Talking points for

(b)(1)1.4a

1. The cowardly leaders of the insurgents have fled Marjeh to Uruzgon and Pakistan. The remaining insurgent fighters are fools to believe that their leadership cares about their salvation or well being. The reality is Afghan men are leaving their families only to be used to support the criminal and selfish goals of the insurgents. Resist the insurgent fighters fleeing to your area because they want to exploit you.

- Marginalize and separate

2. The Taliban has planted many bombs and booby traps in Marjeh. They will do the same when the cowards flee to your village. They care only about themselves; not you, your family or your village. Keep the Taliban out of your village and keep your family safe.

- Marginalize and separate

3. We have been led to this place because every day insurgent members choose to provide information about other insurgents as a result of their own internal conflicts. How can you trust insurgents who don't trust each other and kill each other. How can Afghans accept claims of insurgent legitimacy when they do not trust themselves, and fight each other for power? The insurgency subjugates and exploits the good people of Afghanistan for power and wealth.

- Infighting, create rifts, paranoia, disrupt C2

4. The Afghan nation will soon prosper and flourish with your help. Encourage those who still take up arms against the ANSF to lay down their arms and return home to be part of a better future.

- Reintegration
