, operational tactical control is transferred to the Chief of the Border Patrol through his proxy the SOG Director. SOG personnel also conduct international training and capacity building operations to enhance the capabilities of our foreign border security law enforcement partners at the request of the U.S. State Department and Department of Defense.

Special Operations Group (SOG)—Organization

SOG is comprised of both Operational and Support personnel:

Operations

- Border Patrol Search Trauma & Rescue Unit (BORSTAR)
- Border Patrol Tactical Unit (BORTAC)
- SOG Intelligence Unit (SIU)
- Mobile Response Team (MRT)

The operational components of SOG consist of BORSTAR, BORTAC, SIU and MRT. BORSTAR, BORTAC and SIU have operational teams based at SOG. BORSTAR and BORTAC are led by a Commander and staff and also serve as the national commanders who exercise ADCON of Sector based Special Operations Detachments. SIU maintains a standard sector station command structure and MRT only maintains a staff for purposes of coordination and training for Sector MRT's.

Support

- Administrative Branch
- Logistics Branch

Administrative Branch

The SOG Administrative Branch manages Human Resources operations and budget to the El Paso based SOG personnel. During national emergencies the Administrative Branch support large influxes of personnel attached to SOG teams for extended periods ensuring that personnel travel and pay and related matters are attended to expeditiously.

Logistics Branch

The Logistics Branch manages all facilities, equipment and fleet for SOG. During national emergencies the Logistic Branch directly supports deployed SOG teams by rapidly delivering fleet and other critical equipment on site.

SOG Components—Missions Statement & Recent Deployments

BORSTAR Mission Statement

In support of the Border Patrol National Strategy, the BORSTAR Unit will provide law enforcement, search, rescue, and medical response capabilities for the U.S. Border Patrol. Additionally, BORSTAR will provide mutual assistance to local, county, state, tribal, and Federal entities by responding to law enforcement and search and rescue requirements, acts of terrorism, potential terrorism, and natural disasters throughout the United States.

The BORSTAR Unit will provide professional training, support, and operational guidance upon request and as directed by the U.S. Customs and Border Protection Commissioner and the United States Border Patrol Chief.

In FY 2013 and FY2014, BORSTAR has provided operational support to RGV, Tucson, San Diego, Yuma and El Paso sectors. The most significant support was to the South Texas Campaign (STC) in RGV Sector. BORSTAR deployed personnel and assets based on established actionable intelligence of emergent threats, illegal activity, and increases in apprehensions, fatalities, and rescues within the STC area of responsibility (AOR). BORSTAR operations in the STC consisted of providing remote law enforcement operations, emergency medical, and search and rescue response in high risk targeted areas. BORSTAR's operational presence aided in the identification of operational gaps and intelligence gathering operations in areas where local resources have been overwhelmed. These operations have led to the interdiction of threats against national security, developed and expanded intelligence gathering, and reduced/mitigated rescues and deaths of illegal aliens who get lost in the countryside in the STC AOR. Additionally, BORSTAR conducted combined law enforcement operations leveraging Local, State, and Federal Agencies in the STC AOR in the disruption and degradation of Transnational Criminal Organization (TCO) illegal activity in the STC AOR. BORSTAR provided personnel to liaison with DHS Office of Health Affairs in addressing the UAC crisis in RGV and establishing a Communicable Disease Contingency Plan to address the influx of illegal aliens requiring medical screenings and treatment. BORSTAR assets in many of the Border Patrol sectors oversaw or assisted with screening of UAC's that were transferred from RGV to other locations.

In addition to providing support to Border Patrol sector operations, BORSTAR deployed in support of 15 OCONUS missions in Belize, Panama, Costa Rica and Mexico during FY 2014 in order to provide training support to foreign law enforcement agencies. OCONUS missions were conducted in Belize, Chile, Panama, Guatemala, Costa Rica, Honduras, Mexico and the Dominican Republic with an average of 52 days.

Border Patrol Tactical Unit (BORTAC)—Mission Statement

The United States Border Patrol Tactical Unit (BORTAC) provides the Department of Homeland Security with a highly trained and specially equipped tactical unit for specialized rapid response or deliberate deployments to law enforcement situations and intelligence based threats requiring special tactics, techniques and procedures in defense of our national security.

The USBP Tactical Unit (BORTAC) provides a trained and highly specialized rapid response unit in order to conduct a wide spectrum of Special Operations, including Counter Terrorism (CT), Counter Drug (CD) and other missions with a National Security nexus, in support of U.S. Government National Security interests. BORTAC supports the National Border Patrol Strategic Plan by matching capabilities to emerging threats, through planning, training, and tactical deployment. This increases USBP's ability to respond to specific terrorist and criminal threats and incidents, and supporting the traditional USBP mission. BORTAC has developed partnerships with the FBI Hostage Rescue Team (HRT) and ICE. BORTAC will continue to foster these relationships as they support the Border Patrol Strategic Plan for a whole-of-government approach to joint operations.

In addition to providing support to Border Patrol sector operations, BORTAC deployed in support of five OCONUS missions in FY 2014. These OCONUS missions were conducted in Chile, Costa Rica, Mexico, Guatemala (MTT and CBP Advisor), and Honduras (CBP Advisor). During this same time frame, BORTAC deployed in support of five CONUS missions in the Swanton, Pennsylvania, El Centro, Tucson, and Rio Grande Valley Sectors.

BORTAC provided operational support for FY 2014 to the Rio Grande Valley (RGV) SOD in conducting joint operations to disrupt and degrade TCO activities in the McAllen area (STC-M) AOR in support of the South Texas Campaign (STC) Operation Trifecta. The operation was a multi-agency operation, with bi-national support, integrating intelligence, interdiction and investigative resources. Focusing effort on the illicit activities of the Gulf Cartel and associated TCOs within the South Texas Campaign, McAllen area. Interdiction efforts included denying the identified TCOs access to key routes of ingress/egress and intelligence based pulse and surge enforcement actions to disrupt and degrade their operations. Special Operations Group Intelligence Unit (SOG IU) provided analytical and SIGINT support to assist in the development of a Common Intelligence Picture (CIP) with RGV SOD Intelligence which further enabled the execution of Intelligence Drive Collection Initiatives with the objective of analyzing and developing intelligence TCO techniques, tactics and methods. BORTAC provided operational support in two iterations of approximately 30 days each. BORTAC also provided support to TCA to support TCA SOD and TCA ACTT with Operation Ronin, which is a year-long iterative operation conducted in order to identify, interdict, arrest and prosecute TCO operatives involved in the smuggling, scouting and scout re-supply operations in Arizona. Special Operations Group Intelligence Unit (SOG IU) provided analytical and SIGINT support to assist in the development of a Common Intelligence Picture (CIP) with RGV SOD Intelligence which further enabled the execution of Intelligence Drive Collection Initiatives with the objective of analyzing and developing intelligence TCO techniques, tactics and methods.

On September 23, 2014, Customs and Border Protection (CBP), United States Border Patrol

(USBP) Special Operations Group (SOG) and Special Operations Detachments (SOD) (El Paso, Del Rio, Yuma, El Centro, San Diego, embarked on the task of deploying personnel for what became a seven week deployment cycle in the manhunt for suspected cop killer Matthew Eric Frein. SOG responded to the support request to aid the Pennsylvania State Police (PSP) in the successful apprehension of the fugitive. Throughout the course of seven weeks, over 100 Border Patrol Tactical Unit (BORTAC), Border Patrol Search, Trauma and Rescue (BORSTAR) and SOG-Intelligence Unit (SOG-IU) personnel, mission essential gear and equipment were deployed to Pennsylvania in search of the fugitive who ambushed two troopers, killing one. Frein was on the *FBI's 10 Most Wanted List* and attempted to evade apprehension in the dense woods of the Pocono Mountains, Monroe County, Pennsylvania. BORTAC/BORSTAR Canine Teams were utilized to expeditiously clear large areas of any human sign or odor allowing resources to be reallocated to high probability search areas.

On September 24th, with less than 24 hour notice, the first wave of tactical support was delivered via CBP Office of Air and Marine (OAM) aircraft to Wilkes-Barre/Scranton, Pennsylvania. OAM played a pivotal role in providing continuous air support throughout the operation by transporting personnel and canines from SOG Headquarters in El Paso, Texas and SOD personnel from El Paso, Del Rio, Yuma, El Centro, and San Diego Sector. In addition to providing transportation in and out of the area of operation, OAM provided close air support with rotary aircraft to assist the law enforcement elements for the duration of the operation.

BORTAC provided Command Staff personnel who coordinated the day to day operations and participated in joint planning missions with the other agencies to ensure logistical and tactical support. BORTAC/BORSTAR personnel performed a vital role in the search for the fugitive utilizing skills refined from years of tracking, imploring night capabilities to operate 24/7 and from conducting high risk operations in difficult terrain throughout the country. BORTAC/BORSTAR personnel performed daily missions with various agencies but not limited to PSP-Special Emergency Response Team (SERT), U.S. Marshals Service Special Operations Group (SOG), Federal Bureau of Investigation (FBI) Tactical Assets, and Bureau of Alcohol, Tobacco and Firearms (ATF) Special Response Team (SRT). SOG-IU integrated and coordinated with other agency partners within the Intelligence Section at the Command Post (CP) and Tactical Operations Center (TOC). Intelligence information gathered was then disseminated to the BORTAC Commander for awareness and to plan for allocation of tactical assets.

On Thursday, October 30, 2014, the Operation successfully ended with the apprehension of Matthew Eric Frein.

Mobile Response Team (MRT)—Mission Statement

The Mobile Response Team (MRT) provides a national group of organized, trained and equipped Border Patrol Agents capable of rapid movement to regional and national incidents in support of priority U.S. Customs and Border Protection (CBP) operations. MRT provides a flexible and enhanced tiered-response capability to counter the emerging, changing and evolving threats in our most challenging operational areas along our Nation's borders.

In support of the USBP National Strategy for enhanced mobility and intelligence-driven response capabilities, the MRT provides a flexible and tiered-response capability to counter the emerging and evolving threats along the challenging operational areas of our Nation’s borders. The MRT provides a national group of organized, trained, and equipped USBP agents capable of rapid movement to regional and national incidents, and events in support of priority CBP operations.

The MRT responds to intelligence driven targets and shifts in local cross-border criminal activity, as deemed necessary by the USBP Chief Patrol agents. MRT Agents are currently conducting operations in the MCS/RGC seam (Zone 6) in support of Operation Trifecta/Operation Strong safety II, to address the significant increase in alien and narcotics trafficking. RGV-SOD has also assigned MRT Agents to provide security and escort UAC’s on commercial/charter flights departing from McAllen/Brownsville, TX which commenced on May 31, 2014. MRT Agents from El Paso and San Diego have been detailed to RGV in support of Trifecta/Operation Strong safety II and to assist in the UAC security/escorts on commercial/charter flights. In response to the on-going UAC crises in the Rio Grande Valley Sector (RGV), MRT has been deployed to help alleviate the processing/detention/transportation strain and to redeploy much needed resources to critical line operations.

Special Operations Group Intelligence Unit—Mission Statement

The Special Operations Group Intelligence Unit uses a risk based, multi-discipline collection, exploitation and analysis approach to detect, track, locate targets and provide intelligence directly supporting tactical field elements and strategic planning in support of the Border Patrol Strategic Plan.

SOG IU empowers SOG and enhances Border Patrol Sectors with increased intelligence, surveillance and reconnaissance by integrating technology and specially trained personnel for the purpose of efficient and rapid collection, analysis and dissemination of intelligence. As an integral part of the operational planning process with other SOG assets, SOG IU integrates with SOG operational teams and provides direct intelligence support using a multi-faceted collection framework for actionable intelligence to field operators.

Through collaboration with Border Patrol Sectors, Department of Defense, law enforcement agencies, and international partners, SOG IU complements the success of the Corridor Campaign Plans. SOG IU identifies threats operating across corridors and threats approaching the U.S. border. SOG IU prioritizes these risks and supports the missions to mitigate the operational gaps specific to each corridor.

The following are FY 2014 key metrics collected between all SOG IU unit (ETAC, ATB, FIT and ISB).

Exhibit 17: FY 2014 Key Metrics for SOG IU

Mission Supported	20
-------------------	----

FIRs Generated	29
New Identified Targets HUMINT and SIGINT	68
New Smuggling Organizations Identified	6
Investigations	23
UNCLASS/CLASS Reports Generated	182
Threat Assessments Generated	9
OCONUS Debriefings	6
Security Clearances Processed	25
Passport Applications Processed	63
PR Personnel Trained	77
Gotham Sector Training	6

The following chart shows the mission support distribution for FY 2014. The majority of the support was focused towards the South Texas and Arizona Corridors. The ‘Other’ category covers other agency mission support and OCONUS deployments.

Exhibit 18: FY 2014 Mission Support Distribution

Exhibit 19: SOG Component Personnel Numbers
As of November 19, 2014

	BORSTAR Personnel	BORTAC Personnel	Overall Total

Enforcement Systems and Sign-Cutting Effectiveness Module

USBP currently employs multiple enforcement systems to facilitate the detection and apprehension of illegal aliens. However, the Border Patrol lacks a consistent ability across the southwest border to collect and aggregate data into a coherent common operating picture. The \$6 million requested in the FY 2015 President's Budget will allow CBP to establish additional geospatial tracking capabilities through the expansion of enforcement system infrastructure which will be deployed across the entire border. This enhanced system, known as the Tracking and Sign-Cutting Effectiveness Module, will more consistently record the location of apprehensions, gotaways, and turnbacks and expand the Border Patrol's ability to identify traffic patterns, visualize key performance measures, and make effective tactical decisions on daily personnel and equipment deployments. It will allow agents and commanders to maintain an active record of sign-cutting and tracking operations, drag road status and sign-cutting detections, including agent and suspect status, track disposition, and results. This system will build from existing systems and data capabilities such as the Intelligent Computer Assisted Detection (ICAD) application and the Enterprise Geospatial Information Services (eGIS). ICAD is USBP's primary system for tracking agent dispatch and monitoring unattended ground sensors (UGS). ICAD's functions include agent dispatch and status monitoring, sensor alerting; operational command and control, and situational awareness. eGIS visually depicts CBP resources to facilitate situational awareness. Multiple detection assets, including UGS and remote video surveillance systems (RVSS) are integrated to provide real-time view of activity and provide the framework for advanced situational awareness and planned internal and external sharing of operational data. The expansion of these capabilities support the Border Patrol's shift to a risk-based strategy by providing the on-the-scene commander with better and more real-time data on which to base decisions.

Consequence Delivery System (CDS)

The USBP conducts operations along southwest, northern, and coastal U.S. borders. Each area has unique circumstances that afford the Border Patrol a range of applicable consequences for use in response to cross-border illegal activity. The Border Patrol has objectively evaluated these unique environs across the border and concluded that border security can be enhanced through a concerted analysis to improve consequence application and effect using a process called the Consequence Delivery System – in order to further disrupt the smuggling cycle and continue the recent progress that has been made to enhance security along the Nation’s borders.

CDS is an initiative that began conceptually in FY 2010 and was fully implemented across the southwest Border Patrol Sectors by the end of FY 2012. During FY 2012, CDS was expanded to the northern and coastal Border Patrol Sectors, as well as to southwest border OFO offices, with full implementation achieved by the end of FY 2013. CDS implements an aspect of targeted enforcement promoted in the FY 2012-2016 Border Patrol Strategic Plan. Previously, consequences were applied based on the viability of consequence programs and the demands of a high volume of illegal aliens. Today, through the application of CDS, consequences are applied through advanced analysis of consequence programs and alien classification to yield the greatest impact.

CDS standardizes the decision making process, guiding management, and agents through a process designed to uniquely evaluate the circumstances of each apprehension of a subject, and apply the best consequence for that individual to break the smuggling cycle and influence the subject against future illegal entry attempts. The seven categories of classifications – First Apprehension; Family Unit; Second/Third Apprehension; Persistent Alien; Suspected Smuggler; Targeted Smuggler; and Criminal Alien – are paired with the most appropriate consequence options and range from administrative voluntary repatriation to criminal prosecution.

Exhibit 22: Post-apprehension Indicators – Recidivism

Exhibit 23: Outcome Indicator – Recidivism Rate and Average Apprehensions per Recidivist

Using CDS analysis for FY 2014, the Border Patrol increased the percentage of apprehensions that resulted in a more effective and efficient consequence, identified by CDS, from 59 percent in FY 2011, to 89 percent. Subsequently, the overall recidivism reported for the subjects apprehended on the southwest border fell from 24 percent in FY 2010, prior to CDS implementation, to 14 percent in FY 2014, and the average number of apprehensions for recidivists fell from 2.66 in FY 2010 to 2.40 in FY 2014.

Consequence Options

Operation Against Smugglers Initiative on Safety and Security (OASISS) is a bilateral criminal prosecution agreement between the U.S. and the Government of Mexico (GoM). Since 2005, OASISS allows for Mexican citizens found smuggling aliens in the U.S. to be prosecuted by the GoM.

Streamline is a criminal prosecution program targeting individuals who illegally enter the U.S. Streamline is a multi-agency effort that relies heavily upon the collaborative efforts of CBP, the U.S. Magistrate, the Federal Judiciary, the U.S. Attorney's Office, the U.S. Marshals Service, ICE, and the Department of Justice (DOJ) Executive Office of Immigration Review (EOIR).

Quick Court is a joint CBP and DOJ effort. CBP works with EOIR to increase the efficiency of immigration court hearings by placing aliens in removal proceedings in immigration courts close to the border, eliminating the need to acquire detention space to hold an alien while awaiting an appearance before an Immigration Judge. As in other immigration proceedings, an administrative final order of removal issued to the alien generally results in a ten year bar to legal re-entry. Further, when a subject who was previously removed is re-arrested, he or she is subject to a federal criminal charge of felony re-entry under 8 U.S.C. § 1326.

The Alien Transfer Exit Program (ATEP) repatriates aliens through geographic areas different from that of their entry location to disrupt future coordination with smugglers after their arrest and removal. ATEP is designed to disrupt the smuggling cycle that often reunites removed aliens with their hired smugglers to attempt another illegal entry.

Expedited Removal proceedings are initiated against aliens who are present without admission, are encountered by an immigration officer within 100 air miles of the U.S. border, and have not been physically present in the U.S. for the 14-day period immediately before their arrest. Aliens processed for expedited removal procedures are not detained pending a hearing before an immigration judge, but are immediately processed for a formal administrative removal order. If an alien, expeditiously removed, returns illegally, he or she may be considered for criminal prosecution (Illegal Re-entry after Removal).

Reinstatement of Removal provides the ability to reinstate a previously executed removal order with respect to aliens who illegally reenter the United States. If an alien is found to have reentered the United States after removal, the prior order of removal is reinstated from its original date and is not subject to review. In most cases, it is not necessary to detain aliens processed for reinstatement pending a hearing before an immigration judge. Reinstatement does not preclude criminal prosecution in accordance with local procedures and guidelines.

Voluntary Return is used at the discretion of BPAs and their supervisors to allow an alien to depart voluntarily from the U.S. in lieu of being subject to removal proceedings.

Warrant of Arrest / Notice to Appear is used when BPAs make an arrest and the alien is to be detained in DHS custody pending a hearing before an immigration judge.

Exhibit 24: CDS – SWB Apprehensions

International/Community Efforts

Latin America

In support of the DHS Strategy for Engagement in Latin America, USBP is providing support and is complementing the CBP International Strategy by leveraging the resources of partner nations through capacity building, advisory support, training, technical assistance, improved information exchange, and shared best practices in order to augment border security efforts in the United States. In its strategy, DHS specifically highlights the key importance of U.S. collaboration with both Mexico and Central America, due to the increase in TCOs, gangs, and drug trafficking organizations, human trafficking and smuggling networks, widespread corruption, and the use of the region as a global transit zone for illicit activities.

The Central American Advisory Support and Training (CAAST) initiative is a Border Patrol-led effort aimed at capacity building in Central America by providing technical assistance and training to combat Transnational Criminal Organizations (TCOs). In support of the DHS Strategy, CAAST initiatives are collaborative efforts between the United States and host nation partners designed to enhance border security capabilities throughout the region, provide on-site advisory support as well as allow for future development and expansion of host nation border security law enforcement. USBP will continue to support CBP's INA efforts through engagement with partner nations, to include providing short term advisors detailed to Central America. Since its inception, the CAAST has provided assistance in Belize, Costa Rica, Guatemala, Honduras, and Panama. In an effort to expand the CBP/BP impact, and in the interest of encouraging long term sustainability, the goal of the CAAST is to transition to permanent advisors in the region.

Advisors have been deployed to the United States Embassies in Panama, Costa Rica, Honduras, Guatemala, and Belize through sponsorship by the Department of State's International Narcotics (INL) Bureau and Law Enforcement Affairs. Host nations receive border and operational capabilities assessments, training, and subject matter expertise in the area of border enforcement operations.

Successful engagements include:

- Establishing a Regional Border Protection Training Program in Panama;
- Creating and implementing the Costa Rican Border Police (CRBP) Directorate and assisting the CRBP with the establishment of a codified selection process for its Academy;
- Assisted in the establishment of a Policia Nacional (PN) tactical support element, Grupo de Operaciones Especiales Tacticas (GOET) in Honduras to help combat border related crime.
- Assisted in the creation and training of the Interagency Task Force (IATF) in Guatemala as part of a Department of Defense (DoD) program that was created to address border security issues on the Guatemalan - Mexican border to include combatting TCOs in rural areas. This project is supported by the United States Southern Command (SOUTHCOM) with Army Special Operations South (ARMYSOUTH).
- Maintaining the USBP International Liaison Unit that creates positive working relationships and alliances with foreign counterparts to increase border security, and the Operation against

Smugglers Initiative on Safety and Security program that enables the prosecution of alien smugglers across the southwest border;

- Coordinated deployment of Federal Police and U.S. Border Patrol assets along respective sides of the border during periods of increased illicit activity; and
- The Border Violence Protocols that created a bi-national response mechanism for incidents of violence along the southwest border through (i) law enforcement procedures and best practices; (ii) response to incidents of violence; (iii) joint threat assessments; (iv) coordinated patrols; (v) communications; (vi) Border Violence Prevention Group; and (vii) oversight.

Immigration Advisory Program/Joint Security Program

As part of CBP's layered enforcement strategy, USBP augments OFO's Immigration Advisory and Joint Security Programs with personnel. IAP focuses on enhancing the safety of air travel by preventing terrorists and other high-risk travelers from boarding commercial aircraft bound for the United States and reducing the number of improperly documented passengers from traveling to the United States. JSP advises and assists in the implementation of advance passenger information targeting operations. JSP's expertise facilitates the identification of travelers who do not possess the proper documentation to enter or transit the United States, Mexico, and Panama. Both programs are established in the Western Hemisphere, preventing terrorists, criminals or inadmissible aliens from boarding U.S. bound flights, prohibiting entry into the U.S. and eliminating the costs associated with removal proceedings, transportation back to the country of origin, and the penalties applied to the airline.

International Border Enforcement Team (IBET) Shadow Program

The United States and Canada IBET Shadow Program is jointly led by the USBP and the Royal Canadian Mounted Police (RCMP). It is part of the CBP International Visitor Program and is used to demonstrate how a cross border bi-national working relationship can make vast improvements to border security. It is designed to allow foreign counterpart border agencies to gain exposure and learn the best practices and management programs of USBP. Many Eastern European countries have shown great interest in the IBET approach to border security, including the Ukraine, Croatia, Bosnia, Macedonia, Serbia, Albania, and Montenegro. The IBET Shadow Program is a unique program between the United States and Canada intended to show the close cooperation and integration on border security issues between the two countries; there are no plans at this time to expand the program to include any other foreign countries.

CBP Critical Capabilities

As mentioned earlier, USBP is supported in accomplishing its mission by other offices within CBP. These offices provide essential support services that allow USBP to concentrate on its core missions; nonetheless they have a critical role in the success or failure of the USBP to accomplish its border security mission. These programs are funded in PPAs other than the Border Security Control PPA and their program details are described in their respective PPA narratives; however, USBP believes it is essential to discuss these programs so that their criticality to USBP operations and the impact of program reductions is understood.

Tunnels

The first documented cross-border tunnel was detected in 1990. Since that time, over 160 tunnels have been discovered along the borders, with the vast majority occurring in the San Diego and Tucson sectors. These tunnels have been discovered through the efforts of CBP, ICE/HSI, DEA, and local law enforcement agencies. The overall objective of the DHS Tunnel Program is to identify, acquire, and implement operational solutions to support tunnel prediction capability, detection, and projection of the trajectory of cross-border tunnels, safely confirm and map tunnels, and coordinate tunnel threat operations. In 2010, USBP was designated as the lead agency for the CBP Tunnel Detection and Technology Program. USBP has enlisted assistance from CBP's Office of Technology Innovation and Acquisition (OTIA) to support tunnel technology acquisition and the creation of a formal tunnel program of record. In FY 2015, OTIA will fund the Cross-Border Tunnel Threat Analysis of Alternatives (AoA) to examine what technologies are available to counter the cross-border tunnel threat and determine which technologies and solutions offer the largest impact for expenditure of resources. Funding for tunnel remediation is provided in the Facilities Construction and Sustainment PPA.

TACCOM

The TACCOM program office is responsible for approximately \$275 million of Land Mobile Radio (LMR) assets and is the backbone of USBP communications operations. Funding for the TACCOM program is provided to OIT and OTIA. Currently, a significant portion of USBP LMR assets (Spectra and Spectra Plus radios) are no longer supported by the manufacturer; USBP acquired all available spare parts for these units, which have now been completely depleted. This has forced USBP to purchase new replacement radios which are incompatible with existing installation kits, incurring labor costs to remove the old installation kits and install the new kits. By FY 2018, the remaining portion of USBP LMR assets (Motorola XTL5000) will no longer be supported.

- Total Portables: 22,000 (Production of these radios ceased as of September 2013 and will no longer be supported by industry by 2018)
- Total Mobiles: 11,533 (Production of these radios ceased as of September 2013 and will no longer be supported by industry by 2018)
- Total Legacy Radios: 10,796 (outdated)

USBP Technology and Tactical Infrastructure Mission Analysis

The USBP conducts a "ground up" scenario and data driven mission analysis process that articulates tactical, low-level baselines, gaps and mission needs. The purpose of this analysis is to support investment and milestone decisions for technology and tactical infrastructure investments, which are made with Border Security Fencing, Infrastructure, and Technology (BSFIT) funding from OTIA. The goal is to articulate business cases in support of the acquisition process. The United States Border Patrol utilizes technology and tactical infrastructure as a force multiplier. The Border Patrol determines technology and tactical

infrastructure needs based on mission analysis and manages field requirements from the headquarters level.

Technology (MSC/MVSS/RVSS)

The Technology Liaison Office within USBP works with OTIA to develop operational requirements for technological assets, monitors current project status, and recommends reassignment or redeployment of technology assets. These assets are procured and sustained with Border Security Fencing, Infrastructure, and Technology (BSFIT) funding from OTIA. These assets include Mobile Surveillance Capability (MSC), MVSS, and RVSS. Many of these systems are reaching the end of their expected life cycle and require replacement. The Arizona Technology plan was to be the initial step towards replacing these aging assets.

CBP Transportation Program

CBP does not have sufficient organic capability to transport and guard illegal aliens apprehended at and between the POEs. The CBP Transportation Program was developed to provide an integrated system of contracted detainee transportation and security along the southwest border, northern border, coastal borders, and the air, land, and sea POEs. This program reduces the numbers of officers and agents that would be used in securing and transporting illegal detainees and allows them to focus on their traditional law enforcements operations. In FY 2013, OTIA was designated as Executive Agent, replacing USBP, and funding was transferred to OTIA beginning in FY 2014. This contract capability was used extensively in Rio Grande Valley sector to move Unaccompanied Children to centralized locations where they could be more adequately supervised.

Aerial/Marine/Riverine Support

This support is provided by the Office of Air & Marine (OAM). OAM provides airlift, surveillances, observation, and medical evacuation support to USBP. This support allows BPAs rapid access to remote locations along the border as needed. Aerial support provided by OAM to OBP is depicted below.

Exhibit 25: OAM Support Hours for the Border Patrol

Hours Allocated	FY 2011	FY 2012	FY 2013	FY 2014
Flight Hours	58,197	66,299	53,179	51,204
Marine and Riverine Support Hours	85,414	102,724	99,645	104,811

Fleet Management Program

The Mobile Assets Program Management Office (MAPMO), funded through the Administration PPA, is responsible for the acquisition and disposal of vehicles used by CBP offices. The USBP vehicle fleet represents approximately 70 percent of the CBP fleet; the mobility provided by this fleet is critical to enabling USBP to accomplish its mission of securing the border.

NII/RAD NUC

The Non-Intrusive Inspection/Radiation Nuclear Detection (NII/RAD-NUC) program manages the deployment of Z Back-Scatter Vans, Fiberscopes, Busters, Radioisotope Identification Devices (RIID), and Personal Radiation Detectors throughout USBP. USBP radiation detection equipment (RDE) capability is focused on station and checkpoint operations. NII and RDE are seen as force multipliers, allowing agents to scan larger portion of the stream of traffic for contraband and illegal entrants. USBP is currently at full operational capability for Personal Radiation Detectors (PRD) and RIIDs; however, USBP RIIDs and PRD's are near or past their expected service life and require replacement. The Domestic Nuclear Detection Office (DNDO) is appropriated funding for the development of the global nuclear detection architecture, development, and acquisition of RN detection equipment, and DHS operational components are appropriated funds for Operations and Maintenance (O&M) of NII and RDE; however, advances in Radiation detection technology will better serve the needs of the USBP, by increasing the efficiency and effectiveness of detection operations. NII funding is provided through the Inspection and Detection Technology PPA.

In addition to the key capabilities described above, there are additional capabilities provided by other CBP offices, such as facilities sustainment by the OA's Facilities Management & Engineering, new agent recruitment by HRM, and new agent training and agent professional development provided by the OTD. These and other capabilities support and assist USBP in accomplishing its mission of securing the borders.

Training and Professional Development

The Office of Training and Development (OTD) is responsible for centralized leadership and direction of all CBP training programs. OTD ensures that all training efforts support the CBP mission and strategic goals, meet the needs of a diverse and dispersed workforce, and contribute to measurable outcomes and results. OTD establishes standards and policies for designing, developing, delivering, and evaluating training. USBP training conducted by OTD is funded through the Training Between the Ports of Entry PPA. The U.S. Border Patrol Academy, under the direction of a Chief Patrol Agent, is primarily responsible for Border Patrol agent basic training, as well as specific specialized training and instructor certification.

CBP policy requires agents to undergo periodic qualifications of firearms proficiency and annual use of force training/certification. Failure to successfully complete these periodic qualifications results in the de-authorization to carry a firearm and/or use intermediate force devices. Periodic qualifications are administered by certified Firearms Instructors and Use of Force Instructors at the Border Patrol sectors. All Use of Force instructors are required to attend training for initial certification, and recertification training every five years.

The Use of Force Policy Division (UFPD) is responsible for the development and articulation of all CBP use of force policy.

In supporting the tasks, functions, and mission requirements of each CBP operational component, UFPD seeks to research, evaluate and procure the best possible equipment for utilization in the field. UFPD also provides comprehensive management and life cycle accountability for tactical equipment and body armor. Additionally, OTD and UFPD provide replenishment of Use of Force equipment and resources, to include ammunitions, and funding for these requirements is essential for officer safety and maintaining established proficiencies and policies.

UFPD has developed appropriate controls, standards, best practices and policies in order to enhance the safety and performance of enforcement personnel.

CBP policy also requires all agents be issued personal protective body armor. CBP strongly encourages the use of body armor while performing law enforcement duties, and requires personal to wear body armor during certain instances such as firearms training and qualifications. Body armor that has exceeded its expiration date or has become unserviceable must be replaced. The current life-cycle for issued body armor is five years.

Summary

In FY 2016, USBP will continue to further its mission by using a variety of programs and initiatives to support strategic objectives. USBP is committed to continuing the southbound land border enforcement efforts to combat the smuggling of firearms and currency to Mexico. A major future objective of the Border Patrol is to ensure that its workforce is highly mobile so that it can rapidly adjust to changes in the border security environment. USBP will continue to reevaluate its existing programs and planned initiatives as the threats and vulnerabilities to border security change in response to newly deployed border enforcement resources.

Performance

The Border Patrol is developing performance goals to frame its unique contribution to comprehensive border security. Several of these measures are already reportable and others are being developed. These measures are not intended to be the sole measures to assess border security. Together, the suite of measures will be used to assess and provide a comprehensive picture of the state of border security.

Three of these measures are already developed and being reported as *Government Performance and Results Act* (P.L. 103-62, GPRA) measures:

- Percent of people apprehended multiple times, also called the recidivism rate (first reported in FY 2013);
- Average number of apprehensions for persons with multiple apprehensions, also called average number of apprehensions per recidivist (first reported in FY 2013); and
- Interdiction effectiveness rate (first reported in FY 2014).

The interdiction effectiveness rate measure reports the percent of detected illegal entrants who were apprehended or turned back after illegally entering the United States between the ports of entry on the Southwest border. The Border Patrol achieves this desired strategic outcome by maximizing the apprehension of detected illegal entrants or, confirming that illegal entrants return to the country from which they entered; and by minimizing the number of persons who evade apprehension and can no longer be pursued.

The formula for calculating the interdiction effectiveness rate is:

$$(\text{apprehensions} + \text{turn-backs}) / (\text{apprehensions} + \text{turn-backs} + \text{got-a-ways})$$

The interdiction effectiveness rate noted above is captured for all corridors of the Southwest Border due to a higher level of activity in the aggregate in those corridors. Within the corridors, some areas historically have significantly higher activity/higher risk than others, and to fully implement risk-informed, intelligence-driven operations that focuses Border Patrol capabilities against prioritized threats, the Border Patrol has designated these higher activity areas as “Deployment Density” areas. The deployment density approach leverages CBP’s organic capabilities against the greatest threats along the U.S. border to consistently enhance and maintain situational awareness, and ensure a law enforcement response and resolution of detected entries. This requires a flexible force to deploy and redeploy Border Patrol resources as threats migrate to other areas.

The traditionally lower activity, lower risk areas of the border are designated as “Geospatial Intelligence, or GEOINT” areas. A different approach is used in GEOINT areas to ensure the Border Patrol maintains situational awareness even in low activity environments. The Border Patrol does not plan to implement any new GPRA measures during FY 2016 but will continue analyzing the data that is gathered under the existing measures and fine-tune the measures if deemed necessary. The Border Patrol is planning to implement three new GPRA measures in FY 2017. These new measures will address surveillance capabilities, mobility, and border security readiness. These measures have been developed and have begun the CBP leadership review and approval process. Outside of the GPRA structure, the Border Patrol is developing additional indicators that will be part of its State of the Border Risk Methodology.

Change Detection

In areas characterized as low-risk, Geospatial Intelligence (GEOINT) resources are used to enhance and maintain situational awareness along the U.S. border. GEOINT can be described as gathering and analyzing imagery and geospatial information for the purpose of detecting change within specific geographical areas of the border environment. Internal resources are used in conjunction with external partner resources in order to satisfy intelligence gaps. Geospatial Intelligence analytic techniques and methods are the primary activity classification tools used in the identified focus areas, which may have little to no infrastructure. Geospatial Intelligence provides enhanced situational awareness so emerging threats can be identified and operationalized as they occur, ensuring continued risk adaptation. This increase of situational awareness provides quantifiable data and additional confidence in the activity level of the border

GEOINT capabilities typically come from high altitude aerial platforms equipped with intelligence, surveillance, and reconnaissance technology (ISR), such as the Office of Air and Marine's (OAM) Unmanned Aircraft System (UAS). The use of these assets requires significant collaborative efforts with OAM and the Office of Intelligence and Investigative Liaison (OIIL). GEOINT change detection capability allows the Border Patrol to continue focusing capabilities on areas where the highest risk exists, but ensures that any threat adaptation can be identified quickly through information and intelligence culminating in appropriate steps being taken to rapidly minimize any new risk. GEOINT is a critical element to validating all cross border activity, or the absence thereof, for accurate state of the border assessment.

Joint Field Command-Arizona

The Joint Field Command – Arizona (JFC-AZ) was created in 2011 to implement the Commissioner's strategic guidance and intent through command, control, and coordination of U.S. Customs and Border Protection (CBP) operational functions within the state of Arizona. The JFC-AZ established a corporate construct that maximizes and improves CBP capabilities to ensure a unified, integrated, and cohesive approach to border security in the JFC-AZ's area of responsibility (AOR). The JFC-AZ reports directly to the Office of the Commissioner (OC) and, serving as the principal link between field component leadership and the OC, has oversight for all CBP operational resources and assets within Arizona.

The AOR for the JFC-AZ covers a large diverse geographical area that incorporates the entire state of Arizona, parts of California, is the largest CBP corridor/area for operations, and provides a single point of integration for all operations and planning. It is operationally responsible for almost 6,500 employees from the various CBP components, which include Tucson and Yuma Border Patrol Sectors, the Tucson Field Office, and the Tucson, Yuma, and Sierra Vista Air Operation Branches. Utilizing intelligence resources and assets of the field components, the Office of Intelligence and Investigative Liaison (OIIL), including the OIIL's Tucson Intelligence Support Team (IST), as well as other Federal, State, Local, and Tribal agencies, the JFC-AZ mitigates risks, threats, intelligence gaps, and fissures in the operating environment.

The JFC-AZ provides strategic guidance and makes operational decisions in real-time expanding operational capacities and maximizing operational effectiveness and capabilities through an integrated and cohesive team leveraging shared information and resources. Integrating the planning and execution of mission objectives results in improved border security, increases ability to protect the American public against terrorists, transnational criminal organizations (TCO) and their smuggling operations, and enhances CBP's ability to secure and expedite lawful trade and travel. The staff responds to security related operational and real-time events involving people, goods, and conveyances entering and exiting the United States, covering all international modes of transportation at and between the ports of entry.

Key to the JFC-AZ is the Joint Intelligence and Operations Center (JIOC), which serves as the principal command, control, and communications center 24x7, providing persistent, real-time situational awareness to all Arizona-based CBP operational components, and their respective commands, as well as JFC leadership. This is accomplished via sustained, comprehensive

reporting, multifaceted communication and the processing and dissemination of tactical intelligence. The JIOC is the single point of integration, coordination, de-confliction and communications for all aviation assets flying in support of the CBP mission in Arizona. Fully mission capable, the JIOC enhances mission integration, creates efficiencies and improves overall operational effectiveness. Personnel in the field have access to the right information at the right time and possess greater awareness of the current environment and factors affecting their working environment. CBP gains an operational and intelligence advantage and is prepared to respond to all threats or emergencies that arise.

Highlighted below is a list of ongoing key integration efforts within the JFC-AZ:

Exhibit 26: JFC–AZ Integration Efficiencies

Description	Ongoing Efforts
<p>Joint Intelligence & Operations Center (JIOC) Serves as the unclassified communication hub for CBP components and law enforcement partners in Arizona. Maintains situational awareness and serves as the principal coordination element for the execution of air-to-ground support to CBP field elements. Provides field components and CBP leadership with a current and coordinated picture of ongoing and emerging activities in the JFC-AZ area of responsibility to enhance information management and augment decision making.</p>	<ul style="list-style-type: none"> • Joint Operations Center: Is the liaison between the field and the Predator Operations Center, as well as the other CBP air platforms, and facilitates intelligence collection, including interdiction efforts between air platforms and ground units when illegal activities have been detected both at and between the POEs; • Emergency Operations Center: Maximizes incident response efficiency when the need to stand up arises. This is a vital facet during natural disasters or other critical incidents providing continuity of operations, to include communication across multiple Federal, State, tribal and local law enforcement agencies and emergency personnel; • Reporting: JIOC is the single point of contact for all reporting to CBP and Department of Homeland Security (DHS) executive leadership and is the communications hub that provides a direct connection to field personnel, local leadership, and tactical commanders by providing consolidated reporting to provide a complete picture of the operating environment; • Air/Ground Coordination: Zone Coordinators (ZC) receive support requests from the field when targets are detected. The JIOC determines priorities and assigns air support accordingly. ZCs are the link between the JIOC and field entities ensuring real-time situational awareness for accurate prioritization of field support. The Air Coordinator, working with the ZCs and Watch Commander, direct the air assets to support the field; and • Blue Force Tracking: Air Coordinators use the CBP Air Marine Operations System, Satellite Tracking System, and Office of Air and Marine (OAM) radio system in conjunction with the Air Safety Blue Force Command Duty Officer. Watch Commanders use Gotham software and trackers for personnel on travel to/in/from Mexico.
<p>Targeting Enforcement Unit Focus is to impact Transnational Criminal Organizations (TCO), family members, and their associates through identification, visa revocation, intelligence collection, and facilitation of investigations by CBP and its partners.</p>	<ul style="list-style-type: none"> • Target Analysis: Garners intelligence, identifies potential targets for visa revocation, and pinpoints individuals and companies that are amenable for the Drug Enforcement Administration (DEA) and the Office of Foreign Asset Control (OFAC) investigations by identifying TCO personnel, and their family members and associates. • Visa Revocation Program: Provides intelligence targeting to identify individuals involved with TCOs and use Non-Immigrant Visas (NIV) to traverse through the ports of entry (POE) in support of criminal

Exhibit 26: JFC-AZ Integration Efficiencies

Description	Ongoing Efforts
	<p>activity; works closely with Department of State to have NIVs revoked; and</p> <ul style="list-style-type: none"> • Anti-Gang Initiative: Disrupts the ability of foreign members of Outlaw Motorcycle Gangs from traveling to the United States.
Joint Operations	
<p>Conduct joint operations to enhance the border security mission and increase overall situational awareness of the Arizona AOR resulting in increased effectiveness and efficiency of operations within the JFC-AZ AOR.</p>	<ul style="list-style-type: none"> • Through integrated planning, JFC-AZ establishes guidelines and best practices for joint enforcement operations; • Components review and approve multi-agency joint/integrated operations with other federal and bi-national agencies; • Facilitates component meetings/briefings for CBP leadership in Arizona; • Assists in the coordination and mission planning for deployment of CBP, military, and civilian air assets operating in Arizona; • Prepares and provides operational briefs/status updates on CBP operations to visiting delegates, local and foreign government entities, non-government organizations, etc.; • Provides situational awareness to the OC through weekly updates/input to the Joint Operations Division (JOD) reporting process; and • Serves as a liaison entity between components in the coordination and development of future and ongoing operations.
Air Integration Strategy	
<p>Leads standardized processes for aviation operations within JFC-AZ AOR through the Executive Air Council (EAC) consisting of senior CBP leadership providing strategic guidance to the Arizona Aviation Tactical Operations Group (AATOG).</p>	<ul style="list-style-type: none"> • Arizona Aviation Tactical Operations Group: Provides continued standardization for air operations in Arizona; convenes on a weekly basis to bring together all aviation support providers and CBP staff planners to conduct operational aviation planning and create Air Tasking Order(s)/flight schedule(s) using a threat based/intelligence driven planning model to prioritize aviation support within the AOR area of responsibility; and • Executive Air Council: Ensures aviation operations align with the strategic goals and objectives of the JFC-AZ and its Campaign Plans and makes decisions regarding priorities when JFC components have competing requests.
Integrated Canine Council	
<p>Manages the finite canine resources and capitalize on their effectiveness by providing strategic and integrated support and coordination.</p>	<ul style="list-style-type: none"> • Integrated Canine Council Charter: Sets forth the guidelines and directives for monthly council meetings attended by CBP component leadership involved in canine operations in Arizona; • Integrated Canine Operations: Backfills canine shortages with component assets to maximize efficiency and utilization; • Canine Shortfalls: Establishes priorities in monthly council meetings to address and rectify support issues in canine/handler assets, trainer assets, and proper kennel facilities; and • Integrated Training: Affords CBP component trainers and canine teams the ability to cross-train with other canine assets.
Joint Planning Team	
<p>Serves as the principal coordination element and planning hub for the components in the development of Campaign Plans, Integrated Operations</p>	<ul style="list-style-type: none"> • Conducts bi-weekly meetings with the components to discuss past, current and future operations, successes, and lessons learned; • Directs planning of Defense/Military planning teams to create the annual JFC-AZ Campaign Plans, further synchronizing border security

Exhibit 26: JFC-AZ Integration Efficiencies

Description	Ongoing Efforts
Orders and Concept of Operations Plans.	<p>efforts in Arizona and to identify future military training missions in the JFC-AZ corridors providing incidental support; and</p> <ul style="list-style-type: none"> • Manages planning efforts with the components to augment direct local, state and tribal agency enforcement operations in programs such as the STONEGARDEN Grant Program, which directly support the overall JFC-AZ Campaign Plan mission.
JFC-AZ Intelligence Enterprise	
Initiates intelligence capabilities to support the CBP mission and JFC-AZ objectives for the AOR through integrated and unified execution of the CBP Intelligence Cycle.	<ul style="list-style-type: none"> • Develops JFC-AZ Priority Intelligence Requirements (PIR) and component collection plans; • Expands and leverages collection management capabilities through Intelligence, Surveillance, and Reconnaissance (ISR) data; • Distributes Annual Joint Regional Threat Assessment (Sonora/Arizona area of responsibility); • Fuses information sharing with components and state, local, federal, and tribal partners, to include bi-national counterparts; • Expands situational awareness capabilities throughout the AOR; • Develops and introduces AOR's Common Intelligence Picture/Common Operating Picture (COP/CIP); and • Maintains analytical collaboration with investigative agencies.
Foreign Operations Branch	
Provides program leadership and coordinates the integrated execution of the JFC Commander's intent for bi-national operations efforts.	<ul style="list-style-type: none"> • Coordinates with the components and other governmental agencies, as appropriate, on the planning and execution for all high level bi-national operations; • Establishes and maintains partnerships at all levels of government, both foreign and domestic, to identify common issues and concerns while proactively seeking solutions to the mutual benefit of all parties; and • Coordinates/participates in the quarterly Border Violence Prevention Protocol meetings as well as other high-level meetings with the Government of Mexico.
Incident Management	
Integrates JFC-AZ response efforts and ensures emergency preparedness to significant events beyond the scope of steady state operations.	<ul style="list-style-type: none"> • Devolution: JFC-AZ is designated as the primary devolution site for the OC, in the event of a catastrophic emergency, allowing CBP to manage and direct its critical primary mission essential Headquarters functions and operations under the direction and leadership of a designated Commissioner or Acting Commissioner. The Devolution Response Group, made up of JFC-AZ staff members, conducts exercises and advises on new roles, responsibilities, and limitations during a devolution event; • Incident Management: Executes policy, strategic planning, and administrative actions through integrated component positioning of emergency equipment, personnel, and supplies; and • Continuity of Operations: Exercises plans in accordance with program guidelines and serves as liaison with local, state, and federal organizations.
Joint Information Center	
Provides official CBP information to accredited news organizations, mass media, published professional journals, and stakeholder groups within the JFC-AZ	<ul style="list-style-type: none"> • Integrates all CBP public affairs offices in Arizona into a central communications component; • Increases public understanding and expands employee awareness of CBP's border security, trade and travel efforts,

Exhibit 26: JFC–AZ Integration Efficiencies

Description	Ongoing Efforts
AOR.	and efficiencies in Arizona; and <ul style="list-style-type: none"> Enhances tactical messaging in Mexico and Central America by establishing relationships with media in the interior of Mexico and other Latin American Countries.
Community Engagement Implements several initiatives aimed at keeping community members, civic leaders and key stakeholders informed about JFC-AZ and component efforts.	<ul style="list-style-type: none"> Provides corporate approach to engaging Members of Congress versus component-specific; Establishes relationships and partnerships with Trade Community, Department of Defense, ranchers, law enforcement, local elected leadership, and the tribal community; and Hosts meetings for trade industry, Cattle Growers Association, and Congressional staffers on mission, operations, and challenges.

Descriptions of Selected Adjustments to Base:

Cost Savings from the FY 2015 Fuel Sharing Initiative: CBP anticipates saving \$9.66 million in FY 2016 as a result of implementation of the DHS-wide Fuel Sharing Initiative in FY 2015. This initiative will enable any DHS Component vehicle to obtain fuel from any CBP-controlled fueling facility along or near the Southwest Border of the U.S., resulting in overall reduced fuel costs.

Increased Retirement Contributions: Due to additional changes to long term demographic assumptions recommended by the Board of Actuaries at its meeting on June 18, 2013, agency contribution rates for all FERS participants are expected to increase again on October 1, 2015. The expected increase of FERS contribution rates affect all federal employees at CBP, with a greater impact on agency contributions on behalf of law enforcement personnel. The adjustment to base pension contribution requirements increases CBP’s pay estimates in order to account for the increased FERS contribution requirement costs in FY 2016.

Reestimation of Pay Requirements: CBP is managing its resources to best support our frontline and mission-critical needs. Recent changes in the OBP environment necessitated a revision of pay assumptions. A number of factors have changed the estimated workforce profile of BPAs in FY 2016, including increased attrition rates in FY 2014, FY 2014 challenges in backfilling agents, and the discontinuation of the six-month promotion of BPAs in the training academy. While CBP is working diligently to meet frontline staffing targets in FY 2015, these factors have caused a decrease to the average grade profile for BPAs in FY 2016. The decrease in the average grade profile has a cascading effect, lowering the pay requirements needed for salary, overtime and differential compensation, and benefits for BPAs.

Training Between the Ports Programs	Descriptions	Training Seats Filled for FY 2014	Training Seats Planned for FY 2015	Training Seats Projected for FY 2016
Basic Training	<ul style="list-style-type: none"> • Basic Training for Border Patrol agents is conducted at the Border Patrol Academy located at the Federal Law Enforcement Training Center (FLETC) facility in Artesia, NM. • Successful completion of basic training is a pre-requisite for employment as a Border Patrol agent and ensures proficiency in the foundational law enforcement knowledge and skills required by the CBP mission. 	778	2,560	1,158
Firearms and Use of Force Instructor Training	<ul style="list-style-type: none"> • Per CBP policy armed officers and agents are required to undergo periodic qualifications of firearms proficiency and annual use of force training/certification. • Failure to successfully complete these periodic qualifications results in the officer/agent losing his/her certification to carry a firearm and/or use intermediate force devices. • These periodic qualifications are administered by certified Firearms 	564	733	733

Training Between the Ports Programs	Descriptions	Training Seats Filled for FY 2014	Training Seats Planned for FY 2015	Training Seats Projected for FY 2016
	<p>Instructors and Use of Force Instructors at field locations.</p> <ul style="list-style-type: none"> • These instructors are required to attend training for initial certification, and recertification training every five years. 			
Driver Training	<ul style="list-style-type: none"> • This training provides Border Patrol agents the skills required to effectively and safely perform their duties in High Center of Gravity Vehicles (HCGVs) and to safely and properly utilize Offensive Driving Techniques. • Completion of this program is required by policy to engage in a pursuit in a HCGV. 	287	384	384
Health & Safety	<ul style="list-style-type: none"> • This training provides BP agents training in dealing with hazardous materials, operating in confined spaces and operating dangerous equipment – scenarios they deal with on a daily basis. • It also includes funding for peer support/chaplaincy training to support staff dealing with stressful and traumatic events, such as loss of a colleague on the job. 	479	1,217	1,200
Emergency Preparedness & Response	<ul style="list-style-type: none"> • This training is required for CBP to maintain sufficient skill levels in incident management and response procedures. • This training provides capabilities not only to maintain security of the border, but also to provide support to areas struck by natural disasters. CBP supports responses to these types of events. 	190	300	300

Training Between the Ports Programs	Descriptions	Training Seats Filled for FY 2014	Training Seats Planned for FY 2015	Training Seats Projected for FY 2016
Canine	<ul style="list-style-type: none"> • Training for Border Patrol agent canine teams operating along the U.S. border between ports of entry and at Border Patrol Checkpoints. This includes canine teams trained in the disciplines of Basic Detection, Concealed Human/Narcotics Detection, Search and Rescue, Human Remains Detection, and Special Response. 	270	211	220
Special Operations Groups	<ul style="list-style-type: none"> • Training for the Office of Field Operations Special Response Teams and Border Patrol's BORTAC and BORSTAR teams is funded under this PPA. • This includes training new/ replacement team members, as well as training to maintain the skills/ certifications of existing team members. 	812	900	900
Riverine Training	<ul style="list-style-type: none"> • This training is required for Border Patrol agents to serve as a vessel commander in the riverine environment. • Border enforcement operations are frequently conducted in such an environment and skilled use of Border Patrol vessels is required by certified operators. 	104	180	180
Anti-Terrorism/ Counter Terrorism	<ul style="list-style-type: none"> • This training provides Border Patrol agents advanced interviewing skills to identify potential threats (terrorists, drugs, currency, and weapons). 	198	300	300
Instructor Training	<ul style="list-style-type: none"> • This training is required for CBP to maintain a sufficient cadre of certified, quality instructors to deliver basic and advanced training to new and incumbent Border Patrol agents. 	237	104	200

Training Between the Ports Programs	Descriptions	Training Seats Filled for FY 2014	Training Seats Planned for FY 2015	Training Seats Projected for FY 2016
Supervisor/ Leadership Training	<ul style="list-style-type: none"> • Training for first- and second-line Border Patrol agent supervisors is funded under this PPA. This training provides these supervisors the technical and supervisory skills required to effectively lead agents under their command. 	334	595	600

Descriptions of Selected Adjustments to Base:

Increased Retirement Contributions: Due to additional changes to long term demographic assumptions recommended by the Board of Actuaries at its meeting on June 18, 2013, agency contribution rates for all FERS participants are expected to increase again on October 1, 2015. The expected increase of FERS contribution rates affect all federal employees at CBP, with a greater impact on agency contributions on behalf of law enforcement personnel. The adjustment to base pension contribution requirements increases CBP's pay estimates in order to account for the increased FERS contribution requirement costs in FY 2016.

Description of Item

CBP requests \$11.1 million to provide an annual source of funding for the Border Security Deployment Program (BSDP) to provide operations and maintenance (O&M) for the current operational system. The \$11.1M funds BSDP with the ability to provide ongoing Program Management and O&M for the nationally deployed mission critical border security system. The funding also provides for incremental priority expansion to address mission needs; technology refreshment of the equipment to sustain and enhance the availability, reliability, maintainability, and security posture of the system; and planning to address gaps on a priority and funds available basis (e.g., training to facilitate investigations, expansion to other areas of operation, integration of thermal cameras for night usage, adding analytics to automate surveillance functions, or expanding the deployment of remotely managed lanes at ports.)

The BSDP provides CBP with a comprehensive and expanded secure operational environment through an integrated surveillance and intrusion detection system that delivers critical security, motion detection, remote monitoring, and situational awareness for all Land Ports of Entry (LPOEs). BSDP is a mission critical tool for the LPOEs where CBP officers and agents use security, surveillance, and audio systems on a 24x7 basis.

BSDP is a CBP enterprise solution that is fully compliant with all DHS security requirements and maintains a current security accreditation. BSDP is installed and used by the Office of Field Operations (OFO) at every LPOE, CBP Centralized Area Surveillance Centers (CASCs) and at limited airport locations along the borders. Over 2,500 authorized users access the system to perform their duties at CBP. BSDP is supported by the physical infrastructure of the Centralized

Audio Video Surveillance System (CAVSS). CAVSS operates with a full Authority to Operate (ATO) and has achieved successful System Accreditation (SA). It consists of over 7,200 cameras, 1,200 microphones, 880 workstations, and 560 standardized Digital Video Recorder (DVR) platforms capable of storing 90 days of video and audio data.

Project Schedule:

Milestone	Completion Date/Projected
Program Management Support contract award	September 18, 2014
Operations & Maintenance (O&M) Support Bridge extension contract award	September 30, 2014
Contract award for new Program Management Support contract	March 18, 2015
Award for new O&M Support Blanket Purchase Agreement (BPA) contract	April 1, 2015
Annual contract option award for Program Management Support contract	March 18, 2016
Annual contract option award for Operations & Maintenance support	April 1, 2016

Project Location(s):

BSDP is currently located across the U.S. at all LPOEs and limited airports along the border.

Justification

BSDP is a mission critical tool for the LPOEs where CBP officers and agents use security, surveillance, and audio systems on a 24x7 basis. BSDP functionality is also used by other CBP offices, including OBP, OIIL, and IA. BSDP also supports CBP CASCs that provide broader situational awareness across regionally located and remotely monitored LPOEs. Since deployment, BSDP has successfully provided CBP with expanded coverage and threat visibility allowing CBP management to utilize officers and agents to focus resources and costs on critical CBP border mission priorities. BSDP has resulted in more efficient and effective use of CBP resources and personnel, improved operational control and situation awareness, increased contraband seizures, enhanced CBP personnel safety and security and reinforced CBP personnel integrity. A cost avoidance assessment was conducted as part of the recent operational analysis addressing the most fundamental surveillance and security capabilities. The assessment stated that BSDP is achieving cost avoidance of \$94 million/year by using technology instead of officer presence for security monitoring.

Impact on Performance (Relationship of Increase to Strategic Goals)

BSDP Alignment with CBP Mission Priorities:

Promote Integrity and Transparency - BSDP plays a key role in addressing officer integrity in the workforce through the capture of recordings used by IA and other investigative bodies to support and respond to investigations.

Countering Terrorism and Transnational Crime - BSDP provides CBP persistent surveillance, situational awareness, and officer safety at LPOEs — the “last line of defense” to safeguard the nation from those seeking to do harm.

Advance Comprehensive Border Security and Management - BSDP is the Common Operating Picture (COP) at LPOEs that provides CBP situational awareness and operational integration to address cross-border criminal activity, inspection needs, and enforcement at LPOEs. BSDP is also considered a critical underlying capability to facilitate the remote monitoring and management of the future entry/exit mission.

Enhance U.S. Economic Competitiveness by Enabling Lawful Trade and Travel - BSDP, as a force multiplier, provides CBP significant cost avoidance and allows officer resources to focus on the trade and travel mission.

Promote Organizational Integration, Innovation, and Agility - BSDP is routinely used by CBP mission components with expressed desire to ensure comprehensive coverage across the organization. Recently BSDP has begun deployment across BP sector and checkpoint facilities.

BSDP Alignment to DHS Goals and Priorities:

Mission 1: Prevent Terrorism and Enhance Security

Goal 1.1: Prevent Terrorist Attacks

- Deter and disrupt operations
- Strengthen transportation security

Goal 1.2: Prevent and Protect Against the Unauthorized Acquisition or Use of Chemical, Biological, Radiological, and Nuclear (CBRN) Materials and Capabilities

- Identify and interdict unlawful acquisition and movement of CBRN materials and weapons

BSDP provides persistent surveillance at all U.S. LPOEs supporting the overall security and reducing the vulnerability of the people and facilities at the LPOEs, enhancing border security at and around the LPOE, and potential support for any terrorist investigation or alerts at the border. BSDP video surveillance technology has also been used in conjunction with LPOE Non-Intrusive Inspection (NII) solutions used to detect radiation. BSDP provides CBP officers situational awareness in the inspection areas and visibility of suspected cargo that has tripped NII detectors.

Mission 2: Secure and Manage our Borders

Goal 2.1: Secure U.S. Air, Land and Sea Borders and Approaches

- Prevent illegal import and entry
- Prevent illegal export and exit

Goal 2.2: Safeguard and Expedite Lawful Trade and Travel

- Safeguard key nodes, conveyances, and pathways
- Manage the risk of people and goods in transit

- Maximize compliance with U.S. trade and promote U.S. economic security and competitiveness

Goal 2.3: Disrupt and Dismantle Transnational Criminal Organizations and Other Illicit Actors

- Identify, investigate, disrupt, and dismantle transnational criminal organizations
- Disrupt illicit actors, activities, and pathways

BSDP provides CBP an integrated surveillance and remote monitoring capability at all U.S. LPOEs. BSDP improves the safety and security of CBP officers, the traveling public and government facilities. BSDP also promotes officer integrity, and adjudicates judicial investigations through court admissible video and audio recordings. BSDP, as a force multiplier, allows CBP officers and agents to focus their attention on the efficient flow of people and goods at the border. BSDP situational awareness at LPOEs is also used to monitor the overall operations at LPOEs and make real time efficiency and risk adjustments as needed.

Mission 3: Enforce and Administer Our Immigration Laws

Goal 3.1: Strengthen and Effectively Administer the Immigration System

- Effectively administer the immigration services system

Goal 3.2: Prevent Unlawful Immigration

- Prevent unlawful entry, strengthen enforcement, and reduce drivers of unlawful immigration
- Arrest detain, and remove priority individuals, including public safety, national security, and border security threats

BSDP supports officers conducting the inspection process at the border and also provides video surveillance and situational awareness for the holding areas where illegal immigrants may be detained at the border.

Program Canine Enforcement Program

Increase 2:

PPA: Internal Affairs, Administration, Rent, Inspections Trade and Travel Facilitation, Training at the Ports of Entry, Training Between the Ports of Entry

Program Increase: Positions 47, FTE 24, Dollars \$9,097

Funding Profile

	FY 2014 Revised Enacted			FY 2015 President's Budget			FY 2016 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							505	505	\$108,797
Program Increase							47	24	\$9,097
Total Request	505	505	\$109,796	505	505	\$108,933	552	529	\$117,894

Description of Item

CBP requests \$9.907 million in funding in S&E for the Canine Enforcement Program (CEP).

CBP's CEP plays a crucial role in anti-terrorism and interdiction efforts. Through the CEP, CBP has established and deployed a world-class detector dog program to augment existing technology while employing cutting edge detection capabilities. This program provides the Agency with a higher level of security and detection capability while maintaining a seamless conduit between existing technology and the proven capabilities of detector dogs. The OFO canine teams are strategically assigned to POEs around the United States and to preclearance operations abroad. CBP officers use specially trained detector dogs in interdiction and to support specialized programs aimed at combating terrorism, as well as narcotics, firearms, and undeclared currency smuggling at our Nation's borders, international airports, and seaports.

Canines also play an important role in the Border Patrol's mission of securing the border. Canines are used to detect illegal aliens, illegal drugs, and illegal currency at checkpoints and are used in field operations to track and apprehend illegal aliens. USBP has approximately 890 canines available for use. New canines are purchased and trained by OTD and transferred to the Border Patrol upon completion of training; the Border Patrol becomes responsible for the care and upkeep costs of the canines once they are transferred to its authority.

Overall, CBP requests a program increase of \$10 million to support an additional 47 canine teams for CBPOs and 40 for BPAs. CBP proposes that this increase be funded out of the

following PPAs: Automation Modernization’s Information Technology PPA; Construction & Facilities Management’s Facilities Construction and Sustainment PPA; and Salaries & Expenses’ Inspections, Trade, and Travel Facilitation, Rent, Administration, Internal Affairs, Training at the Ports of Entry, and Training Between the Ports of Entry PPAs. Increased budget authority, particularly efforts involving additional positions, often requires association with the multiple PPAs that support these new positions. CBP’s position cost model provides the capability to present and distribute the estimated necessary authority and FTE with any such increase in positions to the appropriate support offices. In most cases, position increases reflect authority and FTE in both the primary PPA associated with the increased capability and/or function, as well as the mission support PPAs responsible for hiring, vetting, training and outfitting the new positions. The total requested increase to the Canine Enforcement Program across all PPAs is \$10 million.

Justification

The primary goal of the CBP CEP is detection and apprehension of persons attempting entry to organize and carry out acts of terrorism and detection and seizure of controlled substances and other contraband, often used to finance terrorist or criminal drug trafficking organizations. Another critical role for CBP CEP is protecting America’s food supply from the importation of food products that may contain harmful pests or disease. CBP canine teams also assist local law enforcement agencies when requested.

An analysis of the following information has identified the POEs with the highest need for additional canine teams by enforcement discipline (Currency Firearms (C/F)) and Human/Narcotic Detection (HNDD)).

- The number of CBPO positions currently allocated to POEs;
- Current number of canine teams, by discipline, at each POE;
- Borderstat and Operations Management Report (OMR) data to determine seizure incidents of narcotics, currency and firearms;
- Outbound data to ensure adequate outbound staffing and infrastructure were in place to support additional Currency/Firearms canine teams; and
- Planned facility expansion at each POEs.

Field Office	C/F	HNDD	Total
Atlanta	1	1	2
Baltimore	2	2	4
Boston	1	1	2
Chicago	0	2	2
Detroit	1	1	2
El Paso	0	2	2
Houston	0	1	1
Laredo	1	7	8
Los Angeles	0	1	1
Miami/Tampa	1	1	2

New York	1	1	2
San Diego	1	5	6
Tucson	4	9	13
TOTAL	13	34	47

USBP has a requirement for 1,115 canines and has developed a plan to reach this level over a five year period. The funding provided will allow OTD to procure and train the additional canines to achieve the USBP plan. This plan will incrementally increase the number of canines purchased each year over the original program and reach the desired end-state of 1,115 canines by Fiscal Year 2019 without overwhelming OTD’s capability to procure and train canines. No additional agents will be required under this plan, as agents assigned to canine duties will come from within the existing staffing floor.

Impact on Performance (Relationship of Increase to Strategic Goals)

The additional CBPO (Canine) positions will permit CBP to:

- Address the threat posed by transnational criminal organizations involved in human trafficking and narcotics smuggling into the United States.
- Counter the smuggling of illicit proceeds and firearms through the U.S. to other destinations.
- Further enhance the layered enforcement approach to disrupt transnational criminal organizations smuggling efforts by increasing vehicle, commercial shipment, and passenger/pedestrian searches.

Goal 1: Secure America’s Borders

The U.S. Border Patrol plays a critical role in securing our Nation’s borders between Ports of Entry (POEs) against all threats.

Measurable objectives, in which the USBP Canine Program is a key element, are to:

- Prevent terrorists and terrorist weapons from entering the United States between the POEs, as well as operational integration, planning, and execution with Federal, state, local, and tribal law enforcement partners.
- Manage risk through the expansion of sophisticated tactics, techniques, and procedures. These include methods such as “force multiplying” skills and abilities in which a USBP canine team has proven to be effective, efficient, and highly mobile.
- Disrupt and degrade Transnational Criminal Organizations by targeting enforcement efforts against the highest priority threats and expanding programs that reduce smuggling and crimes associated with smuggling.

Increase community engagement by participating in community/school programs and engaging the public to assist the U.S. Border Patrol in informing and promoting the capabilities of the USBP Canine Program.

U.S. Customs and Border Protection
Salaries and Expenses
Justification of Program Changes
(Dollars in Thousands)

Program Increase 3: Cross-Training Initiative
PPA: Border Security Control
Program Increase: Positions 0, FTE 0, Dollars \$500

Funding Profile

	FY 2014 Revised Enacted			FY 2015 President's Budget			FY 2016 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$0
Program Increase							0	0	\$500
Total Request	0	0	\$0	0	0	\$0	0	0	\$500

Description of Item

CBP requests \$500,000 to develop a Border Patrol Agent Cross-Training Initiative in FY 2016. This increase would provide initial funding for an agent cross-training initiative to broaden their knowledge base and experience.

Justification

In FY 2014, USBP examined whether it would be worthwhile to train BPAs in Crime Scene Investigation, Evidence Collection, Intelligence Analysis & Targeting, and as Unmanned Aerial Vehicle pilots. This analysis determined that these skills could provide additional value-added capabilities to the Border Patrol. Therefore, USBP determined that an initiative to cross-train agents and evaluate its effectiveness and feasibility is worthwhile. This funding is a first step towards fully implementing this effort. The Analysis phase is to look at the length of training required for each area and how it would provide added value to the USBP. The crime scene investigation and evidence collection training are being incorporated into the Use of Force review and will become a part of their recommendations to document Use of Force incidents.

USBP completed the analysis phase of the initiative in FY 2014, and is completing the final determination of associated costs, due at the end of the 2nd quarter, FY2015. During FY 2015, USBP will develop a training schedule for FY 2016, announce the training opportunities to agents and begin the selection process. Agents would begin training in FY 2016.

Impact on Performance (Relationship of Increase to Strategic Goals)

This Cross-Training Initiative will allow USBP to provide BPAs with the necessary skills to perform additional mission-critical tasks. Cross-training agents to accomplish these tasks will provide Patrol Agents in Charge the flexibility to use the most accessible asset under the circumstances.

This initiative supports OBP Strategic Plan Objective 2.1: Strengthen Investment in People and Objective 2.4: Improve Organizational Structures, Processes, Systems, and Doctrine.

(Dollars in Thousands)

Program Increase 4: Establish Counter Network Operations Capability
PPA: Internal Affairs, Administration, Rent, National Targeting Center, Training at the Ports of Entry
Program Increase: Positions 60, FTE 30, Dollars \$9,924

Funding Profile

	FY 2014 Revised Enacted			FY 2015 President's Budget			FY 2016 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$0
Program Increase							60	30	\$9,924
Total Request	0	0	\$0	0	0	\$0	60	30	\$9,924

Description of Item

CBP requests \$9.924 million in S&E to establish a Counter Network Operations Capability. CBP has developed a counter network strategy that is an agency-wide focus on combating transnational criminal organizations and terrorist networks leveraging our unique collection, targeting, and interdiction capabilities and extending this approach through interagency investigative and intelligence community partnerships. In total, funding will support applying advanced analysis and visualization tools to identify the nation's most challenging targets utilizing a multi-intelligence based approach. CBP will establish a focused counter network team in a collaborative analytic environment with access to data and tools to conduct advanced counter network analysis of the nation's key transnational organized crime and terrorist targets.

Overall, CBP requests a program increase of \$14.736 million to establish a Counter Network Operations Capability. CBP proposes that this increase be funded out of the following PPAs: Automation Modernization's Automated Targeting Systems PPA; Construction & Facilities Management's Facilities Construction and Sustainment PPA; and Salaries & Expenses' Rent, Administration, Internal Affairs, National Targeting Center, Training at the Ports of Entry, and Training & Development PPAs. Increased budget authority, particularly efforts involving additional positions, often requires association with the multiple PPAs that support these new positions. CBP's position cost model provides the capability to present and distribute the estimated necessary authority and FTE with any such increase in positions to the appropriate support offices. In most cases, position increases reflect authority and FTE in both the primary PPA associated with the increased capability and/or function, as well as the mission support PPAs responsible for hiring, vetting, training and outfitting the new positions. The total request for this program across all PPAs is \$14.736 million.

Justification

CBP's unparalleled competencies (data, analytics, and global presence) and investigative neutrality ideally posture us to contribute to the global counter network effort. We therefore require an organizational structure that contributes to a counter network strategy that leverages partnerships to: (1) define and prioritize terrorist and transnational criminal networks; (2) contribute to building a viable counter network force; (3) collaborate in attacking terrorist and transnational criminal networks; (4) accurately assess the effectiveness of our attacks; and (5) rapidly adjust our post-attack strategies and tactics as necessary.

Undetected criminal and terrorist travel, contraband movement, and commercial and financial activity necessitates continued improvement in our ability to uncover the patterns and faint signals that exist within disparate sources of information. To successfully identify these patterns and signals, CBP will develop targeting and analysis tools speeding the work that CBP analysts are currently doing with CBP's unique data holdings. By fusing and correlating data across domains, and simultaneously protecting the privacy and civil liberties of Americans, DHS can better organize and exploit information to make more informed decisions regarding the risk presented by travelers attempting to enter the United States.

The funding requested will assist CBP in establishing an advanced analytics capability to support CBP's counter network cells at the National Targeting Center and border security efforts in the field. This capability will be enabled by three elements: (1) a focused analytics office that support data science and intelligence analysis to facilitate counter network targeting efforts; (2) an advanced analytic tools suite that capitalizes on emerging big data platforms that utilize CBP's data holdings to better understand and define terrorist and transnational criminal organizations; (3) hardware and visualization systems to enable collaborative multi-agency initiatives to target priority threats.

CBP's National Targeting Center will promote the implementation and optimization of CBP's counter network efforts and strategy, strengthened by active collaboration across all CBP components to plan, coordinate, and evaluate our deliberate disruptive effects taken against terrorist and transnational criminal networks. In the field and abroad, CBP's regional command campaigns, centers, and operating elements will benefit from CBP's ability to leverage advanced tools, training, access, and partnerships to strengthen resilience against terrorist and transnational criminal network activities and execute unified deliberate actions with our interagency partners to disrupt and marginalize them.

Impact on Performance (Relationship of Increase to Strategic Goals)

CBP's intent is to establish a dedicated counter network capability that partners with both domestic and international law enforcement and border centric agencies. This outcome requires FTEs and IT and contractor support that is dedicated to the initiative on a full time basis. With the requested \$14.736 million funding, the anticipated Counter Network Division within the National Targeting Center will be able to bring on board the needed 60 FTEs projected for FY

2016 and beyond, and will be able to establish the required IT enhancements needed for the initiative, as well as the necessary contractor support. The cumulative results would be:

- Counter network functions will be performed by dedicated NTC FTEs.
- Contractor support and IT support will result in ability to stand up a full mission capable counter network division within the NTC.
- The five phases of the counter network initiative will move forward and will accomplish the following satisfactory outcomes:
 - Define and prioritize terrorist and transnational criminal networks;
 - Contribute to building a viable counter network force;
 - Collaborate in attacking terrorist and transnational criminal networks;
 - Accurately assess the effectiveness of our attacks; and
 - Rapidly adjust our post-attack strategies and tactics as necessary.

DHS QHSR:

Mission 2: Securing and Managing Our Borders

Goal 2.3: Disrupt and Dismantle Transnational Criminal Organizations

Program Increase 5: Intelligence and Targeting Operations
PPA: Intelligence/Investigative Liaison
Program Increase: Positions 24, FTE 24, Dollars \$3,262

Funding Profile

	FY 2014 Revised Enacted			FY 2015 President's Budget			FY 2016 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							294	290	\$25,654
Program Increase							24	24	\$3,262
Total Request	280	276	\$37,315	281	275	\$37,873	318	314	\$28,916

Description of Item

CBP requests an increase of \$3.262 million to provide FTE support related to the overall requested increase to Intelligence and Targeting Operations. This request would provide funding for an increase of 24 FTE to establish a responsive, cutting edge Field Support Division through the strategic build out of additional Intelligence Support Teams (IST).

Justification

Field Support Division (FSD)

The strategic build-out of ISTs in the field will ensure OIIL intelligence capabilities are provided to all the major CBP campaigns along the southwest border. There is a lack of national level intelligence capabilities being applied consistently throughout the field in CBP and the flow of information is inconsistent. ISTs provide permanent dedicated trained intelligence personnel with a consistent knowledge base who use national level intelligence capabilities to support the immediate intelligence needs of CBP operators in high tempo areas along the border. Appropriately resourced ISTs ensure that information permeates all levels of the organization, and all offices within each level. Intelligence is applied appropriately, and information from the field flows back up through the organization and back down to the field. ISTs provide CBP senior field leadership with integrated intelligence to include classified threat/situational awareness briefings, and creates a timely exchange of information between the National Intelligence Community and CBP field elements.

Impact on Performance (Relationship of Increase to Strategic Goals)

Field Support Division

In an under-resourced intelligence construct, the information flow is haphazard and unreliable. Some operators may receive duplicative or misleading information, and others may receive no information at all. Intelligence may not be applied appropriately, and intelligence does not efficiently flow up and down the organization. Additional funding will allow CBP to provide consistently trained professional intelligence skill sets at the field level and permit expansion of national Collection capabilities to the field; formalize collection plans across campaign corridors; and combine classified reporting with field level information to combat transnational criminal networks. In addition, strategic placement and build-out of new ISTs will enable OIIL to bridge the gap between national strategic level intelligence and field tactical level intelligence.

Program Increase 6: NII Equipment Refresh & Recapitalization
PPA: Inspection and Detection Technology
Program Increase: Positions 0, FTE 0, Dollars \$85,300

Funding Profile

	FY 2014 Revised Enacted			FY 2015 President's Budget			FY 2016 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$11,700
Program Increase							0	0	\$85,300
Total Request	0	0	\$0	0	0	\$11,700	0	0	\$97,000

Description of Item

CBP requests an increase of \$85.3 million for the Non-Intrusive Inspection (NII) program. Specifically, CBP requests funding to recapitalize NII systems. The NII Program is comprised of both NII imaging systems and Radiation Detection Equipment (RDE) to support its layered enforcement strategy to safeguard the United States and facilitate legitimate trade and travel. The NII Program's business objective is to optimize deployment of NII systems across air, land, and sea ports of entry (POEs) and Office of Border Patrol (OBP) checkpoints, taking into consideration identified threats, risks, infrastructure, and available funds. NII and RDE technology facilitates cargo and conveyance inspection activities creating positive annual economic benefits of approximately \$7 billion to \$18.7 billion. The requested increase is for NII only.

CBP does not have the necessary funding within its base to recapitalize the NII systems. The FY 2016 requested funding will be used to: (1) sustain the current inventory of NII systems and RDE, (2) continue the process of replacing/refurbishing a mix of large and small scale NII systems, and (3) procure mobile, baggage, and tool trucks (to include Operations and Maintenance, procurement of devices, training, and application development). The FY 2016 funding also provides recurring training to maintain operator skills and to staff help desks that provide support for operations and equipment service and repair. This requested increase will fund recapitalization of aging systems. Without this funding increase, maintenance costs would rise, systems would become obsolete, system downtime would rise impacting the effectiveness of inspections, labor cost would rise, and the movement of legitimate trade and travel would be delayed due to the need for manual inspections.

Project Schedule:

Primary Contractor(s): To be determined based upon contract awards

Project Location(s): U.S. Ports of Entry and Checkpoints

Justification

The majority of CBP's previous NII capital investment occurred in the years immediately after the events of 9/11. Approximately 28 percent of CBP's large scale NII inventory is beyond its life expectancy, and from an enterprise perspective, CBP now faces the challenges of aging equipment and underfunded recapitalization across multiple technologies. Without additional acquisition funding, aging technology will become obsolete, become cost prohibitive to maintain, or become ineffective. Some currently-deployed technology has already become obsolete and can no longer be repaired.

NII systems include both large scale and small scale systems. Large scale systems are capable of imaging both laden cargo conveyances and passenger vehicles for the presence of contraband. Small scale systems are used to perform non-intrusive inspections on passenger baggage and cargo, view inside of fuel tanks and small compartments, identify densities anomalies in the shells of vehicles, behind walls of conveyances, and propane tanks and identify false walls in containers. CBP currently has 314 large scale systems and 4,930 small scale systems.

Both large and small scale systems have a projected life expectancy of 10 years per the original equipment manufacturer. By the end of FY 2016 the following NII systems will exceed their 10 year life expectancy:

- 84 large scale systems (27 percent) with a recapitalization cost of \$121.7 million; and
- 2,047 small scale systems (42 percent) with a recapitalization cost of \$56.9 million.

Impact on Performance (Relationship of Increase to Strategic Goals)

In FY 2014, CBP conducted over 7.2 million NII examinations. Of these examinations, over 2.3 million inspections were for cargo truck and seaport containers using imaging technology. Relying solely on physical inspections would have required an increase in staff by over 8,000 officers to manage the workload. When compared to a physical search, the time it takes to conduct a secondary examination is reduced by an average of 112 minutes, from 2 hours to 8 minutes for a team of 3 officers. This equates to approximately 13 million hours in time savings. CBP conducted 2,093 seizures resulting in over 249,000 pounds of seized narcotics. As systems age beyond useful life and become non-viable for operational use, more manual inspections will be needed to maintain the required level of security for the same level of commerce. A program increase is necessary to recapitalize the aging large scale and small scale systems used in the NII program to avoid disruption of commerce across the US borders.

Program Increase							15	15	\$8,399
Total Request	0	0	\$0	8	6	\$1,276	23	23	\$9,889

Description of Item

CBP requests an increase of \$8.399 million for:

- Expansion of the National Border Geospatial Intelligence Strategy (NBGIS) to the northern border;
- Equipment refresh for the Law Enforcement Technical Collections (LETC) program;
- An additional 15 FTE and infrastructure enhancements for CBP's intelligence, surveillance, and reconnaissance (ISR) initiatives; and
- An additional 11 FTE new to augment established Field Support Division locations and support the DHS Joint Task Force.

This additional funding will enable CBP to increase the exploitation, processing, and dissemination of intelligence services and products to CBP senior field leadership, operators, partner agencies, and the Intelligence Community.

Justification

National Border Geospatial Intelligence Strategy

DHS recognizes that intelligence is a force multiplier and technology must be leveraged to identify and validate low-risk or low-activity areas on the U.S. border in order to "shrink the border" and allow a focused and measured use of CBP capabilities against prioritized threats. Geospatial intelligence provides enhanced situational awareness through overhead Intelligence, Surveillance, and Reconnaissance so emerging threats can be identified and operationalized as they occur, ensuring continued risk adaptation. While providing additional data points for

analysis, NBGIS ultimately delivers a more detailed picture of activities occurring at the border. Classified briefings on the full spectrum of capabilities and intelligence products are available upon request.

Law Enforcement Technical Collections

CBP's Law Enforcement Technical Collections (LETC) program provides a proven capability that intercepts illicit radio communications used by terrorists and transnational criminal organizations, thereby greatly enhancing the effectiveness of our border enforcement operations. The requested funding will support LETC airborne and ground initiatives that will enhance the security of our borders and border approaches, and focus on detecting, identifying, locating, and monitoring open push-to-talk, two-way radio communications associated with criminal activity. This technology would provide significant utility in understanding the tactics, techniques, procedures, and modus operandi of terrorist and criminal elements within a specific AOR. LETC enforcement activities contribute to apprehensions of undocumented immigrants and drug interdictions by providing advanced situational awareness of illicit activities and facilitating our understanding of illicit communications capabilities/networks.

Field Support Division (FSD)

The requested funding will enhance existing Intelligence Support Team (IST) locations by providing trained geospatial intelligence analysts to support the joint task forces under the Department of Homeland Security Southwest Border and Approaches Campaign Plan. The intelligence analysts will support the Joint Task Force –West, Joint Task Force-East, and Joint Task Force-Investigations. The FSD provides responsive cutting edge support to CBP field activities and the organizations that partner with them through the deployment of tailored ISTs. These ISTs provide the local CBP Field Commanders, Directors of Air Operations, Directors of Marine Operations, Chief Patrol Agents, and Directors of Field Operations with all-source operational level intelligence that allows them to obtain heightened situational awareness regarding their operational environment. The deployed ISTs enable field enforcement personnel and the agencies that partner with them to more readily integrate intelligence into enforcement operations and increase the multi-directional flow of information between CBP field elements, CBP headquarters and other Federal, state, local, tribal, and international partner agencies.

Impact on Performance (Relationship of Increase to Strategic Goals)

National Border Geospatial Intelligence Strategy

Funding will allow CBP to expand its geospatial intelligence coverage to the littorals, Baja Peninsula, Gulf of California, and select areas of the Caribbean Basin. Increased situational awareness of nautical approach vectors employed by terrorist and transnational criminal organizations will complement the established coverage along the northern and southern borders and provide intelligence on a total of approximately 12,400 miles of coverage. This program directly feeds into the deployment density of Border Patrol resources along the borders of the United States and its territories. The funding is directly related to resources to analyze 24/7

collection operations. Current resources dedicated to the program only have the capacity of approximately 1,000 miles of the southwest border, versus the 12,400 mile goal.

Field Support Division

Additional funding will allow CBP to support the DHS Secretary's Southern Border & Approaches Campaign Plan (SBACP) with full-time trained intelligence employees to include GEOINT analyst permanent employees. The SBACP designates three Joint Task Forces to combine DHS operations within a specific area of operation. In addition, funding will allow CBP to augment existing IST locations along the southwest border, which bridge the gap between national strategic level intelligence and field tactical level intelligence. As the teams that are deployed across the southwest border assume an integral role in the planning, processing, exploitation, and dissemination of actionable intelligence to CBP field locations, increased demand for new products will require additional resources. The presence of consistently trained professionals possessing intelligence skill sets across the southwest border will provide senior field leadership and DHS Joint Task Forces with integrated intelligence to include classified threat/situational awareness briefings and products and permit the timely exchange of information between the National Intelligence Community and CBP field elements.

Current Services Level							0	0	\$0
Program Increase							9	5	\$29,445
Total Request	0	0	\$0	0	0	\$0	9	5	\$29,445

Description of Item

CBP requests \$29.445 million to implement the Electronic Visa Information Update System (EVIUS). CBP proposes to implement a new program that will allow NIV holders to provide updated biographic and travel-related information through a public website. This process will enable CBP to facilitate admissibility determinations post-visa issuance before passengers initiate travel to the United States. This new system will complement the existing visa application process and enhance CBP’s ability to make pre-travel risk determinations.

The Government of the United States and the Government of the People’s Republic of China reached agreement on visa reciprocity negotiations in October 2014, and the President announced this agreement on November 8, 2014. CBP proposes piloting this program for travelers from China who are issued 10-year, multiple entry B1, B2, or B1/B2 visas for business and tourism. The program will allow travelers with these visas to provide updated biographic and travel information to CBP via a public website every 2 years from the date of visa issuance for the duration of visa validity. CBP will review and adjudicate the updated biographic and travel-related information to support pre-travel, risk-based determinations and facilitate processing upon arrival in the United States. For travelers who do not update their information, CBP will interface with the State Department, which will in turn, revoke the traveler’s visa.

System Resource Estimates: CBP’s estimate for implementing this new program is \$29.4 million in start-up costs.

- Information Technology: \$19.9 million for program start-up.
 - Costs for the creation of a new system along with the infrastructure to collect updated biographic and travel data from non-immigrant visa holders and vet the data;

- Costs for supporting and securing information technology for the applicants to use as well as the communications necessary to inform various external services, e.g., the Department of State (DOS), of CBP's determinations and any subsequent updates to those determinations; and
- Costs for the creation of web content and help files in multiple languages, as needed.
- Program Management Staff: 2 additional staff in FY 2016 plus 3 additional staff in FY 2017
- Vetting Staff: 5 additional officers in FY 2016 plus 5 additional officers in FY 2017
- Call Center for Traveler Support: 2 new officers and 10 Contract staff cost of \$3.5 million yearly in FY 2016 plus 3 new officers in FY 2017
 - This would be a travel authorization-specific call center to respond to traveler inquiries for the new non-immigrant system. The call center would be available 24/7 and staffed with personnel who have language skills needed to assist applicants.
- Fee Study - \$3 million²⁴
- Public Affairs Outreach - \$1.5 million start-up in FY 2017 with recurring costs of \$50,000.

	1st Year (Dollars in Thousands)
System Development	\$ 4,410
Data Center Infrastructure (2 Data Centers including replication)	\$ 10,000
Network and NW Security	\$ 2,500
Fee Collection and Processing	\$ 3,000
Vetting for new applicants	
Annual Re-vetting for changed data	
Staffing	\$ 3,035
Contract Language Call Center Staff	\$ 3,500
Fee Study	\$ 3,000
Public Affairs Outreach	
Total	\$ 29,445

Justification

In order for the U.S. Government to have a reciprocal agreement with China to allow for 10-year visas, a system is needed to collect additional information from these travelers at least every two years. Previously, the U.S. Government received this information when these travelers had to get visas every year. Although the ESTA system currently collects this information, travelers

²⁴ CBP will seek congressional authority to recover the full cost of administrating this program.

from China are not statutorily eligible for the ESTA program because China is not a Visa Waiver Program participant. Accordingly, a new system similar to ESTA will need to be built.

Impact on Performance (Relationship of Increase to Strategic Goals)

This process will enable CBP to facilitate admissibility determinations post-visa issuance before passengers initiate travel to the United States. This new system will complement the existing visa application process and enhance CBP's ability to make pre-travel risk determinations regarding certain long-term visas.

Mission 2: Secure and Manage our Borders

Goal 2.1: Secure U.S. Air, Land and Sea Borders and Approaches

- Prevent illegal import and entry
- Prevent illegal export and exit

Goal 2.2: Safeguard and Expedite Lawful Trade and Travel

- Safeguard key nodes, conveyances, and pathways
- Manage the risk of people and goods in transit
- Maximize compliance with U.S. trade and promote U.S. economic security and competitiveness

Goal 2.3: Disrupt and Dismantle Transnational Criminal Organizations and Other Illicit Actors

- Identify, investigate, disrupt, and dismantle transnational criminal organizations
- Disrupt illicit actors, activities, and pathways

Mission 3: Enforce and Administer Our Immigration Laws

Goal 3.1: Strengthen and Effectively Administer the Immigration System

- Effectively administer the immigration services system

Goal 3.2: Prevent Unlawful Immigration

- Prevent unlawful entry, strengthen enforcement, and reduce drivers of unlawful immigration
- Arrest detain, and remove priority individuals, including public safety, national security, and border security threats

(Dollars in Thousands)

Program Increase 9: Polygraph Examiners Hiring Initiative
PPA: Internal Affairs
Program Increase: Positions 40, FTE 5, Dollars \$1,465

Funding Profile

	FY 2014 Revised Enacted			FY 2015 President's Budget			FY 2016 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							110	110	\$19,865
Program Increase							40	5	\$1,465
Total Request	110	110	\$17,659	110	110	\$19,865	150	115	\$21,330

Description of Item

CBP requests an increase of \$1.465 million to provide additional support to the Credibility Assessment Division (CAD) of the Office of Internal Affairs (IA). CAD conducts applicant screening polygraph examinations. This request would provide funding to allow CBP to hire an additional 40 Polygraph Examiners, which will increase program capacity and allow CBP to fully comply with the Anti-Border Corruption Act 2010 (ABCA) requirement that law enforcement applicants be polygraphed. Analyses of CBP's hiring process have identified the polygraph process as a significant chokepoint area. This request will also allow CBP to help eliminate that chokepoint area, and expedite bringing applicants on board as Border Patrol Agents and CBP Officers.

Justification

The Anti-Border Corruption Act of 2010 requires all law enforcement applicants to be polygraphed before being hired. Corruption negatively affects CBP's mission of securing the borders while facilitating trade and travel. The Office of Internal Affairs (IA) priority will be to remain current on the hiring demands for mission offices OBP, OFO and OAM while avoiding significant cost associated with conducting background investigations on unsuitable candidates.

Impact on Performance (Relationship of Increase to Strategic Goals)

The current staffing level of 110 polygraph examiners in the IA-CAD, results in a through-put of approximately 15,120 polygraph examinations per year. An additional 40 Polygraph Examiners will increase program capacity and ensure IA CAD's ability to comply with hiring initiatives authorized by Congress. With 150 Polygraph Examiners, IA CAD's capacity would be

approximately 21,840 polygraph examinations, which is an increase of 6,720, or 44 percent, per year.

IA CAD has agreements with other federal agencies to assist with polygraph examinations. This option cannot be relied upon for a specific number of polygraph examinations, due to the fluctuating workload of the other agencies. Hiring additional Polygraph Examiners would provide IA CAD with total control of the Polygraph Examiners, and would allow IA to deploy Polygraph Examiners where mission requirements dictate.

Not funding this requirement puts CBP at risk of failing to meet the congressionally mandated staffing floors or to address approved hiring initiatives for law enforcement officers.

Program Increase: Positions 0, FTE 0, Dollars \$4,706

Funding Profile

	FY 2014 Revised Enacted			FY 2015 President's Budget			FY 2016 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$0
Program Increase							0	0	\$4,706
Total Request	0	0	\$0	0	0	\$0	0	0	\$4,706

Description of Item

CBP requests \$4.706 million in funding for implementation of a standardized care plan for mothers and children in CBP custody, to include unaccompanied minor children at ports of entry and border patrol stations. This will ensure that individuals, whether detained at POEs or stations, will receive the same standard of care and services.

Justification

During FY 2014, the southwest border experienced an unprecedented increase in the number of Unaccompanied Children (UC) crossing the border. Due to the lack of bed space, the Department of Health and Human Services (HHS) was unable to accept the UCs, forcing CBP to maintain custody of UCs for a much longer period that originally programmed. Their overall numbers and the duration of their detention required CBP to take measures to provide adequate care for UCs. These measures included contracting with outside vendors to provide food services, showers and laundry services for health hygiene, monitoring, medical care, and the purchase of significant amounts of personal hygiene items. CBP has developed a contingency plan to deal with the situation in the future should the number of UCs exceed projected levels or the detention period extends longer than anticipated. The requested funding would support the contracts and other costs for the proper care of children and families in CBP custody.

Current Services Level							0	0	\$0
Program Increase							0	0	\$420
Total Request	0	0	\$0	0	0	\$0	0	0	\$420

Description of Item

CBP requests an increase of \$420,000 in S&E for mission support requirements associated with the overall requested increase of an additional 15 Unmanned Aircraft System (UAS) crew in support of both operations along the southwest border and operations within the Source and Transit zone.

Overall, CBP requests \$8.4 million for an additional 15 UAS crew. CBP proposes that this increase be funded out of the following PPAs: Air & Marine Salaries; Automation Modernization's Information Technology PPA; Construction & Facilities Management's Facilities Construction and Sustainment PPA; and Salaries & Expenses' Rent, Administration, Internal Affairs, and Training & Development PPAs. Increased budget authority, particularly efforts involving additional positions, often requires association with the multiple PPAs that support these new positions. CBP's position cost model provides the capability to present and distribute the estimated necessary authority and FTE with any such increase in positions to the appropriate support offices. In most cases, position increases reflect authority and FTE in both the primary PPA associated with the increased capability and/or function, as well as the mission support PPAs responsible for hiring, vetting, training and outfitting the new positions. Across all PPAs, the total requested increase for UAS Crew is \$8.4 million.

Justification

The UAS consists of a medium-altitude, long-endurance unmanned aircraft (MQ-9 Predator B), sensor communication packages, ground control, launch and recovery systems, operations, maintenance, technical and logistics support, pilots, and sensor operators to meet mission requirements in the three major areas of responsibility: southwest border, northern border and

southeast coastal area. The UAS supports border interdiction operations with long-range surveillance that provides real-time intelligence and situational awareness to border agents 24 hours a day, 7 days a week.

The 15 additional UAS crew will include eight Air Interdiction Agents; four Sensor Operators; three support staff positions; and the necessary salaries, benefits, overtime, premium pay, training, travel, law enforcement equipment, and supplies. The positions are needed to provide increased CBP aerial surveillance, enforcement, and security posture for surges similar to that of unaccompanied children illegally entering the U.S.

OAM took a staff level reduction in FY 2010 that prevented the hiring of additional UAS crew as more systems were being delivered and the operating tempo along the southwest border increased. As an interim measure, OAM cross-trained P-3 pilots and sensor operators whose aircraft were undergoing a service life extension to operate the Predator B and Guardian maritime UAS. Now that the P-3 SLEP is nearly completed and the P-3 wing is increasing its operating tempo, the pilots and sensor operators are no longer available to support the UAS Program. The additional UAS crews will make-up for the loss of the P-3 crew, and support increasing UAS operating tempo along the SWB, in particular Arizona, South Texas, and support UC operations should that problem increase in severity.

Impact on Performance (Relationship of Increase to Strategic Goals)

The UAS is a force multiplier with the following benefits:

- Ability to monitor extended border areas at any time of the day or night;
- Capability to vector ground support directly to vehicles or persons of interest;
- Provide ground personnel extended situational awareness of surroundings and operational area for potential threat identification purposes;
- Emergency or disaster support for other US government agencies; and
- Provide intelligence data to the Office of Intelligence and Investigative Liaison (OIIL) for analysis.

UAS contributed to the following operational successes: (FY 2014 figures below)

- VaDER Detections Investigated – 7,616
- Illegal Apprehensions – 1,834
- Drugs Seized – 70,577 lbs. marijuana and 992 lbs. cocaine
- Arrests – 54
- Vehicles Seized – 37
- Weapons Seized – 149

Program Increase 12: Unaccompanied Children Contingency Fund
PPA: Border Security Control
Program Increase: Positions 0, FTE 0, Dollars \$24,409

Funding Profile

	FY 2014 Revised Enacted			FY 2015 President's Budget			FY 2016 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$203,227
Program Increase							0	0	\$24,409
Total Request	0	0	\$198,625	0	0	\$203,227	0	0	\$227,636

Description of Item

The FY 2016 President's Budget includes funding for the Department of Homeland Security (DHS) and Department of Health and Human Services (HHS) to respond to Unaccompanied Children (UC) crossing the southwest border. Specifically, CBP is requesting contingency funding of up to \$134.5 million for costs associated with the apprehension and care of up to 104,000 UCs. Because of the low probability of such a high number of UCs attempting to enter the United States in FY 2016, the Budget scores the requested increase at \$24.4 million.

Justification

During FY 2014, the southwest border experienced an unprecedented increase in the number of Unaccompanied Children crossing the border. Due to record-breaking number of UCs crossing the border, CBP maintained custody of UCs for a much longer period than originally planned. The overall numbers of UCs and the duration of their detention required CBP to take drastic measures to provide adequate care for UCs. These measures included contracting with outside vendors to provide food services, showers and laundry services, monitoring, medical care, and the purchase of significant amounts of personal hygiene products.

Without this increase in funding, CBP will not have the flexibility to adequately respond to a significant surge of UCs in FY 2016. CBP has learned important lessons relating to the apprehension and care of UCs from the wave of crossings during the summer of 2014. This program increase will mitigate risk to CBP personnel and provide for the health and safety of UCs by ensuring that the agency has the funding in place to respond to unanticipated surges in UC crossings.

The FY 2016 President's Budget includes resources to support a comprehensive contingency plan to address the situation in the future should the numbers of UCs exceed projected levels. Given the lessons learned from the FY 2014 surge, including process and contract improvements, the Budget assumes that CBP could accommodate a similar level of unaccompanied children as FY 2014, when the agency cared for 58,000 before transferring them to HHS custody. The requested contingency funding would be triggered only when the level of unaccompanied children exceeds this baseline.

The proposed contingency language sets up varying levels of appropriated funding that become available depending on the magnitude of the increase in UCs. These funding levels correspond to the costs for CBP to apprehend, transport, house, and care for the UCs. The first increment of funding would become available if UC levels are higher than those from the comparable date (after January 1) in the previous fiscal year. Each of the next increment would become available only if UC levels reach 120%, 140%, and 160% of comparable dates in the previous year, respectively. The full amount of \$134.5 million is designed to support CBP costs for up to 104,000 unaccompanied children.

Impact on Performance (Relationship of Increase to Strategic Goals)

Total Request	0	0	\$58,210	0	0	\$51,179	0	0	\$24,250

Description of Item

CBP proposes a reduction to vehicle acquisition funding of \$10 million in FY 2016.

Justification

This program reduction is being proposed in order to ensure that CBP can focus its resources to further preserve and advance its mission in targeted areas. These areas include Facilities sustainment projects, Revenue Modernization, and technology investments along the southwest border.

Impact on Performance (Relationship of Decrease to Strategic Goals)

CBP is currently operating with reduced funding levels, and has a Fleet Right-Sizing Initiative underway to assess, plan and execute a strategy to ensure that CBP's fleet inventory is sized appropriately to efficiently meet its mission. Based upon the CBP fleet assessment analysis conducted in FY 2013, CBP identified an approximate 6,350 vehicles for reduction from the fleet. Out of these identified vehicles, 2,554 estimated reductions are scheduled to occur between FY 2014 and FY 2015. The remaining 3,796 vehicles will be reduced between FY 2016 and FY 2019; Table 1 depicts the annual effect of this reduction on the fleet's vehicle replacement needs.

Taking vehicles out of inventory reduces the overall size of the fleet and reduces CBP's vehicle replacement liability, which is already underfunded. Reducing the vehicle inventory by 3,796 vehicles between FY 2016 and FY 2019 would lower the replacement liability by \$140 million, calculated as the average vehicle purchase price (replacement cost) multiplied by the total

number of vehicle reductions. The annual cost avoidance achieved by lowering the replacement liability is indicated in Table 2.

Table 1: Replacement Requirement Analysis with Current Funding

Replacement Requirement Analysis	FY2016	FY2017	FY2018	FY2019	FY2020
Vehicles Eligible For Replacement	7,324	8,728	9,734	10,733	11,774
Vehicle Reduction from Right-Sizing	1,512	1,471	760	53	0
Remaining Vehicle Replacement Need	5,812	7,257	8,974	10,680	11,774
Planned Replacement Based Upon Available Funding	944	923	903	884	878
Unfunded Requirement	4,868	6,334	8,071	9,796	10,896

Reducing the vehicle inventory by 3,796 vehicles between FY 2016 and FY 2019 results in a total cost avoidance of \$140 million, i.e. the costs avoided by not replacing the vehicles. The annual cost avoidance is indicated in Table 2.

Table 2: Vehicle Replacement Funding Analysis with Current Funding

Funding Analysis (In Thousands of Dollars)	FY2016	FY2017	FY2018	FY2019	FY2020
Funding Needed to Replace All Eligible Vehicles	\$266,504	\$322,927	\$365,925	\$409,639	\$456,893
Cost Avoidance Due to Right-Sizing	\$55,018	\$54,425	\$28,570	\$2,023	
Funding Needed to Replace Vehicles After Right-Sizing	\$211,485	\$268,501	\$337,355	\$407,616	\$456,893
Expected Vehicle Replacement Funding	\$34,350	\$34,150	\$33,946	\$33,739	\$34,071
Funding Surplus/Deficit	(\$177,135)	(\$234,351)	(\$303,409)	(\$373,877)	(\$422,822)

Thousand-K

Detailed in the charts below are the new projections if the annual vehicle replacement budget is reduced by \$10 million. Over the span of FY16 to FY20, CBP will only be able to acquire 3,178 replacement vehicles, versus 4,532 vehicles before the reduction (sum of *Planned Replacement Based Upon Available Funding* in Table 2 versus Table 1 respectively). While the impact to vehicle age and maintenance are minor in FY 2016, the deficit of funds needed to replace retirement eligible vehicles will increase to \$475 million in FY 2020, instead of a \$422 million deficit with current funding levels.

Table 3: Replacement Requirement Analysis

Replacement Requirement Analysis	FY2016	FY2017	FY2018	FY2019	FY2020
Vehicles Eligible For Replacement	7,324	9,008	10,289	11,558	12,866
Vehicle Reduction from Right-Sizing	1,512	1,471	760	53	0
Remaining Vehicle Replacement Need	5,812	7,537	9,529	11,505	12,866
Planned Replacement Based Upon Available Funding	664	648	633	617	616
Unfunded Requirement	5,148	6,889	8,896	10,888	12,250

Table 4: Vehicle Replacement Funding Analysis

Funding Analysis In Thousands of Dollars)	FY2016	FY2017	FY2018	FY2019	FY2020
Funding Needed to Replace All Eligible Vehicles	\$266,719	\$333,366	\$386,480	\$441,527	\$499,226
Cost Avoidance Due to Right-Sizing	\$55,063	\$54,438	\$28,547	\$2,025	
Funding Needed to Replace Vehicles After Right-Sizing	\$211,657	\$278,927	\$357,932	\$439,502	\$499,226
Expected Vehicle Replacement Funding	\$24,181	\$23,981	\$23,777	\$23,570	\$23,902
Funding Surplus/Deficit	(\$187,476)	(\$254,946)	(\$334,155)	(\$415,932)	(\$475,324)

Thousand-K

Note on Schedule and Impact of Vehicle Right-Sizing: This analysis is based on a vehicle inventory reduction schedule and target inventory levels developed by CBP. CBP is also implementing cost saving initiatives to reduce maintenance, repair, and operation costs across the fleet. Such initiatives include but are not limited to part store implementation, fuel sharing, and strategic maintenance contracts.

V. Exhibits and Other Supporting Material

A. Justification of Proposed Legislative Language

For necessary expenses for enforcement of laws relating to border security, immigration, customs, agricultural inspections and regulatory activities related to plant and animal imports, and transportation of unaccompanied minor aliens; purchase and lease of up to 7,500 (6,500 for replacement only) police-type vehicles; and contracting with individuals for personal services abroad; [\$8,326,386,000] **\$9,045,270,000**; of which \$3,274,000 shall be derived from the Harbor Maintenance Trust Fund for administrative expenses related to the collection of the Harbor Maintenance Fee pursuant to section 9505(c)(3) of the Internal Revenue Code of 1986 (26 U.S.C. 9505(c)(3)) and notwithstanding section 1511(e)(1) of the Homeland Security Act of 2002 (6 U.S.C. 551(e)(1)); of which not to exceed \$34,425 shall be for official reception and representation expenses; of which such sums as become available in the Customs User Fee Account, except sums subject to section 13031(f)(3) of the Consolidated Omnibus Budget Reconciliation Act of 1985 (19 U.S.C. 58c(f)(3)), shall be derived from that account; of which not to exceed \$150,000 shall be available for payment for rental space in connection with preclearance operations; of which not to exceed \$1,000,000 shall be for awards of compensation to informants, to be accounted for solely under the certificate of the Secretary of Homeland Security; *Provided, That, of the amounts made available under this heading for Inspection and Detection Technology Investments, \$45,000,000 shall remain available until September 30, 2019³ : Provided, That for fiscal year [2015] 2016², the overtime limitation prescribed in section 5(c)(1) of the Act of February 13, 1911 (19 U.S.C. 267(c)(1)) shall be \$35,000; and notwithstanding any other provision of law, none of the funds appropriated by this Act may be available to compensate any employee of U.S. Customs and Border Protection for overtime, from whatever source, in an amount that exceeds such limitation, except in individual cases determined by the Secretary of Homeland Security, or the designee of the Secretary, to be necessary for national security purposes, to prevent excessive costs, or in cases of immigration emergencies: *Provided further, that the Border Patrol shall maintain an active duty presence of not less than 21,370 full-time equivalent agents protecting the borders of the United States in the fiscal year: Provided further, That, at any point after January 1, 2016, and before October 1, 2016, if the Secretary of Homeland Security, in consultation with the Secretary of Health and Human Services, determines that the cumulative number of unaccompanied children transferred to the custody of the Secretary of Health and Human Services for the current fiscal year exceeds the number transferred through the comparable date in the previous fiscal year, an additional \$116,921,000 shall be available under this heading: Provided further, That, if the Secretary of Homeland Security, in consultation with the Secretary of Health and Human Services, determines that the cumulative number of such children transferred exceeds 120 percent of the number transferred through the comparable date, \$5,789,000 shall be available in addition to the amount made available in the previous proviso: Provided further, That, if the Secretary of Homeland Security, in consultation with the Secretary of Health and Human Services, determines that the cumulative number of such children transferred exceeds 140 percent of the number transferred through the comparable date, \$6,017,000 shall be available in addition to the amounts made available in the previous two provisos: Provided further, That, if the Secretary of Homeland Security, in consultation with the Secretary of Health and Human Services, determines that the cumulative number of such children transferred exceeds 160 percent of the number transferred through the comparable date, \$5,796,000 shall be available in addition to**

the amounts made available in the previous three provisos: Provided further, That amounts made available in any of the previous four provisos may be transferred to any other appropriation: Provided further, That the transfer authority in the previous proviso is in addition to any other transfer authority provided by law⁴.

Language Provision	Explanation
¹ [\$8,326,386,000] <u>\$9,069,679,000</u>	Dollar change only. No substantial change proposed.
² [2015] <u>2016</u>	Fiscal year change only. No substantial change proposed.
³ <i>Provided, That, of the amounts made available under this heading for Inspection and Detection Technology Investments, \$45,000,000 shall remain available until September 30, 2019</i>	CBP requests multi-year availability for \$45.0 million of the requested \$85.3 million in funding for Non-Intrusive Inspection Refresh and Recapitalization program increase.
⁴ <i>: Provided further, That, at any point after January 1, 2016, and before October 1, 2016, if the Secretary of Homeland Security, in consultation with the Secretary of Health and Human Services, determines that the cumulative number of unaccompanied children transferred to the custody of the Secretary of Health and Human Services for the current fiscal year exceeds the number transferred through the comparable date in the previous fiscal year, an additional \$116,921,000 shall be available under this heading: Provided further, That, if the Secretary of Homeland Security, in consultation with the Secretary of Health and Human Services, determines that the cumulative number of such children transferred exceeds 120 percent of the number transferred through the comparable date, \$5,789,000 shall be available in addition to the amount made available in the previous proviso: Provided further, That, if the Secretary of Homeland Security, in consultation with the Secretary of Health and Human</i>	CBP requests language to make funds available only in the event of a surge of unaccompanied children beyond levels experienced in the previous year.

Services, determines that the cumulative number of such children transferred exceeds 140 percent of the number transferred through the comparable date, \$6,017,000 shall be available in addition to the amounts made available in the previous two provisos: Provided further, That, if the Secretary of Homeland Security, in consultation with the Secretary of Health and Human Services, determines that the cumulative number of such children transferred exceeds 160 percent of the number transferred through the comparable date, \$5,796,000 shall be available in addition to the amounts made available in the previous three provisos: Provided further, That amounts made available in any of the previous four provisos may be transferred to any other appropriation: Provided further, That the transfer authority in the previous proviso is in addition to any other transfer authority provided by law⁴

B. FY 2015 to FY 2016 Budget Change

Rent Mission Statement

CBP leases a substantial portion of its real property assets through GSA and also by direct lease delegation to non-federal sources. This PPA includes funds to support the rental of facilities, space, buildings, structures, and land along with rent-related building charges and services, including utilities and services provided by the Federal Protective Service (FPS). The Rent PPA supports the Office of Border Patrol, Office of Field Operations, Office of Air and Marine, and the Mission Support activities.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
23.1 Rental Payments to GSA	\$309,621	\$331,634	\$511,867	\$180,233

An increase of \$171,658,000 is for the realignment of rent payments of GSA LPOEs. An increase of \$7,986,000 is for greater reliance on increased AQI fees. An increase of \$273,000 is to establish counter network operations capability. An increase of \$241,000 is for additional canines for the Office of Field Operations and Office of Border Patrol. An increase of \$75,000 is for an additional UAS crew.

Inspections Trade and Travel Facilitation Mission Statement

The purpose of Inspections, Trade and Travel Facilitation at Ports of Entry (POEs) is to facilitate the flow of legitimate travel and trade across U.S. borders, while ensuring that threats to the United States are not allowed entry, using technology, intelligence and risk information, targeting, and international cooperation in the screening of entering international cargo and travelers and departing export cargo. This program reduces the potential of terrorists, instruments of terror, and contraband from entering our country, while facilitating the legal flow of people and trade by deploying CBP officers, agricultural specialists, and import specialists to the ports of entry. The goal of this program is to improve compliance with trade regulations and other mandatory import/export guidance while increasing the security of the United States.

International Cargo Screening Mission Statement

International Cargo Screening (ICS), which includes CBP's Container Security Initiative (CSI) and Secure Freight Initiative (SFI), enhance the security of maritime containerized shipping from exploitation by terrorists. ICS's goal is three-fold: (1) to expand operations to new critical international seaports; (2) to secure and improve operations at existing ports; and (3) to encourage global efforts to enhance maritime container security through capacity building. Working with foreign administrations, CSI is designed to achieve a more secure maritime trade environment while ensuring the need for efficiency in global commerce. The three core elements of the program are: (1) establishing security criteria and identify high-risk containers; (2) scanning those containers identified as high-risk prior to arrival at U.S. ports; (3) using technology to quickly scan high-risk containers.

Other international programs Mission Statement

The goal of Other International Programs is to extend the U.S. zone of security beyond U.S. Borders by promoting international border security and global standards. In this arena, CBP implements programs and initiatives that support the U.S. Government's objectives in anti-terrorism, border security, non-proliferation, export controls, immigration and capacity building. This program's efforts foster and facilitate legitimate international trade, increase compliance, build alliances to combat trans-national crime, reduce corruption, strengthen border controls, promote the rule of law and enhance economic stability throughout the world. This is accomplished through the development and maintenance of collaborative relations with foreign governments, the development of international strategies, and representation of CBP positions in various international forums, international technical assistance and training, and the negotiation of international agreements.

C-TPAT Mission Statement

The Customs-Trade Partnership Against Terrorism (C-TPAT) is a partnership between the Federal government and private industry. It is an effort that CBP has undertaken with the business community to secure the supply chain. The goal of C-TPAT is to develop and maintain a secure supply chain, from factory floor to port of entry, which enables CBP to facilitate trade and ensure safe and secure borders. C-TPAT is designed to use and enhance the security processes and procedures currently employed by the trade community and ensure that international shipments are not compromised or diverted by terrorists or their accomplices.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change

Trusted Traveler Programs (TTP) Mission Statement

CBP's trusted traveler programs enhance the agency's ability to expedite the process and facilitate known, low risk trusted travelers arriving into the United States by allowing CBP officers additional time to focus on higher risk, unknown travelers; develop and implement national policies related to trusted traveler programs; provide guidance to the field locations on the operation of trusted traveler programs; strategize the growth of current programs and the development and implementation of new programs; and respond to congressional and industry inquiries of trusted traveler program related matters.

Inspection and Detection Technology Mission Statement

The CBP reliance on Non-Intrusive Inspection (NII) technology to secure the borders has become more and more critical. In conjunction with CBP's many other initiatives (24-Hour and Trade Act rules, Automated Targeting System (ATS), Container Security Initiative (CSI), Customs-Trade Partnership Against Terrorism (C-TPAT) etc.), NII is part of a multi-layered approach which allows CBP to work smarter and faster in recognizing potential terrorist threats. These complementary layers enhance security and protect our nation. CBP has long recognized that an adversary can defeat any single system or device. For this reason, CBP cannot rely on any single technology or inspection process. Instead, CBP uses various technologies in different combinations to substantially increase the likelihood that a nuclear or radiological weapon, weapons grade material, illegal aliens, or other contraband being smuggled across the United States borders will be detected. NII technologies are viewed as force multipliers that enable CBP officers to screen or examine a larger portion of the stream of commercial traffic while maintaining the flow of legitimate trade, cargo and travelers. Since 9/11, NII technology has been the cornerstone of the CBP multi-layered enforcement strategy. Technologies currently deployed to our nation's land, sea and airports of entry include large-scale X-ray and gamma-ray imaging systems, as well as a variety of portable and handheld technologies, to include radiation detection technology.

National Targeting Center Mission Statement

The priority mission of the U.S. Customs and Border Protection's National Targeting Centers is to provide around-the-clock tactical targeting and analytical research support for CBP anti-terrorism efforts. The NTC facilities are primarily staffed by CBP officers, border patrol agents, and field analysis specialists who are experts in passenger and cargo targeting for air, sea, and land operations in the inbound and outbound environments. The NTC staff develops tactical targets from raw intelligence in support of the CBP mission to detect and prevent terrorists and terrorist weapons from entering the United States. NTC supports all CBP field elements, including CSI personnel stationed in countries throughout the world, with additional research assets for passenger and cargo examinations.

Training at the Ports of Entry Mission Statement

The Office of Training and Development exists to develop and deliver basic, mid, and advanced level training programs for all CBP employees, especially mission critical occupations (e.g., CBP Officers, Agricultural Specialists, Imports Specialists, and Entry Specialists) at the ports of entry. This training empowers CBP employees with the necessary skill sets to achieve the goal of combating terrorism, improving border security, improving inspection and control, and facilitating trade.

Border Security Control Mission Statement

The Office of Border Patrol (OBP) has been delegated with the authority and responsibility to deliver the Executive Branch Program for Border Security and Control between the Ports of Entry. The primary purpose of this program is to prevent the entry of terrorists and their instruments of terror, illegal immigrants, and contraband, while facilitating the legitimate flow of people, goods, and services on which the economy depends. The program will be accomplished through the judicious use of resources including personnel, surveillance technology, communications, transportation, facilities, and mission support activities. Border Patrol agents deter uncontrolled entry into the interior of the U.S. by: the rapid detection, interception, and apprehension of illegal entrants at or near the border; interdicting or deterring illegal aliens, drug smugglers, potential terrorists and criminals from attempting illegal entry between ports-of-entry; and causing persons seeking admission into the U.S. to present themselves at designated ports for inspection.

Training Between the Ports of Entry Mission Statement

The Office of Training and Development exists to provide core operational training for Border Patrol Agents whose primary responsibility lies between the ports of entry. This training empowers CBP employees with the necessary skill sets to achieve the goal of safeguarding the borders of the United States. This training ensures that CBP is able to rapidly deploy a highly motivated, well-trained workforce, both on a temporary and permanent basis, who can quickly respond to potential terrorist threats, shifts in smuggling patterns and other national security threats.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
11.1 Full-time Permanent	\$13,726	\$18,817	\$19,047	\$230
11.3 Other than Full-Time Permanent	\$56	\$60	\$61	\$1
11.5 Other Personnel Compensation	\$2,014	\$2,145	\$2,171	\$26
12.1 Civilian Personnel Benefits	\$6,869	\$8,515	\$8,795	\$280
Total, Salaries & Benefits	\$22,665	\$29,537	\$30,074	\$537

An increase of \$175,000 is for increased retirement contributions. An increase of \$289,000 is for the FY 2016 1% pay raise. An increase of \$73,000 is to annualize the FY 2015 pay raise.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.2 Other Services from Non-Federal Sources	\$10,575	\$12,697	\$13,057	\$360

An increase of \$360,000 is for additional canines for the Office of Field Operations and Office of Border Patrol.

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Customs and Border Protection Border Security Fencing, Infrastructure, and Technology (BSFIT)

I. Appropriation Overview

A. Mission Statement for Border Security Fencing, Infrastructure, and Technology

The Border Security Fencing, Infrastructure, and Technology (BSFIT) appropriation supports the Department of Homeland Security (DHS) and U.S. Customs and Border Protection (CBP) missions by delivering operationally appropriate, agile, and cost-effective detection and surveillance technology systems, tactical infrastructure (TI), and Tactical Communications Modernization (TACCOM). These technology systems enhance CBP's situational awareness and its ability to respond to, and resolve, illegal activity.

Investments, particularly in surveillance technology, have a workforce multiplier effect. Prior to recent investments in technology, many U.S. Border Patrol (USBP) agents provided situational awareness through detection-related duties. The methods used were labor intensive, often very tedious, and typically covered only a small fraction of the terrain that needed to be covered. These activities also exposed the agents to considerable dangers. With the deployment of fixed and mobile surveillance capabilities, agents gain situational awareness automatically at the patrol stations. They can now target their response actions in a focused manner, direct the response team to the best interdiction location, and warn the team of any additional dangers that would have otherwise been unknown.

As a result, these investments have a two-fold impact, increasing visibility on the border and increasing Border Patrol's operational capabilities and safety. These investments lead to more accurate and timely information, which is critical to CBP's risk-based operational strategy. By gaining sufficient situational awareness, CBP can determine the activity level in all border regions, monitor evolving threat patterns, and strategically deploy assets (agents and technology) based on threat.

DHS's border security mission is to prevent the illegal flow of people and goods across U.S. air, land, and sea borders, while expediting the safe flow of lawful trade and commerce, and disrupting and dismantling transnational criminal organizations. DHS has an objective of substantially increasing situational awareness at the Nation's borders in order to help detect and classify potential threats and effectively resolve them. In addition, DHS has made building our existing partnerships with our North American neighbors a priority in order to collaboratively address threats.

To address threats and hazards over the next four years, DHS must remain agile in responding to new trends in illegal migration, from Central America or elsewhere. We will continue to strengthen border security through using our resources in a smarter way. With the deployment of fixed and mobile surveillance capabilities on the ground, agents are able to shift from detection duties to increase their capacity to respond, interdict, and resolve illegal activities.

Furthermore, the 2012-2016 U.S. Border Patrol Strategic Plan establishes an approach for the Border Patrol that is tailored to meet the challenges of securing a 21st century border against a variety of different threats and adversaries. The 2012-2016 Strategic Plan builds on the foundation of the 2004 National Border Patrol Strategy, which guided the acquisition and deployment of additional resources – personnel, technology, and infrastructure – to support execution of the Border Patrol’s mission. This risk-based strategic plan involves a set of objectives, strategies, and programs that use information, integration, and rapid response to develop and deploy new and better tactics, techniques, and procedures to achieve the Border Patrol’s strategic objectives. This equates to being more effective and efficient by using tools and methods to mitigate risks.

Another CBP goal for border enforcement is to secure the Northern border, littoral borders, and associated airspace. The Northern border spans thousands of miles where Federal law enforcement personnel assets are limited; therefore, intelligence, aviation assets, partnerships, and technology are essential to addressing threats and reducing vulnerabilities. Moreover, CBP continues to evaluate the conditions and risks along the U.S. borders in order to effectively address changing vulnerabilities and adjust priorities as required.

BSFIT Portfolio

The BSFIT technology portfolio, including the Arizona Technology Plan, is managed by the Office of Technology Innovation and Acquisition (OTIA) Program Management Office (PMO). BSFIT technology programs deliver detection and surveillance systems to both the Southwest and Northern borders – increasing situational awareness and assisting law enforcement personnel in identifying and resolving illegal activity. The TI program is managed by the CBP Office of Administration, Border Patrol Facilities and Tactical Infrastructure (BPFTI) PMO, and consists of projects that provide persistent impediments (fencing, gates, etc.) and agent access (roads, bridges, drainage, etc.) to the border. TACCOM is managed by the Office of Information and Technology (OIT), Wireless Systems Program Office (WSPO), and provides expanded digital, secure communications capabilities that enable USBP agents and officers to coordinate activities, thereby enhancing agent safety.

Exhibit 1: Border Security Fencing, Infrastructure, and Technology Portfolio

BSFIT Investments		
Appropriation	Programs	Projects/Activities
BSFIT	Arizona Technology Plan and Additional Southwest Border Investments (Managed by OTIA) ¹	<ul style="list-style-type: none"> • Integrated Fixed Towers (IFT) • Agent Portable Surveillance System (APSS) • Mobile Surveillance Capability (MSC) • Mobile Video Surveillance System (MVSS) • Remote Video Surveillance System (RVSS) Upgrade • Thermal Imaging Device (TID) • Unattended Ground Sensor (UGS)/Imaging Unattended Ground Sensor (I-UGS) • Ultra-Light Aircraft Detection (ULAD) • Cross Border Tunnel Threat (CBTT)
	TACCOM (Managed by Wireless Systems Program Directorate within OIT)	<ul style="list-style-type: none"> • Tactical Communications Modernization (TACCOM) I • Digital In Place (DIP)
	TI (Managed by OBP Facilities and TI within the Office of Administration)	<ul style="list-style-type: none"> • Vehicle Fencing (VF) • Pedestrian Fencing (PF) • Roads, lighting, low water crossings, bridges, drainage and grate systems, and marine ramps
	Northern Border Investments (Managed by OTIA) ¹	<ul style="list-style-type: none"> • Maritime Detection Project (MDP) • Maritime Surveillance Radar (MSR) • Land Air Maritime Border (LAMB) Projects • Aircraft Video Downlink (AVDL) • Low Flying Aircraft Detection (LFAD) • Northern Border RVSS • Operational Integration Center (OIC)
	Fielded Technology Systems (Managed by OIT)	<ul style="list-style-type: none"> • Mobile Surveillance Systems (MSS) • Southwest Border Legacy RVSS • Scope Trucks • Static Remote Video Surveillance • Border Intrusion Surveillance System • Trailered Remote Video Surveillance

¹ Some of these programs are also listed under “Fielded Technology Systems” if they are fully, or partially, deployed to the field.

BSFIT Investments		
Appropriation	Programs	Projects/Activities
	Innovative Technology Demos and Pilots (Managed by OTIA)	<ul style="list-style-type: none"> • CBP Demonstration Event • Mobile Retransmit Capability • Power Management Solution • Modeling Laydown Tool • Wide Area Aerial Surveillance
	Fielded Technology Systems (Managed by OTIA)	<ul style="list-style-type: none"> • Tethered Aerostat Radar System (TARS) • Block 1 • Agent Portable Surveillance System (APSS) • Thermal Imaging Device (TID) • Mobile Surveillance Capability (MSC) • Unattended Ground Sensor (UGS)/Imaging Unattended Ground Sensor (I-UGS) • Northern Border RVSS • DoD Re-Use Equipment • Aircraft Video Downlink (AVDL)² • Operational Integration Center (OIC)³ • Maritime Detection Project (MDP) • Maritime Surveillance Radar (MSR)

For detailed information regarding the BSFIT technology portfolio, see the FY 2015-2018 Multi-Year Investment and Management Plan. This Plan was compiled pursuant to language set forth in *FY 2012 Department of Homeland Security (DHS) Appropriations Act* (P.L. 112-74). The Multi-Year Investment and Management Plan highlights CBP's surveillance and communications investment projects.

For information regarding which projects have been fielded to date, see Exhibit 1 above. For information regarding which project will be delivered in FY 2016, see Exhibit 2 below.

² OTIA plans to transition the management of AVDL to the Office of Air and Marine (OAM).

³ OTIA plans to transition the management of the OIC to the Office of Border Patrol (OBP).

Exhibit 2: BSFIT Technology Portfolio to be delivered by FY 2016

Non-deployed BSFIT technology to be delivered by FY 2016:

- △ Remote Video Surveillance System (RVSS)
- ⊕ Mobile Video Surveillance System (MVSS)
- ⚡ Ultra-Light Aircraft Detection (ULAD)
- ⊗ Low-Flying Aircraft Detection (LFAD)
- ⊙ Tactical Communications Modernization (TACCOM)
- ◇ Maritime Detection Project (MDP)

The Arizona Technology Plan

As a result of a Department-wide reassessment of the SBInet Program that incorporated an independent, quantitative, science-based Alternative of Analysis (AoA), CBP began the deployment of the Arizona Technology Plan, a multi-year effort to provide a cost-effective mix of technology solutions across all of Arizona. The deployment of the Arizona Technology Plan completes Phase IA of the AoA and focused on securing the Arizona border, specifically the Tucson and Yuma Border Patrol Sectors. The Arizona Technology Plan technologies are listed in Exhibit 3 and shown in Exhibit 4.

Exhibit 3: Arizona Technology Plan

Arizona Technology Plan Technologies

- Integrated Fixed Towers (IFT)
- Agent Portable Surveillance Systems (APSS)
- Mobile Surveillance Capability (MSC)
- Mobile Video Surveillance System (MVSS)
- Remote Video Surveillance System (RVSS)
- Unattended Ground Sensors/Imaging Sensors (UGS/IS)
- Ultra-Light Aircraft Detection (ULAD)⁴

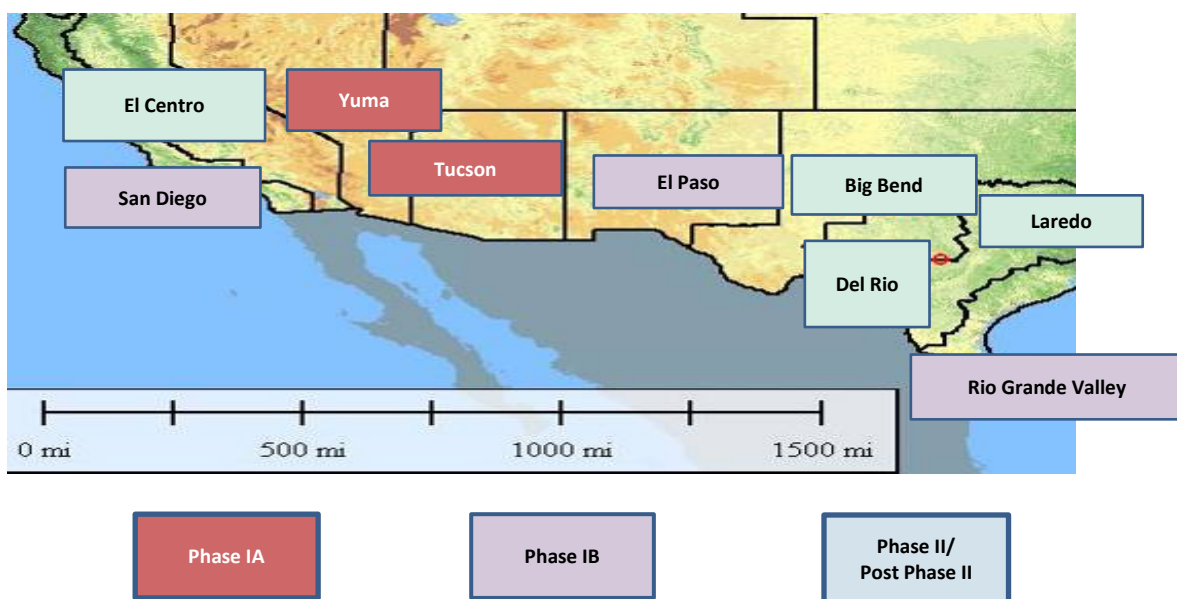

Exhibit 4: The Arizona Technology Plan (ATP) Solution

⁴ ULAD was not originally part of the Arizona Technology Plan.

As previously stated, the Arizona Technology Plan completes Phase IA of the AoA. In addition to Phase IA, there were additional AoA phases: Phase IB, Phase II, and Post Phase II. See Exhibit 5 for the Border Patrol Sectors found in these phases. Phase IB focuses on the San Diego, El Paso, and Rio Grande Valley (RGV) Sectors and Phase II focuses on the El Centro, Big Bend, Del Rio, and Laredo Sectors. Technology options identified in Phases IB and II were determined by weighting the different threats, geographic areas, and terrain within each border area. CBP is currently working on the completion of the Arizona Technology Plan, and is also focused on deploying technology to South Texas.

Exhibit 5: USBP Sectors in AoA Phases 1A, 1B, II, and Post-II

B. Budget Activities:

The BSFIT appropriation consists of two PPAs:

- **Development and Deployment (D&D):** D&D funds provide for the activities associated with acquisition programs, such as procurement, technical, and program management support; systems engineering services; advanced technology development; operational test and evaluation support; and assessment and mitigation activities associated with deploying technology.
- **Operations and Maintenance (O&M):** O&M funds provide logistics support – supply, maintenance, repair, and training services – to operate and maintain all border surveillance technology deployments, as well as legacy surveillance and communication systems. In addition, O&M funds maintenance and repair for TI. A combination of government and contractor logistics activities will provide maintenance management, system support analysis, call center operations, asset management, critical property, spare parts storage, inventory records management, field services, repairs, and training.

C. Budget Request Summary:

DHS requests \$373.461 million for the FY 2016 BSFIT appropriation. This request includes a net adjustments to base decrease of \$30.459 million, and program increases of \$71.402 million. These increases would provide funding for Arizona Tactical Infrastructure, re-use of Department of Defense equipment, increased Mobile Surveillance Capability, and Mobile Surveillance deployments to the southwest border. The FY 2016 BSFIT request will fund acquisition, delivery, and sustainment of prioritized border security capabilities and services for CBP's front-line agents and officers. Funding will also be used to respond to changing threats and evolving operational needs.

A summary of the funding levels (both D&D and O&M) anticipated for the major investments in the BSFIT Portfolio for FY 2016 is listed below.

BSFIT Major Investments for FY 2016

Key Projects	Key Capabilities	FY 2016 Funding (Dollars in Thousands)
Block 1	<ul style="list-style-type: none"> • Main mission for Block 1 Sustainment is increased situational awareness and persistent surveillance across the Tucson and Ajo Stations within the Tucson Sector. • Supports USBP agents and officers to effectively detect, identify, classify, and resolve illegal incursions at the border. • Deployment of towers with a suite of integrated day and night cameras, radars, UGS, and a communications package. • An initial version of a Common Operating Picture (COP), which is the system that integrates the sensor output, and displays the results at a command center. • Covers approximately 53 miles of international border in Arizona. • The transition of ILS elements from the Contractor Maintenance and Logistics Support (CMLS) contract with the Boeing Company was completed in FY 2014 with the end of the Block 1 Maintenance Task Order (BMTO) as the final task order on the <i>SBI_{net}</i> Indefinite Delivery, Indefinite Quantity (IDIQ) on March 16, 2014. The transition involved moving away from CMLS to organic Government sustainment supported through existing Inter-Agency Agreements (IAAs) with both the Federal Aviation Administration (FAA) and NavAir, in addition to memorandums of understanding (MOUs) with the CBP Office of Information and Technology (OIT) and CBP Facilities Management and Engineering (FM&E). 	\$16,836

Key Projects	Key Capabilities	FY 2016 Funding (Dollars in Thousands)
Facilities Management & Engineering Tactical Infrastructure (FM&E BPFTI PMO)	<ul style="list-style-type: none"> • Primary goal of the TI program is to manage the Border Patrol’s long-term planning, construction, maintenance, and repair activities for TI to include fence, roads, bridges, towers, lighting, vegetation and debris removal, drainage, and gates. • Provides USBP with persistent impedance, access to cross-border activity, and visibility of cross-border activity. • TI maintenance and repair activities have been streamlined by the use of regional comprehensive tactical infrastructure maintenance and repair (CTIMR) contracts along the Southwest border. • All four CTIMR contracts have been awarded; O&M is being accomplished on all TI along the Southwest border. • Removal and replacement will take place for 7.5 miles of existing primary pedestrian fence in Zone 30 (Naco), which is a high priority fence project for the USBP. 	\$93,694
Integrated Fixed Towers (IFT)	<ul style="list-style-type: none"> • IFT is a system that provides automated, persistent wide-area surveillance for the detection, tracking, identification, and classification of illegal entries. • In threat areas where mobile surveillance systems cannot be a viable and/or a long-term solution is required, IFTs, equipped with sensor suites and communication equipment, can be deployed to provide automated, persistent wide-area surveillance for the detection, tracking, identification, and classification of illegal entries. • When multiple IFT units are integrated into a system with a COP, the USBP will be able to increase situational awareness and monitor a larger area of interest. • Awarded contract on February 26, 2014, with the base quantity IFT system installed in USBP Station Nogales AoR scheduled for the fourth quarter of FY 2015. 	\$11,108

Key Projects	Key Capabilities	FY 2016 Funding (Dollars in Thousands)
<p>Tactical Communications (TACCOM) Modernization</p> <p>Digital In Place (DIP)</p>	<ul style="list-style-type: none"> • CBP operates and maintains one of the largest LMR tactical voice communications infrastructures in the Federal Government in order to support their mission of securing the Nation’s borders against illegal entry of people and goods, while managing legitimate travel and trade. • Tactical communications capabilities are essential to coordinating mission activities and protecting the safety of over 44,000 CBP law enforcement agents and officers who operate in remote areas where their radio is often the only communications channel to coordinate activities or summon assistance. • Originally, TACCOM I was intended to upgrade all of the Focus Areas on the Southwest border, but because of schedule delays, costs, and evolving technology, TACCOM I was re-evaluated to be limited to RGV, El Paso, and Houlton. • The DIP project will perform a one-for-one replacement to all narrowband systems nationwide to P25 standards and AES encryption. • DIP upgrades will allow systems to be operable and maintainable until the next-generation systems are developed and put into place. • DIP will not extend current coverage or capacity, but will allow narrowband systems to be digital. • DIP will include the following focus areas: Swanton, Laredo, Del Rio, San Diego, El Centro, Marfa, Blaine, Spokane, Grand Forks, Havre, Miami, New Orleans, Ramey, Buffalo, and Detroit. 	<p>\$27,800</p>

Key Projects	Key Capabilities	FY 2016 Funding (Dollars in Thousands)
Northern Border Remote Video Surveillance System (RVSS)	<ul style="list-style-type: none"> • Northern Border RVSS consists of day/night cameras attached to fixed towers, which allow USBP to monitor border activity through video transmissions to a control room. • Northern Border RVSS provides enhanced situational awareness of border activity through persistent surveillance and detection to facilitate proper law enforcement resolutions. • Northern Border RVSS expands the coverage at the Northern border where highly trafficked and illegal activities exist. • Transitioned to organic Government sustainment. • Funding is used to continue operations and maintenance of the RVSS systems in Buffalo and Detroit. <ul style="list-style-type: none"> ○ In Buffalo, there are five towers and video at Headquarters, covering 17 miles along the Niagara River in New York. ○ In Detroit, there are 11 towers and video at Headquarters, covering 35 miles along St. Clair River in Michigan. 	\$8,439

Key Projects	Key Capabilities	FY 2016 Funding (Dollars in Thousands)
Remote Video Surveillance System (RVSS)	<ul style="list-style-type: none"> • RVSS is a remotely controlled system of either daylight or infrared cameras that are mounted to a permanent structure or tower. The images are transmitted, monitored, and recorded at a central location. • This system is deployed to monitor large spans of the international border or Critical Transit Nodes. • This Program will enhance the capability of providing situational awareness of border activity through persistent surveillance and detection to facilitate proper law enforcement resolution. • Additional RVSS towers will expand the coverage of the RVSS system in Arizona in areas that are highly trafficked with illegal activities. Currently, prior year funding is being used to execute RVSS system upgrades. • The RVSS Upgrade Program plans to add an additional 18 new RVSS camera sites/towers, as well as upgrade 47 existing RVSS camera sites and six communication relay sites in Arizona. • The RVSS Upgrade Program will deploy the RVSS capability to eight USBP AoRs within the RGV Sector. • The sensor suite configuration at each RVSS site varies depending on USBP operational needs and the geographical area such as urban, suburban, or rural. • Contract was awarded to General Dynamics One Source LLC on July 26, 2013, with Initial Operational Capability (IOC) and Full Operational Capability (FOC) projected for the second quarter of FY 2015 and the fourth quarter of FY 2016, respectively. 	\$22,000

Key Projects	Key Capabilities	FY 2016 Funding (Dollars in Thousands)
Mobile Surveillance Capabilities (MSC)	<ul style="list-style-type: none"> • The purpose of the MSC is to provide area surveillance in rural, remote areas over a range of 8 to 12 kilometers. • Capabilities are detection, identification, and tracking of IoIs until successfully culminating in a law enforcement conclusion. • Sensory equipment may include electro - optical/infrared (EO/IR) cameras, ground surveillance radars (GSR), laser range finders, laser illuminators, global positioning systems (GPS), and command, control, and communication (C3) systems. • Delivery and deployment of the 33 FLIR/ICx units was completed in September 2013. Sixteen additional FLIR/ICx MSC units were delivered in the first Quarter of FY 2015. • Acquisition of additional MSC units for deployment to the Southwest border is planned to begin in FY 2016. 	\$24,383

Key Projects	Key Capabilities	FY 2016 Funding (Dollars in Thousands)
Tethered Aerostat Radar System (TARS)	<ul style="list-style-type: none"> • TARS is a multi-mission capability that supports both the counter-drug and air defense missions. • DHS and CBP took over the TARS program from the Department of Defense beginning in FY 2014. • TARS provides long-range detection and monitoring of low-level air, maritime, and surface narcotic traffickers, as well as a unique look-down capability (10,000 feet) permitting a vast area of coverage (200 nautical miles) with a single unit. • TARS offers a distinct visual deterrent to illicit air traffic and is a critical component of the Air & Marine Operations Center's (AMOC) bi-national interdiction operations with Mexico. • The prime contractor for TARS is Exelis, with Northrop Grumman responsible for the data network. • The TARS Request for Information (RFI) for commercial radar capabilities is planned for FY 2015. • The program exercised FY 2015 O&M contract options. 	\$35,549

CURRENT SERVICES PROGRAM DESCRIPTION:

O&M funds support recurring requirements related to life cycle logistics—supply, maintenance, repair, and training services—to operate and maintain border surveillance technology systems, as well as legacy surveillance and communication systems. A combination of Government and contractor logistics activities will provide maintenance management, system support analysis, call center operations, asset management, spare parts storage, management and inventory records, field services, and training.

BSFIT O&M funding also supports the maintenance of various physical components, which are designed to help the USBP fulfill its primary homeland security mission. The BPFTI PMO provides USBP with long-term planning, construction, and maintenance capabilities of tactical components. In

support of other USBP mission elements, the pedestrian and vehicle fences provide persistent impedance by slowing, delaying, and acting as a USBP force multiplier. If the required fences are not properly repaired or replaced, access points will be available for cross-border activity. The gaps in the fence, particularly in urban locations, will lead to an increase in crime and threats to national security and agent safety. Furthermore, infrastructure repairs have enabled USBP's timely and effective response. Roads, ramps, crossovers, and bridges provide improved access so that USBP agents can more readily respond to potential events. Permanent lighting, debris, and vegetation removal provide USBP agents with greater visibility. Towers that are not maintained may lead to a lapse in technology, which could result in a surge in illicit cross-border activity in areas inaccessible to USBP agents.

Exhibit 6: Tactical Infrastructure

FY 2014 marked the substantial completion of the K-1B/K-1C Fence Project in the El Paso Sector. The completion of this project is a significant milestone for CBP, as it marks the completion of Pedestrian Fence 225 (PF225). This was part of DHS's multi-layered strategy, via the *Secure Fence Act of 2006*, to construct the necessary infrastructure to deter and prevent illegal entry on our Southwest border. The completion of K-1B and the completed construction of approximately 225 miles of new pedestrian fence along the Southwest border will further CBP's mission of gaining effective control of our Nation's borders.

In addition to TI, O&M funding additionally provides for several surveillance technologies. For example, O&M will provide for the maintenance of legacy RVSS technology. Legacy RVSS are crucial to the USBP, as they are already deployed and used across the Southwest border. RVSS legacy systems have outlived their expected life cycle, and requirements for repairs have greatly increased. CBP will undergo a review to determine an appropriate refresh plan for these assets. O&M funding will also support the TARS Program, which is a multi-mission capability that supports both counter-narcotic enforcement and air domain awareness missions. The TARS program has assisted CBP with

interdicting suspect aircraft for over 20 years. TARS units are currently in operation along the U.S.-Mexico border and support both counter-narcotic enforcement and air domain awareness missions. As a transfer from DoD, TARS funding of \$35.5 million will provide O&M support in FY 2016 for the eight TARS sites. Six sites are located on the Southwest border, one site is in Florida, and one site is in Puerto Rico. Program funding supports the full operations and maintenance for TARS sites via a contract that provides for a 24/7 TARS Control Center, logistics center, and depot support for Government-furnished, prime mission, and ancillary equipment. Program funding further supports minor equipment sustainment modifications and upgrades and acceptance testing for all aerostats. Funding also allows for the purchase of special purpose vehicles, helium, utilities, support agreements, leases, as well as the delivery of surveillance data. The TARS program will provide a unique look-down capability from an altitude of 10,000 feet permitting a vast detection range of 200 nautical miles with a single system. No other capability exists today that provides visibility at this altitude level.

BSFIT O&M will also support the maintenance of DoD re-use technology. BSFIT currently plans to maintain aerostat technology, which is operationally beneficial to CBP. In August 2012, CBP worked with DoD to conduct an Operational Utility Demonstration of the excess DoD tethered aerostats. Anecdotal evidence from this demonstration indicates that the tethered aerostat systems: enhance the USBP's situational awareness; improve border agent safety; are deployable over typical terrain with proper planning and site preparation; are operable and maintainable in the operational environment; and, according to USBP intelligence, are a visual deterrent to Transnational Organized Crime (TOC) Networks.

BSFIT O&M funding will increase overall from FY 2015 to FY 2016. This increase is primarily due to increased funding for TI to complete the Naco Primary Fence Replacement in Arizona, which is a high priority fence project for the USBP along the Southwest border. It involves the removal and replacement of an estimated 7.5 miles of existing primary pedestrian fence in Zone 30. The BSFIT account will also absorb a decrease to its base. There will be a savings realized from the O&M contract for the IFT Program. The contract awarded for the IFT Program on February 26, 2014, was less than the estimated cost. The savings will go toward other pressing CBP needs. In addition to the IFT savings, some maintenance funding requested in FY 2015 will not recur in FY 2016. The total amount that will non-recur in FY 2016 is \$15.010 million. The majority of the funding that will not recur is for the MVSS Program. The MVSS Program requires less funding in FY 2016 to meet the anticipated maintenance requirements for that year. Additional O&M funding may be requested in future fiscal years for the MVSS Program as additional MVSS deployments are completed.

OVERVIEW OF ADDITIONAL PROGRAMS REQUESTING O&M:

Agent Portable Surveillance Systems (APSS)

Twelve APSS units were deployed to the Tucson Sector for USBP agent training and operations during the first quarter of FY 2012. The Operational Assessment (OA) for the APSS units was completed in the fourth quarter of FY 2012. The OA concluded that the technology demonstrator met the medium range detection of border incursions (three to five miles) but fell short of meeting future operational requirements of self-sustained operations under battery power for at least ten hours and the ability for a crew of three or less agents to carry it to remote sites in rugged terrain. The APSS units transitioned to sustainment in the first quarter of FY 2013 and will remain deployed until a Program of Record is put into place. The BSFIT account currently supports the maintenance of the 12 APSS demonstration

units, which provide USBP agents with a man-portable, medium-range surveillance capability in areas with difficult terrain or low activity. In addition, they provide the USBP with improved situational awareness, rapid response, and increased agent safety. They also complement fixed and mobile technology solutions.

Unattended Ground Sensor/Imaging Unattended Ground Sensors (UGS/I-UGS)

UGS/I-UGS provide USBP agents with the ability to detect and track activity via a relay repeater to a common operating picture (COP) at a base station. They contribute to improved situational awareness, agent safety, and rapid response. A single UGS sensor can detect human/animal traffic up to a range of 10 meters, and vehicles up to a range of 15 meters. I-UGS are used to differentiate between human, animal, and vehicle traffic – acting as a force multiplier as they increase the effectiveness and efficiency of operational response by USBP. UGS/I-UGS technology complements fixed technology deployments, such as IFT and RVSS. UGS and imaging sensor deliveries to the Tucson and Ajo Stations were completed in September 2013. A total of 545 UGS units and 140 imaging sensors were delivered. The BSFIT account supports the maintenance of UGS and imaging sensors.

Ultra-Light Aircraft Detection (ULAD)

ULAD systems, which augment current U.S. air domain radar coverage, are transportable and designed to detect and track small, low-flying, and slow-moving aircraft. ULAD radar data is received by the CBP Office of Air and Marine's (OAM) Air and Marine Operations Surveillance System (AMOSS), where it aids in completing CBP's air domain awareness and law enforcement activities.

Mobile Surveillance System (MSS)

MSS units are moved as a reaction force where illicit traffic appears to be increasing. They are also positioned in locations to fill gaps where fixed sensor systems (such as IFTs) are not typically present. However, due to their limited elevation capabilities, they are not able to cover the same amount of area that an IFT could cover. The deployment of MSS has resulted in an increase in USBP agent safety. The identification information that the MSS provides enables USBP agents to select the site and method of interdiction.

Tactical Infrastructure (TI)

To help the USBP secure borders between the Port of Entry (POE), the BPFTI Program Management Office (PMO) plans, constructs, and maintains various physical components. These TI components vary—from roads, fencing, bridges, and crossovers; to lights, electrical components, and drainage structures; to vegetation and debris removal; and to towers (excluding technology). However, the primary goal remains constant, and that is to help USBP agents prevent terrorists and terrorist weapons from entering the United States.

The BPFTI PMO provides the USBP with long-term planning, construction, and maintenance capabilities of tactical components. In support of other USBP mission elements, the pedestrian and vehicle fences provide persistent impedance by slowing, delaying, and acting as a USBP force multiplier. If the required fences are not properly constructed or replaced, access points will be available for cross-border activity. The gaps in the fence, particularly in urban locations, will in turn lead to an increase in crime and threats to national security and agent safety.

Furthermore, infrastructure repairs have enabled USBP's timely and effective response. Roads, ramps, crossovers, and bridges provide improved access so that USBP agents can more readily respond to potential events. Permanent lighting, debris, and vegetation removal provide USBP agents with greater visibility. Towers that are not maintained may lead to a surge in illicit cross-border activity in areas inaccessible to USBP agents.

Northern Border

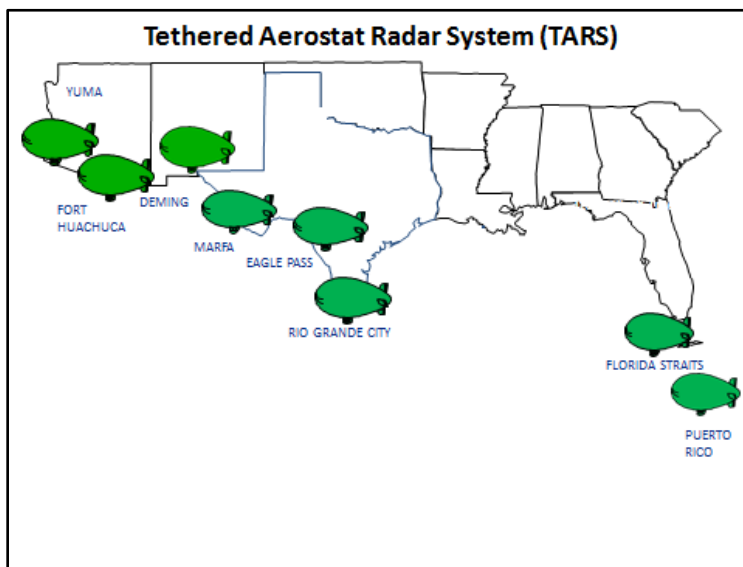

In addition to the U.S. Southern border, technology investments are also deployed along the U.S. Northern border, including the Blaine, Spokane, Detroit, and Buffalo Sectors. The BSFIT Northern Border portfolio consists of several projects and demonstrations designed to secure the border. The Northern Border RVSS technology allows the USBP to monitor border activity through video transmissions to a control room. In addition, the AVDL project is in operation and enhances and expands information sharing among CBP's operational components by providing CBP OAM with the ability to transmit and receive real-time, full-motion video to ground stations. The LFAD project with its short-range radar systems and other sensors will provide area surveillance to detect and interdict low-flying aircraft in rural and semi-urban areas.

Northern Border demonstrations and deployments explore how to best integrate various sensors, border security organizations, and mission operations to optimize border security in a vast, geographically challenging environment. The OIC, located in the Detroit Sector, maximizes operational effectiveness by leveraging local and state law enforcement agencies and existing technologies, including information feeds from cameras and radars that are deployed across vast areas of the border. With the demonstration period over, the OIC remains operational and will be supported by the BSFIT account until it is transitioned to a new business owner that can secure its own project funding. The MDP is also supported by the BSFIT account, and will detect, identify, classify, and track maritime threats with commercially available maritime radar and data fusion systems. This project is currently being deployed in the Buffalo Sector.

Tethered Aerostat Radar System (TARS)

The TARS Program transitioned from the Department of Defense (DoD) to CBP on July 1, 2013. TARS (Exhibit 7) are stationary, aerostat-based radar systems that operate L-band radars with a range of 200 nautical miles and a detection altitude that is from the surface to 2000 feet above the aerostat operating altitude. They provide air surveillance across sections of the U.S.-Mexico Southern border, and portions of both the Gulf of Mexico and the Caribbean. TARS provide a unique look-down radar capability that detects low altitude aircraft by mitigating the curvature of the earth and terrain, thereby masking limitations by operating at altitude. Ground based radars are unable to detect these aircraft at a distance due to the masking characteristics of nearby terrain (such as mountains) and the curvature of the earth. By the time a low flying aircraft comes into view of ground based radar, law enforcement will typically not have the necessary time to deploy a proper response. The TARS system provides radar coverage of 200 nautical miles, allowing OAM the time to investigate and/or intercept activity at the border and beyond, including the interior of the country.

Exhibit 7: TARS and Operational Locations

Department of Defense (DoD) Re-use

In addition to deploying and maintaining surveillance technologies, TI, and TACCOM, CBP has formed a partnership with DoD to identify and reuse “excess” DoD technology. CBP identified several categories of such equipment that would be beneficial to use, and nearly all of these categories matched DoD equipment that was no longer in use. To date, several categories of equipment have been delivered to CBP from DoD – for example: thermal imaging equipment, night vision equipment, and aerostat system technology. Using this equipment is advantageous because it benefits CBP operationally. As far as the sustainment of this equipment is concerned, CBP currently intends to operate much of the equipment until the point at which it is no longer operational. There is, however, some equipment that CBP seeks to sustain with maintenance funding. CBP is presently planning for the maintenance of aerostat system technology. Aerostat system technology, which consists of aerostats and towers, is re-locatable and therefore allows CBP to be more flexible in responding to border threats. Funding requested in FY 2016 will assist with addressing requirements for DoD re-use technology.

SUMMARY OF FY 2016 O&M FUNDING LEVELS:

Exhibit 8 below is a summary of the O&M funding levels anticipated for the BSFIT Portfolio for FY 2016. As previously stated, O&M funding will be used for M&R services and to support recurring requirements based on life cycle logistics. O&M costs are forecasted to increase over the next several years in anticipation of technology deployment.

Exhibit 8: Summary of FY 2016 O&M Funding Request Levels (\$ in thousands)

Project	FY 2016 Request
Fielded Systems	
Block 1	16,836
OIT Support – Legacy RVSS	10,310
OIT Support – OBP Systems	16,500
Integrated Logistics Support Core	11,015
Integrated Logistics Support Systems	1,831
Tethered Aerostat Radar System	35,549
DoD Re-Use	7,800
Subtotal	99,841
Arizona Technology Plan and other Southwest Border Deployments	
Integrated Fixed Towers	11,108
Agent Portable Surveillance System	1,176
Mobile Surveillance Capability	8,383
Mobile Surveillance System	6,479
Mobile Video Surveillance System	5,868
Remote Video Surveillance System	5,579
Unattended Ground Sensors	175
Ultra-Light Aircraft Detection	682
Subtotal	39,450
Northern Border Projects	
Aircraft Video Download Link	125
Low-Flying Aircraft Detection	450
Maritime Detection Project	750
Land Air Maritime Border	1,133
Northern Border Remote Video Surveillance System	8,439
Subtotal	10,897
TACCOM	
TACCOM Maintenance	27,800
Subtotal	27,800
Tactical Infrastructure (TI)	
TI Maintenance	93,694
Subtotal	93,694
Technology Management	
Support Contracts	2,249
Subtotal	2,249
Total O&M	273,931

MAJOR ACQUISITIONS:

Block 1 Maintenance

The main mission for Block 1 Maintenance is increased situational awareness and persistence surveillance across the Tucson (TUS-1) and Ajo (AJO-1) areas of responsibility within the Tucson Sector. Block 1 technology supports CBP agents’ and officers’ abilities to effectively detect, identify, classify and resolve illegal incursions at the border. Block 1 includes a deployment of towers with a suite of integrated day and night cameras, radars, unattended ground sensors and a communications package. Block 1 also includes an initial version of a common operating picture, which is the system that integrates the sensors, and displays the results at a command center. Block 1 deployments in TUS-1 and AJO-1 collectively cover approximately 53 miles of international border in Arizona.

OTIA systems utilize embedded information technology. They do not provide IT as a service, as defined in OMB Cir. A-130. Therefore, these acquisitions are considered mixed non-IT/IT

This project is proposed to be funded out of multiple PPAs in FY 2016, as follows:

- BSFIT Operations & Maintenance \$16.836 million
- Technology Innovation & Acquisition \$0.427 million

FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Funding (\$\$\$ thousands)	FY 2016 Activity Request (\$\$\$ thousands)
\$22,704	\$15,681	\$17,263

FY 2016 Funding Breakout:

Program Area (Funding in \$\$\$ thousands)	Sub-Program	Mission Need
Block 1 (\$16,836)	Investment Maintenance	Includes costs associated with supporting the maintenance of Block 1, which provides increased situational awareness and persistence surveillance across the TUS-1 and AJO-1 areas of responsibility within the Tucson Sector.
Block 1 (\$0,427)	Salaries	Supports Program Management Office; funding captured in the OTIA S&E account.

Integrated Fixed Towers (IFT)

IFT provide automated, persistent wide area surveillance for the detection, tracking, identification, and classification of illegal entries. In threat areas where mobile surveillance systems cannot be a viable and/or long term solution, IFTs equipped with sensor suites and communication equipment can be deployed to provide automated, persistent wide area surveillance for the detection, tracking, identification, and classification of illegal entries. When multiple IFT units are integrated into a system with a common operating picture (COP), Border Patrol will be able to increase situational awareness and be able to monitor a larger area of

interest. With an IFT system, a single COP operator can maintain persistent surveillance over a large area whereas previously, multiple agents exposed to threats were required to provide coverage in the same amount of area.

This project is proposed to be funded out of multiple PPAs in FY 2016, as follows:

- BSFIT Operations & Maintenance \$11.108 million
- Technology Innovation & Acquisition \$1.607 million

FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Funding (\$\$\$ thousands)	FY 2016 Activity Request (\$\$\$ thousands)
\$86,816	\$26,589	\$12,715

FY 2016 Funding Breakout:

Program Area (Funding in \$\$\$ thousands)	Sub-Program	Mission Need
IFT (\$11,108)	Investment Maintenance	Includes the costs associated with supporting the maintenance of IFTs, which provide automated, persistent wide area surveillance for the detection, tracking, identification, and classification of illegal entries
IFT (\$1,607)	Salaries	Supports Program Management Office; funding captured in the Technology, Innovation, and Acquisition (TIA) PPA in the S&E account.

Mobile Surveillance Capabilities (MSC)

The purpose of the MSC is to provide area surveillance in rural, remote areas over a range of 8 to 12 kilometers. Capabilities are detection, identification, and tracking of items of interest (IOI's) until successfully culminating in a law enforcement conclusion. Sensory equipment may include electro - optical/infrared (EO/IR) cameras, ground surveillance radars (GSR), laser range finders, laser illuminators, global positioning systems (GPS), and command, control, communication (C3) systems.

Government Ford F-450 trucks are outfitted with an integrated suite of sensor equipment attached to the flat skid cargo bed, with an operator workstation located inside the truck cabin, allowing CBP to adjust the location of its surveillance capabilities to keep pace with the ever changing border threat.

OTIA systems utilize embedded information technology. They do not provide IT as a service, as defined in OMB Cir. A-130. Therefore, these acquisitions are considered mixed non-IT/IT.

This project is proposed to be funded out of multiple PPAs in FY 2016, as follows:

- BSFIT Development & Deployment \$16.000 million
- BSFIT Operations & Maintenance \$8.383 million
- Technology Innovation & Acquisition \$0.282 million

FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Funding (\$\$\$ thousands)	FY 2016 Activity Request (\$\$\$ thousands)
\$5,874	\$12,859	\$24,665

FY 2016 Funding Breakout:

Program Area (Funding in \$\$\$ thousands)	Sub-Program	Mission Need
MSC (\$16,000)	Investment Acquisition	Includes the costs associated with the development and deployment of MSC, whose purpose is to provide area surveillance in rural, remote areas over a range of 8 to 12 kilometers.
MSC (\$8,383)	Investment Maintenance	Includes the costs associated with the maintenance of MSC, whose purpose is to provide area surveillance in rural, remote areas over a range of 8 to 12 kilometers.
MSC (\$0,282)	Salaries	Supports Program Management Office; funding captured in the TIA PPA in the S&E account.

Northern Border Remote Video Surveillance System (NB-RVSS)

The NB-RVSS consist of day night cameras attached to fixed towers, which allows the Border Patrol to monitor border activity through video transmissions to a control room. This program will enhance the capability of providing situational awareness of border activity through persistent surveillance and detection to facilitate proper law enforcement resolution. The NB - RVSS towers have expanded the coverage at the Northern Border where highly trafficked and illegal activities exist.

OTIA systems utilize embedded information technology. They do not provide IT as a service, as defined in OMB Cir. A-130. Therefore, these acquisitions are considered “mixed non-IT/IT.”

This project is proposed to be funded out of multiple PPAs in FY 2016, as follows:

- BSFIT Operations & Maintenance \$8.439 million
- Technology Innovation & Acquisition \$0.427 million

FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Funding (\$\$\$ thousands)	FY 2016 Activity Request (\$\$\$ thousands)
\$6,610	\$10,204	\$8,866

FY 2016 Funding Breakout:

Program Area (Funding in \$\$\$ thousands)	Sub-Program	Mission Need
NB-RVSS (\$8,439)	Investment Maintenance	Includes costs associated with maintenance of NB-RVSS, which allow the Border Patrol to monitor border activity through video transmissions to a control room. This program will enhance the capability of providing situational awareness of border activity through persistent surveillance and detection to facilitate proper law enforcement resolution.
NB-RVSS (\$0,427)	Salaries	Supports Program Management Office; funding captured in the TIA PPA in the S&E account.

Remote Video Surveillance System (RVSS)

An RVSS is a remotely controlled system of either daylight or infrared cameras mounted to a permanent structure. The images are transmitted, monitored, and recorded at a central location. This system is deployed to monitor large spans of the international border or Critical Transit Nodes. This program will address technology obsolescence by upgrading selected RVSS sites with new surveillance capability and deploy the upgraded technology at new RVSS Upgrade sites, thus enhancing the capability of providing situational awareness of border activity through persistent surveillance and detection to facilitate proper law enforcement resolution. These additional RVSS towers will expand the coverage of the RVSS system in Arizona in areas that are highly trafficked with illegal activities.

OTIA systems utilize embedded information technology. They do not provide IT as a service, as defined in OMB Cir. A-130. Therefore, these acquisitions are considered mixed non-IT/IT.

This project is proposed to be funded out of multiple PPAs in FY 2016, as follows:

- BSFIT Development & Deployment \$16.421 million
- BSFIT Operations & Maintenance \$5.579 million
- Technology Innovation & Acquisition \$1.603 million

Tactical Communications (TACCOM) Modernization

CBP is responsible for securing the nation’s borders against illegal entry of people and goods while facilitating legitimate travel and trade. To support this mission, CBP operates and maintains one of the largest Land Mobile Radio (LMR) tactical voice communications infrastructures in the Federal government. Tactical communications capabilities are essential to coordinating mission activities and protecting the safety of over 44,000 CBP law enforcement agents and officers. These agents and officers operate in remote areas where their radio is often their only communications channel to coordinate activities or summon assistance. By improving coverage, capacity, reliability, and encryption, the modernization effort provides critical communications support to the agents and officers who secure the nation’s borders

This project is proposed to be funded out of multiple PPAs in FY 2016, as follows:

Based on the updated RAD

- Information Technology \$3.796 million
- BSFIT Operations & Maintenance \$27.800 million

FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Funding (\$\$\$ thousands)	FY 2016 Activity Request (\$\$\$ thousands)
57,905	29,607	31,596

FY 2016 Funding Breakout:

Program Area (Funding in \$\$\$ thousands)	Sub-Program	Mission Need
Tactical Communication (TACCOM) Modernization (\$28,371)	Investment Maintenance	Includes the expense costs associated with providing CBP the resources necessary to meet their responsibility for securing the nation's borders against illegal entry of people and goods while managing legitimate travel and trade.
Tactical Communication (TACCOM) Modernization (\$3,225)	Salaries	Supports Program Management Office.

END ITEMS:

End Item: Mobile Video Surveillance System (MVSS)

Estimated Cost per Item: \$ 0.300 million (acquisition cost only)

Total Estimated Cost: \$30.888 million (D&D and O&M funding requested for FY 2016; can procure 73 units)

Contract Information and Status: Indefinite Delivery Indefinite Quantity (IDIQ), Fixed Price Contract awarded to Mistral Inc. of Bethesda, Maryland on July 31, 2014. The contract has 1 base-year and 4 option-years. The award was protested based on size, and the Small Business Administration (SBA) has yet to make a small-business size protest ruling.

CURRENT SERVICES PROGRAM DESCRIPTION:

D&D funds new investments and surveillance and detection technologies, including sensor systems, radars, and day/night cameras, to improve CBP operational forces' ability to detect, identify, classify, and track illegal entries and items of interest across all border environments. These systems are deployed on fixed structures, mobile platforms (e.g., wheeled vehicles), and directly on the ground.

D&D further provides for related activities, such as technical support, systems engineering services, prime contractor program management, advanced technology development, operational testing and evaluation support, and environmental planning, assessment, and mitigation activities associated with deploying technology and TI. A portion of FY 2016 D&D funding will be used by the RVSS Upgrade Program to begin field tower construction in the RGV Sector.

Funding is not requested for the TACCOM Program's DIP project in FY 2016. As a result of the funding pause for DIP, CBP will delay the completion of modernizing its existing LMR systems with

state-of-the-art digital technology that complies with P25 standards in the following focus areas: El Centro, Havre, Blaine, Grand Forks, and Spokane. The modernization provides narrow-banding, mandated by the National Telecommunications and Information Administration (NTIA), AES encryption to protect radio communications from scanning, and Global Positioning System (GPS)-supported Blue Force Tracking to track agent and officer location and safety. In addition, it is important to note that a large amount of CBP’s LMR systems have components that are between 10 to 20 years old. CBP may incur increased expenses for the sustainment of out-of-life-cycle equipment and the unavailability of parts which can affect CBP officers and agents. Interoperability between CBP Office of Border Patrol (OBP), Office of Field Operations (OFO) and Office of Air Marine (OAM) with Federal, tribal, state and local partners via the Radio IP System (RIPS) will also be delayed. RIPS introduces open standards interfaces that will provide CBP with options for replacing aging, embedded proprietary solutions.

SUMMARY OF FY 2016 D&D FUNDING LEVELS

Exhibit 9 is a summary of the anticipated FY 2016 D&D funding levels for the BSFIT Portfolio divided between key mission areas.

Exhibit 9: Summary of FY 2016 D&D Funding Request Levels (\$ in thousands)

Project	FY 2016 Request
Arizona Technology Plan and other Southwest Border Deployments	
DoD Re-Use	1,200
Agent Portable Systems: Thermal Imaging Device	1,824
Mobile Surveillance Capability	16,000
Mobile Video Surveillance System	25,020
Remote Video Surveillance System	16,421
Subtotal	60,465

Other Technology and Management (Support Contracts & Southwest Field Office)	39,065
Subtotal	39,065
Total D&D	99,530

OVERVIEW OF ADDITIONAL PROGRAMS REQUESTING D&D:

Department of Defense (DoD) Re-use

In addition to deploying and maintaining surveillance technologies, TI, and TACCOM, CBP has formed a partnership with DoD to identify and reuse “excess” DoD technology. CBP identified several categories of such equipment that would be beneficial to use, and nearly all of these categories matched DoD equipment that was no longer in use. To date, several categories of equipment have been delivered to CBP from DoD – for example: thermal imaging equipment, night vision equipment, and aerostat system technology. Using this equipment is advantageous because it benefits CBP operationally. As far as the sustainment of this equipment is concerned, CBP currently intends to operate much of the equipment until the point at which it is no longer operational. Within D&D, this funding will allow CBP to conduct technical evaluations and deploy additional DoD re-use systems to

the field. Some of these technologies include: foliage penetrating sensors, night vision detection devices, and wireless sensor data link systems. Funding requested in FY 2016 will assist with addressing requirements for DoD re-use technology.

MAJOR ACQUISITIONS:

Mobile Surveillance Capabilities (MSC)

The purpose of the MSC is to provide area surveillance in rural, remote areas over a range of 8 to 12 kilometers. Capabilities are detection, identification, and tracking of items of interest (IOI's) until successfully culminating in a law enforcement conclusion. Sensory equipment may include electro - optical/infrared (EO/IR) cameras, ground surveillance radars (GSR), laser range finders, laser illuminators, global positioning systems (GPS), and command, control, communication (C3) systems.

Government Ford F-450 trucks are outfitted with an integrated suite of sensor equipment attached to the flat skid cargo bed, with an operator workstation located inside the truck cabin, allowing CBP to adjust the location of its surveillance capabilities to keep pace with the ever changing border threat.

OTIA systems utilize embedded information technology. They do not provide IT as a service, as defined in OMB Cir. A-130. Therefore, these acquisitions are considered mixed non-IT/IT.

This project is proposed to be funded out of multiple PPAs in FY 2016, as follows:

- BSFIT Development & Deployment \$16.000 million
- BSFIT Operations & Maintenance \$8.383 million
- Technology Innovation & Acquisition \$0.282 million

FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Funding (\$\$\$ thousands)	FY 2016 Activity Request (\$\$\$ thousands)
\$5,874	\$12,859	\$24,665

FY 2016 Funding Breakout:

Program Area (Funding in \$\$\$ thousands)	Sub-Program	Mission Need
MSC (\$16,000)	Investment Acquisition	Includes the costs associated with the development and deployment of MSC, whose purpose is to provide area surveillance in rural, remote areas over a range of 8 to 12 kilometers.
MSC (\$8,383)	Investment Maintenance	Includes the costs associated with the maintenance of MSC, whose purpose is to provide area surveillance in rural, remote areas over a range of 8 to 12 kilometers.
MSC (\$0,282)	Salaries	Supports Program Management Office; funding captured in TIA PPA in the S&E account.

Remote Video Surveillance System (RVSS)

An RVSS is a remotely controlled system of either daylight or infrared cameras mounted to a permanent structure. The images are transmitted, monitored, and recorded at a central location. This system is deployed to monitor large spans of the international border or Critical Transit Nodes. This program will address technology obsolescence by upgrading selected RVSS sites with new surveillance capability and deploy the upgraded technology at new RVSS Upgrade sites, thus enhancing the capability of providing situational awareness of border activity through persistent surveillance and detection to facilitate proper law enforcement resolution. These additional RVSS towers will expand the coverage of the RVSS system in Arizona in areas that are highly trafficked with illegal activities.

OTIA systems utilize embedded information technology. They do not provide IT as a service, as defined in OMB Cir. A-130. Therefore, these acquisitions are considered mixed non-IT/IT.

This project is proposed to be funded out of multiple PPAs in FY 2016, as follows:

- BSFIT Development & Deployment \$16.421 million
- BSFIT Operations & Maintenance \$5.579 million
- Technology Innovation & Acquisition \$1.603 million

FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Funding (\$\$\$ thousands)	FY 2016 Activity Request (\$\$\$ thousands)
\$17,592	\$48,067	\$23,603

FY 2016 Funding Breakout:

Program Area (Funding in \$\$\$ thousands)	Sub-Program	Mission Need
RVSS (\$16,421)	Investment Acquisition	Includes the costs associated with the development and deployment of RVSSs, which include day-night cameras attached to fixed towers, allowing the Border Patrol to monitor border activity through video transmissions to a control room.
RVSS (\$5,579)	Investment Maintenance	Includes costs associated with the maintenance of RVSSs, which include day-night cameras attached to fixed towers, allowing the Border Patrol to monitor border activity through video transmissions to a control room.
RVSS (\$1,603)	Salaries	Supports Program Management Office; funding captured in the TIA PPA in the S&E account.

END ITEMS:

End Item: Mobile Video Surveillance System (MVSS)

Estimated Cost per Item: \$ 0.300 million (acquisition cost only)

Total Estimated Cost: \$30.888 million (Development & Deployment and Operations & Maintenance funding in President's Budget for FY 2016; can procure 73 units)

Contract Information and Status: Indefinite Delivery Indefinite Quantity (IDIQ), Fixed Price Contract awarded to Mistral Inc. of Bethesda, Maryland on July 31, 2014. The contract has 1 base-year and 4 option-years. The award was protested based on size, and the Small Business Administration (SBA) has yet to make a small-business size protest ruling.

IV. Program Justification Changes

Department of Homeland Security
Border Security Fencing, Infrastructure, and Technology:
Justification of Program Changes
(Dollars in Thousands)

Program Increase 1: Mobile Surveillance Capability
PPA: Development and Deployment
Program Increase: Positions 0, FTE 0, Dollars \$16,000

Funding Profile

	FY 2014 Revised Enacted			FY 2015 President's Budget			FY 2016 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$0
Program Increase							0	0	\$16,000
Total Request	0	0	\$0	0	0	\$0	0	0	\$16,000

Description of Item

CBP requests an increase of \$16 million in funds for BSFIT D&D in FY 2016. This funding will allow CBP to procure a minimum of 10 Mobile Surveillance Capability (MSC) systems, including initial spares and program support, for deployment to the El Paso, Big Bend, and Del Rio Sectors.

Justification

The proposed increase in D&D funding for the MSC Program will benefit CBP operations on the Southwest border. \$16 million in funding will allow CBP to procure a minimum of 10 systems, including initial spares and program support, for deployment to the El Paso, Big Bend, and Del Rio Sectors. CBP may be able to procure additional MSC systems depending on the costs associated with procuring initial spares and program support. The maximum procurement that CBP anticipates with the funding provided is 19 systems.

The new MSC units would replace aging, less capable, legacy MSS units that are nearing end-of-life. MSC systems provide mobile area surveillance in remote rural areas over a range of 8 to 12 kilometers, which allows CBP to adjust the location of its surveillance capabilities to keep pace with the ever-changing border threat. The capabilities of MSC are detection, identification, and tracking of Items of Interest (IoIs) until successfully culminating in a law enforcement conclusion.

Impact on Performance (Relationship of Increase to Strategic Goals)

CBP expects that the deployment of additional MSC systems to Southwest border areas will have a positive impact on operational performance. MSC sensory equipment includes electro-optical/infrared cameras; ground surveillance radars; laser range finders; laser illuminators; GPS systems; and command, control, and communication systems. The equipment provides ground surveillance radar detections and the ability to assess with day and night cameras. The MSC is a stand-alone, truck-mounted suite of radar and cameras that provide a display within the cab of the truck. An operator can use the information displayed to identify an activity and advise USBP agents responding to the activity.

2014 DHS QHSR Alignment

Mission 2: Secure and Manage our Borders

Goal 2.3: Disrupt and Dismantle Transnational Criminal Organizations and Other Illicit Actors

Objective: Identify, investigate, disrupt, and dismantle transnational criminal organizations; and

Objective: Disrupt illicit actors, activities, and pathways.

Department of Homeland Security
Border Security Fencing, Infrastructure, and Technology:
Justification of Program Changes
(Dollars in Thousands)

Program Increase 2: Re-use of DOD Equipment
PPA: Operations and Maintenance, Development and Deployment
Program Increase: Positions 0, FTE 0, Dollars \$8,507

Funding Profile

	FY 2014 Revised Enacted			FY 2015 President's Budget			FY 2016 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$497
Program Increase							0	0	\$8,507
Total Request	0	0	\$497	0	0	\$497	0	0	\$9,004

Description of Item

CBP requests an \$8.507 million increase in funds for BSFIT D&D and O&M in FY 2016 for re-use of DoD equipment. Within D&D, this funding will allow CBP to conduct technical evaluations and deploy additional DoD re-use systems to the field. Some of these technologies include: foliage penetrating sensors, night vision detection devices, and wireless sensor data link systems. Within O&M, this funding will allow CBP to complete the installation, training, operation, and maintenance of re-locatable towers. It will also provide for logistics and sustainment support for aerostat and re-locatable tower deployments, including the utility evaluation, site preparation, and operation of one aerostat.

Justification

The proposed increase in D&D funding for DoD re-use equipment will benefit CBP operationally. CBP has formed a partnership with the DoD to identify “excess” technologies which are no longer needed by DoD but could hold value for CBP. To date, several categories of equipment have been delivered to CBP from DoD. For instance, aerostat technology, spectrometers, and night vision equipment have been delivered to the field. CBP estimates that 2,087 items have been distributed to CBP to date. The procurement value of this equipment is approximately \$66.207 million.

Of the \$8.507 million requested increase, \$1.200 million will allow CBP to conduct technical evaluations and deploy additional DoD re-use systems to the field. Some of these technologies include: foliage penetrating sensors, night vision detection devices, and wireless sensor data link

systems. The deployment of these technologies is important to CBP because it supports CBP operations in the field.

The balance of the increase, \$7.307 million, will allow CBP to complete the installation, training, operation, and maintenance of re-locatable towers. It will also provide for logistics and sustainment support for aerostat and re-locatable tower deployments, including the utility evaluation, site preparation, and operation of one aerostat. The operation and maintenance of DoD re-use equipment is important to CBP because it supports operations in the field and provides a cost-effective way to provide necessary equipment to fulfill CBP's border security mission requirements.

Impact on Performance (Relationship of Increase to Strategic Goals)

The deployment of DoD re-use equipment to the field will support CBP operations. To date, CBP has deployed several DoD technologies. For example, DoD aerostat technology was deployed to the RGV Sector in early FY 2014. Since its deployment, the technology has resulted in nearly 22,000 apprehensions and over 28 tons of illegal drug seizures. CBP seeks to continue its partnership with DoD in order to continue to reap the benefits from operating excess DoD equipment.

2014 DHS QHSR Alignment

Mission 2: Secure and Manage our Borders

Goal 2.3: Disrupt and Dismantle Transnational Criminal Organizations and Other Illicit Actors

Objective: Identify, investigate, disrupt, and dismantle transnational criminal organizations; and

Objective: Disrupt illicit actors, activities, and pathways.

Department of Homeland Security
Border Security Fencing, Infrastructure, and Technology:
Justification of Program Changes
(Dollars in Thousands)

Program Increase 3: Mobile Surveillance Deployment to SW Border
PPA: Development and Deployment
Program Increase: Positions 0, FTE 0, Dollars \$2,195

Funding Profile

	FY 2014 Revised Enacted			FY 2015 President's Budget			FY 2016 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$24,649
Program Increase							0	0	\$2,195
Total Request	0	0	\$0	0	0	\$24,649	0	0	\$26,844

Description of Item

CBP requests an increase of \$2.195 million in funds for BSFIT D&D in FY 2016 for Mobile Video Surveillance Systems (MVSS) units and program support. Funding for mobile surveillance in FY 2016 will allow for the acquisition of an additional 73 units. It will also provide support staff for the management and deployment of MVSS units throughout Texas. The increase in D&D funding will additionally support the procurement and deployment of agent-portable systems on the Southwest border.

Justification

The proposed increase in D&D funding for the MVSS Program and agent-portable systems will benefit CBP operations on the Southwest border. This funding will be used for the acquisition of MVSS units and the support staff for the management and deployment throughout Texas. The deployments will satisfy USBP needs in Laredo, Big Bend, and Del Rio sectors; the MVSS Program also plans to begin deployments to meet operational needs in the El Paso sector. CBP estimates that at least 73 MVSS units will be acquired with the FY 2016 funding requested. Laredo Sector will receive 15 units, Del Rio Sector will receive 40 units, and Big Bend Sector will receive 18 units. Any additional units acquired will be deployed to the El Paso Sector. MVSS systems enable the visual detection, identification, classification, and tracking of Items of Interest (IoIs) in both urban and remote areas along the border.

\$1.824 million of the request is intended for the procurement and deployment of agent-portable systems on the southwest border. CBP will acquire agent-portable technology that is consistent with CBP operational needs.

Impact on Performance (Relationship of Increase to Strategic Goals)

CBP expects that the deployment of MVSS and agent-portable systems to southwest border areas will have a positive impact on operational performance. The MVSS significantly enhances CBP's capability to provide constant video surveillance and situational awareness, resulting in timely and effective responses from law enforcement in predominately rural, remote areas. It is used for detection, identification, and tracking. The system's agility provides the USBP with a dynamic surveillance capability, demonstrated by the ability to relocate video surveillance assets on the basis of changes in threat patterns and behavior. The MVSS system also provides video surveillance coverage (as needed) between fixed tower assets.

Agent-portable systems, in comparison with other systems such as fixed and mobile, are the most flexible in terms of when and where they can be used. They provide dynamic surveillance in operational areas with sufficient agent access and where IoI vanishing times are sufficient for detection. The acquisition of additional agent-portable systems for the Southwest border will enhance CBP operations.

2014 DHS QHSR Alignment

Mission 2: Secure and Manage our Borders

Goal 2.3: Disrupt and Dismantle Transnational Criminal Organizations and Other Illicit Actors

Objective: Identify, investigate, disrupt, and dismantle transnational criminal organizations; and

Objective: Disrupt illicit actors, activities, and pathways.

**Border Security Fencing, Infrastructure, and Technology:
Justification of Program Changes**
(Dollars in Thousands)

Program Increase 4: Arizona Tactical Infrastructure
PPA: Operations and Maintenance
Program Increase: Positions 0, FTE 0, Dollars \$44,700

Funding Profile

	FY 2014 Revised Enacted			FY 2015 President's Budget			FY 2016 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$48,994
Program Increase							0	0	\$44,700
Total Request	0	0	\$48,994	0	0	\$48,994	0	0	\$93,694

Description of Item

CBP requests an increase of \$44.700 million in funds for BSFIT O&M in FY 2016 to complete the Naco Primary Fence Replacement Project. This project is high priority fence project for the USBP along the Southwest border and involves the removal and replacement of an estimated 7.5 miles of existing primary pedestrian fence in Zone 30.

Justification

The proposed increase in O&M funding for the TI Program will be beneficial for CBP. With the \$44.700 million requested, CBP plans to complete the Naco Primary Fence Replacement Project. This Project is a high priority fence project for the USBP along the southwest border and involves the removal and replacement of an estimated 7.5 miles of existing primary pedestrian fence in Zone 30. This section of fence has been successfully exploited by Transnational Criminal Organizations (TCOs) due to ease of concealment (the fence is within a populated area) and due to the inadequate design of the fence (the fence lacks adequate height, foundation, and strength). The funding requested will address these vulnerabilities.

Impact on Performance (Relationship of Increase to Strategic Goals)

The completion of the Naco Primary Fence Replacement Project will provide operational benefits for CBP. New fencing will provide persistent impedance in Naco, thereby delaying the progress of individuals who attempt to cross the border within Zone 30 illegally. Without the fence replacement, access points for cross-border activity will remain. This could lead to an increase in crime and threats to national security and agent safety. In addition, the completion of the Project will provide CBP with the ability to deploy resources and manpower to other remote and rural areas, thereby enhancing security along other areas of the border.

Operations and Maintenance Mission Statement

O&M funds support recurring requirements related to life cycle logistics-supply, maintenance, repair, and training services-to operate and maintain border surveillance technology systems, as well as legacy surveillance and communication systems. A combination of Government and contractor logistics activities will provide maintenance management, system support analysis, call center operations, asset management, spare parts storage, management and inventory records, field services, and training. In addition, O&M provides maintenance and repair (M&R) services for all types of TI, both legacy and newly constructed, to include maintenance and repair of fences, gates, roads, bridges, drainage structures, grates, lighting, electrical systems, and debris removal. O&M also includes the development and implementation of a tracking system to capture and store data so that future maintenance work can be clearly identified and planned. Finally, O&M provides M&R services for the real property associated with tower-based systems, including M&R of the site itself, mechanical and electrical components, fuel tanks, racks, and other components, and may even include the replacement of the entire physical tower itself.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.2 Other Services from Non-Federal Sources	\$167,350	\$54,505	\$59,182	\$4,677

A decrease of \$1,000,000 is to realign funding for Office of Technology Innovation and Acquisition. A decrease of \$44,000 is for the consolidation of rent. An increase of \$7,307,000 is a re-use of DOD equipment. A decrease of \$1,586,000 is to partially non-recur BSFIT O&M

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.7 Operation and Maintenance of Equipment	\$10,652	\$195,737	\$213,119	\$17,382

An increase of \$44,700,000 is for tactical infrastructure in Arizona. A decrease of \$13,424,000 is to partially non-recur BSFIT O&M A decrease of \$13,894,000 is from IFT contract savings.

Development and Deployment Mission Statement

D&D funds support new investments and surveillance and detection technologies, including sensor systems, radars, and day/night cameras, to improve CBP operational forces' ability to detect, identify, classify, and track illegal entries and items of interest across all border environments. These systems are deployed on fixed structures, mobile platforms (i.e. wheeled vehicles), and on the ground. Additionally, D&D provides for related activities, such as technical support; systems engineering services; prime contractor program management; advanced technology development; Operational Test & Evaluation support; and environmental planning, assessment, and mitigation activities associated with deploying technology and TI.

Summary Justification and Explanation of Changes

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
25.2 Other Services from Non-Federal Sources	\$156,365	\$27,124	\$29,319	\$2,195

An increase of \$2,195,000 is for mobile surveillance deployment to SW Border.

	FY 2014 Revised Enacted	FY 2015 President's Budget	FY 2016 Request	FY 2015 to FY 2016 Change
31.0 Equipment	\$35	\$83,470	\$70,211	(\$13,259)

A decrease of \$2,000,000 is for BSFIT support contracts. An increase of \$16,000,000 is for mobile surveillance capability. An increase of \$1,200,000 is a re-use of DOD equipment. A decrease of \$28,459,000 is to partially non-recur the FY15 RVSS upgrade.

BUDGET REQUEST AND SUPPORTING INFORMATION

U.S. Customs and Border Protection Automation Modernization

I. Appropriation Overview

A. Mission Statement for Automation Modernization:

The Automation Modernization appropriation provides critical information technology support to CBP front-line personnel. The CBP automation framework is comprised of the Automated Commercial Environment (ACE)/International Trade Data System (ITDS), Information Technology (IT), Critical Operations Protection and Processing Support (COPPS), and Automated Targeting Systems (ATS) PPAs.

ACE is one of the most significant automation efforts CBP has undertaken to date. It is being developed and deployed in phases. The deployed ACE capabilities have already yielded tangible benefits to CBP, over forty government agencies, and the trade community. As ACE functionality is introduced, the associated segments of its predecessor, the Automated Commercial System (ACS), are being retired. With this budget request, automation efforts will continue to expand with the modernization of revenue collections, processing, and reconciliation for both the trade and travel environments – from duties and taxes, to the fees that fund CBP operations and other agencies.

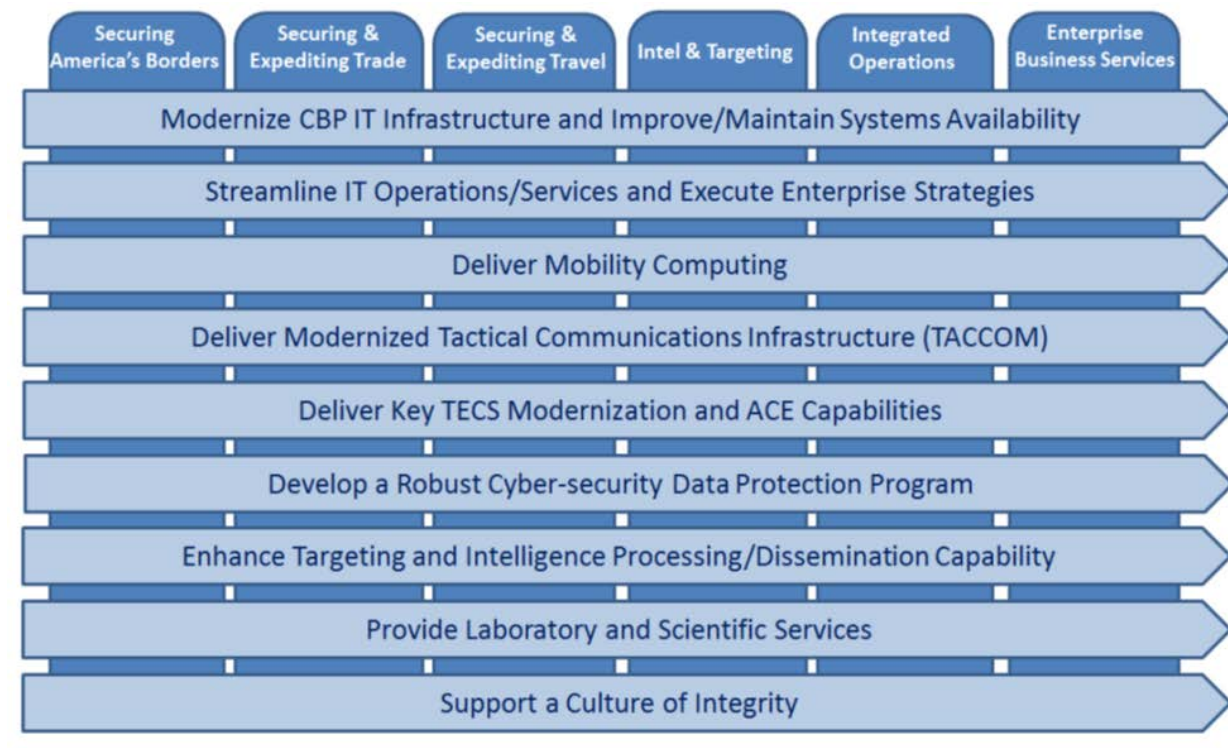

On February 19, 2014, the President signed an Executive Order on *Streamlining the Export/Import Process for America's Businesses*, which requires the completion and use of the International Trade Data System (ITDS) by December 2016. Meeting this goal requires all Federal agencies with roles in export/import processes to transition from paper-based to electronic data collection, allowing businesses to transmit, through an electronic “single-window,” the data required by the U.S. government to import or export cargo. Currently, businesses must submit data to multiple agencies through various means. Implementation of this Executive Order will save businesses time and money, and dramatically reduce the number of forms that they must fill out in order to import or export cargo. In order to meet this deadline, CBP must deliver the core ACE capabilities that support these collections by the end of calendar year 2016. CBP will meet this deadline by developing and deploying useful segments of capabilities. As each segment is completed, users will have more robust, manageable, and accessible tools to aid in securing U.S. borders, facilitating legitimate trade, and targeting illicit goods. For example, there will be more efficient government decision-making associated with goods arriving at the border, reducing the time for clearing goods from many days to, in some cases, seconds, which is a dramatic increase in the flow of legitimate commerce across our borders. Incremental development and deployment will be obtained by using an agile development methodology and framework whereby new capabilities are delivered in incremental releases rather than waiting a year or more. Product backlogs, as identified and prioritized by CBP internal customers, will define the capabilities needed for ACE core functionality. Such capabilities include but are not be limited to: Cargo Release, Entry Summary Edits, Exports, ITDS, and Air Manifest. The program has made great progress reducing ACE Operations and Maintenance (O&M) costs.

CBP manages the operational availability of its IT infrastructure primarily with the COPPS and the Information Technology PPAs. These funds provide the majority of the funding necessary to operate and maintain CBP's IT infrastructure and mission-critical IT. COPPS funds also support the multi-year modernization of TECS, a key system for border enforcement that shares information concerning people who are inadmissible or may pose a threat to the United States. COPPS further supports Terrorism Prevention Systems Enhancement (TPSE), which focuses on enhancing system infrastructure and the supporting enterprise services that enhance continuity of operations.

CBP's priority mission is keeping terrorists and terrorist weapons from entering the United States, while also identifying and interdicting other types of illegal entries and contraband. To do so, CBP must identify high-risk travelers and dangerous cargo, while securing and facilitating legitimate trade and travel, and enforcing hundreds of U.S. laws at the border. CBP accomplishes its mission through a number of agency assets, including CBP's targeting applications. Funding in the Automated Targeting System (ATS) PPA supports CBP's efforts to maximize resources in a more efficient and cost-effective manner through the use of technology, data, and risk-based programs.

The Office of Information and Technology (OIT) supports all CBP users by providing integrated, comprehensive technical support that facilitates both CBP and DHS missions. OIT is responsible for the development, acquisition, testing, and maintenance of new and legacy applications (both government and commercial), and ensures the reliability of CBP's data infrastructure, which transmits critical data to and from CBP and DHS data centers to CBP agents and officers on the front-line, as well as other government agencies, and our travel and trade partners.

Exhibit 1: OIT Mission Priorities¹

B. Budget Activities:

Automated Commercial Environment (ACE)/ International Trade Data System (ITDS)

ACE was created by Title VI of the *North American Free Trade Agreement Implementation Act*, (P.L. 103-182, commonly referred to as the Modernization Act of December 1993) to modernize import processing. Since that time, other elements of customs modernization, such as enforcement and ITDS, have been added to this PPA to enhance national border security. ITDS assists Participating Government Agencies (PGA) in making use of ACE to support their border security, product safety, and international trade missions by helping the PGA design, develop, and integrate their requirements into ACE Cargo Release functionality. ITDS also provides guidance on the legal implications of PGA integration into ACE and serves as a forum for agency issues. Through ITDS, ACE provides a “single window” for filing and facilitating the exchange of trade and transportation information to improve business operations and facilitate lawful trade. A total of 47 government agencies are currently participating in the ACE/ITDS initiative.

CBP has aligned ACE with the DHS Quadrennial Homeland Security Review (QHSR) Mission 2: Securing and Managing our Borders, by reducing the country’s vulnerability to changing threats without diminishing economic security and by providing threat awareness, prevention, and protection

¹ In addition to Auto Mod funding, OIT is additionally supported by APHIS and Immigration User Fees.

for the homeland. Specifically, ACE provides DHS personnel with automated, modernized tools and information to help them decide, before a shipment reaches U.S. borders, what cargo should be targeted because it poses a potential risk, and what cargo should be expedited because it complies with U.S. laws. Like ACS, ACE also supports the revenue collection activity through its account management and revenue collection functionality.

Information Technology

The IT PPA includes funding for most OIT divisions: Border Enforcement and Management Systems Division, Passenger Systems Program Directorate, Targeting Analysis Systems Program Directorate, and a small portion of Cargo Systems Program Directorate, OIT's business support offices, including the Field Support Directorate who provides direct customer support in the field, as well as some infrastructure costs incurred by Enterprise Networks & Technology Support Directorate and Enterprise Data Management & Engineering Directorate. In addition, the IT PPA funds direct operational support provided by OIT's Laboratories and Scientific Services Directorate, and approximately 50 percent of OIT's direct staff costs.² Other pay costs for OIT are covered by various sources of fee funding.

Critical Operations Protection and Processing Support (COPPS)

The COPPS PPA funding supports COPPS IT infrastructure, TECS modernization, and Terrorism Prevention Systems Enhancement (TPSE). The COPPS PPA provides a significant portion of funding to operate and maintain CBP's IT infrastructure and the mission-critical IT systems used to secure the borders while facilitating legitimate trade and travel. The TECS Modernization Program is a multi-year effort dedicated to modernizing TECS, which will improve and sustain DHS and other Federal agency screening capabilities into the future, and support new screening requirements and capabilities. TECS modernization will provide critical border enforcement and POE processing capabilities. TECS is a key tool for sharing passenger data information to determine the admissibility of individuals. TPSE focuses on enhancing system infrastructure and provides continuous, uninterrupted availability of operational systems.

Automated Targeting System (ATS)

ATS is a critical decision support tool that is the cornerstone for all CBP targeting efforts. CBP uses ATS to improve the collection, use, analysis, and dissemination of intelligence to target, identify, and prevent potential terrorists and terrorist weapons from entering the United States, as well as to identify other violations and violators of U.S. law. In this way, ATS allows CBPOs to focus their efforts on travelers and cargo shipments that most warrant further attention. ATS standardizes names, addresses, conveyance names, and similar data so these data elements can be more easily associated with other business data to form a more complete picture of a traveler, import, or export in context with previous behavior of the parties involved. Every traveler and all shipments are processed through ATS, and are subject to a real-time, rule-based evaluation. Risk assessment strategies are multi-tiered in their approach and are founded on complex statistical studies, data analysis, and rules based on knowledge engineering. On a typical day, CBP, using ATS, conducts 100 percent risk assessments on the nearly one million travelers and over 60,000 containers entering at our air, land, and sea POEs.

² Additional OIT FTE and associated Salaries & Benefits costs are funded by IUF and APHIS user fees.

Budget Request Summary:

In FY 2016, CBP requests \$867.311 million and 1,685 positions and 1,620 FTE for Automation Modernization. This is for the portion of OIT staffing funded directly by the Automation Modernization Information Technology PPA. Other FTE are funded in user fee accounts. This request includes a net adjustment to base increase of \$26.574 million, program decreases of \$10.3 million, and program increases of \$26.129 million. These increases would provide funding in support of Intelligence and Targeting Operations, Counter Network Operations Capability, High Risk Internal Cybersecurity Remediation, and the Watchlist Service Encounter Service.

	Realignment of Data Center Support Costs	0	0	-54
Program Changes	Revenue Modernization	0	0	12,552
FY 2016 Request		83	82	153,736

CURRENT SERVICES PROGRAM DESCRIPTION:

ACE/ITDS is a CBP program designed to modernize the business processes and information technology systems essential to securing U.S. borders, facilitating the flow of legitimate shipments, and targeting illicit goods. ACE modernizes and enhances trade processing with features that provide account-based, consolidated, and automated border processing. It provides a centralized online access point to connect CBP, participating government agencies (PGA), and the trade community. ACE interfaces with and consolidates information from targeting, the Automated Commercial System (ACS), border enforcement systems, and PGA systems. ITDS is the mechanism for coordinating intergovernmental involvement with ACE.

ACE/ITDS benefits include:

- Single window for end-to-end trade processing lifecycle for CBP, PGA, and the trade community;
- Enhance cargo control business processes for imports and exports;
- Reduction of costly labor- and paper-intensive activities;
- Reporting of trade data to multiple agencies via a single, secure, Internet based portal;
- Improve operational processes and update policies and regulations associated with the trade modernization effort;
- Enhance revenue collection capability; and,
- View and manage trade activity from a national account perspective.

In addition, ACE allows other government agencies to better fulfill the mandate set forth under the *Security and Accountability for Every Port Act of 2006* (P.L. 109-347), which requires agencies with licensing and admissibility requirements to participate in ITDS. ACE is the platform through which the vision and goals of the ITDS will be achieved by facilitating collection and distribution of standard electronic import and export data required by all Federal agencies that participate in ITDS. On February 19, 2014, Executive Order 13659: *Streamlining the Export/Import Process for America's Businesses*, established a phased approach and deadline of December 31, 2016 for completion and government-wide use of ACE/ITDS. Once fully utilized, ACE will provide unprecedented interagency coordination and information sharing, ultimately making ACE the "single window" for the collection and dissemination of trade data.

CBP plans to finish core trade processing capabilities in ACE by the end of calendar year 2016. The plan includes fully decommissioning the legacy ACS and moving its capabilities to ACE. This includes financial capabilities such as lockbox ACH debit/credit, debt management, refunds, and bill processing. ACS is responsible for approximately \$40 billion in annual revenue.

Capabilities Delivered

To date, ACE has deployed capabilities in all of the following five phases of the cargo business processing lifecycle:

- Pre-arrival (manifests are submitted prior to cargo entering United States (U.S.);
- Arrival (cargo arrives at U.S. Port of Entry);
- Post Release (entry summaries are submitted, if they have not been pre-filed, reviewed, and liquidated, so that issues associated with payments of duty, taxes, and fees can be resolved);
- Exports (capabilities establishing a single automated process platform for all export commodity, manifest, and licensing data); and
- PGA Integration (functionality in ACE enabling CBP and Partner Government Agencies processing needs to be met for all modes of transportation).

Exhibit 1 indicates Entry Summaries filed from the latter half of FY 2009 through FY 2014. Filing entry summaries is a key component of the Post-Release process. ACE Entry Summary processing capabilities have been incrementally deployed since third quarter 2009.

Exhibit 1: Total Entry Summaries Filed

* The FY 2009 data markers represent the latter half of the fiscal year when ACE deployed entry summary capabilities.

The following exhibit shows total revenue collected, broken down by Duties, Taxes, and Fees (or Miscellaneous Collections):

Exhibit 2: CBP Total Revenue Collections³

	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014
Total Revenue Collected	\$29,529,729,864	\$32,023,009,855	\$37,180,898,372	\$39,404,171,101	\$42,490,220,327	\$43,638,373,477
Actual Duty Collections	\$23,445,340,326	\$25,629,936,745	\$29,830,547,586	\$31,160,245,897	\$31,757,563,798	\$33,287,210,478
Actual Taxes	\$2,460,572,052	\$2,722,274,659	\$2,855,564,187	\$3,000,169,532	\$2,937,661,916	\$3,246,969,959
Actual Misc. Collections	\$3,623,817,486	\$3,670,798,451	\$4,494,786,599	\$5,243,755,672	\$7,794,994,613	\$7,104,193,040

CBP is further undertaking a modernization of the revenue collection process by improving financial management, increasing efficiencies, and strengthening operational performance through an integrated management infrastructure.

Additional capabilities deployed or planned for ACE are illustrated in Exhibit 3. Deployed capabilities are assembled in the lower portion of the business process and planned capabilities are displayed in the higher region.

³ This is the net revenue collected by CBP including custodial and entity revenue. ACE represents a small but growing portion of the total revenue CBP collects each year. The percentage of revenue collected by ACE increases by the capabilities ACE deploys. ACE is on track to meet Executive Order –Streamlining the Export/Import Process for America’s Businesses deadline of December 31, 2016. At that time, ACE will be a primary system for capturing revenue at CBP.

Exhibit 3: Capabilities Delivered in ACE⁴

Discussion of Select Adjustments to Base:

Retirement Contributions: Due to additional changes to long term demographic assumptions recommended by the Board of Actuaries at its meeting on June 18, 2013, agency contribution rates for all FERS participants are expected to increase again on October 1, 2015. The expected increase of FERS contribution rates affect all federal employees at CBP, with a greater impact on agency contributions on behalf of law enforcement personnel. The adjustment to base pension contribution requirements increases CBP’s pay estimates in order to account for the increased FERS contribution requirement costs in FY 2016.

MAJOR ACQUISITIONS:

Automated Commercial Environment (ACE)

ACE will form a comprehensive system that enables CBP to interact, manage, and oversee the import and export data, enforcement systems and cargo related financial management in order to provide end-to-end visibility of the entire trade cycle. With more automated tools and information CBP will be able to decide, before a shipment reaches U.S. borders, what cargo to target for further investigative action

⁴ This figure represents the ACE capabilities deployed through October 18, 2014, in relation to the scope of ACE that will be completed by the end of calendar year 2016.

because it poses a potential risk, and what cargo to expedite because it complies with U.S. laws. The Cargo Release project through ACE will provide full and integrated import processing, which is not possible in the current legacy cargo system. Full and integrated import processing includes being the single window for international trade community to electronically transmit import data needed by CBP and PGAs to assess the safety, security and compliance of cargo, track and hold suspect cargo, and quickly approve the release of legitimate cargo into the US.

FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Funding (\$\$\$ thousands)	FY 2016 Activity Request (\$\$\$ thousands)
140,762	141,061	141,184

FY 2016 Funding Breakout:

Program Area (Funding in \$\$\$ thousands)	Sub-Program	Mission Need
ACE (\$141,184)	Trade Post Release (\$21,208)	Complete development and deploy post-entry capabilities in ACE. This includes reconciliation, drawback, liquidation, and protest.
	Trade Risk Assessment & Screening (\$25,635)	Sustain and enhance electronic cargo pre-arrival information in ACE to assess risk of goods prior to entry. Manifest interface with findings is one enhancement scheduled in FY2016.
	Trade Inbound/Outbound Processing (\$94,341)	Complete development and deploy cargo control and conveyance capabilities in ACE. This includes expedited release, diversion process, and FTZ admissions.

CURRENT SERVICES PROGRAM DESCRIPTION:

The CBP Office of Information and Technology (OIT) is funded within this PPA. OIT supports CBP by providing integrated, comprehensive technical support that facilitates both CBP and DHS missions. OIT is responsible for developing, acquiring, testing, and maintaining new and legacy applications (both government and commercial), and for ensuring the reliability of CBP's data infrastructure, which transmits critical data to and from CBP and DHS data centers to CBP agents and officers on the front-line. CBP's Information Technology applications contribute to CBP's multi-layered defense (data, inspection technology, and uniformed personnel), which enables users to connect to CBP's mission-critical applications at the CBP and/or DHS data centers. These applications also enable users to connect to a vast array of data related to operational areas of passenger and cargo processing, targeting, and border enforcement, as well as mission support areas of finance, human resource, and training.

Exhibit 1: OIT and the CBP Mission

3

OIT's responsibilities are broad and its stakeholders are diverse. OIT works to keep CBP mission-capable through efficient and cost-effective technology solutions and through services and scientific support. OIT's current operations and the challenges are significant. These challenges include aging infrastructure, complex customer needs, and increasing data demands. The numerous functions and services provided by the various OIT Divisions are described in greater detail below.

Exhibit 2: Services provided by Information Technology

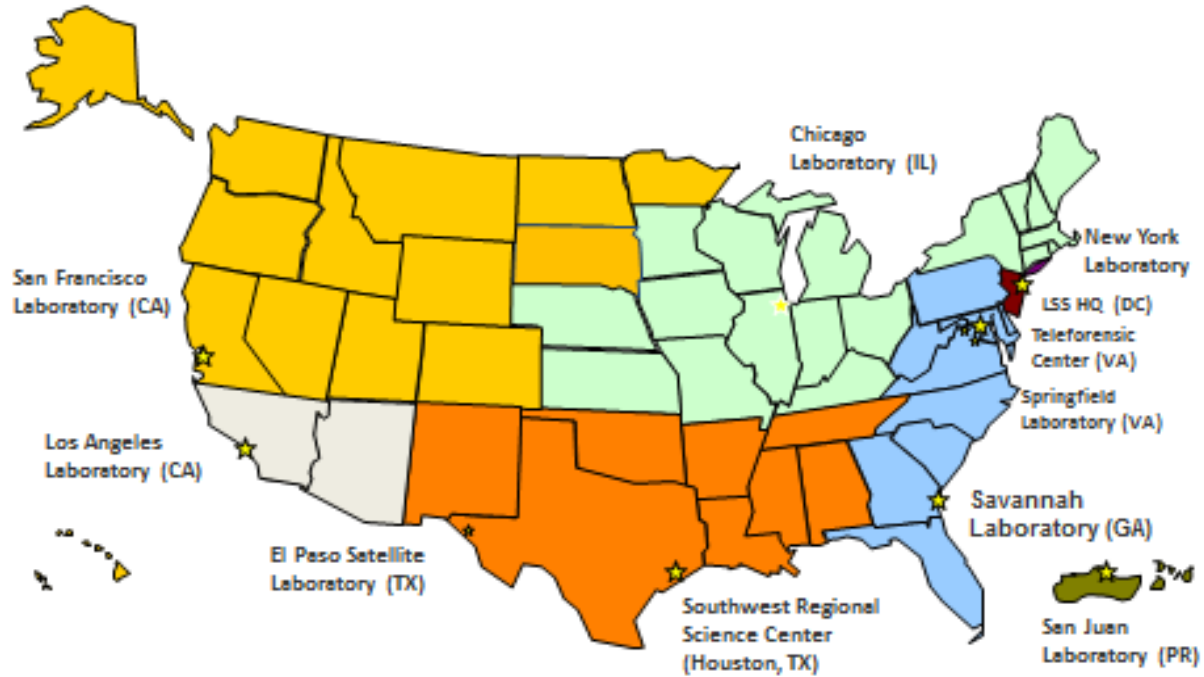

Division	Functions/Services
Border Enforcement and Management Systems Division (BEMSD)	<ul style="list-style-type: none"> • Supports CBP’s activities by developing government software application systems that respond to the requirements of the Border Patrol; • Includes the Enforcement Application for CBP; • This system also maintains and ensures integration of CBP’s financial, human resource, and mission support applications used for pay, officer scheduling, and travel; and • Funding for BP Enforcement applications such as Enterprise Geospatial Information Services (eGIS) and Intelligent Computer-Aided Detection (ICAD) are within the BSFIT appropriation.
Cargo Systems Program Directorate (CSPD)	<ul style="list-style-type: none"> • Facilitates the flow of cargo at POEs through the development, operations, and maintenance of CBP’s mission-critical trade systems; and • Automated Export System is also funded within the Automation Modernization annual infrastructure PPA.
Passenger Systems Program Directorate (PSPD)	<ul style="list-style-type: none"> • Facilitates the flow of people through the development, deployment, operations, and maintenance of numerous passenger applications that enable advanced passenger screening, consolidated trusted traveler programs, and in-bound passenger screening. These applications provide critical information to the front-line to screen and vet passengers before departure and upon arrival at POEs. PSPD is also responsible for enrolling and processing applicants in the trusted traveler programs (Global Entry, NEXUS, SENTRI, and FAST); • Supports other agencies outside CBP, including U.S. Citizenship & Immigration Services (USCIS) and Immigration & Customs Enforcement (ICE). In coordination with other law enforcement agencies, the program maintains, updates, and disseminates advance traveler information and lookout data in real time. These applications also provide entry and exit data to intelligence agencies and to the Office of Biometric Identity Management formally US-VISIT; and • Supports connectivity services to the FBI National Crime Information Center (NCIC) and to state data centers via the National Law Enforcement Telecommunications System. OIT supports Transportation Security Administration (TSA) by providing one central communication hub for carriers via DHS Router, which sends data to TSA and CBP as appropriate.
Targeting and Analysis Systems Program Directorate (TASPD)	<ul style="list-style-type: none"> • Responsible for enhancing, administering, and maintaining selectivity and targeting systems and related systems that help secure the supply chain and support CBP’s layered defense strategy for international cargo and passengers.

Division	Functions/Services
	<ul style="list-style-type: none"> • TASPDP achieves this goal through the facilitation and admission of travel and trade.
Wireless Systems Program Division (WSPD)	<ul style="list-style-type: none"> • Responsible for the land mobile radio infrastructure and subscriber equipment used by more than 40,000 CBP law enforcement agents and officers in the course of their duties. Existing systems have gaps that may affect the operational efficiency of CBP's officers and agents performing their daily missions; and • Primary funding for wireless radio enhancement/upgrade is funded within the BSFIT appropriation.
Field Support Directorate (FSD)	<p>Provides customer support to CBP users throughout the day with support for CBP's operational systems and infrastructure, as well as ensure operational readiness for special events that require a CBP presence. With staff dispersed throughout the United States who provides on-site support to CBP employees, Field Technology Officers are OIT's primary interface with CBP customers around the world. FSD services and maintains CBP's technology systems, networks, and equipment to minimize all systems' downtime. FSD is also responsible for the maintenance, repair, installation, and operation of a wide range of highly complex voice and data communications systems, video surveillance equipment, sensor intrusion systems, and Non-Intrusive Inspection (NII) devices.</p>
Enterprise Networks & Technology Support Directorate (ENTSD)	<ul style="list-style-type: none"> • Responsible for enterprise architecture, design, and management of CBP network infrastructures. ENTSD provides operational technology support to all CBP field locations, technology training, enterprise wide area network, security operations and help desk services. ENTSD provides local area network, wireless, surveillance and detection technology support to all CBP field offices, performs field outreach, manages field modernization projects, and oversees all field deployments. ENTSD is working to modernize CBP field locations by deploying a common wireless communications infrastructure and a consistent desktop configuration across all of CBP, while improving network diversity and survivability; and • ENTSD provides reliable and responsive technology systems, tools, and services in unwavering support of the CBP mission to protect the country with goals of improved availability of critical systems, improved customer satisfaction and increased integration across teams and technologies.
Enterprise Data Management & Engineering Directorate (EDMED)	<ul style="list-style-type: none"> • Provides innovative IT services and solutions to CBP and DHS users by engineering solutions that provide optimal IT data integrity and accessibility that ensures performance quality, reliability and system availability which supports the protection of U.S. borders and the facilitation of legitimate trade;

Division	Functions/Services
	<ul style="list-style-type: none"> • Uses industry and government best practices to integrate business and technical solutions across OIT. EDMED provides its DHS and CBP users with enterprise architecture design and management, systems engineering, data center operations and services, strategic planning, security program management, technology evaluation and integration, audit coordination, and enterprise process management; and • Funded from both the Automation Modernization IT PPA and from the COPPS PPA.
Laboratories and Scientific Services Directorate (LSSD)	<ul style="list-style-type: none"> • Forensic and scientific arm of CBP, which provides forensic and scientific testing for Trade Enforcement, Weapons of Mass Effect, Intellectual Property Rights, and Narcotics Enforcement; • Staff in LSSD Headquarters, as well as eight field laboratories located throughout the U.S., one national research laboratory, and one teleforensics laboratory with the latter two located in Virginia (see Figure 5 below). In addition there are several mobile laboratories that are used at borders for random trade surges and for on-site emergency response and programmatic on-site border security operations. A specially trained laboratory forensic “jump team,” which can be activated at a moment’s notice to provide crime scene investigation, documentation, and testing for cases involving possible terrorist activity; and • Funded primarily through the Automation Modernization annual Infrastructure PPA. LSSD support provided to CBP’s Non-Intrusive Inspection (NII) program is funded through the CBP annual Salaries and Expense NII PPA.
OIT Support Organizations	<p>OIT has several support organizations that provide support to all OIT program and support organizations. The Financial Management Division provides program, financial, and asset management oversight. The Workforce Management Division provides human resource and facility support. The Transformation Management Support Division (TSMD) is working to define and plan to meet future requirements from a human resource and acquisition perspective. The Chief of Staff provides coordination and oversight of OIT operations in support of the Chief Information Officer. Lastly, the Technology Directorate and Chief Security Officer serve to ensure that technologies approved and introduced to the CBP network meet the required architecture and security requirements to secure CBP’s network and critical data.</p>

Exhibit 3: Laboratories and Scientific Services Directorate – Field Locations

LSS Field Laboratories

Working Capital Fund Activity

CBP’s Working Capital Fund (WCF) costs that are paid from the IT PPA are provided below. Additional WCF costs are paid from the S&E appropriation.

Exhibit 4: Working Capital Fund Costs

CBP Office	Working Capital Fund (CBP)	FY 2016 Anticipated Charges
OIT	Research Library and Information Service	1,897,094
	CLAN Operations	2,072,881
	Enterprise Licenses Agreements	38,555,621
	CIO/DHS Infrastructure Transf Pgm	23,995,578
	Sub-Total OIT	66,521,174

Organizational Performance

OIT is responsible for overseeing and managing CBP's information technology infrastructure that supports over 60,000 CBP employees, other government agencies, and CBP travel and trade partners to manage, control, and protect the country's borders at and between POEs. CBP is responsible for protecting over 5,000 miles of border with Canada, 1,900 miles of border with Mexico, and 95,000 miles of shoreline. In FY 2014, CBP processed a daily average of nearly 970,000 passengers and pedestrians, processed over 300,000 conveyances, made over 1,900 apprehensions for illegal entry and/or inadmissible aliens, seized nearly 7,000 pounds of narcotics, and prevented entry of nearly 4,870 harmful agricultural pests, plants, and animals.

This translates into the daily processing of more than 21 billion messages and nearly 35 billion database queries with OGAs, passenger carriers, cargo brokers, trade representatives, and airlines, a volume of daily queries among the highest in the world.

CBP accomplishes its mission through a comprehensive enforcement strategy that depends on vast IT infrastructure. OIT operates the IT infrastructure, repairs and maintains equipment deployed domestically and abroad, troubleshoots daily incidents, ensures security of the infrastructure, develops new capabilities in support of the mission, and provides lab and forensic support. The implementation and sustainment of business processes is achieved through the design, development, programming, testing, implementation, training, and maintenance of automated systems.

OIT manages the IT at all of CBP facilities and systems including the hardware, software, data, video, and voice communications. In addition, OIT is responsible for identifying and evaluating new technologies for applications in support of CBP business processes. CBP IT infrastructure directly enables operational outcomes by providing real-time access to critical applications and data back within seconds. CBP's IT systems allow frontline officers and agents to process millions of passengers and pedestrians arriving internationally, by air, sea, and land across U.S. borders; and to process truck, rail, and sea containers, and shipments of goods.

Discussion of Selected Adjustments-to-Base

Retirement of Legacy IT Systems: CBP has identified \$4.727 million in additional savings resulting from merging the Automated Targeting System-Outbound (ATS-AT) and the Automated Export System (AES), as well as retiring the Automated Commercial System (ACS). The functionality of these systems has largely been shifted to other, more current systems. Of the \$4.727 million identified, \$1.511 million is included in the Information Technology PPA.

Retirement Contributions: Due to additional changes to long term demographic assumptions recommended by the Board of Actuaries at its meeting on June 18, 2013, agency contribution rates for all FERS participants are expected to increase again on October 1, 2015. The expected increase of FERS contribution rates affect all federal employees at CBP, with a greater impact on agency contributions on behalf of law enforcement personnel. The adjustment to base pension contribution requirements increases CBP's pay estimates in order to account for the increased FERS contribution requirement costs in FY 2016.

Realignment of Mission Support Funding from CBPO Initiative: In FY 2014, Congress enacted appropriations to fund an additional 2,000 CBPOs and other operational and mission support personnel to enhance CBP’s ability to facilitate processing of legitimate travelers and cargo, increase the seizures of unlawful items, and help reduce wait times. Funding for the mission support personnel was enacted centrally within the Administration PPA. However, since enactment, CBP has determined the required mix of mission support personnel to best support the additional 2,000 CBPOs. The funding for the mission support personnel has been realigned to provide funds within the specific PPAs where mission support personnel has increased to support the additional 2,000 CBPOs.

Cybersecurity Professionals Pay Schedule Change: Funds will support departmental efforts to plan for and execute new human capital statutory authority for cybersecurity positions. Specific preparatory activities will include the collection of additional information about existing cybersecurity employees and staffing gaps as well as the creation of human capital guidance, policies, and operating procedures. Funds will cover implementation personnel, including human capital and legal support, and will also be distributed to cybersecurity employees performing mission critical work through changes to compensation, including base pay and incentives.

MAJOR ACQUISITIONS:

Advanced Passenger Information System (APIS)

The Advanced Passenger Information System (APIS) is used to review air, sea, train, and limited bus passengers and crew in an effort to identify possible terrorists, uncover high-risk individuals, and facilitate the clearance process for legitimate travelers. The Aviation and Transportation Security Act (ATSA) became law on November 19, 2001. Section 115 of ATSA requires commercial air carriers to provide APIS data for inbound passengers and crewmembers before their arrival in the United States. Principal beneficiaries include CBP, Transportation Security Administration, and commercial air carriers. The APIS program is focusing on limited enhancement of functionality, data examination and improvement, support for carrier submissions, and coordination with TECS Modernization development of Manifest Processing module of High Performance Primary Query and Manifest Processing (HPPQ&MP). APIS will be modernized with an accompanying conversion of data under TECS Modernization.

FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Funding (\$\$\$ thousands)	FY 2016 Activity Request (\$\$\$ thousands)
2,370	2,382	2,389

FY 2016 Funding Breakout:

Program Area (Funding in \$\$\$ thousands)	Sub-Program	Mission Need
Maintenance (2,389)*		Maintain functionality of updated APIS applications through break-fix operations, data validation and minor changes in accordance with business requirements.

***includes \$416 for government salaries**

CBP Infrastructure

CBP Infrastructure is the Information Technology (IT) backbone that supports all of CBP's systems. The systems supported by CBP Infrastructure allow for a unified border presence and provide more efficient and effective information sharing amongst trade and law enforcement agencies. The CBP Infrastructure Program supports the performance goals in the DHS Strategic Plan specifically by securing and managing our borders, safeguarding and securing cyberspace, and assisting in the collection of customs revenue and enforcement import/export controls. The Infrastructure Program has implemented the following functionalities: 1) Data Center Modernization within the Infrastructure Program is critical for CBP to improve performance and increases reliability and 2) Bandwidth expansion and the modernization of routers and switches enhance network availability, improve security and ensure CBP compliance with NIST SP 800-53 and Executive Order 13636.

This project is proposed to be funded out of multiple PPAs in FY 2016, as follows:

- COPPS \$131.945 million
- Information Technology \$208.554 million
- Global Entry \$0.007 million
- Immigration User Fee \$91.868 million
- Agriculture Quarantine Inspection Fee \$52.901 million

FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Funding (\$\$\$ thousands)	FY 2016 Activity Request (\$\$\$ thousands)
495,175	479,644	485,275

FY 2016 Funding Breakout:

Program Area (Funding in \$\$\$ thousands)	Sub-Program	Mission Need
Operations and Maintenance (485,275)	Data Center Services (DC)	Facilities and computer equipment used for storage, management, and dissemination of electronic customs and trade data and information used to support missions of DHS and authorized law enforcement partners.
	Desktop Services (Desk)	The acquisition, deployment, and ongoing support of the technology associated with the desktop computing environment for CBP personnel at more than 1,300 locations.
	Email Services (Email)	Provision of email services to more than 65,000 CBP employees worldwide.
	Help Desk Services (Help)	Support service that troubleshoots problems with computers and other information technology products in response to CBP's workforce of more than 65,000, as well as public users of the Global Online Enrollment System.
	Network Services (Net)	Network communication line/bandwidth, routers, firewalls, intrusion detection and other security

		infrastructure enabling CBP personnel to access mission critical data and information resources.
	Program Management (PM)	Strategic planning, risk management, budget oversight and acquisition management for the CBP Infrastructure Program.
	Site Services (Site)	The field resources deployed to provide on-site IT infrastructure user support at more than 1,300 locations including land/air/sea ports of entry, labs, and offices.
	Video Services (Video)	Video conferencing capabilities that allow more than 300 CBP sites to instantly “meet” to perform corporate training, conduct interviewing, recruit new personnel, conduct daily meeting and project management and connect to courtroom depositions.
	Voice Services (Voice)	Land line services, telephone devices, VOIP appliances, servers, handsets and software added to CBP’s data network to allow voice communications between CBP’s ports of entry and offices nationwide.
	Wireless Services (Wireless)	Provision of pagers, cellular telephones, wireless local area networks, wireless wide area networks, cellular phones, satellite networks, and DHS computers and/or laptops with wireless modems to enable CBP personnel at ports of entry, on remote border locations, and in local/region/HQ offices to conduct vital communication when not at conventional desk locations.

Tactical Communications (TACCOM) Modernization

CBP is responsible for securing the nation’s borders against illegal entry of people and goods while facilitating legitimate travel and trade. To support this mission, CBP operates and maintains one of the largest Land Mobile Radio (LMR) tactical voice communications infrastructures in the Federal government. Tactical communications capabilities are essential to coordinating mission activities and protecting the safety of over 44,000 CBP law enforcement agents and officers. These agents and officers operate in remote areas where their radio is often their only communications channel to coordinate activities or summon assistance. By improving coverage, capacity, reliability, and encryption, the modernization effort provides critical communications support to the agents and officers who secure the nation’s borders

This project is proposed to be funded out of multiple PPAs in FY 2016, as follows:

- Information Technology \$3.796 million
- BSFIT Operations & Maintenance \$27.800 million

CURRENT SERVICES PROGRAM DESCRIPTION:

The Critical Operations Protection and Processing Support (COPPS) PPA supports:

- **COPPS IT Infrastructure (\$133.879 million):** Operation and maintenance of a complex network of hardware; software; data switches; and routers; and engineering and data center services, that must be in place to transmit screening, targeting, terrorist watch list, and apprehension data from CBP's mission-critical IT systems to the front line.

- **TECS Modernization (\$48 million):** Multi-year program that will enhance CBP's passenger screening capabilities by developing and deploying a modernized TECS to transition to the CBP common IT infrastructure, and to better meet operational needs of CBP officers at POEs.
- **Terrorism Prevention Systems Enhancement (TPSE) (\$10 million):** Provides for backup redundancy of data at the DHS data center to ensure availability of operational systems all day, every day, to meet processing and storage/backup requirements for passenger screening requirements.

COPPS IT Infrastructure

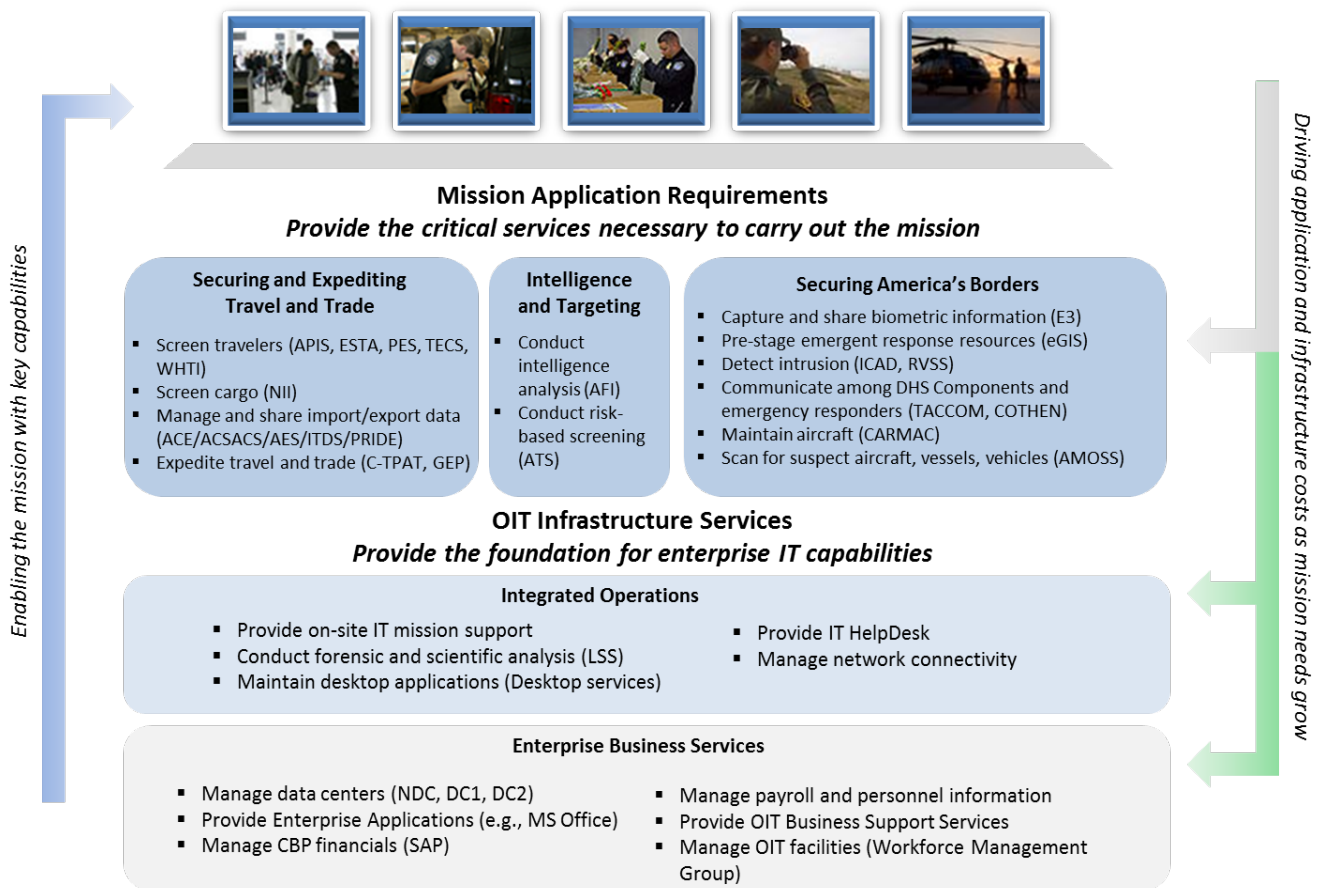

COPPS funds a significant portion of the funding needed to operate and maintain CBP IT infrastructure and the data network that supports the storage, transmission, and delivery of all data used to determine the admissibility of persons and cargo from CBP and DHS data centers to the front lines. A complex network of field equipment hardware, software, data routers, and switches is required in each of CBP's 1,200 field locations to connect users to the data centers, which provide storage, retrieval, engineering, network monitoring, and other capabilities.

CBP IT infrastructure supports the daily operations and maintenance requirements of mission support personnel and provides connectivity and data transmission for users within CBP, PGAs, and CBP trade and travel partners. It enables users to connect to mission critical applications (hosted at CBP and DHS data centers) and also connects users to a vast array of data related to the operational areas of passenger and cargo processing, targeting, and border enforcement, as well as the mission support areas of finance, human resources, and training.

Data and the flow of information are critical to the CBP mission, as CBP officers and agents send and receive billions of passenger and cargo queries each day to determine admissibility abroad and at POEs. By providing thousands of employees in the field with critical intelligence and targeting data, to managing all aspects of tactical communications, COPPS applications serve as a force multiplier for the frontline to obtain quick assessment of admissibility, while promoting efficiency and agility.

Securing CBP's data is of paramount concern. There are a variety of network tools that monitor and trace user activity across the CBP network, to interrupt inappropriate and/or unauthorized access to CBP's network and data. All CBP end users are required to take annual security training, and each user's access must be revalidated by supervisors on a regular basis.

Exhibit 1: Growth in mission requirements places new demands on IT applications and has a corresponding cost impact on the IT infrastructure

To address the emergence and proliferation of new technologies, OIT is actively working to review its capabilities and change its processes for service delivery. OIT has undertaken efforts to simplify and standardize its production applications on future state standard architecture, and has started to migrate back office applications to DHS data centers.

CBP is looking to migrate all legacy mainframe applications to the new environment to avoid significant cost increases expected in future years when contracts for legacy mainframe technologies that exist primarily for CBP are due to be renegotiated. If not migrated by FY 2016, CBP will require significant upgrades in technology and software licensing that will exceed budget available (see exhibit 2). OIT is currently testing various methods of re-hosting mainframe applications, and migrating old software code.

Exhibit 2: Red Mainframe Growth Projections

In order to accommodate surge in usage, it is not recommended that regular capacity exceeds 85 percent. The red mainframe is predominately TECS workload (production and non-production), which has annual growth of approximately 14.6%. Increased processing also increases associated software licensing costs.

CBP infrastructure serves a variety of federal, state, local, and international government agencies. Furthermore, all of CBP’s major mission-critical systems, applications, and programs, as well as mission support applications, depend upon IT infrastructure to access and transmit data from some 3,600 CBP facilities to the CBP National Data Center (NDC). In FY 2014, CBP processed a daily average of nearly 970,000 passengers and pedestrians, processed over 300,000 conveyances, made over 1,900 apprehensions for illegal entry and/or inadmissible aliens, seized nearly 7,000 pounds of narcotics, and prevented entry of nearly 4,870 harmful agricultural pests, plants, and animals. Such a workload demands quick data responses from CBP’s IT infrastructure. The systems assist CBPOs in identifying potential threats, including terrorists, weapons of mass destruction, and bioterrorism. They also provide the means by which U.S. criminal and trade laws are enforced and provide the capability to collect tariffs and taxes related to international trade and commerce.

The majority of COPPS supports on-going necessary operations and maintenance of network engineering services, data center services, and a variety of annual hardware/software licensing and maintenance. Network Services include the hardware, software, and communication services that allow any two computers or other devices too quickly and effectively exchange data. These services are described in greater detail below.

Exhibit 3: IT Services

Services	
Data center services	<ul style="list-style-type: none"> • The facilities used for equipment and the storage, management, and dissemination of electronic data and information to users; • Data center operations include the management and oversight of data center facilities and computer operations activities, such as validating and documenting any change made to production systems, providing email services, and incident reporting from the Situation Room; and • Supports CBP activities all day, every day. Other PPAs such as ACE/ITDS and Automated Targeting Systems also provide funding for data center services.
Help desk services	<ul style="list-style-type: none"> • Provides information, assistance, and 24x7x365 support to troubleshoot problems with computers and other information technology products; and the Technology Service Desk is the initial single point of contact for reporting system, application, email, Local Area Network (LAN), communications, and hardware problems for CBP IT worldwide.
Hardware	<ul style="list-style-type: none"> • Includes backup generators, scanners, hand held computers, a network operations center, Local and Wide Area Networks, routers, encryptors, gateways, firewalls, mainframe computers, workstations, file/email/database/application servers, modems, and Value Added Network (VAN) connections; and • Software includes application development tools, Operating Systems, Program and Configuration Management tools, Office Automation tools, testing tools, LAN/WAN administration tools, and other management tools.
Email Services	<ul style="list-style-type: none"> • Includes the acquisition, deployment, and ongoing support for email platform hardware and software; and • Examples of costs included in email services are system software (e.g., Microsoft Outlook), hardware (servers, workstations, storage – Storage Area Network (SAN), tape backup), diagnostic tools, troubleshooting tools, antivirus, intrusion detection, and management tools for change, configuration, and release management.

TECS Modernization

TECS Modernization is also funded within the COPPS PPA. TECS is a key passenger border enforcement system for CBP and DHS, which plays an essential role in the screening of travelers entering the U.S., as well as supporting the screening requirements of other federal agencies.

Modernizing TECS functionality is critical to CBP's border enforcement mission. The current TECS system is more than 25 years old and uses hardware and software technology that will be increasingly difficult to support. Completing TECS Modernization reduces CBP's reliance on unsupportable mainframe technology and costly third party software licenses for which CBP is one of the few remaining customers. Reliance on these old technologies increases the risk of failure and inability to

meet future anticipated increased operational demand, for critical border security functions for CBP, DHS, and other government agencies that depend on TECS for their daily operations. The multi-year TECS Modernization Program described in Exhibit 4 will update and improve the system.

Exhibit 4: TECS Modernization Program

TECS Modernization Program	
Secondary Inspection	<ul style="list-style-type: none"> • Consolidates and replaces the functionality of three legacy processes for supporting passport control (immigration), baggage control, and agriculture inspections as well as the ability to view the results of previous secondary inspections; • Modernizes inspection logs, where additional information is documented regarding physical inspection of travelers, vehicles, or their belongings; • Provides single sign-on and data transfer with the adverse actions application providing officers a “holistic” secondary inspection capabilities; and • Migrates the secondary inspection data from the legacy system to the target databases.
High Performance Primary Query	<ul style="list-style-type: none"> • Supports person and vehicle searches to better integrate available data within TECS; • Provides fast response times and near real time availability of lookout records when entered into legacy TECS for primary inspections; • Modernizes the Advance Passenger Information System (APIS); and • Migrates data from the legacy system to the target databases.
Travel Document and Encounter Data	<ul style="list-style-type: none"> • Provides improved functionality for querying and validating travel documents and encounter data for passengers and conveyances; and • Migrates travel document and encounter data from the legacy system to the target databases.
Lookout Record Data and Services	<ul style="list-style-type: none"> • Migrates lookout records from mainframe environment to new target infrastructure and will support the creation and maintenance of the lookout records; and • Supports internal CBP systems and external agencies with access to lookout records and TECS screening/vetting via services.
Primary Inspection Processes	<ul style="list-style-type: none"> • Completes modernization for existing primary applications (Air, Sea, and Land), transitioning data and processing off of the legacy system and onto the modernization infrastructure and target databases; and • Modernizes business operations to support random referral and operational messaging at primary processing.

The multi-year modernization project will employ an incremental approach that addresses seven objectives as established in the CBP Mission Needs Statement:

- Reduce the possibility of missing someone who should be intercepted by improving data integration and search capabilities. TECS Modernization will improve both the integrity of data as well as search capabilities so front-line CBP officers can effectively make border crossing decisions;

- Improve access to person-centric information by Government officials. Improved access through graphical user interface search results that can be sorted and filtered easily by the user unlike the static results TECS provides today. TECS Modernization will provide an updated system with better access, improved information sharing, and tighter security over sensitive person-centric information;
- Improve the effectiveness and efficiency of secondary inspections by combining 3 legacy functions (baggage, admissibility, and agriculture inspections) into one CBP function. It also provides integration with other systems sharing data and not requiring the officer to sign into the other system but allowing them to move seamlessly between the two systems. Secondary now provides secondary officers with the same information viewed by primary officers to make the referral. TECS Modernization will simplify and streamline one of the most important CBP functions, Secondary Inspections. TECS Modernization will eliminate the need to re-enter redundant data and make it easier for end users to do their jobs;
- Improve flexibility to incorporate new capabilities and respond to evolving threats. TECS Modernization will provide a more modular environment, more receptive to changes for meeting critical business objectives;
- Provide a highly reliable and scalable system with quick response times that meet the Key Performance Parameters for transferring lookout data from legacy to modern in under 30 seconds and having a 1 second response time for high performance primary query. TECS Modernization is built on a much more scalable foundation so that CBP can grow and meet new emerging requirements;
- Eliminate dated technologies that are no longer able to support the CBP mission over the long term. TECS Modernization will provide newer technologies that make it easier to maintain the system without taking the entire system down which disrupts critical field activities; and
- Comply with CBP and DHS mandates such as Service Oriented Architecture. TECS Modernization will significantly improve how components and functions can be combined and configured into an overall compliant architecture.

With the current funding profile, TECS Modernization is scheduled to be completed in the second quarter of FY 2016, but no later than the fourth quarter of FY 2016 (per the current acquisition program baseline), and will provide critical POE border enforcement and is the primary lookout record database for all of DHS. TECS Modernization will:

- Provide subject record “watch list” processing for DHS and other agencies (this includes maintenance of lookout records and vetting services against these records with PGAs and international partners);
- Support primary and secondary inspections for persons and conveyances at the POEs;
- Track crossing history for persons and conveyances;
- Receive and process more than one million passenger manifests from carriers every day;
- Provide screening services for more than 20 PGAs, trusted traveler programs, ESTA, and supports targeting analysis;
- Support more than 70,000 users from over 20 federal agencies responsible for screening to determine benefits, traveler processing, investigations, case management, and intelligence;
- Provide entry/exit data to other systems/agencies;

- Provide a real time interface with Federal Bureau of Investigation's National Criminal Information Center (NCIC) and Integrated Automated Fingerprint Information System (IAFIS) for on-line-queries of wants/warrants and criminal history records;
- Provide a real-time interface to National Law Enforcement Telecommunications System (Nlets) for on-line queries of driver's licenses, vehicle registration and state wants/warrants from all 50 states and Canada;
- Provide a real time interface with the US-VISIT Automated Biometric Identification System (IDENT) system for collection and verification of fingerprints of non-U.S. citizens;
- Provide a real-time interface to travel document issuing authorities (the travel document photos and biographic data are displayed at primary and secondary inspection, and data is shared with other federal stakeholders as provisioned in the memoranda of understanding. These issuing authorities include the Department of State, U.S. Citizenship and Immigration Services, CBP's Trusted Traveler Programs, departments of motor vehicles of states and Canadian provinces with enhanced driver's licenses, and tribal authorities); and
- Process over two million transactions daily.

Terrorism Prevention Systems Enhancements

The Terrorism Prevention Systems Enhancement (TPSE) operations and maintenance is also funded within the COPPS PPA. The program was initiated in FY 2008 to ensure uninterrupted availability of IT systems and monitoring in the passenger and targeting areas by enhancing critical IT infrastructure. The infrastructure enhancements implemented at CBP's NDC, and the two DHS Data Centers improved availability and reliability. The program enhances CBP's efforts to provide uninterrupted availability of operational systems to meet the processing as well as storage and backup requirements for passenger screening. On-going sustainment ensures that continuous passenger systems operations are in place to meet the mission demand and withstand threats which could compromise system availability.

Discussion of Selected Adjustments-to-Base

Retirement of Legacy IT Systems: CBP has identified \$4.727 million in additional savings resulting from merging the Automated Targeting System-Outbound (ATS-AT) and the Automated Export System (AES), as well as retiring the Automated Commercial System (ACS). The functionality of these systems has largely been shifted to other, more current systems. Of the \$4.727 million identified, \$3.125 million is included in the COPPS PPA.

Realignment of Data Center Costs: In prior years, DHS OCIO collected funds from Components to pay for certain Data Center overhead costs on an ad-hoc basis. In the FY 2016 Budget, these funds will be consolidated in DHS OCIO's budget. This will enable DHS OCIO to better negotiate current data center contracts with the intent of reducing overall cost and footprint. The amount provided in this program change is based on the historic proportion of data center usage.

Retirement Contributions: Due to additional changes to long term demographic assumptions recommended by the Board of Actuaries at its meeting on June 18, 2013, agency contribution rates for all FERS participants are expected to increase again on October 1, 2015. The expected increase of FERS contribution rates affect all federal employees at CBP, with a greater impact on agency

contributions on behalf of law enforcement personnel. The adjustment to base pension contribution requirements increases CBP's pay estimates in order to account for the increased FERS contribution requirement costs in FY 2016.

MAJOR ACQUISITIONS:

Arrival and Departure Identification Services (ADIS)

Operate and maintain CBP's automated arrival and departure identification services currently provided by the Arrival and Departure Information System (ADIS) at the levels of performance negotiated in the Service Level Agreements.

This project is proposed to be funded out of multiple PPAs in FY 2016, as follows:

- COPPS \$2.122 million
- Inspections, Trade, and Travel Facilitation \$26.883 million

CBP Infrastructure

CBP Infrastructure is the Information Technology (IT) backbone that supports all of CBP's systems. The systems supported by CBP Infrastructure allow for a unified border presence and provide more efficient and effective information sharing amongst trade and law enforcement agencies. The CBP Infrastructure Program supports the performance goals in the DHS Strategic Plan specifically by securing and managing our borders, safeguarding and securing cyberspace, and assisting in the collection of customs revenue and enforcement import/export controls. The Infrastructure Program has implemented the following functionalities: 1) Data Center Modernization within the Infrastructure Program is critical for CBP to improve performance and increases reliability and 2) Bandwidth expansion and the modernization of routers and switches enhance network availability, improve security and ensure CBP compliance with NIST SP 800-53 and Executive Order 13636.

This project is proposed to be funded out of multiple PPAs in FY 2016, as follows:

- COPPS \$131.945 million
- Information Technology \$208.554 million
- Global Entry \$0.007 million
- Immigration User Fee \$91.868 million
- Agriculture Quarantine Inspection Fee \$52.901 million

TECS Modernization

The focus of CBP TECS Modernization is to improve the technological and data sharing functions at and between the Ports of Entry (POEs) and to improve Primary and Secondary Inspection processes at border POEs. CBP TECS Modernization will also modernize the core TECS subject record and support services for all TECS users. This modernization effort includes new applications and host system components that are specific to the CBP mission. TECS Modernization addresses performance gaps that exist in the Legacy TECS. CBP will accomplish this investment through five main projects

that are focused on modernization and enhancement of associated system capabilities and functions.
 Note: See CASR for full description.

FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Funding (\$\$\$ thousands)	FY 2016 Activity Request (\$\$\$ thousands)
55,000	50,002	48,003

FY 2016 Funding Breakout:

Program Area (\$000 – Estimate)	Sub-Program	Mission Need
Design (0)		
Development (\$7,409)		<p>In FY16, CBP will complete the TECS Modernization Development and integration tasks for the five main projects which were all begun in previous years:</p> <ul style="list-style-type: none"> - Secondary Inspection (SI) supports processing of travelers referred from primary inspection for either enforcement or administrative reasons. - High Performance Primary Query (HPPQ) is a high performance service of the modernized TECS that supports Primary Query functions and modernizes manifest processing. - Travel Documents and Encounter Data (TDED) provides for the conversion of travel document data from the Department of State, USCIS, state, and provincial governments and crossing data. - Lookout Record Data and Screening Services (LRDS) migrates lookout records creation and maintenance to modernized infrastructure and provides access via modern services. - Primary Inspections Processes (PIP) modernizes the primary and alternate inspection processing. <p>TECS Modernization supports the CBP goals of securing and facilitating legitimate travel. TECS is critical to CBP, DHS and other Federal agencies to provide information on people, vehicles, vessels and aircraft that may pose a danger to the security of the U.S.</p>
Maintenance (\$45,159)		<p>In FY 2016, CBP will maintain the functionality already deployed by the five projects listed under development. This includes contractor services support, data center operations, hardware and software licenses, training, travel and program coordination and continuity associated for the program during the sustainment. Keeping the modernized TECS system running supports the CBP goals of securing and facilitating legitimate travel. TECS is critical to CBP, DHS and other Federal agencies to provide information on people, vehicles, vessels and aircraft that may pose a danger to the security of the U.S.</p>
Security (\$413)		<p>This program area address the provision of security services for the TECS Modernization program, including security planning, programming and support, and Certification and Accreditation</p>

Program Area (\$000 – Estimate)	Sub-Program	Mission Need
		(C&A), and privacy considerations. Security is critical to TECS to protect the law enforcement and privacy data in TECS and maintain active auditing.

END ITEMS:

End Item: Data Center Storage

Estimated Cost per Item: \$833,000

Total Estimated Cost: \$2.5 Million

Contract Information and Status: Planning to award a Firm Fixed Price Delivery Order against DHS Blanket Purchase Agreement HSHQDC-11-A-00042.

Budget and Funding			
	FY 2014	FY 2015 President's Budget	FY 2016 President's Budget

CURRENT SERVICES PROGRAM DESCRIPTION:

The Automated Targeting System (ATS) consists of six modules that focus on exports, imports, passengers, and crew (airline passengers and crew on international flights, passengers and crew on sea carriers), private vehicles crossing at land borders, and import trends over time. ATS assists U.S. Customs and Border Protection (CBP) to effectively and efficiently identify cargo, individuals, or conveyances that may present additional risk to the United States. The six modules are:

- ATS-Inbound – serves as the decision support tool for inbound targeting of cargo;
- ATS-Outbound – targets outbound cargo and assists in identifying exports posing a high risk of containing goods requiring specific export licenses, narcotics, or other contraband;

- ATS-Passenger (ATS-P) – used by CBP personnel at international ports of departure and U.S. ports of entry, and voyages to evaluate passengers and crewmembers prior to arrival or departure;
- ATS-Land (ATS-L) – provides analysis and rules-based risk assessment of passenger vehicles crossing the nation’s borders;
- ATS-Trend Analysis and Analytical Selectivity – improves CBP’s ability to examine, locate, and target for action violators of U.S. laws, treaties, quotas, and policies regarding international trade; and
- ATS-International - provides foreign custom authorities with automated cargo targeting capabilities and provides a systematic medium for exchanging best practices and developing and testing targeting concepts.

CBP’s efforts are parsed into four primary categories: Operations; System Hardware and Software Upgrades; Targeting Methodology Improvements; and Infrastructure Improvements.

Operations includes:

- Identification, development, implementation, and refinement of mechanisms for various targeting methodologies and responding to security-related operational and real time events; and
- Expand targeting coverage to more completely analyze and make improvements to targeting capabilities, coordinate intelligence, and support architectural improvements.

System Hardware & Software Upgrades includes:

- Network improvements;
- Security and monitoring;
- Geospatial tools;
- Discovery and exploration tools; and
- New proprietary data sources.

Targeting Methodology Improvements includes:

- Advanced targeting capabilities to include Entity Resolution, Predictive Modeling and Visualization, Intelligence Driven Targeting, and Machine Learning;
- Cargo targeting methodology refresh including capture of findings information and support to outbound targeting;
- Integration of trade interfaces for screening and targeting;
- Automated Targeting System –current maintenance/enhancements and future engagement with international partners;
- Land border pedestrian rule development, deployment, and validation;
- Targeting effectiveness metrics;
- Threshold targeting; and
- Continuous vetting capabilities.

Infrastructure Improvements includes:

- Failover/Disaster recovery of the ATS modules;
- ATS hardware and software upgrades including high availability appliances; infrastructure and circuits technology refresh; data center infrastructure refresh;
- Maximum redundancy and network diversity; and

- Other critical operations and maintenance (O&M) costs associated with CBP Targeting Enterprise (including, but not limited to, periodic technology refreshes and other necessary hardware/software upgrades).

CBP's targeting systems allow CBP to confirm identity in order to interdict watchlisted individuals and assist in identifying previously unidentified, or "unknown," high-risk travelers, cargo shipments, and conveyances by using intelligence-driven targeting rules. These automated targeting rules are developed by subject matter experts and are based on actionable intelligence derived from current Intelligence Community (IC) reporting or other law enforcement information available to CBP. The rules are not designed to determine a traveler's risk using a weighted score or rank, but rather, focus on risk factors, travel scenarios, or affiliations that may indicate an elevated level of concern.

Although the primary focus of the targeting programs is to identify terrorist operatives and/or mitigate terrorism threats, targeting rules are also used to support CBP's mission of enforcing the laws of the United States at the borders. This includes targeting for individuals or businesses who may be involved in other criminal activity, such as narcotics or currency smuggling, or travelers seeking illegal entry into the United States through, for example, visa fraud or human smuggling.

A large number of rules are included in the ATS modules that encapsulate sophisticated concepts of business activity, which help identify suspicious or unusual behavior. The ATS rules are constantly evolving to both meet new threats and refine existing rules. ATS applies the same methodology to all individuals to preclude any possibility of disparate treatment of individuals or groups. ATS is consistent in its evaluation of risk associated with individuals and is used to support the overall CBP intelligence and law enforcement mission. CBP's targeting programs assisted in the identification and/or apprehension of suspects in terrorist cases and interception of high risk travelers and cargo.

In order to make risk-based operational decisions before a passenger boards an aircraft, and continuing until the traveler enters the United States, CBP leverages all available advance information on in-bound passengers. As a result of advance travel information, CBP assesses passenger risk ahead of time, often days before a traveler boards a plane. Throughout the travel process – from reservation, to check-in, to boarding at a foreign point of origin – CBP devotes its resources to identifying the highest threats, including those who may not have been exposed by the IC. The visa process, run by the Department of State (DOS), provides one source of information, and for travelers under the Visa Waiver Program, CBP has the opportunity to assess their risk via the Electronic System for Travel Authorization (ESTA). CBP assesses travelers' risk when they purchase their ticket and/or make a reservation, and when they check-in for their flight. Currently, in all cases before an international flight departs for the United States from a foreign point of origin, the airline transmits Advance Passenger Information (API) for passenger and crew to CBP.

CBP evaluates all cargo to identify high-risk shipment and conveyances for examination. CBP uses numerous rule and weight sets to analyze information from manifest, importer security filing, and entry data, to prioritize shipments for review, and to generate recommended targets by scoring each shipment. In some cases, CBP systems automatically place shipments on hold when they score above a specified risk threshold. CBP not only screens commodity information on manifest, importer security filing, and entry data, but also screens trade entities to shipments against lookouts and prior violation records, who are identified on those data sources.

Exhibit 2: High Risk Travelers Identified

Fiscal Year	APIS	VISA	ESTA
2008	245,857	-	-
2009	250,325	-	-
2010	250,813	8,100	-
2011	297,167	12,153	58,916
2012	313,230	28,182	138,498
2013	318,110	25,939	144,010
2014	347,068	43,778	112,780
Sub Total	2,022,570	118,152	454,204
TOTAL	2,594,926		

Note: VISA and ESTA Hotlists do not go back 5 years.

Exhibit 3: High Risk Cargo Identified

Fiscal Year	Number of Shipments Identified
2008	441,543
2009	482,619
2010	528,593
2011	594,778
2012	694,696
2013	852,495
2014	930,069
TOTAL	4,524,793

The targeting programs continue to identify high-risk travelers, cargo shipments, and conveyances for inspection and examination. CBP is also partnering with other agencies, domestic and foreign, on using the methodology of the targeting programs to identify suspects in other environments. The progress and outcome of these initiatives are highly dependent on the participation of foreign partners

and available funding, including funding streams from DOS and Department of Defense (DoD) initiatives. These include the following ongoing long-term projects:

- **The Global Advance Passenger Information (API)/Passenger Name Record (PNR) Project:** This project builds upon CBP's experience with the more established API processes in place with Mexico and the Caribbean Community.
- **The Automated Targeting System – Global (ATS-G):** This provides CBP and prospective partners with a platform on which to share best practices on the use of traveler data, and to ultimately collaborate on risk-assessment methodologies and passenger targeting rules.
- **The International Targeting Center (ITC):** The ITC is a joint/collaborative targeting initiative currently being piloted at CBP's National Targeting Center – Passenger (NTC-P). The pilot is being led by CBP, but includes participation of the United Kingdom Border Force and Canada Border Services Agency, with both Australia and New Zealand considering joining. Its purpose is to improve the collective targeting capability by co-locating targeting personnel. Co-located personnel have the ability to draw upon pooled knowledge, such as shared data on individuals intending to travel or who are en route in real-time and shared situational awareness.
- **Initiatives with International Organizations and Counterpart Customs Administrations:** CBP continue to pursue initiatives with international organizations and counterpart customs administrations to improve cargo targeting practices. The purpose of these consultations is to promote cargo targeting best practices and risk management methodologies. Many of these customs administrations are either in the planning stages of procuring or developing an automated cargo targeting system, or are seeking to improve their current systems. CBP technical experts analyze the current practices and technical capabilities and make recommendations for additional system features.
- **World Customs Organization (WCO) Cargo Targeting System (CTS):** DOS issued a grant to the WCO to develop the CTS, which was distributed to WCO member administrations to identify high-risk cargo shipments. One condition of the grant is that the WCO must “collaborate closely” on the project with CBP. CBP has provided user and functional requirements for the system through its design and development phases. The first version of the system focuses on vessel container cargo. In May 2013, the WCO installed the system in two pilot locations: the Bahamas and Jamaica. CBP continues its support of the pilot by providing training and technical assistance. The pilot concluded in October 2013 and the WCO and CBP promotes greater use of the CTS by other customs administrations and vessel carriers.
- **High-Risk Cargo Shipments:** CBP is working with a number of foreign authorities to process their cargo data through CBP's ATS to identify high-risk cargo shipments. These authorities transmit their data to ATS, which then processes the data and provides risk assessment evaluations. CBP may then collaborate with representatives from the foreign authority on the appropriate operational protocol if a high-risk shipment is identified. The ATS user interface for representatives from these authorities is termed ATS-I.
- **Air Cargo Advance Screening (ACAS):** ACAS is a program developed as a result of the October 2010 failed attempted plot of Al-Qaeda in the Arabian Peninsula in the air cargo environment. ACAS ensures foreign air cargo is screened prior to loading on the aircraft. Participants from the air cargo environment have volunteered to transmit seven data elements for CBP risk assessment analysis. CBP and the Transportation Security Administration (TSA) have ongoing discussions with stakeholders of the air cargo community to expand participation in the program.

- **ATS and Vetting:** CBP is pursuing a project with other DHS and non-DHS stakeholders to use ATS as a vetting service for visa overstays, refugee applications, and visa pre-adjudications. These three project areas are conceptually similar, may overlap, and may use common resources, but are distinct and separate in their purpose. The projects also have common stakeholders both inside and outside of DHS. Thus, by relying on the ATS current methodologies, proven workflows and procedures, these three projects can be accomplished without the need to develop new processes.

Discussion of Selected Adjustments-to-Base

Retirement of Legacy IT Systems: CBP has identified \$4.727 million in additional savings resulting from merging the Automated Targeting System-Outbound (ATS-AT) and the Automated Export System (AES), as well as retiring the Automated Commercial System (ACS). The functionality of these systems has largely been shifted to other, more current systems. Of the \$4.727 million identified, \$91,000 is included in the Automated Targeting systems PPA.

Retirement Contributions: Due to additional changes to long term demographic assumptions recommended by the Board of Actuaries at its meeting on June 18, 2013, agency contribution rates for all FERS participants are expected to increase again on October 1, 2015. The expected increase of FERS contribution rates affect all federal employees at CBP, with a greater impact on agency contributions on behalf of law enforcement personnel. The adjustment to base pension contribution requirements increases CBP’s pay estimates in order to account for the increased FERS contribution requirement costs in FY 2016.

MAJOR ACQUISITIONS:

Automated Targeting System (ATS) Maintenance

Automated Targeting System (ATS) is a web-based enforcement and decision support tool that incorporates intelligence information and technologies to target suspect inbound and outbound shipments for examinations and passengers for inspection. It allows CBP officers to focus their efforts on cargo shipments and passengers that most warrant further attention. The ATS systems have allowed the CBP Officers to process large volumes of data efficiently, which was previously a gap within the targeting environment. As volumes of data increase in people, cargo and conveyances, officers require increasingly efficient access to information and more information on which to base critical admission decisions. The systems investments are also intended to address data quality improvements, including entity and name resolution to ensure that efforts are focused on those persons and cargo that truly present a threat to the homeland.

This project is proposed to be funded out of multiple PPAs in FY 2016, as follows:

- Automated Targeting Systems \$118.148 million
- Intelligence/Investigative Liaison \$1.58 million

FY 2014 Activity Funding (\$\$\$ thousands)	FY 2015 Activity Funding (\$\$\$ thousands)	FY 2016 Activity Request (\$\$\$ thousands)
116,992	110,093	119,728

FY 2016 Funding Breakout:

Program Area (Funding in \$\$\$ thousands)	Sub-Program	Mission Need
O&M (119,728)	Hardware/Infrastructure	Network upgrades, system redundancy, storage.
	Database Administration Support	24/7/365 architecture and engineering system support.
	Rule Updates	Daily rules updates and ad-hoc data requests.
	Vetting/Targeting Capabilities	Data visualization, entity resolution, predictive modeling, intelligence driven targeting, visa overstay/pre-adjudication/document validation.
	ATS-G	O&M for existing countries.
	Full Failover & Disaster Recovery	System backup and data reclamation in the event of critical failure.
	Data Improvement/Enrichment	Rule set clean-up, data standardization, methodology improvement/refresh.

END ITEMS:

End Item: Servers

Estimated Cost per Item: \$1.1 Million – \$2 Million

Total Estimated Cost: \$7.4 Million

Contract Information and Status: Oracle BPA, Fixed Price Contract awarded to Mythics, Inc. of Virginia Beach, VA on July 29, 2014. The current contract covers one year. Additional and/or modernized servers will be acquired within the base budget if actual growth and capacity deem it necessary, also giving consideration to cost and performance of available technologies.

Budget and Funding			
	FY 2014	FY 2015 President's Budget	FY 2016 President's Budget
Request (\$M)	\$9.9M	7.4M	7.4M*
Appropriations (\$M)	\$9.9M	-	-
Obligations (\$M)	\$9.6M	-	-
Unobligated Balance (\$M)	\$300K	-	-
Expenditures	\$9.6M	-	-

(\$M)			
Number of Items Procured (or Planned to be Procured)	7	4	4

*Requested amount for FY 2016 is based on current estimates.

Scope and Justification: Due to continued growth of ATS systems and storage limitations, consolidated database appliance storage expansion will be provisioned to support further growth of automated targeting systems. CBP anticipates an average growth rate of 25 to 30 percent per year across its targeting databases. This additional capacity allows TASP to retain cargo and passenger records while providing needed capacity for new targeting efforts.

IV. Program Justification Changes

Department of Homeland Security
Automation Modernization:
Justification of Program Changes
(Dollars in Thousands)

Program Increase 1: Revenue Modernization
PPA: ACE/ITDS
Program Increase: Positions 0, FTE 0, Dollars \$12,552

Funding Profile

	FY 2014 Revised Enacted			FY 2015 President's Budget			FY 2016 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$20,000
Program Increase							0	0	\$12,552
Total Request	0	0	\$0	0	0	\$0	0	0	\$32,552

Description of Item

CBP requests an increase of \$12.552 million in funding for Revenue Modernization business process improvement, system automation, program management, and acquisition activities. Revenue Modernization efforts will allow CBP to transition, automate, and centralize field collections, freeing frontline CBPOs to be redirected to critical security and compliance duties.

In addition, the trade and travel communities are seeking more reliable, predictable, and effective revenue collection solutions from CBP. Revenue Modernization will enable CBP to transform outdated collection processes and allow for smoother, more efficient commerce by:

Simplifying the way CBP conducts business with its customers to improve the flow of trade and travel;

- Maximizing revenue collections and collection accuracy to effectively fund mission critical priorities and programs;
- Reducing transaction costs to enhance economic efficiency and Gross Domestic Product (GDP); and
- Expanding access to electronic payment technology to make financial exchanges easier, safer, and more convenient for trade and travel.

The centralization and automation of revenue collection processes will require system enhancements that will incrementally automate all collections activity into an optimized financial system.

Revenue Modernization also directly supports the Department of Treasury's electronic collections goals and its ongoing initiatives to promote the use of a wide variety of cutting-edge technology to collect revenue.

In addition to modernizing and automating collections processes, expanding electronic payment options, and transitioning manual collections out of the field, Revenue Modernization directly accomplishes key Presidential priorities including:

- Executive Order 13659 calling for a "single window" through which businesses will transmit data required by participating agencies for importation and exportation of cargo, including the transition from paper-based requirements and procedures to faster and more cost-effective electronic submissions to, and communications with, agencies; and
- Executive Order 13571 necessitating the use of innovative technologies to streamline agency processes to reduce costs, accelerate delivery, and improve the customer experience.

Project Schedule:

CBP recognizes that the development and implementation of a sustainable Revenue Modernization requires a phased, multi-year approach to incrementally transition complex revenue operations to a new environment. Revenue Modernization is more than transitioning existing functionality from ACS to a new system; it will include a comprehensive review of existing revenue collection processes, governing regulations, and technological alternatives. This promotes the identification of opportunities to generate processing efficiencies, optimize cost savings, and inform the development of systems requirements that address the complexities of CBP's revenue collection processes.

Funding provided by this Program Increase for FY 2016 will be directed toward prioritizing the transition of select revenue collections processes with the highest manual transaction volumes by conducting business process improvement, and enhancing collection processes and reporting through automation. In addition, funding will be used to develop and incorporate electronic payment capabilities into collection processes (e.g., payments via mobile apps and kiosks).

The primary tasks will be business process improvement, system automation, program management, and acquisition activities that support incremental transition of field collections, development of electronic payment capabilities, and enhanced reporting.

Justification

CBP collects approximately \$48 billion annually in duties, taxes, and fees. The revenue collected by CBP is used throughout the Government to support critical programs and promote U.S. trade and travel. CBP is responsible for the collection of duties, taxes, and fees for Departments and Agencies, including fees that directly support CBP operations. Revenue collected by CBP also supports the Treasury General Fund, the Travel Promotion Trust Fund, the Army Corps of Engineers, IRS, Secret Service, Puerto Rico, the U.S. Virgin Islands, ICE, the Department of Agriculture, and USCIS.

Examples of CBP revenue collections and their impact:

- Over \$1.5 billion in Harbor Maintenance Fees are collected annually and used, in part, to fund the operation and maintenance of U.S. seaports and waterways, which are critical to the U.S. Trade and Travel mission.
- CBP collects over \$120 million annually in Travel Promotion Trust Fund Fees used by the Corporation for Travel Promotion to attract more international travelers to the United States, via a marketing and communications program, to increase travel spending in the U.S.
- \$180 million in Commercial Vessel, Vehicle and Agriculture Fees are collected and used to reimburse USDA and CBP for the costs of agriculture inspections (e.g., pest and plant), and provide support research, promotion, and consumer information for designated products.

The primary goal of Revenue Modernization is to modernize CBP's revenue processes and systems to create more efficient revenue collections processes and achieve a long-term revenue management solution that is adaptable to new revenue programs and technologies.

Revenue Modernization will reengineer complex revenue collection processes into more streamlined and fiscally sound financial management practices. Specifically, Revenue Modernization will:

- Create efficiencies at the Ports of Entry. Using a baseline time study of CBPO hours spent on cashiering duties, the estimated annual opportunity cost associated with cash and check collection activities equals \$11.39 million (approximately 57 CBPO and 86 Cashier FTEs). If cash and check collection activities are centralized and automated, these CBPO labor hours can be redirected to focus on CBP's security and compliance mission.
