Sounds like an excellent idea. This past Saturday, the FBI hosted a community outreach CREST event in Compton/Watts/Lynwood for over 200 attendees from local churches and interfaith groups. A panel session, which included our ADIC, was well received with the community expressing their local concerns after the AME church shooting. There was positive media coverage as well. As part of the ICG working group, we'd be happy to participate to push the CVE initiative forward.

Thanks,

I think it would be great. Since the AME church shooting DHS has implemented a "surge" in outreach to churches and interfaith groups across the country doing protective measures workshops. Locally, I am working with (b) (6) from USC Center for Religion and Civic Culture to force multiply and get some of our material out to the faith-based orgs. We are also working with AME Leadership to conduct a workshop on protective measures soon in Southern California along with the DHS Protective (b)(6),(b)(7)(C) [REDACTED]. Happy to do more.
